According to MAP-21, States are required to be green by September 2015. Your SDLA only has a few months to resolve all the issues. Your SDLA is expected to reply to this message by August 14th with an analysis of the issues noted and a plan to address them. This problem ticket and sub-tickets for each tab in red will remain open until your State fixes the problems being reported. If you need any help to develop the plan, please let us know.

In our review for the **June** data, AAMVA noticed the following issues:

CDLIS Data Quality of Pointer Deletions

- Alaska had a 28.57% error rate (2 out of 7) Delete Driver (UE) messages

Please find the June monthly CDLIS Timeliness, Data Quality, and Capabilities report attached:

- 2015 06 June CDLIS Timeliness and Accuracy- Summary Workbook

If you need additional information, please let us know. For example, we can send you more detailed information on the Pointer Deletions.

This is a Master Problem with Subtasks.

Progress:

Entered on 05/31/2017 at 12:36:06 EDT (GMT-0400) by Jessie Rogers:

Good afternoon,

According to MAP-21, States are required to resolve all CDL compliance findings by September 30, 2015, and to provide assurances that the State will remain in compliance through the next fiscal year ending in September 2016. Now that September 30, 2015 has passed, it becomes even more important for your SDLA to understand and resolve persistent CDLIS problems that could lead to compliance findings. AAMVA and FMCSA developed this report to assist your SDLA in identifying and resolving potential CDLIS problems before they become compliance findings.

Your SDLA is expected to reply to this message by June 14th with an analysis of the issues noted and a plan to address them. The response from the SDLA is helpful to gain a better understanding of how AAMVA can assist the SDLA in correcting these specific CDLIS issues. Please note that this is not a compliance report, but a tool to help States be more proactive in fixing their issues.

This problem ticket and sub-tickets for each tab in red will remain open until your State fixes the problems being reported (state remains green for three consecutive months).

In our review for the **April** data, AAMVA noticed the following issues:

CDLIS Timeliness of Convictions Sent Successfully

- Alaska sent 33.33% of its successful Report Out-of-State Convictions (HA) transactions (1 out of 3) within the federal time limit of 10 days

CDLIS Data Quality of Withdrawals

- Alaska had a 100% error rate (5 out of 5) Withdrawal (HW) messages

CDLIS Data Quality Updates to MPR Personally Identifiable Information

- Alaska had a 24.32% overall error rate (9 out of 37) Updates to MPR Personally Identifiable Information

CDLIS Data Quality of Pointer Deletions

- Alaska had a 62.96% error rate (17 out of 27) Delete Driver (UE) messages

Please find the April monthly CDLIS Timeliness, Data Quality, and Capabilities report attached:

- 2017 04 April CDLIS Timeliness and Accuracy- Summary Workbook

If you need additional information, please let us know. For example, we can send you more detailed information on the Conviction, Withdrawal, Updates to MPR PII or Pointer Deletion messages.

Thanks,

Entered on 06/27/2016 at 16:30:34 EDT (GMT-0400) by Jessie Rogers:

Good afternoon,

According to MAP-21, States are required to resolve all CDL compliance findings by September 30, 2015, and to provide assurances that the State will remain in compliance through the next fiscal year ending in September 2016. Now that September 30, 2015 has passed, it becomes even more important for your SDLA to understand and resolve persistent CDLIS problems that could lead to compliance findings. AAMVA and FMCSA developed this report to assist your SDLA in identifying and resolving potential CDLIS problems before they become compliance findings.

Your SDLA is expected to reply to this message by July 14th with an analysis of the issues noted and a plan to address them. The response from the SDLA is helpful to gain a better understanding of how AAMVA can assist the SDLA in correcting these specific CDLIS issues. Please note that this is not a compliance report, but a tool to help States be more proactive in fixing their issues.

This problem ticket and sub-tickets for each tab in red will remain open until your State fixes the problems being reported (state remains green for three consecutive months).

In our review for the **May** data, AAMVA noticed the following issues:

CDLIS Timeliness of Withdrawals Sent Successfully

- Alaska sent 0% of its successful Report Out-of-State Withdrawals (HW) transactions (0 out of 1) within the federal time limit of 10 days

CDLIS Data Quality of Convictions

- Alaska had a 20% error rate (5 out of 1) Conviction (HA) messages

CDLIS Data Quality of Withdrawals

- Alaska had a 33.33% error rate (3 out of 1) Withdrawal (HW) messages

Please find the May monthly CDLIS Timeliness, Data Quality, and Capabilities report attached:

- 2016 05 May CDLIS Timeliness and Accuracy- Summary Workbook

If you need additional information, please let us know. For example, we can send you more detailed information on the Withdrawal or Conviction messages.

Thanks,

Jessie Rogers | Reporting Analyst | AAMVA | 4401 Wilson Blvd., Suite 700 Arlington, Va.

Entered on 10/16/2015 at 10:41:44 EDT (GMT-0400) by JShifflett:

Good morning,

Thank you for your response on these errors. AAMVA recommends that AK continue working with the courts to let them know how important it is to report the convictions within the required time and with the correct information.

For the data quality issues, hopefully we see AK become green due to the changes in staff refining error correction processes to reduce unnecessary correction attempts. AAMVA also recommends the AAMVA Systems Training which aims to develop education, training and learning opportunities that meet the needs of AAMVA's membership in the use of all the systems and procedures to ensure commercial driver safety and compliance with Federal regulations. **NOTE:** All courses are **free** for AAMVA members. Click the following link to view the course catalogue and to register or enroll in a session: <http://aamva.intevista.com>. If you experience trouble enrolling, or if you would like more information on any of the courses, please send an email to trainer@aamva.org.

We will monitor this tab and the others to see if AK improves. Once Alaska is green for three consecutive months in each tab, we will close that sub ticket for the tab.

Thanks,

Jessie Rogers | Reporting Analyst | AAMVA | 4401 Wilson Blvd., Suite 700 Arlington, Va.

Entered on 10/15/2015 at 13:16:39 EDT (GMT-0400) by Nichole Tham:
Good afternoon,

Thank you for this notification. Both DMV and FMCSA are aware of the issues noted in the report and DMV is actively working to resolve them. Some factors contributing to the Timeliness/Quality Errors:

The Timeliness Errors are due to staff diligently working the backlog of E-Dispo records that were not reported to DMV by the courts. These will continue to be high until that backlog is caught up. Part of this delay is attributed to the lack of distinction between CDL/non-CDL citations; additional steps are required to identify and manually update CDL citations/pointers in CDLIS, which significantly slows the process. Although DMV has expressed the need for the Department of Public Safety (DPS) to add a "CDL Indicator" to citation forms, both DPS and the Alaska Court System (ACS) has deemed it impracticable. Staff must continue to manually decipher each out of state license record to see if it is a CDL.

The Quality Errors are in part because there has been a large learning curve for staff, and because AAMVA reports multiple attempts to submit the same record as separate errors, which skews the percentages. Staff are refining error correction processes to reduce unnecessary correction attempts which should reduce error compounding overall.

Sincerely,

Nichole Tham

Problem: Alaska's Monthly Timeliness and Data Accuracy For CDLIS Messages Review

Problem Number:890

Status: Analysis **Date:** 05/31/2017
Time: 12:53:10 **Creation Date:**07/31/2015
Creation Time:11:27:54 **Created By:** JShifflett

This is a Master Problem with Subtasks.

Progress:

Entered on 05/31/2017 at 12:53:10 EDT (GMT-0400) by Wendy Cunningham:

Please add David Rios, david.rios@dot.gov<mailto:david.rios@dot.gov> to the Alaska notifications, David will be assisting the Division with State Programs/CDL until that position is filled.

Also please remove Laura Edwards, laura.edwards@dot.gov<mailto:laura.edwards@dot.gov> from the notification, she is retiring as of today.

Thank you
Wendy Cunningham
WSC State Program Manager

Entered on 05/31/2017 at 12:36:06 EDT (GMT-0400) by Jessie Rogers:

Good afternoon,

According to MAP-21, States are required to resolve all CDL compliance findings by September 30, 2015, and to provide assurances that the State will remain in compliance through the next fiscal year ending in September 2016. Now that September 30, 2015 has passed, it becomes even more important for your SDLA to understand and resolve persistent CDLIS problems that could lead to compliance findings. AAMVA and FMCSA

developed this report to assist your SDLA in identifying and resolving potential CDLIS problems before they become compliance findings.

Your SDLA is expected to reply to this message by June 14th with an analysis of the issues noted and a plan to address them. The response from the SDLA is helpful to gain a better understanding of how AAMVA can assist the SDLA in correcting these specific CDLIS issues. Please note that this is not a compliance report, but a tool to help States be more proactive in fixing their issues.

This problem ticket and sub-tickets for each tab in red will remain open until your State fixes the problems being reported (state remains green for three consecutive months).

In our review for the **April** data, AAMVA noticed the following issues:

CDLIS Timeliness of Convictions Sent Successfully

- Alaska sent 33.33% of its successful Report Out-of-State Convictions (HA) transactions (1 out of 3) within the federal time limit of 10 days

CDLIS Data Quality of Withdrawals

- Alaska had a 100% error rate (5 out of 5) Withdrawal (HW) messages

CDLIS Data Quality Updates to MPR Personally Identifiable Information

- Alaska had a 24.32% overall error rate (9 out of 37) Updates to MPR Personally Identifiable Information

CDLIS Data Quality of Pointer Deletions

- Alaska had a 62.96% error rate (17 out of 27) Delete Driver (UE) messages

Please find the April monthly CDLIS Timeliness, Data Quality, and Capabilities report attached:

- 2017 04 April CDLIS Timeliness and Accuracy- Summary Workbook

If you need additional information, please let us know. For example, we can send you more detailed information on the Conviction, Withdrawal, Updates to MPR PII or Pointer Deletion messages.

Thanks,

Jessie Rogers | Senior Operations Analyst | AAMVA | 4401 Wilson Blvd., Suite 700 Arlington, Va. 22203 | 703.908.8264 | jrogers@aamva.org | www.aamva.org

In our review for the **May** data, AAMVA noticed the following issues:

CDLIS Timeliness of Withdrawals Sent Successfully

- Alaska sent 0% of its successful Report Out-of-State Withdrawals (HW) transactions (0 out of 1) within the federal time limit of 10 days

CDLIS Data Quality of Convictions

- Alaska had a 20% error rate (5 out of 1) Conviction (HA) messages

CDLIS Data Quality of Withdrawals

- Alaska had a 33.33% error rate (3 out of 1) Withdrawal (HW) messages

Please find the May monthly CDLIS Timeliness, Data Quality, and Capabilities report attached:

- 2016 05 May CDLIS Timeliness and Accuracy- Summary Workbook

If you need additional information, please let us know. For example, we can send you more detailed information on the Withdrawal or Conviction messages.

Thanks,

Entered on 05/25/2016 at 13:43:11 EDT (GMT-0400) by Jessie Rogers:

According to MAP-21, States are required to resolve all CDL compliance findings by September 30, 2015, and to provide assurances that the State will remain in compliance through the next fiscal year ending in September 2016. Now that September 30, 2015 has passed, it becomes even more important for your SDLA to understand and resolve persistent CDLIS problems that could lead to compliance findings. AAMVA and FMCSA developed this report to assist your SDLA in identifying and resolving potential CDLIS problems before they become compliance findings.

Your SDLA is expected to reply to this message by June 8th with an analysis of the issues noted and a plan to address them. The response from the SDLA is helpful to gain a better understanding of how AAMVA can assist the SDLA in correcting these specific CDLIS issues. Please note that this is not a compliance report, but a tool to help States be more proactive in fixing their issues.

This problem ticket and sub-tickets for each tab in red will remain open until your State fixes the problems being reported (state remains green for three consecutive months).

In our review for the **April** data, AAMVA noticed the following issues:

CDLIS Data Quality of Convictions

- Alaska had a 14.29% error rate (2 out of 14) Conviction (HA) messages

CDLIS Data Quality of Withdrawals

- Alaska had a 100% error rate (1 out of 1) Withdrawal (HW) messages

Please find the April monthly CDLIS Timeliness, Data Quality, and Capabilities report attached:

- 2016 04 April CDLIS Timeliness and Accuracy- Summary Workbook

If you need additional information, please let us know. For example, we can send you more detailed information on the Conviction or Withdrawal messages.

Thanks,

Good morning,

Thank you for your response on these errors. AAMVA recommends that AK continue working with the courts to let them know how important it is to report the convictions within the required time and with the correct information.

For the data quality issues, hopefully we see AK become green due to the changes in staff refining error correction processes to reduce unnecessary correction attempts. AAMVA also recommends the AAMVA Systems Training which

aims to develop education, training and learning opportunities that meet the needs of AAMVA's membership in the use of all the systems and procedures to ensure commercial driver safety and compliance with Federal regulations. **NOTE:** All courses are **free** for AAMVA members. Click the following link to view the course catalogue and to register or enroll in a session: <http://aamva.intevista.com>. If you experience trouble enrolling, or if you would like more information on any of the courses, please send an email to trainer@aamva.org.

We will monitor this tab and the others to see if AK improves. Once Alaska is green for three consecutive months in each tab, we will close that sub ticket for the tab.

Thanks,

Jessie Rogers | Reporting Analyst | AAMVA | 4401 Wilson Blvd., Suite 700 Arlington, Va.

Entered on 10/15/2015 at 13:16:39 EDT (GMT-0400) by Nichole Tham:
Good afternoon,

Thank you for this notification. Both DMV and FMCSA are aware of the issues noted in the report and DMV is actively working to resolve them. Some factors contributing to the Timeliness/Quality Errors:

The Timeliness Errors are due to staff diligently working the backlog of E-Dispo records that were not reported to DMV by the courts. These will continue to be high until that backlog is caught up. Part of this delay is attributed to the lack of distinction between CDL/non-CDL citations; additional steps are required to identify and manually update CDL citations/pointers in CDLIS, which significantly slows the process. Although DMV has expressed the need for the Department of Public Safety (DPS) to add a "CDL Indicator" to citation forms, both DPS and the Alaska Court System (ACS) has deemed it impracticable. Staff must continue to manually decipher each out of state license record to see if it is a CDL.

The Quality Errors are in part because there has been a large learning curve for staff, and because AAMVA reports multiple attempts to submit the same record as separate errors, which skews the percentages. Staff are refining error correction processes to reduce unnecessary correction attempts which should reduce error compounding overall.

Sincerely,

Nichole Tham
Driver Services Manager

Entered on 05/31/2017 at 12:36:06 EDT (GMT-0400) by Jessie Rogers:

Good afternoon,

According to MAP-21, States are required to resolve all CDL compliance findings by September 30, 2015, and to provide assurances that the State will remain in compliance through the next fiscal year ending in September 2016. Now that September 30, 2015 has passed, it becomes even more important for your SDLA to understand and resolve persistent CDLIS problems that could lead to compliance findings. AAMVA and FMCSA

developed this report to assist your SDLA in identifying and resolving potential CDLIS problems before they become compliance findings.

Your SDLA is expected to reply to this message by June 14th with an analysis of the issues noted and a plan to address them. The response from the SDLA is helpful to gain a better understanding of how AAMVA can assist the SDLA in correcting these specific CDLIS issues. Please note that this is not a compliance report, but a tool to help States be more proactive in fixing their issues.

This problem ticket and sub-tickets for each tab in red will remain open until your State fixes the problems being reported (state remains green for three consecutive months).

In our review for the **April** data, AAMVA noticed the following issues:

CDLIS Timeliness of Convictions Sent Successfully

- Alaska sent 33.33% of its successful Report Out-of-State Convictions (HA) transactions (1 out of 3) within the federal time limit of 10 days

CDLIS Data Quality of Withdrawals

- Alaska had a 100% error rate (5 out of 5) Withdrawal (HW) messages

CDLIS Data Quality Updates to MPR Personally Identifiable Information

- Alaska had a 24.32% overall error rate (9 out of 37) Updates to MPR Personally Identifiable Information

CDLIS Data Quality of Pointer Deletions

- Alaska had a 62.96% error rate (17 out of 27) Delete Driver (UE) messages

Please find the April monthly CDLIS Timeliness, Data Quality, and Capabilities report attached:

- 2017 04 April CDLIS Timeliness and Accuracy- Summary Workbook

If you need additional information, please let us know. For example, we can send you more detailed information on the Conviction, Withdrawal, Updates to MPR PII or Pointer Deletion messages.

Thanks,

Jessie Rogers | Senior Operations Analyst | AAMVA | 4401 Wilson Blvd., Suite 700 Arlington, Va. 22203 | 703.908.8264 | jrogers@aamva.org | www.aamva.org

Entered on 04/21/2016 at 10:05:16 EDT (GMT-0400) by Jessie Rogers:

According to MAP-21, States are required to resolve all CDL compliance findings by September 30, 2015, and to provide assurances that the State will remain in compliance through the next fiscal year ending in September 2016. Now that September 30, 2015 has passed, it becomes even more important for your SDLA to understand and resolve persistent CDLIS problems that could lead to compliance findings. AAMVA and FMCSA developed this report to assist your SDLA in identifying and resolving potential CDLIS problems before they become compliance findings.

Your SDLA is expected to reply to this message by May 5th with an analysis of the issues noted and a plan to address them. The response from the SDLA is helpful to gain a better understanding of how AAMVA can assist the SDLA in correcting these specific CDLIS issues. Please note that this is not a compliance report, but a tool to help States be more proactive in fixing their issues.

This problem ticket and sub-tickets for each tab in red will remain open until your State fixes the problems being reported (state remains green for three consecutive months).

In our review for the **March** data, AAMVA noticed the following issues:

CDLIS Timeliness of Withdrawals Sent Successfully

- Alaska sent 0% of its successful Report Out-of-State Withdrawals (HW) transactions (0 out of 1) within the federal time limit of 10 days

CDLIS Data Quality of Withdrawals

- Alaska had a 88.89% error rate (8 out of 9) Withdrawal (HW) messages

Please find the March monthly CDLIS Timeliness, Data Quality, and Capabilities report attached:

- 2016 03 March CDLIS Timeliness and Accuracy- Summary Workbook

If you need additional information, please let us know. For example, we can send you more detailed information on the Withdrawal messages.

Thanks,

Good morning,

Thank you for your response on these errors. AAMVA recommends that AK continue working with the courts to let them know how important it is to report the convictions within the required time and with the correct information.

For the data quality issues, hopefully we see AK become green due to the changes in staff refining error correction processes to reduce unnecessary correction attempts. AAMVA also recommends the AAMVA Systems Training which

aims to develop education, training and learning opportunities that meet the needs of AAMVA's membership in the use of all the systems and procedures to ensure commercial driver safety and compliance with Federal regulations. **NOTE:** All courses are **free** for AAMVA members. Click the following link to view the course catalogue and to register or enroll in a session: <http://aamva.intevista.com>. If you experience trouble enrolling, or if you would like more information on any of the courses, please send an email to trainer@aamva.org.

We will monitor this tab and the others to see if AK improves. Once Alaska is green for three consecutive months in each tab, we will close that sub ticket for the tab.

Thanks,

Jessie Rogers | Reporting Analyst | AAMVA | 4401 Wilson Blvd., Suite 700 Arlington, Va.

Entered on 10/15/2015 at 13:16:39 EDT (GMT-0400) by Nichole Tham:
Good afternoon,

Thank you for this notification. Both DMV and FMCSA are aware of the issues noted in the report and DMV is actively working to resolve them. Some factors contributing to the Timeliness/Quality Errors:

The Timeliness Errors are due to staff diligently working the backlog of E-Dispo records that were not reported to DMV by the courts. These will continue to be high until that backlog is caught up. Part of this delay is attributed to the lack of distinction between CDL/non-CDL citations; additional steps are required to identify and manually update CDL citations/pointers in CDLIS, which significantly slows the process. Although DMV has expressed the need for the Department of Public Safety (DPS) to add a "CDL Indicator" to citation forms, both DPS and the Alaska Court System (ACS) has deemed it impracticable. Staff must continue to manually decipher each out of state license record to see if it is a CDL.

The Quality Errors are in part because there has been a large learning curve for staff, and because AAMVA reports multiple attempts to submit the same record as separate errors, which skews the percentages. Staff are refining error correction processes to reduce unnecessary correction attempts which should reduce error compounding overall.

Sincerely,

Nichole Tham

Entered on 05/31/2017 at 12:36:06 EDT (GMT-0400) by Jessie Rogers:

Good afternoon,

According to MAP-21, States are required to resolve all CDL compliance findings by September 30, 2015, and to provide assurances that the State will remain in compliance through the next fiscal year ending in September 2016. Now that September 30, 2015 has passed, it becomes even more important for your SDLA to understand and resolve persistent CDLIS problems that could lead to compliance findings. AAMVA and FMCSA

developed this report to assist your SDLA in identifying and resolving potential CDLIS problems before they become compliance findings.

Your SDLA is expected to reply to this message by June 14th with an analysis of the issues noted and a plan to address them. The response from the SDLA is helpful to gain a better understanding of how AAMVA can assist the SDLA in correcting these specific CDLIS issues. Please note that this is not a compliance report, but a tool to help States be more proactive in fixing their issues.

This problem ticket and sub-tickets for each tab in red will remain open until your State fixes the problems being reported (state remains green for three consecutive months).

In our review for the **April** data, AAMVA noticed the following issues:

CDLIS Timeliness of Convictions Sent Successfully

- Alaska sent 33.33% of its successful Report Out-of-State Convictions (HA) transactions (1 out of 3) within the federal time limit of 10 days

CDLIS Data Quality of Withdrawals

- Alaska had a 100% error rate (5 out of 5) Withdrawal (HW) messages

CDLIS Data Quality Updates to MPR Personally Identifiable Information

- Alaska had a 24.32% overall error rate (9 out of 37) Updates to MPR Personally Identifiable Information

CDLIS Data Quality of Pointer Deletions

- Alaska had a 62.96% error rate (17 out of 27) Delete Driver (UE) messages

Please find the April monthly CDLIS Timeliness, Data Quality, and Capabilities report attached:

- 2017 04 April CDLIS Timeliness and Accuracy- Summary Workbook

If you need additional information, please let us know. For example, we can send you more detailed information on the Conviction, Withdrawal, Updates to MPR PII or Pointer Deletion messages.

Thanks,

Entered on 04/27/2017 at 09:18:30 EDT (GMT-0400) by Jessie Rogers:

Good morning,

According to MAP-21, States are required to resolve all CDL compliance findings by September 30, 2015, and to provide assurances that the State will remain in compliance through the next fiscal year ending in September 2016. Now that September 30, 2015 has passed, it becomes even more important for your SDLA to understand and resolve persistent CDLIS problems that could lead to compliance findings. AAMVA and FMCSA developed this report to assist your SDLA in identifying and resolving potential CDLIS problems before they become compliance findings.

Your SDLA is expected to reply to this message by April 14th with an analysis of the issues noted and a plan to address them. The response from the SDLA is helpful to gain a better understanding of how AAMVA can assist the SDLA in correcting these specific CDLIS issues. Please note that this is not a compliance report, but a tool to help States be more proactive in fixing their issues.

This problem ticket and sub-tickets for each tab in red will remain open until your State fixes the problems being reported (state remains green for three consecutive months).

In our review for the **March** data, AAMVA noticed the following issues:

CDLIS Data Quality of Convictions

- Alaska had a 100% error rate (1 out of 1) Conviction (HA) messages

CDLIS Data Quality of Withdrawals

- Alaska had a 100% error rate (5 out of 5) Withdrawal (HW) messages

CDLIS Data Quality Updates to MPR Personally Identifiable Information

- Alaska had a 26.09% overall error rate (24 out of 92) Updates to MPR Personally Identifiable Information

CDLIS Data Quality Updates to MPR SOR

- Alaska had a 23% overall error rate (115 out of 500) for Updates to MPR SOR

CDLIS Data Quality of Pointer Deletions

- Alaska had a 87.50% error rate (14 out of 16) Delete Driver (UE) messages

Please find the March monthly CDLIS Timeliness, Data Quality, and Capabilities report attached:

- 2017 03 March CDLIS Timeliness and Accuracy- Summary Workbook

If you need additional information, please let us know. For example, we can send you more detailed information on the Convictions, Withdrawals, Updates, or Pointer Deletion messages.

Thanks,

Jessie Rogers | Senior Operations Analyst | AAMVA | 4401 Wilson Blvd., Suite 700 Arlington, Va. 22203 | 703.908.8264 | jrogers@aamva.org | www.aamva.org

Entered on 03/31/2016 at 09:08:30 EDT (GMT-0400) by Jessie Rogers:

According to MAP-21, States are required to resolve all CDL compliance findings by September 30, 2015, and to provide assurances that the State will remain in compliance through the next fiscal year ending in September 2016. Now that September 30, 2015 has passed, it becomes even more important for your SDLA to understand and resolve persistent CDLIS problems that could lead to compliance findings. AAMVA and FMCSA developed this report to assist your SDLA in identifying and resolving potential CDLIS problems before they become compliance findings.

Your SDLA is expected to reply to this message by April 14th with an analysis of the issues noted and a plan to address them. The response from the SDLA is helpful to gain a better understanding of how AAMVA can assist the SDLA in correcting these specific CDLIS issues. Please note that this is not a compliance report, but a tool to help States be more proactive in fixing their issues.

This problem ticket and sub-tickets for each tab in red will remain open until your State fixes the problems being reported (state remains green for three consecutive months).

In our review for the **February** data, AAMVA noticed the following issues:

CDLIS Timeliness of Convictions Sent Successfully

- Alaska sent 44.44% of its successful Report Out-of-State Convictions (HA) transactions (4 out of 9) within the federal time limit of 10 days

CDLIS Timeliness of Withdrawals Sent Successfully

- Alaska sent 0% of its successful Report Out-of-State Withdrawals (HW) transactions (0 out of 3) within the federal time limit of 10 days

CDLIS Data Quality of Convictions

- Alaska had a 18.75% error rate (3 out of 16) Conviction (HA) messages

CDLIS Data Quality of Withdrawals

- Alaska had a 25% error rate (1 out of 4) Withdrawal (HW) messages

Please find the February monthly CDLIS Timeliness, Data Quality, and Capabilities report attached:

- 2016 02 February CDLIS Timeliness and Accuracy- Summary Workbook

If you need additional information, please let us know. For example, we can send you more detailed information on the Conviction or Withdrawal messages.

Thanks,

Good morning,

Thank you for your response on these errors. AAMVA recommends that AK continue working with the courts to let them know how important it is to report the convictions within the required time and with the correct information.

For the data quality issues, hopefully we see AK become green due to the changes in staff refining error correction processes to reduce unnecessary correction attempts. AAMVA also recommends the AAMVA Systems Training which

aims to develop education, training and learning opportunities that meet the needs of AAMVA's membership in the use of all the systems and procedures to ensure commercial driver safety and compliance with Federal regulations. **NOTE:** All courses are **free** for AAMVA members. Click the following link to view the course catalogue and to register or enroll in a session: <http://aamva.intevista.com>. If you experience trouble enrolling, or if you would like more information on any of the courses, please send an email to trainer@aamva.org.

We will monitor this tab and the others to see if AK improves. Once Alaska is green for three consecutive months in each tab, we will close that sub ticket for the tab.

Thanks,

Jessie Rogers | Reporting Analyst | AAMVA | 4401 Wilson Blvd., Suite 700 Arlington, Va.

Entered on 10/15/2015 at 13:16:39 EDT (GMT-0400) by Nichole Tham:
Good afternoon,

Thank you for this notification. Both DMV and FMCSA are aware of the issues noted in the report and DMV is actively working to resolve them. Some factors contributing to the Timeliness/Quality Errors:

The Timeliness Errors are due to staff diligently working the backlog of E-Dispo records that were not reported to DMV by the courts. These will continue to be high until that backlog is caught up. Part of this delay is attributed to the lack of distinction between CDL/non-CDL citations; additional steps are required to identify and manually update CDL citations/pointers in CDLIS, which significantly slows the process. Although DMV has expressed the need for the Department of Public Safety (DPS) to add a "CDL Indicator" to citation forms, both DPS and the Alaska Court System (ACS) has deemed it impracticable. Staff must continue to manually decipher each out of state license record to see if it is a CDL.

The Quality Errors are in part because there has been a large learning curve for staff, and because AAMVA reports multiple attempts to submit the same record as separate errors, which skews the percentages. Staff are refining error correction processes to reduce unnecessary correction attempts which should reduce error compounding overall.

Sincerely,

Nichole Tham

Entered on 05/31/2017 at 12:36:06 EDT (GMT-0400) by Jessie Rogers:

Good afternoon,

According to MAP-21, States are required to resolve all CDL compliance findings by September 30, 2015, and to provide assurances that the State will remain in compliance through the next fiscal year ending in September 2016. Now that September 30, 2015 has passed, it becomes even more important for your SDLA to understand and resolve persistent CDLIS problems that could lead to compliance findings. AAMVA and FMCSA developed this report to assist your SDLA in identifying and resolving potential CDLIS problems before they become compliance findings.

Your SDLA is expected to reply to this message by June 14th with an analysis of the issues noted and a plan to address them. The response from the SDLA is helpful to gain a better understanding of how AAMVA can assist the SDLA in correcting these specific CDLIS issues. Please note that this is not a compliance report, but a tool to help States be more proactive in fixing their issues.

This problem ticket and sub-tickets for each tab in red will remain open until your State fixes the problems being reported (state remains green for three consecutive months).

In our review for the **April** data, AAMVA noticed the following issues:

CDLIS Timeliness of Convictions Sent Successfully

- Alaska sent 33.33% of its successful Report Out-of-State Convictions (HA) transactions (1 out of 3) within the federal time limit of 10 days

CDLIS Data Quality of Withdrawals

- Alaska had a 100% error rate (5 out of 5) Withdrawal (HW) messages

CDLIS Data Quality Updates to MPR Personally Identifiable Information

- Alaska had a 24.32% overall error rate (9 out of 37) Updates to MPR Personally Identifiable Information

CDLIS Data Quality of Pointer Deletions

- Alaska had a 62.96% error rate (17 out of 27) Delete Driver (UE) messages

Please find the April monthly CDLIS Timeliness, Data Quality, and Capabilities report attached:

- 2017 04 April CDLIS Timeliness and Accuracy- Summary Workbook

If you need additional information, please let us know. For example, we can send you more detailed information on the Conviction, Withdrawal, Updates to MPR PII or Pointer Deletion messages.

Thanks,

Jessie Rogers | Senior Operations Analyst | AAMVA | 4401 Wilson Blvd., Suite 700 Arlington, Va.

Entered on 03/29/2017 at 15:51:26 EDT (GMT-0400) by Jessie Rogers:

Good afternoon,

According to MAP-21, States are required to resolve all CDL compliance findings by September 30, 2015, and to provide assurances that the State will remain in compliance through the next fiscal year ending in September 2016. Now that September 30, 2015 has passed, it becomes even more important for your SDLA to understand and resolve persistent CDLIS problems that could lead to compliance findings. AAMVA and FMCSA developed this report to assist your SDLA in identifying and resolving potential CDLIS problems before they become compliance findings.

Your SDLA is expected to reply to this message by April 14th with an analysis of the issues noted and a plan to address them. The response from the SDLA is helpful to gain a better understanding of how AAMVA can assist the SDLA in correcting these specific CDLIS issues. Please note that this is not a compliance report, but a tool to help States be more proactive in fixing their issues.

This problem ticket and sub-tickets for each tab in red will remain open until your State fixes the problems being reported (state remains green for three consecutive months).

In our review for the **February** data, AAMVA noticed the following issues:

CDLIS Data Quality Updates to MPR Personally Identifiable Information

- Alaska had a 65.17% overall error rate (58 out of 89) Updates to MPR Personally Identifiable Information

CDLIS Data Quality Updates to MPR SOR

- Alaska had a 34.89% overall error rate (82 out of 235) for Updates to MPR SOR

CDLIS Data Quality of Pointer Deletions

- Alaska had a 77.78% error rate (7 out of 9) Delete Driver (UE) messages

Please find the February monthly CDLIS Timeliness, Data Quality, and Capabilities report attached:

- 2017 02 February CDLIS Timeliness and Accuracy- Summary Workbook

If you need additional information, please let us know. For example, we can send you more detailed information on the Updates to MPR PII, SOR or Pointer Deletion messages.

Thanks,

Jessie Rogers | Senior Operations Analyst | AAMVA | 4401 Wilson Blvd., Suite 700 Arlington, Va.

Please note that this is not a compliance report, but a tool to help States be more proactive in fixing their issues.

This problem ticket and sub-tickets for each tab in red will remain open until your State fixes the problems being reported (state remains green for three consecutive months).

In our review for the **February** data, AAMVA noticed the following issues:

CDLIS Timeliness of Convictions Sent Successfully

- Alaska sent 44.44% of its successful Report Out-of-State Convictions (HA) transactions (4 out of 9) within the federal time limit of 10 days

CDLIS Timeliness of Withdrawals Sent Successfully

- Alaska sent 0% of its successful Report Out-of-State Withdrawals (HW) transactions (0 out of 3) within the federal time limit of 10 days

CDLIS Data Quality of Convictions

- Alaska had a 18.75% error rate (3 out of 16) Conviction (HA) messages

CDLIS Data Quality of Withdrawals

- Alaska had a 25% error rate (1 out of 4) Withdrawal (HW) messages

Please find the February monthly CDLIS Timeliness, Data Quality, and Capabilities report attached:

- 2016 02 February CDLIS Timeliness and Accuracy- Summary Workbook

If you need additional information, please let us know. For example, we can send you more detailed information on the Conviction or Withdrawal messages.

Thanks,

Entered on 02/26/2016 at 10:40:44 EST (GMT-0500) by Jessie Rogers:

According to MAP-21, States are required to resolve all CDL compliance findings by September 30, 2015, and to provide assurances that the State will remain in compliance through the next fiscal year ending in September 2016. Now that September 30, 2015 has passed, it becomes even more important for your SDLA to understand and resolve persistent CDLIS problems that could lead to compliance findings. AAMVA and FMCSA developed this report to assist your SDLA in identifying and resolving potential CDLIS problems before they become compliance findings.

Your SDLA is expected to reply to this message by March 11th with an analysis of the issues noted and a plan to address them. The response from the SDLA is helpful to gain a better understanding of how AAMVA can assist

the SDLA in correcting these specific CDLIS issues. Please note that this is not a compliance report, but a tool to help States be more proactive in fixing their issues.

This problem ticket and sub-tickets for each tab in red will remain open until your State fixes the problems being reported (state remains green for three consecutive months).

In our review for the **January** data, AAMVA noticed the following issues:

CDLIS Timeliness of Convictions Sent Successfully

- Alaska sent 50% of its successful Report Out-of-State Convictions (HA) transactions (4 out of 8) within the federal time limit of 10 days

CDLIS Timeliness of Withdrawals Sent Successfully

- Alaska sent 0% of its successful Report Out-of-State Withdrawals (HW) transactions (0 out of 1) within the federal time limit of 10 days

CDLIS Data Quality of Pointer Deletions

- Alaska had a 42.86% error rate (3 out of 7) Delete Driver (UE) messages

Please find the January monthly CDLIS Timeliness, Data Quality, and Capabilities report attached:

- 2016 01 January CDLIS Timeliness and Accuracy- Summary Workbook

If you need additional information, please let us know. For example, we can send you more detailed information on the Conviction, Withdrawal or Pointer deletion messages.

Thanks,

Entered on 10/16/2015 at 10:41:44 EDT (GMT-0400) by JShifflett:

Good morning,

Thank you for your response on these errors. AAMVA recommends that AK continue working with the courts to let them know how important it is to report the convictions within the required time and with the correct information.

For the data quality issues, hopefully we see AK become green due to the changes in staff refining error correction processes to reduce unnecessary correction attempts. AAMVA also recommends the AAMVA Systems Training which aims to develop education, training and learning opportunities that meet the needs of AAMVA's membership in the use of all the systems and procedures to ensure commercial driver safety and compliance with Federal regulations. **NOTE:** All courses are **free** for AAMVA members. Click the following link to view the course catalogue and to register or enroll in a session: <http://aamva.intevista.com>. If you experience trouble enrolling, or if you would like more information on any of the courses, please send an email to trainer@aamva.org.

We will monitor this tab and the others to see if AK improves. Once Alaska is green for three consecutive months in each tab, we will close that sub ticket for the tab.

Thanks,

Jessie Rogers | Reporting Analyst | AAMVA | 4401 Wilson Blvd., Suite 700 Arlington, Va.

Entered on 10/15/2015 at 13:16:39 EDT (GMT-0400) by Nichole Tham:

Good afternoon,

Thank you for this notification. Both DMV and FMCSA are aware of the issues noted in the report and DMV is actively working to resolve them. Some factors contributing to the Timeliness/Quality Errors:

The Timeliness Errors are due to staff diligently working the backlog of E-Dispo records that were not reported to DMV by the courts. These will continue to be high until that backlog is caught up. Part of this delay is attributed to the lack of distinction between CDL/non-CDL citations; additional steps are required to identify and manually update CDL citations/pointers in CDLIS, which significantly slows the process. Although DMV has expressed the need for the Department of Public Safety (DPS) to add a "CDL Indicator" to citation forms, both DPS and the Alaska Court System (ACS) has deemed it impracticable. Staff must continue to manually decipher each out of state license record to see if it is a CDL.

The Quality Errors are in part because there has been a large learning curve for staff, and because AAMVA

reports multiple attempts to submit the same record as separate errors, which skews the percentages. Staff are refining error correction processes to reduce unnecessary correction attempts which should reduce error compounding overall.

Sincerely,

Nichole Tham

Good afternoon,

According to MAP-21, States are required to resolve all CDL compliance findings by September 30, 2015, and to provide assurances that the State will remain in compliance through the next fiscal year ending in September 2016. Now that September 30, 2015 has passed, it becomes even more important for your SDLA to understand and resolve persistent CDLIS problems that could lead to compliance findings. AAMVA and FMCSA developed this report to assist your SDLA in identifying and resolving potential CDLIS problems before they become compliance findings.

Your SDLA is expected to reply to this message by June 14th with an analysis of the issues noted and a plan to address them. The response from the SDLA is helpful to gain a better understanding of how AAMVA can assist the SDLA in correcting these specific CDLIS issues. Please note that this is not a compliance report, but a tool to help States be more proactive in fixing their issues.

This problem ticket and sub-tickets for each tab in red will remain open until your State fixes the problems being reported (state remains green for three consecutive months).

In our review for the **April** data, AAMVA noticed the following issues:

CDLIS Timeliness of Convictions Sent Successfully

- Alaska sent 33.33% of its successful Report Out-of-State Convictions (HA) transactions (1 out of 3) within the federal time limit of 10 days

CDLIS Data Quality of Withdrawals

- Alaska had a 100% error rate (5 out of 5) Withdrawal (HW) messages

CDLIS Data Quality Updates to MPR Personally Identifiable Information

- Alaska had a 24.32% overall error rate (9 out of 37) Updates to MPR Personally Identifiable Information

CDLIS Data Quality of Pointer Deletions

- Alaska had a 62.96% error rate (17 out of 27) Delete Driver (UE) messages

Please find the April monthly CDLIS Timeliness, Data Quality, and Capabilities report attached:

- 2017 04 April CDLIS Timeliness and Accuracy- Summary Workbook

If you need additional information, please let us know. For example, we can send you more detailed information on the Conviction, Withdrawal, Updates to MPR PII or Pointer Deletion messages.

Thanks,

Jessie Rogers | Senior Operations Analyst | AAMVA | 4401 Wilson Blvd., Suite 700 Arlington, Va.

Entered on 03/29/2017 at 15:51:26 EDT (GMT-0400) by Jessie Rogers:

Good afternoon,

According to MAP-21, States are required to resolve all CDL compliance findings by September 30, 2015, and to provide assurances that the State will remain in compliance through the next fiscal year ending in September 2016. Now that September 30, 2015 has passed, it becomes even more important for your SDLA to understand and resolve persistent CDLIS problems that could lead to compliance findings. AAMVA and FMCSA developed this report to assist your SDLA in identifying and resolving potential CDLIS problems before they become compliance findings.

Your SDLA is expected to reply to this message by April 14th with an analysis of the issues noted and a plan to address them. The response from the SDLA is helpful to gain a better understanding of how AAMVA can assist the SDLA in correcting these specific CDLIS issues. Please note that this is not a compliance report, but a tool to help States be more proactive in fixing their issues.

This problem ticket and sub-tickets for each tab in red will remain open until your State fixes the problems being reported (state remains green for three consecutive months).

In our review for the **February** data, AAMVA noticed the following issues:

CDLIS Data Quality Updates to MPR Personally Identifiable Information

- Alaska had a 65.17% overall error rate (58 out of 89) Updates to MPR Personally Identifiable Information

CDLIS Data Quality Updates to MPR SOR

- Alaska had a 34.89% overall error rate (82 out of 235) for Updates to MPR SOR

CDLIS Data Quality of Pointer Deletions

- Alaska had a 77.78% error rate (7 out of 9) Delete Driver (UE) messages

Please find the February monthly CDLIS Timeliness, Data Quality, and Capabilities report attached:

- 2017 02 February CDLIS Timeliness and Accuracy- Summary Workbook

If you need additional information, please let us know. For example, we can send you more detailed information on the Updates to MPR PII, SOR or Pointer Deletion messages.

Thanks,

Jessie Rogers | Senior Operations Analyst | AAMVA | 4401 Wilson Blvd., Suite 700 Arlington, Va.

Entered on 02/26/2016 at 10:40:44 EST (GMT-0500) by Jessie Rogers:

According to MAP-21, States are required to resolve all CDL compliance findings by September 30, 2015, and to provide assurances that the State will remain in compliance through the next fiscal year ending in September 2016. Now that September 30, 2015 has passed, it becomes even more important for your SDLA to understand and resolve persistent CDLIS problems that could lead to compliance findings. AAMVA and FMCSA developed this report to assist your SDLA in identifying and resolving potential CDLIS problems before they become compliance findings.

Your SDLA is expected to reply to this message by March 11th with an analysis of the issues noted and a plan to address them. The response from the SDLA is helpful to gain a better understanding of how AAMVA can assist

the SDLA in correcting these specific CDLIS issues. Please note that this is not a compliance report, but a tool to help States be more proactive in fixing their issues.

This problem ticket and sub-tickets for each tab in red will remain open until your State fixes the problems being reported (state remains green for three consecutive months).

In our review for the **January** data, AAMVA noticed the following issues:

CDLIS Timeliness of Convictions Sent Successfully

- Alaska sent 50% of its successful Report Out-of-State Convictions (HA) transactions (4 out of 8) within the federal time limit of 10 days

CDLIS Timeliness of Withdrawals Sent Successfully

- Alaska sent 0% of its successful Report Out-of-State Withdrawals (HW) transactions (0 out of 1) within the federal time limit of 10 days

CDLIS Data Quality of Pointer Deletions

- Alaska had a 42.86% error rate (3 out of 7) Delete Driver (UE) messages

Please find the January monthly CDLIS Timeliness, Data Quality, and Capabilities report attached:

- 2016 01 January CDLIS Timeliness and Accuracy- Summary Workbook

If you need additional information, please let us know. For example, we can send you more detailed information on the Conviction, Withdrawal or Pointer deletion messages.

Thanks,

Good morning,

Thank you for your response on these errors. AAMVA recommends that AK continue working with the courts to let them know how important it is to report the convictions within the required time and with the correct information.

For the data quality issues, hopefully we see AK become green due to the changes in staff refining error correction processes to reduce unnecessary correction attempts. AAMVA also recommends the AAMVA Systems Training which aims to develop education, training and learning opportunities that meet the needs of AAMVA's membership in the use of all the systems and procedures to ensure commercial driver safety and compliance with Federal regulations. **NOTE:** All courses are **free** for AAMVA members. Click the following link to view the course catalogue and to register or enroll in a session: <http://aamva.intevista.com>. If you experience trouble enrolling, or if you would like more information on any of the courses, please send an email to trainer@aamva.org.

We will monitor this tab and the others to see if AK improves. Once Alaska is green for three consecutive months in each tab, we will close that sub ticket for the tab.

Thanks,

Jessie Rogers | Reporting Analyst | AAMVA | 4401 Wilson Blvd., Suite 700 Arlington, Va.

Entered on 10/15/2015 at 13:16:39 EDT (GMT-0400) by Nichole Tham:

Good afternoon,

Thank you for this notification. Both DMV and FMCSA are aware of the issues noted in the report and DMV is actively working to resolve them. Some factors contributing to the Timeliness/Quality Errors:

The Timeliness Errors are due to staff diligently working the backlog of E-Dispo records that were not reported to DMV by the courts. These will continue to be high until that backlog is caught up. Part of this delay is attributed to the lack of distinction between CDL/non-CDL citations; additional steps are required to identify and manually update CDL citations/pointers in CDLIS, which significantly slows the process. Although DMV has expressed the need for the Department of Public Safety (DPS) to add a "CDL Indicator" to citation forms, both DPS and the Alaska Court System (ACS) has deemed it impracticable. Staff must continue to manually decipher each out of state license record to see if it is a CDL.

The Quality Errors are in part because there has been a large learning curve for staff, and because AAMVA

reports multiple attempts to submit the same record as separate errors, which skews the percentages. Staff are refining error correction processes to reduce unnecessary correction attempts which should reduce error compounding overall.

Sincerely,

Nichole Tham

Entered on 02/27/2017 at 14:20:15 EST (GMT-0500) by Jessie Rogers:

Good afternoon,

According to MAP-21, States are required to resolve all CDL compliance findings by September 30, 2015, and to provide assurances that the State will remain in compliance through the next fiscal year ending in September 2016. Now that September 30, 2015 has passed, it becomes even more important for your SDLA to understand and resolve persistent CDLIS problems that could lead to compliance findings. AAMVA and FMCSA developed this report to assist your SDLA in identifying and resolving potential CDLIS problems before they become compliance findings.

Your SDLA is expected to reply to this message by March 13th with an analysis of the issues noted and a plan to address them. The response from the SDLA is helpful to gain a better understanding of how AAMVA can assist the SDLA in correcting these specific CDLIS issues. Please note that this is not a compliance report, but a tool to help States be more proactive in fixing their issues.

This problem ticket and sub-tickets for each tab in red will remain open until your State fixes the problems being reported (state remains green for three consecutive months).

In our review for the **January** data, AAMVA noticed the following issues:

CDLIS Timeliness of Convictions Sent Successfully

- Alaska sent 60% of its successful Report Out-of-State Convictions (HA) transactions (3 out of 5) within the federal time limit of 10 days

CDLIS Data Quality Updates to MPR Personally Identifiable Information

- Alaska had a 19.83% overall error rate (71 out of 358) Updates to MPR Personally Identifiable Information

Please find the January monthly CDLIS Timeliness, Data Quality, and Capabilities report attached:

- 2017 01 January CDLIS Timeliness and Accuracy- Summary Workbook

If you need additional information, please let us know. For example, we can send you more detailed information on the Conviction or Updates to MPR PII messages.

Thanks,

Jessie Rogers | Senior Operations Analyst | AAMVA | 4401 Wilson Blvd., Suite 700 Arlington, Va.

Entered on 01/28/2016 at 13:30:39 EST (GMT-0500) by Jessie Rogers:

According to MAP-21, States are required to resolve all CDL compliance findings by September 30, 2015, and to provide assurances that the State will remain in compliance through the next fiscal year ending in September 2016. Now that September 30, 2015 has passed, it becomes even more important for your SDLA to understand and resolve persistent CDLIS problems that could lead to compliance findings. AAMVA and FMCSA developed this report to assist your SDLA in identifying and resolving potential CDLIS problems before they become compliance findings.

Your SDLA is expected to reply to this message by February 11th with an analysis of the issues noted and a plan to address them. The response from the SDLA is helpful to gain a better understanding of how AAMVA can

assist the SDLA in correcting these specific CDLIS issues. Please note that this is not a compliance report, but a tool to help States be more proactive in fixing their issues.

This problem ticket and sub-tickets for each tab in red will remain open until your State fixes the problems being reported (state remains green for three consecutive months).

In our review for the **December** data, AAMVA noticed the following issues:

CDLIS Timeliness of Convictions Sent Successfully

- Alaska sent 5% of its successful Report Out-of-State Convictions (HA) transactions (2 out of 40) within the federal time limit of 10 days

Please find the December monthly CDLIS Timeliness, Data Quality, and Capabilities report attached:

- 2015 12 December CDLIS Timeliness and Accuracy- Summary Workbook

If you need additional information, please let us know. For example, we can send you more detailed information on the Conviction messages.

Thanks,

Jessie Rogers | Reporting Analyst | AAMVA | 4401 Wilson Blvd., Suite 700 Arlington, Va.

Good morning,

Thank you for your response on these errors. AAMVA recommends that AK continue working with the courts to let them know how important it is to report the convictions within the required time and with the correct information.

For the data quality issues, hopefully we see AK become green due to the changes in staff refining error correction processes to reduce unnecessary correction attempts. AAMVA also recommends the AAMVA Systems Training which aims to develop education, training and learning opportunities that meet the needs of AAMVA's membership in the use of all the systems and procedures to ensure commercial driver safety and compliance with Federal regulations. **NOTE:** All courses are **free** for AAMVA members. Click the following link to view the course catalogue and to register or enroll in a session: <http://aamva.intevista.com>. If you experience trouble enrolling, or if you would like more information on any of the courses, please send an email to trainer@aamva.org.

We will monitor this tab and the others to see if AK improves. Once Alaska is green for three consecutive months in each tab, we will close that sub ticket for the tab.

Thanks,

Jessie Rogers | Reporting Analyst | AAMVA | 4401 Wilson Blvd., Suite 700 Arlington, Va.

Entered on 10/15/2015 at 13:16:39 EDT (GMT-0400) by Nichole Tham:

Good afternoon,

Thank you for this notification. Both DMV and FMCSA are aware of the issues noted in the report and DMV is actively working to resolve them. Some factors contributing to the Timeliness/Quality Errors:

The Timeliness Errors are due to staff diligently working the backlog of E-Dispo records that were not reported to DMV by the courts. These will continue to be high until that backlog is caught up. Part of this delay is attributed to the lack of distinction between CDL/non-CDL citations; additional steps are required to identify and manually update CDL citations/pointers in CDLIS, which significantly slows the process. Although DMV has expressed the need for the Department of Public Safety (DPS) to add a "CDL Indicator" to citation forms, both DPS and the Alaska Court System (ACS) has deemed it impracticable. Staff must continue to manually decipher each out of state license record to see if it is a CDL.

The Quality Errors are in part because there has been a large learning curve for staff, and because AAMVA

reports multiple attempts to submit the same record as separate errors, which skews the percentages. Staff are refining error correction processes to reduce unnecessary correction attempts which should reduce error compounding overall.

Sincerely,

Nichole Tham

Subject: USCHI Exemption Request - Deadline TONIGHT
Attachments: 2017-05-30 USCHI Exemption ODOT Comments.pdf

Hello PRC,

I just noticed [this the other day on the Federal Register](#) and at first it seemed like a rather harmless exemption request, but upon further consideration I think SDLAs need to weigh in to avoid an outcome we may not want. I have attached Oregon's comments for your reference, but see what you think. **Deadline to comment is 11:59 pm tonight** – apologies for the very short notice.

Thanks,
Russ

RE: Federal Docket Management System (FDMS) Docket Number FMCSA-2017-0133,
Commercial Driver's License: Application for Exemption; U.S. Customer Harvesters, Inc.
(USCHI)

Thank you for providing the Oregon Department of Transportation Driver and Motor Vehicle Services Division (DMV) an opportunity to comment on this exemption request. The exemption, as Oregon understands it, would allow operators of custom harvesters to obtain a CDL without an intrastate commerce restriction (K restriction), even if one would otherwise be required due to the driver's age. As I will explain below, Oregon DMV is concerned that the remedy sought by USCHI will have unintended consequences on interstate commerce, is cumbersome for state driver licensing agencies (SLDAs) responsible for issuing the CDL, and addresses only a symptom of the identified problem while ignoring its root cause.

First, allowing a driver aged 18 to 21 to obtain a CDL without a K restriction will have broad, unintended consequences. Under current federal regulation, drivers under the age of 21 are prohibited from operating a commercial motor vehicle (CMV) in interstate commerce unless otherwise excepted under 49 CFR 391.2. The generally accepted rationale for this restriction is that younger, less experienced drivers are involved in a higher rate of CMV and non-CMV crashes and therefore pose a greater safety risk to the motoring public. By limiting young drivers to intrastate commerce, they can gain experience driving shorter distances and, by extension, fewer hours than would be required for someone operating between states. If those younger custom harvester drivers were allowed to obtain a CDL without the K restriction, they could operate any CMV in interstate commerce and law enforcement would have no easy way to identify that the driver was restricted from doing so. In addition to just having knowledge of the exceptions in 49 CFR 391.2, now the officer would need to calculate the driver's age during the roadside stop and *still* know the custom harvester exemption to properly enforce the law. The result of this exemption, Oregon believes, is that 18- to 20-year-old drivers will exploit the

loophole and operate CMVs other than custom harvesters in interstate commerce, potentially posing a safety risk to road users.

Second, this exemption would create a burden for SDLAs in the issuance process. Oregon's driver issuance system is coded to automatically apply a K restriction if the CLP or CDL applicant is under the age of 21. Accommodating this exemption would require time consuming and costly programming work with no nexus to highway safety. Further, representatives across our 60 field offices would need a process by which they could confirm that an 18- to 20-year-old applicant was currently employed by a custom harvester, which would increase the already lengthy CLP/CDL transaction time. And what would happen if that driver was no longer employed in the custom harvester industry? DMV would receive no notification, and yet the driver would still be allowed to possess a CDL without the appropriate restriction.

Finally, USCHI's suggested remedy addresses only a symptom of their problem, not its root cause. The problem, as stated in the exemption request, is that "law enforcement officers interpret the 'K' restriction to mean that the license is invalid outside the issuing State, even though section 391.2(a) exempts younger custom harvester drivers from the 21-year-old age requirement when operating in interstate commerce." The root cause is not the licensing product or the restriction thereon; instead, it is that law enforcement officers are not familiar enough with the regulations – and the more technical components of the regulations, like specific driver qualification applicability provisions – to properly enforce them. Oregon suggests that the proper solution to address this root cause is better education of law enforcement agencies. Trying to solve it through the K restriction exemption will only cause further confusion for enforcement personnel and may have a deleterious effect on public safety.

Thank you again for the opportunity to comment and we look forward to FMCSA's response.

Good Afternoon Mina,

We have added AI SPEXS Structured testing to our schedule and will send you the Structured test plan 2 weeks prior to June 28th.

Please let me know of any questions.

Thank you,
Siri.

Subject: USCHI Exemption Request - Deadline TONIGHT

Hello PRC,

I just noticed [this the other day on the Federal Register](#) and at first it seemed like a rather harmless exemption request, but upon further consideration I think SDLAs need to weigh in to avoid an outcome we may not want. I have attached Oregon's comments for your reference, but see what you think. **Deadline to comment is 11:59 pm tonight** – apologies for the very short notice.

Thanks,
Russ

Thanks, Patrick! Even if states have time to comment to the effect of “our state seconds the opinion of Oregon” or something like that, it would should FMCSA that multiple state share some concerns about the exemption. Don't feel like you need to write extensive comments if I've already covered the issues you have.

Hello Russ,

Thank you for sharing this with us, and putting it on our radar. I have shared Oregon's letter with Cian from AAMVA's Regulatory Affairs and he has drafted a letter as well that is currently in the approval process. I will share the letter with you once it has been fully approved.

Thank you!

Subject: USCHI Exemption Request - Deadline TONIGHT

Hello PRC,

I just noticed [this the other day on the Federal Register](#) and at first it seemed like a rather harmless exemption request, but upon further consideration I think SDLAs need to weigh in to avoid an outcome we may not want. I have attached Oregon's comments for your reference, but see what you think. **Deadline to comment is 11:59 pm tonight** – apologies for the very short notice.

Thanks,
Russ

Attachments: AK Meeting Minutes 20170531.docx

Hi AK,

Attached are the minutes for today's meeting. Please let me know if I missed or misstated anything.

Sorry, but I need to make a correction to the number of test cases per week in order to finish in 6 weeks. It should be 14, so we will aim to finish 14 per week.

Please don't hesitate to let me know if you have questions.

Thanks,

Susan Creighton | Lead Systems Analyst - Quality Assurance Vehicles |AAMVA | 4401 Wilson Blvd, Ste 700, Arlington, VA 22203 | 703.908.5893 | screighton@aamva.org | www.aamva.org

MEETING AGENDA and MINUTES ALASKA – STATUS MEETING

Date of Meeting: 5/31/2017

Minutes Prepared By: Susan Creighton

Location: Conference Call – (888) 390-7016 pass code 1509728
Jaguar Conference Room Time: 4:30 PM – 5:30 PM ET

1. Purpose of Meeting *(prepare and distribute in advance of meeting)*

Discuss status of NMVTIS implementation re-write for AMIE integrated online updates and inquiries with initial load. Tentative implementation is set for early December 2017.

2. Attendance at Meeting *(add rows as necessary)*

Name	Department/Division	Invitee	Attended
Mina Peters	Alaska	√	√
David Nolen	Alaska	√	√
Dillon Pressley	Alaska – Resource Data	√	√
Patrick Brosnan	Alaska – Business	√	
Patrick Anderson	Alaska – Resource Data	√	√
Debra Leonardo	Alaska – Business	√	
Katie Smith	Alaska - Business	√	
Casey Garber	AAMVA, Business Solutions	√	√
Marney Michalowski	AAMVA, Business Solutions	√	
Susan Creighton	AAMVA, Lead Systems Analyst	√	√
Amir Chaudhry	AAMVA, Lead Systems Analyst	√	√

3. Meeting Agenda *(prepare and distribute in advance of meeting)*

- Online Scenario Testing
- Next Steps
- Questions & Concerns

4. Meeting Notes, Decisions, Issues

Online Scenario testing has commenced. AK is in the process of setting up the test data in NMVTIS for test scenarios where the vehicle is already titled in AK.

There are 82 test case and we are aiming at 6 weeks for the first pass, so that is 14 test cases per week.

There will be a small regression after all online scenario test cases have passed of approximately 20 test cases to ensure everything is still working after defects were corrected.

Susan sent AK the latest set of offset reports.

NEXT STEPS:

Continue Online Scenario Testing

5. Action Items *(add rows as necessary)*

Action	Assigned to	Due Date	Status
Send latest offset reports	Susan Creighton	5/25/2017	Complete

6. Issues Identified *(add rows as necessary; issues are unplanned items of impact that require action)*

Issues	Owner	Due Date	Status
.			

7. Next Meeting

Date: (MM/DD/CCYY)	6/7/2017	Time:	4:30 pm – 5:30 pm ET	Location:	Jaguar Conference Room
Agenda:	Will be Sent out Prior to Meeting

Subject: RD Transition
Attachments: Julie Knittle.vcf

Hello All,

Hope this finds you doing well! As you are likely aware, I am retiring. Friday, June 8 is my last real work day. I'll be staying on for a couple of months working extremely part time to finish a couple of projects. One of those is updating contacts, so you haven't truly heard the last of me.

Please begin reaching out to Julie Knittle, your new Regional Director, for assistance. I've attached her contact information for your convenience. Julie is currently in the AAMVA firehose orientation phase, but stands ready to provide support.

For my part, thank you so much for everything over the years. Thank you for responding to the many emails I've sent, the information you've provided, and the time you've made for me. I truly loved this job and will miss the people with whom I've had the pleasure of working! However, new adventures await!

I wish you all the very best, both personally and professionally. Be happy and take care!

And please pass this message on to the appropriate folks on your team. Thanks!

Sheila

*Sheila Prior
Regional Director until June 9.

Thanks, Patrick! Even if states have time to comment to the effect of "our state seconds the opinion of Oregon" or something like that, it would should FMCSA that multiple state share some concerns about the exemption. Don't feel like you need to write extensive comments if I've already covered the issues you have.

Subject: IDEC Executive Board is Seeking Board Members!
Attachments: IDEC Executive Board Application - May 2017.docx

The IDEC Executive Board is seeking two jurisdiction members to serve on the IDEC Executive Board - one from Region I and one from Region II. The Board is made up of one representative from each of the four AAMVA regions. The members of the Board bring global views and innovative ideas to the examiner training arena, provide outreach to the AAMVA jurisdictions to gain input on jurisdictional driver examiner training programs and provide accreditation of those driver examiner training programs. If you are interested in serving on the IDEC Executive Board, please fill out the IDEC Board Application form and send it back to: committees@aamva.org.

IDEC Executive Board Member Application Form

AAMVA is looking for volunteers to serve as Region I and II Representatives on the International Driver Examiner Certification (IDEC) Executive Board, a permanent AAMVA Executive Board which is directly responsible for maintaining and distributing new and revised IDEC materials to the AAMVA members. These include both commercial, non-commercial and motorcycle examiner testing materials. The IDEC Executive Board will meet face to face at least twice a year, as well as via conference call or webinar as the work load requires. Applicants need to come from an IDEC accredited jurisdiction and are required to attend and actively participate in all Executive Board meetings, assist in all Board activities, and be the liaison between the AAMVA Member Jurisdictions in your Region.

The working group is comprised of 6-members, representing all AAMVA regions with a range of experience in the testing and conducting driver licensing. The Board Representative is part of the governing body of the International Driver Examiner Certification Program and shall direct and supervise the affairs and publications of the program, promote its objectives, accredit jurisdictions, and certify the individual jurisdictional examiners.

After reviewing the required duties and qualifications, please complete this form if you are interested in serving on the Executive Board.

Contact Information

Name:			
Title:			
Organization:			
Street Address:			
City, State & Postal Code:			
Work Phone:		Email Address:	

Applicant Qualifications:

Board Representatives must be well versed in the driver license training process shall carry out the following duties:

The development, approval, and periodic review of program accreditation and examiner certification procedures including:

- (1) the core curriculum;
- (2) the examiner training programs conducted by jurisdictions;
- (3) regional training programs conducted for certification purposes;
- (4) the certification examinations and scoring levels used in the certification process;
- (5) eligibility requirements and the application form;
- (6) the program accreditation approval process; and
- (7) examiner de-certification and the appeal process.
- (8) marketing, and promotional strategies

The Executive Board will meet face to face at least once a year and hold conference calls or webinars as the work load requires. Board members are required to attend and actively participate in all meetings, assist in all activities; and be the liaison between the AAMVA member jurisdictions on driver examiner training related issues.

If you feel you meet the above qualifications and are interested in applying for the open position:
Please return the completed this application form and attach a detailed description of your professional background and experience no later than Friday, June 16, 2017 to Dianne Graham
committees@aamva.org

Agreement and Signature

By submitting this application, I affirm that I meet the qualifications and am willing to serve if selected. As supervisor, I authorize this applicant to serve if selected.

Hello Susan,

I've made sure that our database has a vehicle stored for every row with Old SOT set to "AI". Please update the records you created for the five gold/orange rows with Old State AI to include the state titling key I've filled out. The system relies on state titling key as a primary identifier.

Additionally, I got back a duplicate title result for the UA pertaining to **AISTRUCTREDTSTW01**

Subject: RE: AK NMVTIS Testing - Structured Testing values

Hi Susan,

I ran into two issues. I can't find any production data to support a vehicle of type "Van Camper", so I don't have a Make listed for that yet. Also, I can't find production data to support what I believe was supposed to be a Chevy Auto Carrier. I ended up using Aztec as the make instead.

Outside of these issues, I believe I've appropriately populated all the necessary fields. Please let me know if I've missed anything.

Subject: RE: AK NMVTIS Testing - Structured Testing values

This email comes from an external source, so remember, Think Before You Click!
Hi Dillon,

Please go ahead and set up all the data for the AK titles that should already be in the AK DB and on NMVTIS before we start the actual test scenario. These would be vehicles that are already titled in AK before the actual test scenario starts so we need to have the data updated in the AK DB and NMVTIS for those titles. These titles will be the yellow/gold highlighted cells in Columns G through N, the "Old" information. So go ahead and actually create the test data that will be used for AI which are highlighted yellow/gold in columns G – N. The instructions to do this are in the Comments column Z. For the gold highlighted cells the data is already in NMVTIS so you need to create the data on the AK DB via a backend method so that you do not send anything to NMVTIS. If you cannot do that, just go ahead and send a UA for

those but let me know so I can delete/update data on NMVTIS before we start. Be sure you use the data already designated in those columns if there is data. For the yellow, you need to provide me what data you used when you did the setup.

For the Columns O – X we can capture the rest as we go.

Thanks,
Susan Creighton / 703.908.5893 office

Subject: RE: AK NMVTIS Testing - Structured Testing values

Hello Susan,

I've gone ahead and allocated a large block of title numbers, and started filling out the information I anticipate will be used during the test. Title Date and State Titling Key will not be available until the test is executed. Please ignore sections in red (they'll represent test cases I intend to inquire about with Debra) and any zero values (will be replaced by the time I'm done).

I've yet to start looking up valid makes for these vehicles, but does what I've filled out thus far seem appropriate?

Is it safe to assume there's no harm in assigning information for a test case that later ends up unused / not resulting in a titling event? There are some cases where I'll need to run inquiries to know what data to use. For example, Test Case 021 seems to imply that Test Case 020 will return a theft result and shouldn't be titled.

Thank you,

Subject: RE: AK NMVTIS Testing - Structured Test Case 001

This email comes from an external source, so remember, Think Before You Click!
Hi Dillon,

Since I need to know the data that you are setting up in order to update our test tool, it would be most appreciated if you could go ahead and do the setup as well as update the test case plan with that information before we get started

(you don't need to redo the 1st test case). For this testing I'm going to give you a set of test cases you can do and you need to let me know which ones you did by sending the same info you sent me before for each one. You won't have to wait on me to validate before moving forward unless the test case has associated test cases or is highlighted blue indicating you need to contact AAMVA in which case I need to execute processes on our side before you move forward. So go ahead and do the setup for the test cases highlighted yellow/gold and provide the data you setup back to me in the test case plan and we will go from there.

Thanks,
Susan Creighton / 703.908.5893 office

Subject: AK NMVTIS Testing - Structured Test Case 001

Alright Susan,

I've deduced that 12,001-18,000 lbs. is the appropriate weight range for the information I input. The titling process has completed without sending an inquiry. The previous inquiries were from inputting values typical of a passenger vehicle as a sanity check.

I've attached the test case plan. Do you want me to attach it after each test case? Are we still doing one test case at a time?

Thank you,

Subject: RE: AK NMVTIS Testing - Structured Testing values

Hi Susan,

I ran into two issues. I can't find any production data to support a vehicle of type "Van Camper", so I don't have a Make listed for that yet. Also, I can't find production data to support what I believe was supposed to be a Chevy Auto Carrier. I ended up using Aztec as the make instead.

Outside of these issues, I believe I've appropriately populated all the necessary fields. Please let me know if I've missed anything.

Thank you,

This email comes from an external source, so remember, Think Before You Click!
Hi Dillon,

Please go ahead and set up all the data for the AK titles that should already be in the AK DB and on NMVTIS before we start the actual test scenario. These would be vehicles that are already titled in AK before the actual test scenario starts so we need to have the data updated in the AK DB and NMVTIS for those titles. These titles will be the yellow/gold highlighted cells in Columns G through N, the "Old" information. So go ahead and actually create the test data that will be used for AI which are highlighted yellow/gold in columns G – N. The instructions to do this are in the Comments column Z. For the gold highlighted cells the data is already in NMVTIS so you need to create the data on the AK DB via a backend method so that you do not send anything to NMVTIS. If you cannot do that, just go ahead and send a UA for

those but let me know so I can delete/update data on NMVTIS before we start. Be sure you use the data already designated in those columns if there is data. For the yellow, you need to provide me what data you used when you did the setup.

For the Columns O – X we can capture the rest as we go.

Thanks,
Susan Creighton / 703.908.5893 office

Subject: RE: AK NMVTIS Testing - Structured Testing values

Hello Susan,

I've gone ahead and allocated a large block of title numbers, and started filling out the information I anticipate will be used during the test. Title Date and State Titling Key will not be available until the test is executed. Please ignore sections in red (they'll represent test cases I intend to inquire about with Debra) and any zero values (will be replaced by the time I'm done).

I've yet to start looking up valid makes for these vehicles, but does what I've filled out thus far seem appropriate?

Is it safe to assume there's no harm in assigning information for a test case that later ends up unused / not resulting in a titling event? There are some cases where I'll need to run inquiries to know what data to use. For example, Test Case 021 seems to imply that Test Case 020 will return a theft result and shouldn't be titled.

Thank you,

This email comes from an external source, so remember, Think Before You Click!
Hi Dillon,

Since I need to know the data that you are setting up in order to update our test tool, it would be most appreciated if you could go ahead and do the setup as well as update the test case plan with that information before we get started

(you don't need to redo the 1st test case). For this testing I'm going to give you a set of test cases you can do and you need to let me know which ones you did by sending the same info you sent me before for each one. You won't have to wait on me to validate before moving forward unless the test case has associated test cases or is highlighted blue indicating you need to contact AAMVA in which case I need to execute processes on our side before you move forward. So go ahead and do the setup for the test cases highlighted yellow/gold and provide the data you setup back to me in the test case plan and we will go from there.

Thanks,
Susan Creighton / 703.908.5893 office

Subject: AK NMVTIS Testing - Structured Test Case 001

Alright Susan,

I've deduced that 12,001-18,000 lbs. is the appropriate weight range for the information I input. The titling process has completed without sending an inquiry. The previous inquiries were from inputting values typical of a passenger vehicle as a sanity check.

I've attached the test case plan. Do you want me to attach it after each test case? Are we still doing one test case at a time?

Thank you,

Hello Susan,

I've made sure that our database has a vehicle stored for every row with Old SOT set to "AI". Please update the records you created for the five gold/orange rows with Old State AI to include the state titling key I've filled out. The system relies on state titling key as a primary identifier.

Additionally, I got back a duplicate title result for the UA pertaining to **AISTRUCTREDTSTW01**

Subject: IDEC Executive Board is Seeking Board Members!
Attachments: IDEC Executive Board Application - June 2017.docx

The IDEC Executive Board is seeking two jurisdiction members to serve on the IDEC Executive Board - one from Region I and one from Region II. The Board is made up of one representative from each of the four AAMVA regions. The members of the Board bring global views and innovative ideas to the examiner training arena, provide outreach to the AAMVA jurisdictions to gain input on jurisdictional driver examiner training programs and provide accreditation of those driver examiner training programs. Applicants should have experience in the testing and conducting of driver examinations. If you are interested in serving on the IDEC Executive Board, please fill out the IDEC Board Application form and send it back to: committees@aamva.org.

IDEC Executive Board Member Application Form

AAMVA is looking for volunteers to serve as Region I and II Representatives on the International Driver Examiner Certification (IDEC) Executive Board, a permanent AAMVA Executive Board which is directly responsible for maintaining and distributing new and revised IDEC materials to the AAMVA members. These include both commercial, non-commercial and motorcycle examiner testing materials. The IDEC Executive Board will meet face to face at least twice a year, as well as via conference call or webinar as the work load requires. Applicants need to come from an IDEC accredited jurisdiction and are required to attend and actively participate in all Executive Board meetings, assist in all Board activities, and be the liaison between the AAMVA Member Jurisdictions in your Region. Applicants should have or have had driver examination experience.

The working group is comprised of 6-members, representing all AAMVA regions with a range of experience in the testing and conducting of driver examination. The Board Representative is part of the governing body of the International Driver Examiner Certification Program and shall direct and supervise the affairs and publications of the program, promote its objectives, accredit jurisdictions, and certify the individual jurisdictional examiners.

After reviewing the required duties and qualifications, please complete this form if you are interested in serving on the Executive Board.

Contact Information

Name:			
Title:			
Organization:			
Street Address:			
City, State & Postal Code:

Applicant Qualifications:

Board Representatives must be well versed in the driver license training process and need to have or have had driver examination experience. The IDEC Board Representative shall carry out the following duties:

The development, approval, and periodic review of program accreditation and examiner certification procedures including:

- (1) the core curriculum;
- (2) the examiner training programs conducted by jurisdictions;
- (3) regional training programs conducted for certification purposes;
- (4) the certification examinations and scoring levels used in the certification process;
- (5) eligibility requirements and the application form;
- (6) the program accreditation approval process; and
- (7) examiner de-certification and the appeal process.
- (8) marketing, and promotional strategies

The Executive Board will meet face to face at least once a year and hold conference calls or webinars as the work load requires. Board members are required to attend and actively participate in all meetings, assist in all activities; and be the liaison between the AAMVA member jurisdictions on driver examiner training related issues.

If you feel you meet the above qualifications and are interested in applying for the open position:
Please return the completed this application form and attach a detailed description of your professional background and experience no later than Friday, June 16, 2017 to Dianne Graham
(committees@aamva.org)

Agreement and Signature

By submitting this application, I affirm that I meet the qualifications and am willing to serve if selected. As supervisor, I authorize this applicant to serve if selected.

NOTE:

- ‘Appointments’ are individual schedules which can include 1-3 segments; more than one per Applicant is possible if he/she is scheduled for additional tests (previous failure, upgrade, *etc.*)
- ‘Scheduled’ and ‘Administered’ are individual segments
 - ‘Scheduled’ is usually 3 times the ‘Appointments’ but can be for fewer segments (*i.e.*, a previous failure requiring only scheduling of 1 or 2 segments)
 - ‘Administered’ is the actual number of segments for which a test was given (less than ‘Scheduled’ when a segment is failed and subsequent segments are cancelled)

Subject: RE: AK NMVTIS Testing - Structured Testing values

Hi Dillon,

I have updated the state titling key for the gold test cases. You can go ahead and get started. The duplicate you mentioned is meant to be there.

Also in answer to your question "Is it safe to assume there's no harm in assigning information for a test case that later ends up unused / not resulting in a titling event? There are some cases where I'll need to run inquiries to know what data to use. For example, Test Case 021 seems to imply that Test Case 020 will return a theft result and shouldn't be titled." is yes this is required. You should go ahead and title and your programs should determine if the records should be sent to NMVTIS as well as if an inquiry should be executed. As stated previously vehicles that are not to be sent to NMVTIS should not be inquired upon but it will be necessary to inquire on all other vehicles as you will need to respond according to what is found in the response to the inquiry.

Thanks,
Susan Creighton / 703.908.5893 office

Subject: RE: AK NMVTIS Testing - Structured Testing values

Hello Susan,

I've made sure that our database has a vehicle stored for every row with Old SOT set to "AI". Please update the records you created for the five gold/orange rows with Old State AI to include the state titling key I've filled out. The system relies on state titling key as a primary identifier.

Additionally, I got back a duplicate title result for the UA pertaining to **AISTRUCTREDTSTW01**

ALVIN **F2** All **F3** AAMVA **F4** MSG **F5** GEN **F7** PER **F8** DS **F9** VEH **F10** DL

Subject: RE: AK NMVTIS Testing - Structured Testing values

Hi Susan,

I ran into two issues. I can't find any production data to support a vehicle of type "Van Camper", so I don't have a Make listed for that yet. Also, I can't find production data to support what I believe was supposed to be a Chevy Auto Carrier. I ended up using Aztec as the make instead.

Outside of these issues, I believe I've appropriately populated all the necessary fields. Please let me know if I've missed anything.

Thank you,

Subject: RE: AK NMVTIS Testing - Structured Testing values

This email comes from an external source, so remember, Think Before You Click!
Hi Dillon,

Please go ahead and set up all the data for the AK titles that should already be in the AK DB and on NMVTIS before we start the actual test scenario. These would be vehicles that are already titled in AK before the actual test scenario starts so we need to have the data updated in the AK DB and NMVTIS for those titles. These titles will be the yellow/gold highlighted cells in Columns G through N, the "Old" information. So go ahead and actually create the test data that will be used for AI which are highlighted yellow/gold in columns G – N. The instructions to do this are in the Comments column Z. For the gold highlighted cells the data is already in NMVTIS so you need to create the data on the AK DB via a backend method so that you do not send anything to NMVTIS. If you cannot do that, just go ahead and send a UA for those but let me know so I can delete/update data on NMVTIS before we start. Be sure you use the data already designated in those columns if there is data. For the yellow, you need to provide me what data you used when you did the setup.

For the Columns O – X we can capture the rest as we go.

Thanks,
Susan Creighton / 703.908.5893 office

Subject: RE: AK NMVTIS Testing - Structured Testing values

Hello Susan,

I've gone ahead and allocated a large block of title numbers, and started filling out the information I anticipate will be used during the test. Title Date and State Titling Key will not be available until the test is executed. Please ignore sections in red (they'll represent test cases I intend to inquire about with Debra) and any zero values (will be replaced by the time I'm done).

I've yet to start looking up valid makes for these vehicles, but does what I've filled out thus far seem appropriate?

Is it safe to assume there's no harm in assigning information for a test case that later ends up unused / not resulting in a titling event? There are some cases where I'll need to run inquiries to know what data to use. For example, Test Case 021 seems to imply that Test Case 020 will return a theft result and shouldn't be titled.

Thank you,

Subject: RE: AK NMVTIS Testing - Structured Test Case 001

This email comes from an external source, so remember, Think Before You Click!

Hi Dillon,

Since I need to know the data that you are setting up in order to update our test tool, it would be most appreciated if you could go ahead and do the setup as well as update the test case plan with that information before we get started (you don't need to redo the 1st test case). For this testing I'm going to give you a set of test cases you can do and you need to let me know which ones you did by sending the same info you sent me before for each one. You won't have to wait on me to validate before moving forward unless the test case has associated test cases or is highlighted blue indicating you need to contact AAMVA in which case I need to execute processes on our side before you move forward. So go ahead and do the setup for the test cases highlighted yellow/gold and provide the data you setup back to me in the test case plan and we will go from there.

Thanks,

Susan Creighton / 703.908.5893 office

Subject: AK NMVTIS Testing - Structured Test Case 001

Alright Susan,

I've deduced that 12,001-18,000 lbs. is the appropriate weight range for the information I input. The titling process has completed without sending an inquiry. The previous inquiries were from inputting values typical of a passenger vehicle as a sanity check.

I've attached the test case plan. Do you want me to attach it after each test case? Are we still doing one test case at a time?

Thank you,

Subject: AK- MPR Summary Report
Attachments: MPR Summary Report- AK.xlsx

Title:	CD90.7.2 MPR Summary Report
Timing:	Monthly
Regulation:	<p>§ 384.207: Notification of Licensing</p> <p>Within the period defined in § 383.73(h) of this subchapter, the State must:</p> <ul style="list-style-type: none"> (a) Notify the operator of the CDLIS of each CLP or CDL issuance; (b) Notify the operator of the CDLIS of any changes in driver identification information; and (c) In the case of transfer issuances, implement the Change State of Record transaction, as specified by the CDLIS, in conjunction with the previous State of record and the operator of the CDLIS.
Transactions:	Add Driver (UA); Change State of Record (UD); Delete Driver (UE)
Purpose:	*This report displays summary information for the Master Pointer Records (MPRs) for a State of Record. The summary includes the addition of the new MPRs to the SOR, number of Change State of Records from and to the SOR, and the number of MPRs deleted. The subtotal of MPRs added or deleted to the State's MPR count for the month is also provided. It displays the count of Master Pointer Records (MPRs) currently present in CDLIS and the percentage of Master Pointer Records currently in state has in CDLIS.
Report Sections:	<p>Header: Report filter information</p> <p>Detail: The MPR(s) added and removed for a State of Record</p> <p>Summary Section:</p> <ul style="list-style-type: none"> * Total number of new MPR(s) added * Total number of Change State of Record (CSOR) moved into State * Subtotal of MPR(s) added to State's Total MPR Count * Total number of MPR(s) deleted * Total number of Change State of Record (CSOR) moved out of State * Subtotal of MPR(s) removed from State's Total MPR Count * MPR Count as of Report Date * Total number of MPR(s) in CDLIS as of Report End Date * 'ST' Percentage (%) as of Report End Date

NOTE: The current MPR Summary Report for your state does not include the CDL status change of the Master Pointer Records (MPRs) i.e. the number of records that have upgraded to a CDLIS MPR and the number of records that have downgraded from a CDLIS MPR which impact the CDLIS MPR count at the Central Site. AAMVA is currently working on implementing a new report to include these counts.

Subject: RE: S2S Governance Committee F2F meeting - June 1, 2017 (ALL DAY)

Thanks to everyone for a great meeting today. Below is the language from Wisconsin's application notifying customers of the S2S process. I hope everyone has a safe trip home.

Chrissy

I understand that I must surrender for cancellation any driver license or identification card previously issued by another state before I may be issued a driver license or identification card in the State of Wisconsin. The State of Wisconsin will notify the other state that my driver license or identification card is surrendered and cancelled, and that I have been issued a Wisconsin license or identification card. (ss. 343.11(1) and (2), and 343.50(1)(b) Wis. Stats.) I certify that the information on this application is true under penalty of perjury and I am a resident of Wisconsin. (s. 343.14(5) Wis. Stats.)

Subject: RE: S2S Governance Committee F2F meeting - June 1, 2017 (ALL DAY)

Thanks to everyone for a great meeting today. Below is the language from Wisconsin's application notifying customers of the S2S process. I hope everyone has a safe trip home.

Chrissy

I understand that I must surrender for cancellation any driver license or identification card previously issued by another state before I may be issued a driver license or identification card in the State of Wisconsin. The State of Wisconsin will notify the other state that my driver license or identification card is surrendered and cancelled, and that I have been issued a Wisconsin license or identification card. (ss. 343.11(1) and (2), and 343.50(1)(b) Wis. Stats.) I certify that the information on this application is true under penalty of perjury and I am a resident of Wisconsin. (s. 343.14(5) Wis. Stats.)

Good morning from Alaska,

Congratulation to both of you! Shelia, I'm sad you're leaving...yet Julie, I'm excited that you're our new AAMVA contact! Could you point me in the direction of who to contact regarding AAMVA website and Sharepoint access for new hires? We just staffed two CDL PI grant funded positions working with CSTIMS and CDLIS/S2S and are eager to get them connected.

Sincerely,

Nichole Tham

Subject: RE: New AK DMV Staff

Hi Julie,

New staff are:

Andrew Castelli, Admin. Assistant, CSTIMS
Anchorage Driver Services
1300 W. Benson Blvd, Suite 100
Anchorage, AK 99503-3689
907-334-5958

Boyd Soule, Training Specialist, CDLIS/S2S
Anchorage Driver Services
1300 W. Benson Blvd, Suite 100
Anchorage, AK 99503-3689
907-334-5957

I'm not sure how your system works, but if you have to "model" access after other existing Alaska users please model after user Barbara Hord. Let me know if you need anything else.

Thanks again,

Nichole Tham

Subject: AK 4sld9hr3x11153810 3 nmvtis records
Attachments: NMVTIS DataChangeRequestForm_20170123.doc

Alaska has a customer with TX title #07130042386113633 daet of issue 01/27/2016. When attempting to process an Alaska title we find 3 nmvtis records. 1. Texas, 2. ID title # 021015467 issue date 07/02/2002, 3. IL title # x6244788003 issue date 09/01/2006.

Will you fix the records so Alaska can process?

Thank you,

NMVTIS DATA CHANGE REQUEST FORM

1 VIN per Form

INSTRUCTIONS

SEND Instructions: An email addressed to helpdesk@aamva.org from an authorized requester, must be sent along with a completed NMVTIS Data Change Request Form for each *record* to be changed. The subject line of the email should include the following: Requesting SOT VIN Number – Title/Brand Add/Modify/Delete

Subject Line Example: AA VIN 12345678901234567 - Title Add

Please note, this opens a ticket at AAMVA which will be sent to you. For all subsequent questions / additional information on this ticket, please update the last email sent with the ticket number by doing a Reply All. Do not send a separate email without the same subject (which includes the ticket information) or a separate ticket will be opened making it hard to track this change request.

If a correction needs to be made the ticket will be returned to the sender in PENDING status. Pending status creates an email to the sender with this line:

Additional information is required to continue working on your issue, please refer to the comments section in this e-mail for notes from the AAMVA Helpdesk.

You can reply directly to this e-mail with the required information and the ticket will be automatically updated and the AAMVA Helpdesk will be notified.

Workspace: External Production
Ticket: AA VIN 12345678901234567 - Title Add
Ticket Number: 123456

If the state needs to make corrections to the form (form was not filled out correctly) the state should make the corrections as noted in the comments section of the email mentioned above and send the ticket back to AAMVA using that same email by doing a Reply All and attaching the corrected form.

Email: helpdesk@aamva.org

Note - Please send the form ONLY in word document format to AAMVA Helpdesk. Do not convert in to PDF.

NMVTIS DATA CHANGE REQUEST FORM

1 VIN per Form

FORM Instructions:

I. Requester Information

- A. Your State (required)
- B. Date of Request (required)
- C. Your Name (required)
- D. Your Phone Number (required)

II. VIN

- A. Vehicle Identification Number of the Vehicle (required). This should be the VIN to be used on the updated record

III. VIN Change

- A. Provide the Old VIN if the VIN is changing

IV. Required Information for Title Add/Modify/Deletes

- A. **Title Number** – Required if adding/changing/deleting title data
- B. **Title Issue Date** – Required if adding/changing/deleting title data
- C. If the title being corrected was issued but never left the DMV (was not a negotiable title) check the box if answer is YES. Note: NMVTIS keeps a record of all negotiable titles in history in order to have a record of what was actually issued.
- D. **Add Title for Vehicle NOT on NMVTIS** (Option) – Check if adding a title for a vehicle that is not on NMVTIS (either the VIN does not exist on NMVTIS or the vehicle having the VIN on NMVTIS is a different vehicle than on NMVTIS).
 - 1. If adding title for a VIN that is currently not in NMVTIS, was an MCO presented as proof of ownership: Check the box if answer is YES
 - 2. Choose the reason you are asking for the data change from the drop down box by clicking on “You Must Choose Reason...” If you choose “Other” fill in the reason in the next text box.
- E. **Add Current Title to Existing NMVTIS Vehicle** (Option) – Check if adding a current title to an existing vehicle record in NMVTIS.
 - 1. Was the change due to change state of title: Check the box if answer is YES
 - 2. Was the change due to in-state title transfer: Check the box if answer is YES
 - 3. Choose the reason you are asking for the data change from the drop down box by clicking on “You Must Choose Reason...” If you choose “Other” fill in the reason in the next text box.
- F. **Modify Current Title on NMVTIS** (Option) – Check if modifying a current title on NMVTIS.
 - 1. Choose the reason you are asking for the data change from the drop down box by clicking on “You Must Choose Reason...” If you choose “Other” fill in the reason in the next text box.
- G. **Add History Title to NMVTIS** (Option) – Check if adding a title which has since been replaced by a newer title on NMVTIS.

NMVTIS DATA CHANGE REQUEST FORM

1 VIN per Form

1. Choose the reason you are asking for the data change from the drop down box by clicking on "You Must Choose Reason..." If you choose "Other" fill in the reason in the next text box.
- H. **Modify History NMVTIS Title** (Option) – Check if you are asking for a change to a title in NMVTIS history.
 1. Choose the reason you are asking for the data change from the drop down box by clicking on "You Must Choose Reason..." If you choose "Other" fill in the reason in the next text box.
- I. **Delete History Title** (Option) – Check if deleting a title in NMVTIS history. Note: Only delete if title was issued in error and never was negotiable or has been successfully recalled. NMVTIS keeps a record of all negotiable titles in history in order to have a record of what was actually issued.
- J. **Delete Current Title** (Option) – Check if deleting the most recent title in NMVTIS. Note: Only delete if title was issued in error and never was negotiable or has been successfully recalled. NMVTIS keeps a record of all negotiable titles in history in order to have a record of what was actually issued. To move this record to history select the Modify Current Title on NMVTIS Option.
- K. **Reset Change State of Title (CSOT) Flag** (Option) – Check if you need to have the CSOT Flag reset. In order to reset the CSOT Flag you must be the OLD SOT and confirm that the data existing on NMVTIS prior to the change matches the data that is on the State's database. If the data does not match you must ensure the data on the State's database or on NMVTIS is updated (whichever needs correction) before resetting the flag. If the record has been purged/ archived off the State's database, you must also request that the record be updated on NMVTIS to Purged. In addition to checking Reset CSOT Option also check Modify Current Title option and check the Active to Purged box under NMVTIS Current Value section.

v. Title Information

Fill in the Current Value that is already on NMVTIS and the Requested Value you want on NMVTIS. If the record is not on NMVTIS fill in only the Requested Value

- A. Title Number
- B. Title Issue Date
- C. State Titling Key – needed only if state is correcting state titling key
- D. Transaction Date – Date the transaction was conducted at your state
- E. Make – needed only if state is correcting Make, use the Make as it is on the Title
- F. Model Year – needed only if state is correcting Model Year
- G. Odometer Reading – needed only if state is correcting Odometer Reading
- H. Odometer Unit of Measure – needed only if state is correcting Odometer Reading
- I. Data Available Indicator – needed only if state is changing data available indicator

vi. Required Information for Brand

- A. Brand Code on NMVTIS – Required if changing brand data
- B. Brand Date on NMVTIS – Required if changing brand data

NMVTIS DATA CHANGE REQUEST FORM

1 VIN per Form

C. Select one of the following:

1. **Add Brand** – Check if adding a brand

a) Choose the reason you are asking for the data change from the drop down box by clicking on “You Must Choose Reason...” If you choose “Other” fill in the reason in the next text box.

2. **Delete Brand** – Check if deleting an existing brand record. NOTE: Brands should not be removed unless they were reported in error. Do not remove brands from NMVTIS that are being removed from the State’s system due to vehicle age, etc.

a) Choose the reason you are asking for the data change from the drop down box by clicking on “You Must Choose Reason...” If you choose “Other” fill in the reason in the next text box.

NOTE: To modify a brand we must delete the old record and add a new record.

vii. Brand Information

A. Make – needed only if state is correcting make on brand record use the Make as it is on the Title

B. Model Year – needed only if state is correcting model year on brand record

C. Percent Damage and Percent of Damage Type – needed only if state records percent of damage on NMVTIS. Should only be filled in for Dismantled, Salvaged, Totaled, or Owner Retained brands.

1. Percent of Damage Type – A for Actual or T for Threshold

2. Percent of Damage – the percent of damage recorded

NMVTIS DATA CHANGE REQUEST FORM

1 VIN per Form

INSTRUCTIONS

SEND Instructions: An email addressed to helpdesk@aamva.org from an authorized requester, must be sent along with a completed NMVTIS Data Change Request Form for each *record* to be changed. The subject line of the email should include the following: Requesting SOT VIN Number – Title/Brand Add/Modify/Delete

Subject Line Example: AA VIN 12345678901234567 - Title Add

Please note, this opens a ticket at AAMVA which will be sent to you. For all subsequent questions / additional information on this ticket, please update the last email sent with the ticket number by doing a Reply All. Do not send a separate email without the same subject (which includes the ticket information) or a separate ticket will be opened making it hard to track this change request.

If a correction needs to be made the ticket will be returned to the sender in PENDING status. Pending status creates an email to the sender with this line:

Additional information is required to continue working on your issue, please refer to the comments section in this e-mail for notes from the AAMVA Helpdesk.

You can reply directly to this e-mail with the required information and the ticket will be automatically updated and the AAMVA Helpdesk will be notified.

Workspace: External Production

Ticket: AA VIN 12345678901234567 - Title Add

Ticket Number: 123456

If the state needs to make corrections to the form (form was not filled out correctly) the state should make the corrections as noted in the comments section of the email mentioned above and send the ticket back to AAMVA using that same email by doing a Reply All and attaching the corrected form.

Email: helpdesk@aamva.org

Note - Please send the form ONLY in word document format to AAMVA Helpdesk. Do not convert in to PDF.

NMVTIS DATA CHANGE REQUEST FORM

1 VIN per Form

FORM Instructions:

I. Requester Information

- A. Your State (required)
- B. Date of Request (required)
- C. Your Name (required)
- D. Your Phone Number (required)

II. VIN

- A. Vehicle Identification Number of the Vehicle (required). This should be the VIN to be used on the updated record

III. VIN Change

- A. Provide the Old VIN if the VIN is changing

IV. Required Information for Title Add/Modify/Deletes

- A. **Title Number** – Required if adding/changing/deleting title data
- B. **Title Issue Date** – Required if adding/changing/deleting title data
- C. If the title being corrected was issued but never left the DMV (was not a negotiable title) check the box if answer is YES. Note: NMVTIS keeps a record of all negotiable titles in history in order to have a record of what was actually issued.
- D. **Add Title for Vehicle NOT on NMVTIS** (Option) – Check if adding a title for a vehicle that is not on NMVTIS (either the VIN does not exist on NMVTIS or the vehicle having the VIN on NMVTIS is a different vehicle than on NMVTIS).
 - 1. If adding title for a VIN that is currently not in NMVTIS, was an MCO presented as proof of ownership: Check the box if answer is YES
 - 2. Choose the reason you are asking for the data change from the drop down box by clicking on "You Must Choose Reason..." If you choose "Other" fill in the reason in the next text box.
- E. **Add Current Title to Existing NMVTIS Vehicle** (Option) – Check if adding a current title to an existing vehicle record in NMVTIS.
 - 1. Was the change due to change state of title: Check the box if answer is YES
 - 2. Was the change due to in-state title transfer: Check the box if answer is YES
 - 3. Choose the reason you are asking for the data change from the drop down box by clicking on "You Must Choose Reason..." If you choose "Other" fill in the reason in the next text box.
- F. **Modify Current Title on NMVTIS** (Option) – Check if modifying a current title on NMVTIS.
 - 1. Choose the reason you are asking for the data change from the drop down box by clicking on "You Must Choose Reason..." If you choose "Other" fill in the reason in the next text box.
- G. **Add History Title to NMVTIS** (Option) – Check if adding a title which has since been replaced by a newer title on NMVTIS.

NMVTIS DATA CHANGE REQUEST FORM

1 VIN per Form

1. Choose the reason you are asking for the data change from the drop down box by clicking on "You Must Choose Reason..." If you choose "Other" fill in the reason in the next text box.
- H. **Modify History NMVTIS Title** (Option) – Check if you are asking for a change to a title in NMVTIS history.
 1. Choose the reason you are asking for the data change from the drop down box by clicking on "You Must Choose Reason..." If you choose "Other" fill in the reason in the next text box.
- I. **Delete History Title** (Option) – Check if deleting a title in NMVTIS history. Note: Only delete if title was issued in error and never was negotiable or has been successfully recalled. NMVTIS keeps a record of all negotiable titles in history in order to have a record of what was actually issued.
- J. **Delete Current Title** (Option) – Check if deleting the most recent title in NMVTIS. Note: Only delete if title was issued in error and never was negotiable or has been successfully recalled. NMVTIS keeps a record of all negotiable titles in history in order to have a record of what was actually issued. To move this record to history select the Modify Current Title on NMVTIS Option.
- K. **Reset Change State of Title (CSOT) Flag** (Option) – Check if you need to have the CSOT Flag reset. In order to reset the CSOT Flag you must be the OLD SOT and confirm that the data existing on NMVTIS prior to the change matches the data that is on the State's database. If the data does not match you must ensure the data on the State's database or on NMVTIS is updated (whichever needs correction) before resetting the flag. If the record has been purged/ archived off the State's database, you must also request that the record be updated on NMVTIS to Purged. In addition to checking Reset CSOT Option also check Modify Current Title option and check the Active to Purged box under NMVTIS Current Value section.

v. Title Information

Fill in the Current Value that is already on NMVTIS and the Requested Value you want on NMVTIS. If the record is not on NMVTIS fill in only the Requested Value

- A. Title Number
- B. Title Issue Date
- C. State Titling Key – needed only if state is correcting state titling key
- D. Transaction Date – Date the transaction was conducted at your state
- E. Make – needed only if state is correcting Make, use the Make as it is on the Title
- F. Model Year – needed only if state is correcting Model Year
- G. Odometer Reading – needed only if state is correcting Odometer Reading
- H. Odometer Unit of Measure – needed only if state is correcting Odometer Reading
- I. Data Available Indicator – needed only if state is changing data available indicator

vi. Required Information for Brand

- A. Brand Code on NMVTIS – Required if changing brand data
- B. Brand Date on NMVTIS – Required if changing brand data

NMVTIS DATA CHANGE REQUEST FORM

1 VIN per Form

C. Select one of the following:

1. **Add Brand** – Check if adding a brand

a) Choose the reason you are asking for the data change from the drop down box by clicking on “You Must Choose Reason...” If you choose “Other” fill in the reason in the next text box.

2. **Delete Brand** – Check if deleting an existing brand record. NOTE: Brands should not be removed unless they were reported in error. Do not remove brands from NMVTIS that are being removed from the State’s system due to vehicle age, etc.

a) Choose the reason you are asking for the data change from the drop down box by clicking on “You Must Choose Reason...” If you choose “Other” fill in the reason in the next text box.

NOTE: To modify a brand we must delete the old record and add a new record.

vii. Brand Information

A. Make – needed only if state is correcting make on brand record use the Make as it is on the Title

B. Model Year – needed only if state is correcting model year on brand record

C. Percent Damage and Percent of Damage Type – needed only if state records percent of damage on NMVTIS. Should only be filled in for Dismantled, Salvaged, Totaled, or Owner Retained brands.

1. Percent of Damage Type – A for Actual or T for Threshold

2. Percent of Damage – the percent of damage recorded

Notification of Ticket Registration

Thank you for opening a ticket with the AAMVA Operations Help Desk. Meeting your needs is important to us.

An AAMVA Operations representative has been assigned to review your request. AAMVA's Help Desk office hours are 7am ET - 10pm ET Monday through Friday and 8am ET - 4:30pm ET on Saturday. If this request was received within this timeframe, the representative will be contacting you shortly in regards to completing your request.

If this request was made after hours, it will be actively worked during the morning of the next business day. If you have any questions, or if this is an after-hours emergency, please contact the AAMVA Operations Department by replying to this email, or by calling 1-888-226-8280 option 1.

Ticket: AK 4sld9hr3x11153810 3 nmvtis records
Ticket Number:166519

Status:Request **Date:** 06/02/2017
Time: 14:09:56 **Created By:**janice.torsen@alaska.gov

Comment:

Alaska has a customer with TX title #07130042386113633 daet of issue 01/27/2016. When attempting to process an Alaska title we find 3 nmvtis records. 1. Texas, 2. ID title # 021015467 issue date 07/02/2002, 3. IL title # x6244788003 issue date 09/01/2006.
Will you fix the records so Alaska can process?

Thank you,

Janice Torsen

NMVTIS DATA CHANGE REQUEST FORM

1 VIN per Form

INSTRUCTIONS

SEND Instructions: An email addressed to helpdesk@aamva.org from an authorized requester, must be sent along with a completed NMVTIS Data Change Request Form for each *record* to be changed. The subject line of the email should include the following: Requesting SOT VIN Number – Title/Brand Add/Modify/Delete

Subject Line Example: AA VIN 12345678901234567 - Title Add

Please note, this opens a ticket at AAMVA which will be sent to you. For all subsequent questions / additional information on this ticket, please update the last email sent with the ticket number by doing a Reply All. Do not send a separate email without the same subject (which includes the ticket information) or a separate ticket will be opened making it hard to track this change request.

If a correction needs to be made the ticket will be returned to the sender in PENDING status. Pending status creates an email to the sender with this line:

Additional information is required to continue working on your issue, please refer to the comments section in this e-mail for notes from the AAMVA Helpdesk.

You can reply directly to this e-mail with the required information and the ticket will be automatically updated and the AAMVA Helpdesk will be notified.

Workspace: External Production
Ticket: AA VIN 12345678901234567 - Title Add
Ticket Number: 123456

If the state needs to make corrections to the form (form was not filled out correctly) the state should make the corrections as noted in the comments section of the email mentioned above and send the ticket back to AAMVA using that same email by doing a Reply All and attaching the corrected form.

Email: helpdesk@aamva.org

Note - Please send the form ONLY in word document format to AAMVA Helpdesk. Do not convert in to PDF.

NMVTIS DATA CHANGE REQUEST FORM

1 VIN per Form

FORM Instructions:

I. Requester Information

- A. Your State (required)
- B. Date of Request (required)
- C. Your Name (required)
- D. Your Phone Number (required)

II. VIN

- A. Vehicle Identification Number of the Vehicle (required). This should be the VIN to be used on the updated record

III. VIN Change

- A. Provide the Old VIN if the VIN is changing

IV. Required Information for Title Add/Modify/Deletes

- A. **Title Number** – Required if adding/changing/deleting title data
- B. **Title Issue Date** – Required if adding/changing/deleting title data
- C. If the title being corrected was issued but never left the DMV (was not a negotiable title) check the box if answer is YES. Note: NMVTIS keeps a record of all negotiable titles in history in order to have a record of what was actually issued.
- D. **Add Title for Vehicle NOT on NMVTIS** (Option) – Check if adding a title for a vehicle that is not on NMVTIS (either the VIN does not exist on NMVTIS or the vehicle having the VIN on NMVTIS is a different vehicle than on NMVTIS).
 - 1. If adding title for a VIN that is currently not in NMVTIS, was an MCO presented as proof of ownership: Check the box if answer is YES
 - 2. Choose the reason you are asking for the data change from the drop down box by clicking on "You Must Choose Reason..." If you choose "Other" fill in the reason in the next text box.
- E. **Add Current Title to Existing NMVTIS Vehicle** (Option) – Check if adding a current title to an existing vehicle record in NMVTIS.
 - 1. Was the change due to change state of title: Check the box if answer is YES
 - 2. Was the change due to in-state title transfer: Check the box if answer is YES
 - 3. Choose the reason you are asking for the data change from the drop down box by clicking on "You Must Choose Reason..." If you choose "Other" fill in the reason in the next text box.
- F. **Modify Current Title on NMVTIS** (Option) – Check if modifying a current title on NMVTIS.
 - 1. Choose the reason you are asking for the data change from the drop down box by clicking on "You Must Choose Reason..." If you choose "Other" fill in the reason in the next text box.
- G. **Add History Title to NMVTIS** (Option) – Check if adding a title which has since been replaced by a newer title on NMVTIS.

NMVTIS DATA CHANGE REQUEST FORM

1 VIN per Form

1. Choose the reason you are asking for the data change from the drop down box by clicking on "You Must Choose Reason..." If you choose "Other" fill in the reason in the next text box.
- H. **Modify History NMVTIS Title** (Option) – Check if you are asking for a change to a title in NMVTIS history.
 1. Choose the reason you are asking for the data change from the drop down box by clicking on "You Must Choose Reason..." If you choose "Other" fill in the reason in the next text box.
- I. **Delete History Title** (Option) – Check if deleting a title in NMVTIS history. Note: Only delete if title was issued in error and never was negotiable or has been successfully recalled. NMVTIS keeps a record of all negotiable titles in history in order to have a record of what was actually issued.
- J. **Delete Current Title** (Option) – Check if deleting the most recent title in NMVTIS. Note: Only delete if title was issued in error and never was negotiable or has been successfully recalled. NMVTIS keeps a record of all negotiable titles in history in order to have a record of what was actually issued. To move this record to history select the Modify Current Title on NMVTIS Option.
- K. **Reset Change State of Title (CSOT) Flag** (Option) – Check if you need to have the CSOT Flag reset. In order to reset the CSOT Flag you must be the OLD SOT and confirm that the data existing on NMVTIS prior to the change matches the data that is on the State's database. If the data does not match you must ensure the data on the State's database or on NMVTIS is updated (whichever needs correction) before resetting the flag. If the record has been purged/ archived off the State's database, you must also request that the record be updated on NMVTIS to Purged. In addition to checking Reset CSOT Option also check Modify Current Title option and check the Active to Purged box under NMVTIS Current Value section.

v. Title Information

Fill in the Current Value that is already on NMVTIS and the Requested Value you want on NMVTIS. If the record is not on NMVTIS fill in only the Requested Value

- A. Title Number
- B. Title Issue Date
- C. State Titling Key – needed only if state is correcting state titling key
- D. Transaction Date – Date the transaction was conducted at your state
- E. Make – needed only if state is correcting Make, use the Make as it is on the Title
- F. Model Year – needed only if state is correcting Model Year
- G. Odometer Reading – needed only if state is correcting Odometer Reading
- H. Odometer Unit of Measure –needed only if state is correcting Odometer Reading
- I. Data Available Indicator – needed only if state is changing data available indicator

vi. Required Information for Brand

- A. Brand Code on NMVTIS – Required if changing brand data
- B. Brand Date on NMVTIS – Required if changing brand data

NMVTIS DATA CHANGE REQUEST FORM

1 VIN per Form

C. Select one of the following:

1. **Add Brand** – Check if adding a brand

a) Choose the reason you are asking for the data change from the drop down box by clicking on “You Must Choose Reason...” If you choose “Other” fill in the reason in the next text box.

2. **Delete Brand** – Check if deleting an existing brand record. NOTE: Brands should not be removed unless they were reported in error. Do not remove brands from NMVTIS that are being removed from the State’s system due to vehicle age, etc.

a) Choose the reason you are asking for the data change from the drop down box by clicking on “You Must Choose Reason...” If you choose “Other” fill in the reason in the next text box.

NOTE: To modify a brand we must delete the old record and add a new record.

vii. Brand Information

A. Make – needed only if state is correcting make on brand record use the Make as it is on the Title

B. Model Year – needed only if state is correcting model year on brand record

C. Percent Damage and Percent of Damage Type – needed only if state records percent of damage on NMVTIS. Should only be filled in for Dismantled, Salvaged, Totaled, or Owner Retained brands.

1. Percent of Damage Type – A for Actual or T for Threshold

2. Percent of Damage – the percent of damage recorded

Good morning from Alaska,

Congratulation to both of you! Shelia, I'm sad you're leaving...yet Julie, I'm excited that you're our new AAMVA contact! Could you point me in the direction of who to contact regarding AAMVA website and Sharepoint access for new hires? We just staffed two CDL PI grant funded positions working with CSTIMS and CDLIS/S2S and are eager to get them connected.

Sincerely,

Nichole Tham

IDEC Executive Board Seeks Volunteers

The IDEC Executive Board is seeking two jurisdiction members to serve on the IDEC Executive Board - one from Region I and one from Region II. The IDEC Board is made up of one representative from each of the four AAMVA regions. The members of the Board bring global views and innovative ideas to the examiner training arena, provide outreach to the AAMVA jurisdictions to gain input on jurisdictional driver examiner training programs and provide accreditation of those driver examiner training programs. If you are interested in serving on the IDEC Executive Board, please fill out the [IDEC Board Application form](#) and send it back to: committees@aamva.org.

OUR EVENTS

AAMVA Bids Adieu to Shiela Prior

AAMVA bids a fond farewell to Sheila Prior, Director of Member Support for Regions III and IV, as she heads into retirement. The AAMVA Community wishes her all the best on a well-deserved retirement – hear what her friends and colleagues had to say in this Farewell Video.

Knittle Welcomed as AAMVA's New Director for Member Support for Regions III and IV

AAMVA welcomes Julie Knittle to the association as the new Director of Member Support for Regions III and IV. Julie has been a fixture in the AAMVA community for many years and most recently served as the Assistant Director of the Programs and Services Division for the Washington Department of Licensing. She brings to AAMVA more than 14 years of service to WA DOL and 27 years in state government. Members who normally contacted Sheila for assistance should now turn to Julie for their AAMVA needs. Julie's contact information at AAMVA is: jknittle@aamva.org, (571) 405-1016.

AAMVA Bids Adieu to Shiela Prior

AAMVA bids a fond farewell to Sheila Prior, Director of Member Support for Regions III and IV, as she heads into retirement. The AAMVA Community wishes her all the best on a well-deserved retirement – hear what her friends and colleagues had to say in this Farewell Video.

Knittle Welcomed as AAMVA's New Director for Member Support for Regions III and IV

AAMVA welcomes Julie Knittle to the association as the new Director of Member Support for Regions III and IV. Julie has been a fixture in the AAMVA community for many years and most recently served as the Assistant Director of the Programs and Services Division for the Washington Department of Licensing. She brings to AAMVA more than 14 years of service to WA DOL and 27 years in state government. Members who normally contacted Sheila for assistance should now turn to Julie for their AAMVA needs. Julie's contact information at AAMVA is: jknittle@aamva.org, (571) 405-1016.

IDEC Executive Board Seeks Volunteers

The IDEC Executive Board is seeking two jurisdiction members to serve on the IDEC Executive Board - one from Region I and one from Region II. The IDEC Board is made up of one representative from each of the four AAMVA regions. The members of the Board bring global views and innovative ideas to the examiner training arena, provide outreach to the AAMVA jurisdictions to gain input on jurisdictional driver examiner training programs and provide accreditation of those driver examiner training programs. If you are interested in serving on the IDEC Executive Board, please fill out the [IDEC Board Application form](#) and send it back to: committees@aamva.org.

IDEC Executive Board Seeks Volunteers

The IDEC Executive Board is seeking two jurisdiction members to serve on the IDEC Executive Board - one from Region I and one from Region II. The IDEC Board is made up of one representative from each of the four AAMVA regions. The members of the Board bring global views and innovative ideas to the examiner training arena, provide outreach to the AAMVA jurisdictions to gain input on jurisdictional driver examiner training programs and provide accreditation of those driver examiner training programs. If you are interested in serving on the IDEC Executive Board, please fill out the [IDEC Board Application form](#) and send it back to: committees@aamva.org.

AAMVA Bids Adieu to Shiela Prior

AAMVA bids a fond farewell to Sheila Prior, Director of Member Support for Regions III and IV, as she heads into retirement. The AAMVA Community wishes her all the best on a well-deserved retirement – hear what her friends and colleagues had to say in this Farewell Video.

Knittle Welcomed as AAMVA's New Director for Member Support for Regions III and IV

AAMVA welcomes Julie Knittle to the association as the new Director of Member Support for Regions III and IV. Julie has been a fixture in the AAMVA community for many years and most recently served as the Assistant Director of the Programs and Services Division for the Washington Department of Licensing. She brings to AAMVA more than 14 years of service to WA DOL and 27 years in state government. Members who normally contacted Sheila for assistance should now turn to Julie for their AAMVA needs. Julie's contact information at AAMVA is: jknittle@aamva.org, (571) 405-1016.

NMVTIS DATA CHANGE REQUEST FORM

1 VIN per Form

INSTRUCTIONS

SEND Instructions: An email addressed to helpdesk@aamva.org from an authorized requester, must be sent along with a completed NMVTIS Data Change Request Form for each *record* to be changed. The subject line of the email should include the following: Requesting SOT VIN Number – Title/Brand Add/Modify/Delete

Subject Line Example: AA VIN 12345678901234567 - Title Add

Please note, this opens a ticket at AAMVA which will be sent to you. For all subsequent questions / additional information on this ticket, please update the last email sent with the ticket number by doing a Reply All. Do not send a separate email without the same subject (which includes the ticket information) or a separate ticket will be opened making it hard to track this change request.

If a correction needs to be made the ticket will be returned to the sender in PENDING status. Pending status creates an email to the sender with this line:

Additional information is required to continue working on your issue, please refer to the comments section in this e-mail for notes from the AAMVA Helpdesk.

You can reply directly to this e-mail with the required information and the ticket will be automatically updated and the AAMVA Helpdesk will be notified.

Workspace: External Production
Ticket: AA VIN 12345678901234567 - Title Add
Ticket Number: 123456

If the state needs to make corrections to the form (form was not filled out correctly) the state should make the corrections as noted in the comments section of the email mentioned above and send the ticket back to AAMVA using that same email by doing a Reply All and attaching the corrected form.

Email: helpdesk@aamva.org

Note - Please send the form ONLY in word document format to AAMVA Helpdesk. Do not convert in to PDF.

NMVTIS DATA CHANGE REQUEST FORM

1 VIN per Form

FORM Instructions:

I. Requester Information

- A. Your State (required)
- B. Date of Request (required)
- C. Your Name (required)
- D. Your Phone Number (required)

II. VIN

- A. Vehicle Identification Number of the Vehicle (required). This should be the VIN to be used on the updated record

III. VIN Change

- A. Provide the Old VIN if the VIN is changing

IV. Required Information for Title Add/Modify/Deletes

- A. **Title Number** – Required if adding/changing/deleting title data
- B. **Title Issue Date** – Required if adding/changing/deleting title data
- C. If the title being corrected was issued but never left the DMV (was not a negotiable title) check the box if answer is YES. Note: NMVTIS keeps a record of all negotiable titles in history in order to have a record of what was actually issued.
- D. **Add Title for Vehicle NOT on NMVTIS** (Option) – Check if adding a title for a vehicle that is not on NMVTIS (either the VIN does not exist on NMVTIS or the vehicle having the VIN on NMVTIS is a different vehicle than on NMVTIS).
 - 1. If adding title for a VIN that is currently not in NMVTIS, was an MCO presented as proof of ownership: Check the box if answer is YES
 - 2. Choose the reason you are asking for the data change from the drop down box by clicking on "You Must Choose Reason..." If you choose "Other" fill in the reason in the next text box.
- E. **Add Current Title to Existing NMVTIS Vehicle** (Option) – Check if adding a current title to an existing vehicle record in NMVTIS.
 - 1. Was the change due to change state of title: Check the box if answer is YES
 - 2. Was the change due to in-state title transfer: Check the box if answer is YES
 - 3. Choose the reason you are asking for the data change from the drop down box by clicking on "You Must Choose Reason..." If you choose "Other" fill in the reason in the next text box.
- F. **Modify Current Title on NMVTIS** (Option) – Check if modifying a current title on NMVTIS.
 - 1. Choose the reason you are asking for the data change from the drop down box by clicking on "You Must Choose Reason..." If you choose "Other" fill in the reason in the next text box.
- G. **Add History Title to NMVTIS** (Option) – Check if adding a title which has since been replaced by a newer title on NMVTIS.

NMVTIS DATA CHANGE REQUEST FORM

1 VIN per Form

1. Choose the reason you are asking for the data change from the drop down box by clicking on "You Must Choose Reason..." If you choose "Other" fill in the reason in the next text box.
- H. **Modify History NMVTIS Title** (Option) – Check if you are asking for a change to a title in NMVTIS history.
 1. Choose the reason you are asking for the data change from the drop down box by clicking on "You Must Choose Reason..." If you choose "Other" fill in the reason in the next text box.
- I. **Delete History Title** (Option) – Check if deleting a title in NMVTIS history. Note: Only delete if title was issued in error and never was negotiable or has been successfully recalled. NMVTIS keeps a record of all negotiable titles in history in order to have a record of what was actually issued.
- J. **Delete Current Title** (Option) – Check if deleting the most recent title in NMVTIS. Note: Only delete if title was issued in error and never was negotiable or has been successfully recalled. NMVTIS keeps a record of all negotiable titles in history in order to have a record of what was actually issued. To move this record to history select the Modify Current Title on NMVTIS Option.
- K. **Reset Change State of Title (CSOT) Flag** (Option) – Check if you need to have the CSOT Flag reset. In order to reset the CSOT Flag you must be the OLD SOT and confirm that the data existing on NMVTIS prior to the change matches the data that is on the State's database. If the data does not match you must ensure the data on the State's database or on NMVTIS is updated (whichever needs correction) before resetting the flag. If the record has been purged/ archived off the State's database, you must also request that the record be updated on NMVTIS to Purged. In addition to checking Reset CSOT Option also check Modify Current Title option and check the Active to Purged box under NMVTIS Current Value section.

v. Title Information

Fill in the Current Value that is already on NMVTIS and the Requested Value you want on NMVTIS. If the record is not on NMVTIS fill in only the Requested Value

- A. Title Number
- B. Title Issue Date
- C. State Titling Key – needed only if state is correcting state titling key
- D. Transaction Date – Date the transaction was conducted at your state
- E. Make – needed only if state is correcting Make, use the Make as it is on the Title
- F. Model Year – needed only if state is correcting Model Year
- G. Odometer Reading – needed only if state is correcting Odometer Reading
- H. Odometer Unit of Measure –needed only if state is correcting Odometer Reading
- I. Data Available Indicator – needed only if state is changing data available indicator

vi. Required Information for Brand

- A. Brand Code on NMVTIS – Required if changing brand data
- B. Brand Date on NMVTIS – Required if changing brand data

NMVTIS DATA CHANGE REQUEST FORM

1 VIN per Form

C. Select one of the following:

1. **Add Brand** – Check if adding a brand

a) Choose the reason you are asking for the data change from the drop down box by clicking on “You Must Choose Reason...” If you choose “Other” fill in the reason in the next text box.

2. **Delete Brand** – Check if deleting an existing brand record. NOTE: Brands should not be removed unless they were reported in error. Do not remove brands from NMVTIS that are being removed from the State’s system due to vehicle age, etc.

a) Choose the reason you are asking for the data change from the drop down box by clicking on “You Must Choose Reason...” If you choose “Other” fill in the reason in the next text box.

NOTE: To modify a brand we must delete the old record and add a new record.

vii. Brand Information

A. Make – needed only if state is correcting make on brand record use the Make as it is on the Title

B. Model Year – needed only if state is correcting model year on brand record

C. Percent Damage and Percent of Damage Type – needed only if state records percent of damage on NMVTIS. Should only be filled in for Dismantled, Salvaged, Totaled, or Owner Retained brands.

1. Percent of Damage Type – A for Actual or T for Threshold

2. Percent of Damage – the percent of damage recorded

Subject: RE: Go-To Webinar- CDL Roundtable

Hello All,

Just a reminder to register for the Bi-Monthly Roundtable tomorrow. Do not forget to add it to your calendar after registering so you can access the link to the web meeting.

The CDL Division looks forward to speaking with you all.

Best,

Isabella Marra

Subject: Go-To Webinar- CDL Roundtable

CDL Bi-Monthly Roundtable occurs several times. Please register for the JUNE 6 Roundtable from 1:00PM-2:30PM ET by clicking on the link and following the directions:

<https://attendee.gotowebinar.com/rt/5961853694252701442>

Hello,

As you know we have been having difficulty with the number of people we can have on for the conference call. Thus, the CDL Team will start hosting the CDL Bi-Monthly Roundtable through Go-To Webinar. Please use the registration code above to register for the roundtable on June 6th from 1:00pm-2:30pm ET.

Please join us for our next FMCSA CDL Roundtable. To ensure our roundtable is valuable for our participants, the FMCSA CDL Division is requesting that you submit agenda items, questions, topics, and ideas that you would like discussed. Please submit them as soon as possible to allow the CDL Division sufficient time to prepare a response. Items should be sent to: CDLcompliance@dot.gov

The purpose of the call is to discuss topics on relevant issues that affect our State Partners, and FMCSA Divisions and Service Centers as it relates to the Federal Motor Carrier Safety Regulations and Commercial Driver Licensing.

As a reminder, the calls are 1:00-2:30 pm ET.

Should you have any questions or concerns, please send your requests to: CDLcompliance@dot.gov

After registering, you will receive a confirmation email containing information about joining the webinar.

Subject: AAMVA Training for Jurisdictions

*AAMVA Systems Training aims to develop education, training and learning opportunities that meet the needs of AAMVA's membership in the use of all the systems and procedures to ensure commercial driver safety and compliance with Federal regulations. These web-delivered programs do not require travel and are learner-centered, interactive and guaranteed to produce results. All courses are **free** for AAMVA members.*

Hello,

Please find the upcoming training schedule below:

PDPS:

June

6 TUE	2:00-4:00 PM ET	Introduction to the National Driver Register (basic)
7 WED	2:00-4:00 PM ET	PDPS Inquiry Transactions (intermediate)
8 Thu	2:00-4:00 PM ET	PDPS Broken Pointer Management (intermediate)

CDLIS and Related Topics:

June

13 TUE	2:00-4:00 PM ET	CDLIS A Overview (basic)
14 WED	2:00-4:00 PM ET	CDLIS B Inquiry Transactions (basic)
15 THU	2:00-4:00 PM ET	CDLIS C Update Transactions (basic)
16 FRI	2:00-4:00 PM ET	AAMVAnet Basics (basic)

20 TUE	2:00-4:00 PM ET	CD31 MPR DHR (intermediate)
21 WED	2:00-4:00 PM ET	CDLIS Resolving Broken and Missing Pointers (intermediate)
22 THU	2:00-4:00 PM ET	CDLIS 10 Year History (intermediate)

27 TUE	2:00-4:00 PM ET	UNI Basics (basic)
28 WED	2:00-4:00 PM ET	UNI Advanced A (advanced)
29 THU	2:00-4:00 PM ET	UNI Advanced B (advanced)

SPEXS (S2S):

June

5 MON	1:30-3:30 PM ET	SPEXS Overview (basic)
7 WED	1:30-3:30 PM ET	SPEXS Transactions AMIE (intermediate)
8 THU	1:30-3:30 PM ET	SPEXS Transactions NIEM (intermediate)
9 FRI	1:30-3:30 PM ET	SPEXS Batch Transactions (intermediate)

12 MON	1:30-3:30 PM ET	SPEXS Bulk Load (intermediate)
14 WED	1:30-3:30 PM ET	SPEXS State Procedures Manual (intermediate)
16 FRI	1:30-3:30 PM ET	SPEXS Web UI & Reports (intermediate)

***This schedule is tentative and subject to change without notice.

Click the link below to view the course catalog and to register or enroll in a session:

<http://aamva.intevista.com>.

If you experience trouble enrolling, or if you would like more information on any of the courses, please send an email to trainer@aamva.org.

We look forward to seeing you online,

AAMVA Training Team

Subject: AK NMVTIS Testing - 002, 005, 006, 011, 012
Attachments: TC002 Title Vehicle - (Title Add) (1 of 1).PNG; TC005 Title Vehicle (CSOT) (1 of 2).PNG; TC005 Title Vehicle (CSOT) (2 of 2).PNG; TC006 Title Vehicle (CSOT) (1 of 1).PNG; TC011 Title Vehicle (CSOT) (1 of 1).PNG; AK NMVTIS Online Structured Test Plan 20170605.xlsx

Good morning Susan,

I've attached my current version of the spreadsheet, as well as images for test cases 002, 005, 006, and 011. I've also performed TC012 which now correctly results in no messages being sent.

A few notes:

- TC005 returned the UT with errors, I'm assuming this is expected.
- State Titling Key wasn't being populated on our CSOT messages sent from the titling system. I had run into this before but couldn't find the cause. Between TC006 and TC011 I located the cause and fixed the issue. TC006 is the only CSOT that succeeded without a state titling key, and I believe the in-state change that'll be performed by TC007 will add the state titling key to the record.
- Originally TC012 correctly skipped sending inquiry messages but sent a UA message with AI title number 7277334. I fixed the issue, performed a Title Undo, removed the vehicle from our system, and titled it again as a new vehicle using 7277335. This correctly resulted in no messages being sent.
- We have the make "Mini Cooper" in our migrated data as "MNNI" rather than "MINI". I believe this to be a typo in the production and/or migrated data. I'll address this as soon as I can.

Unless I hear otherwise I'll continue performing the initial tests cases of each group where possible.

Thank you,

This email comes from an external source, so remember, Think Before You Click!
Hi Dillon,

I have updated the state titling key for the gold test cases. You can go ahead and get started. The duplicate you mentioned is meant to be there.

Also in answer to your question "Is it safe to assume there's no harm in assigning information for a test case that later ends up unused / not resulting in a titling event? There are some cases where I'll need to run inquiries to know what data to use. For example, Test Case 021 seems to imply that Test Case 020 will return a theft result and shouldn't be titled." is yes this is required. You should go ahead and title and your programs should determine if the records should be sent to NMVTIS as well as if an inquiry should be executed. As stated previously vehicles that are not to be sent to NMVTIS should not be inquired upon but it will be necessary to inquire on all other vehicles as you will need to respond according to what is found in the response to the inquiry.

Thanks,
Susan Creighton / 703.908.5893 office

Hello Susan,

I've made sure that our database has a vehicle stored for every row with Old SOT set to "AI". Please update the records you created for the five gold/orange rows with Old State AI to include the state titling key I've filled out. The system relies on state titling key as a primary identifier.

Additionally, I got back a duplicate title result for the UA pertaining to **AISTRUCTREDTSTW01**

Subject: RE: AK NMVTIS Testing - Structured Testing values

Hi Susan,

I ran into two issues. I can't find any production data to support a vehicle of type "Van Camper", so I don't have a Make listed for that yet. Also, I can't find production data to support what I believe was supposed to be a Chevy Auto Carrier. I ended up using Aztec as the make instead.

Outside of these issues, I believe I've appropriately populated all the necessary fields. Please let me know if I've missed anything.

Thank you,

Subject: RE: AK NMVTIS Testing - Structured Testing values

This email comes from an external source, so remember, Think Before You Click!
Hi Dillon,

Please go ahead and set up all the data for the AK titles that should already be in the AK DB and on NMVTIS before we start the actual test scenario. These would be vehicles that are already titled in AK before the actual test scenario starts so we need to have the data updated in the AK DB and NMVTIS for those titles. These titles will be the yellow/gold highlighted cells in Columns G through N, the "Old" information. So go ahead and actually create the test data that will be used for AI which are highlighted yellow/gold in columns G – N. The instructions to do this are in the Comments column Z. For the gold highlighted cells the data is already in NMVTIS so you need to create the data on the AK DB via a backend method so that you do not send anything to NMVTIS. If you cannot do that, just go ahead and send a UA for those but let me know so I can delete/update data on NMVTIS before we start. Be sure you use the data already designated in those columns if there is data. For the yellow, you need to provide me what data you used when you did the setup.

For the Columns O – X we can capture the rest as we go.

Thanks,
Susan Creighton / 703.908.5893 office

Subject: RE: AK NMVTIS Testing - Structured Testing values

Hello Susan,

I've gone ahead and allocated a large block of title numbers, and started filling out the information I anticipate will be used during the test. Title Date and State Titling Key will not be available until the test is executed. Please ignore sections in red (they'll represent test cases I intend to inquire about with Debra) and any zero values (will be replaced by the time I'm done).

I've yet to start looking up valid makes for these vehicles, but does what I've filled out thus far seem appropriate?

Is it safe to assume there's no harm in assigning information for a test case that later ends up unused / not resulting in a titling event? There are some cases where I'll need to run inquiries to know what data to use. For example, Test Case 021 seems to imply that Test Case 020 will return a theft result and shouldn't be titled.

Thank you,

Subject: RE: AK NMVTIS Testing - Structured Test Case 001

This email comes from an external source, so remember, Think Before You Click!

Hi Dillon,

Since I need to know the data that you are setting up in order to update our test tool, it would be most appreciated if you could go ahead and do the setup as well as update the test case plan with that information before we get started (you don't need to redo the 1st test case). For this testing I'm going to give you a set of test cases you can do and you need to let me know which ones you did by sending the same info you sent me before for each one. You won't have to wait on me to validate before moving forward unless the test case has associated test cases or is highlighted blue indicating you need to contact AAMVA in which case I need to execute processes on our side before you move forward. So go ahead and do the setup for the test cases highlighted yellow/gold and provide the data you setup back to me in the test case plan and we will go from there.

Thanks,

Susan Creighton / 703.908.5893 office

Subject: AK NMVTIS Testing - Structured Test Case 001

Alright Susan,

I've deduced that 12,001-18,000 lbs. is the appropriate weight range for the information I input. The titling process has completed without sending an inquiry. The previous inquiries were from inputting values typical of a passenger vehicle as a sanity check.

I've attached the test case plan. Do you want me to attach it after each test case? Are we still doing one test case at a time?

Thank you,

From: AAMVA Trainer <trainer@aamva.org>
Sent: Monday, June 5, 2017 9:26 AM
To: Tham, Nichole M (DOA)
Subject: Your Enrollment Information for 20170606 Introduction to the National Driver Register (basic)

Our records indicate that you enrolled in 20170606 Introduction to the National Driver Register (basic).

You may also be interested in this related class:

PDPS Inquiry Transactions
PDPS Update Transactions
PDPS S2S NDR Gen Transactions
PDPS Interactions
PDPS Broken Pointer Management
PDPS Cleanfile Processing

You can view the training schedule for these classes (and others) and enroll at aamva.intevista.com. Courses open for enrollment approximately one month in advance of the scheduled class.

To assist you with your long-range planning you will also find a Tentative Training Schedule available for download at aamva.intevista.com.

If you have any questions concerning these topics or the training schedule, please contact us via email at trainer@aamva.org.

Meeting Name

CDLIS Proposal Review Committee

Date(s) and Time of Meeting: Tuesday June 6th 2017, 11:00-12:30 EDT

Agenda Prepared By: Madhu Chandrasekharan

Location: GoToMeeting <https://global.gotomeeting.com/join/704935925>

Type: ☐ Conference Call (instructions below) ☒ Online Meeting (instructions below)

Dial In Information: Dial +1 (646) 749-3122, Access Code: 704-935-925

Purpose of Meeting: The purpose of this meeting is to discuss the items listed below under 'Meeting Agenda' with the CDLIS Working Group.

Meeting Attendance:

<i>Name</i>	<i>Jurisdiction/Organization</i>	<i>Attended</i>
Andy Frey	Iowa	<input type="checkbox"/>
Patrick McJannet	Montana	<input type="checkbox"/>
Kami Beers	Delaware	<input type="checkbox"/>
Amy Anthony		<input type="checkbox"/>
JoLynn Peck	Michigan	<input type="checkbox"/>
Russ Casler	Oregon	<input type="checkbox"/>
Mina Peters	Alaska	<input type="checkbox"/>
Pam Dsa	AAMVA	<input type="checkbox"/>
Loffie Jordaan		<input type="checkbox"/>
Mindy Stephens		<input type="checkbox"/>
Ashish Regmi		<input type="checkbox"/>
Madhu Chandrasekharan		<input type="checkbox"/>

Vikas Jain		<input type="checkbox"/>
Cian Cashin		<input type="checkbox"/>

Meeting Schedule/Agenda:

- a. S2S Update
- b. Modification of A91 ACD Code for Arizona
- c. Oregon to implement a Non Binary Gender Code
- d. CR for adding Puerto Rico as valid value to Medical Licensing Jurisdiction Code field
- e. Drug and Alcohol Clearing House Update
- f. National Registry Update

Notes, Decisions, Issues:

Action Items:

<i>Action Item</i>	<i>Assigned To</i>	<i>Status</i>
1. Reach out to Pam to discuss the possibility of having F2F meetings for the CDLIS WG as an incentive of membership	Madhu	In Progress
2. Update Medical Variance Validation Issues slides based on conversation	Madhu	In Progress
3. AAMVA and PRC meeting attendees will follow up on action items above to improve CDLIS Working Group Meeting participation.	AAMVA/PRC	In Progress

Next Meeting: Tuesday July 4th 2017, 11:00-12:30 EDT

From: twir@aamva.org
Sent: Monday, June 5, 2017 11:40 AM

IDEC Executive Board Seeks Volunteers

The IDEC Executive Board is seeking two jurisdiction members to serve on the IDEC Executive Board - one from Region I and one from Region II. The IDEC Board is made up of one representative from each of the four AAMVA regions. The members of the Board bring global views and innovative ideas to the examiner training arena, provide outreach to the AAMVA jurisdictions to gain input on jurisdictional driver examiner training programs and provide accreditation of those driver examiner training programs. If you are interested in serving on the IDEC Executive Board, please fill out the [IDEC Board Application form](#) and send it back to: committees@aamva.org.

JURISDICTION NEWS

Motorcycle Skills Tests and Motorcycle Licenses No Longer Required for Operation of Three-wheel Auto-cycles in Georgia

Based on a recent law change, beginning July 1, 2017, drivers in Georgia operating three-wheel auto-cycles (three-wheel motor vehicles controlled by a steering wheel) will no longer be required to possess a motorcycle license or motorcycle learner's permit. In addition, Georgia residents who wish to legally operate an auto-cycle in Georgia will no longer be required to take the DDS motorcycle knowledge test or motorcycle skills test. Instead, effective July 1, 2017, drivers in Georgia operating three-wheel auto-cycles will only be required to possess a valid Georgia Class C (regular) driver's license, a valid Georgia Class CP (regular) learner's permit, or any equivalent class of driver's license or learner's permit issued by another state. Governor Cuomo Announces Fake ID and Underage Drinking Sweeps at Summer Concerts Across New York

New York Governor Andrew M. Cuomo announced that DMV investigators and State Police, in cooperation with local law enforcement, have launched a 2017 summer concert crack down. As part of the state's "Operation Prevent" initiative, DMV held its first concert enforcement on Thursday, May 18, making 12 arrests at the Brad Paisley concert at Saratoga Performing Arts Center and 55 arrests at the Future concert at Darien Lake on May 24. At the Brad Paisley and Future concerts in May, fraudulent licenses from New York, Rhode Island, Illinois, Pennsylvania, Florida, Maryland, New Jersey, Connecticut and Florida were recovered. Operation Prevent Investigators will continue to conduct sweeps at venues this summer including SPAC, Darien Lake, Jones Beach, Canalside in Buffalo, CMAC in Canandaigua and the Lakeview Amphitheater in Syracuse, as well as other events where underage concertgoers are likely to gather. DMV's Division of Field Investigation perform the investigations in partnership with the State Liquor Authority, New York State Park Police, New York State Police, and local law enforcement agencies. [Read more here.](#)

FEDERAL NEWS

DOT Seeks To Renew Existing ICR On TIFIA Program

The Department of Transportation (DOT) [has submitted](#) an information collection request to the Office of Management and Budget (OMB) to renew an existing information collection which allows entities to apply for the Transportation Infrastructure Financing and Innovation Act program (TIFIA) credit assistance and assists the DOT in evaluating projects and project sponsors for program eligibility and creditworthiness. The TIFIA program requires applicants [to submit two types of responses](#) for consideration including a letter of interest and an application. Written comments should be submitted by June 30, 2017.

FMCSA Withdraws Advance Notice of Proposed Rulemaking Concerning Financial Responsibility for Motor Carriers, Freight Forwarders, and Brokers

The Federal Motor Carrier Safety Administration (FMCSA) [withdraws](#) its November 28, 2014 advance notice of proposed rulemaking (ANPRM) concerning financial responsibility for motor carriers, freight forwarders, and brokers. FMCSA is authorized to establish minimum levels of financial responsibility for motor carriers at or above the minimum levels set by Congress. In the ANPRM, FMCSA sought public comment on whether to exercise its discretion to increase the minimum levels of financial responsibility, and, if so, to what levels. After reviewing all public comments to the ANPRM, FMCSA has determined that it has insufficient data or information to support moving forward with a rulemaking proposal, at this time.

NTSB & NSC Announce July 24 Roundtable on Commercial Vehicle Safety Technology

The National Transportation Safety Board (NTSB) and the National Safety Council (NSC) will co-host a roundtable discussion on "[Advanced Driver Assistance Systems - Strategies for Increasing Commercial Vehicle Adoption](#)," July 24, 2017, from 1:00 - 5:30 P.M. CDT at the Renaissance Schaumburg Convention Center Hotel, in Schaumburg, Illinois. Roundtable participants will include experts on this topic from industry, government, advocacy groups, media, and academia. Motor vehicle crashes continue to be a leading cause of preventable deaths in the United States. According to the NSC, an estimated 40,000 Americans died from traffic accidents in 2016, a 6 percent jump from the previous year. And, in 2015, according to the Federal Motor Carrier Safety Administration, 4,311 large trucks and buses were involved in fatal crashes, an 8 percent increase from 2014. Advanced driver assistance systems (ADAS) - also known as collision avoidance technologies - can play a significant role in preventing crashes and saving lives. While we have seen significant growth in the passenger vehicle market, adoption of ADAS technologies in the commercial vehicle market (heavy trucks) and among employer and rental fleets has been slow. For more information, contact Amy

[Nebraska RFP# 5557Z1: Modernization of the Nebraska Department of Motor Vehicles, Title, and Registration \(VTR\) System](#)

(Proposals due June 16, 2017)

PARTNER NEWS

As Teen Traffic Deaths Spike, States Awarded New Grants

With teen driver deaths up 9 percent in 2015, The Governors Highway Safety Association (GHSA) and [Ford Driving Skills for Life](#) (Ford DSFL) have awarded [State Highway Safety Offices](#) (SHSOs) in Georgia, Montana, Nebraska, New Hampshire and New York \$74,000 in funding to support teen safe driving activities. This announcement comes on the heels of [new AAA Foundation for Traffic Safety research](#) that newly licensed teen drivers in were three times as likely as adults to be involved in fatal crashes. Also, according to NHTSA, a total of 1,866 teen drivers were killed in 2015 -- 163 more teen deaths than in 2014. Early estimates for 2016 reveal that traffic deaths continued their surge upward. [Read more here.](#)

ENO Report: Adopting and Adapting: States and Automated Vehicles

The ENO Center for Transportation has released a report, *Adopting and Adapting: States and Automated Vehicles*. Automated vehicles are challenging the status quo of transportation networks and the policies that support them. The technology is developing quickly and has the potential to make roadways safer, more efficient, and more accessible for Americans. However, commercial deployment is still several years away, and successful implementation is far from guaranteed. To allow the technology to reach its full potential, governments at all levels need to adapt, especially on the state level. State governments have long played an important role in planning, regulating, and managing roadway networks, however AVs could entirely upend the existing federalist structure. This paper provides guidance on how states should prepare for an automated future by adapting their approach to motor vehicle regulations, infrastructure investment, and research. [Read more here.](#)

TIRF Releases Three New Resources for Alcohol Interlock Programs

The Traffic Injury Research Foundation is pleased to announce the publication of three new resources about alcohol interlock programs.

1. A new program evaluation module has been added to the Alcohol Interlock Curriculum for Practitioners (www.aic.tirf.ca). This resource is made possible through a cooperative agreement with the National Highway Traffic Safety Administration (NHTSA) and was developed with input from an expert panel of program administrators, highway safety office managers, and criminal justice practitioners. The new module is [available here](#). Please register in order to access the new module.

2. TIRF USA has published 2016 Annual Ignition Interlock Survey: United States. The Traffic Injury Research Foundation USA, Inc. (TIRF USA), in partnership with the Association of Ignition Interlock Program Administrators (AIIPA) and TIRF in Canada, conducted a national survey of the number of total installed and active installed ignition interlocks in the United States in 2015, and from January 1st through August 31st, 2016. These data provide a comprehensive picture of interlock installations across the United States and comparisons are made to data from the previous year where feasible. The 2016 alcohol interlock installation survey report is available at www.tirf.us.

3. The Proceedings from the 4th Annual Conference of the Association of Ignition Interlock Program Administrators are now available.

[Dealer Services Survey](#) (Ends 07/05/2017) Response received from AB.

[IRS Form 2290 & Registering Heavy Weight Vehicles](#) (Ends 06/12/2017) Responses received from AL, CA, GA, ID, IL, KS, ME, MI, MN, MO, NC, ND, NE, NM, SC, UT, VA, VT, WA, WI.

If you need a Web password or have any questions about using the survey tool, please send an e-mail to webportalsupport@aamva.org or call Janice Dluzynski at 703-908-5842. All online surveys can be found on the AAMVA Web site [here](#).

This event was held on May 15th-18th, 2016 in Denver, Colorado. Key topics on the agenda included national trends in alcohol interlock legislation, the use of advanced device features, innovative compliance-based monitoring strategies, and opportunities to build program stakeholder partnerships. In addition, presentations explored effective ways manage special populations in interlock programs, including offenders with respiratory problems, Tribal communities, drug-impaired drivers, and participants for whom cost is a challenge. The full proceedings can be downloaded from the [AIIPA website](#).

TRB: Automated Vehicles Symposium 2017

TRB and the Association for Unmanned Vehicle Systems International (AUUSI) are cosponsoring the Automated Vehicles Symposium in July 11-13, 2017 in San Francisco, California. This event will focus on challenges and opportunities related to the increasing automation of motor vehicles as well as the environments in which they operate. The workshop will build on previous workshops providing updates on the state-of-the-art in road vehicle automation research. For questions, contact Rich Cunard at RCunard@nas.edu. TIRF Releases Three New Resources for Alcohol Interlock Programs

The Traffic Injury Research Foundation is pleased to announce the publication of three new resources about alcohol interlock programs.

1. A new program evaluation module has been added to the Alcohol Interlock Curriculum for Practitioners (www.aic.tirf.ca). This resource is made possible through a cooperative agreement with the National Highway Traffic Safety Administration (NHTSA) and was developed with input from an expert panel of program administrators, highway safety office managers, and criminal justice practitioners. The new module is [available here](#). Please register in order to access the new module.

2. TIRF USA has published 2016 Annual Ignition Interlock Survey: United States. The Traffic Injury Research Foundation USA, Inc. (TIRF USA), in partnership with the Association of Ignition Interlock Program Administrators (AIIPA) and TIRF in Canada, conducted a national survey of the number of total installed and active installed ignition interlocks in the United States in 2015, and from January 1st through August 31st, 2016. These data provide a comprehensive picture of interlock installations across the United States and comparisons are made to data from the previous year where feasible. The 2016 alcohol interlock installation survey report is available at www.tirf.us.

3. The Proceedings from the 4th Annual Conference of the Association of Ignition Interlock Program Administrators are now available.

[Dealer Services Survey](#) (Ends 07/05/2017) Response received from AB.

[IRS Form 2290 & Registering Heavy Weight Vehicles](#) (Ends 06/12/2017) Responses received from AL, CA, GA, ID, IL, KS, ME, MI, MN, MO, NC, ND, NE, NM, SC, UT, VA, VT, WA, WI.

If you need a Web password or have any questions about using the survey tool, please send an e-mail to webportalsupport@aamva.org or call Janice Dluzynski at 703-908-5842. All online surveys can be found on the AAMVA Web site [here](#).

This event was held on May 15th-18th, 2016 in Denver, Colorado. Key topics on the agenda included national trends in alcohol interlock legislation, the use of advanced device features, innovative compliance-based monitoring strategies, and opportunities to build program stakeholder partnerships. In addition, presentations explored effective ways manage special populations in interlock programs, including offenders with respiratory problems, Tribal communities, drug-impaired drivers, and participants for whom cost is a challenge. The full proceedings can be downloaded from the [AIIPA website](#).

TRB: Automated Vehicles Symposium 2017

TRB and the Association for Unmanned Vehicle Systems International (AUVSI) are cosponsoring the Automated Vehicles Symposium in July 11-13, 2017 in San Francisco, California. This event will focus on challenges and opportunities related to the increasing automation of motor vehicles as well as the environments in which they operate. The workshop will build on previous workshops providing updates on the state-of-the-art in road vehicle automation research. For questions, contact Rich Cunard at RCunard@nas.edu. Motorcycle Skills Tests and Motorcycle Licenses No Longer Required for Operation of Three-wheel Auto-cycles in Georgia

Based on a recent law change, beginning July 1, 2017, drivers in Georgia operating three-wheel auto-cycles (three-wheel motor vehicles controlled by a steering wheel) will no longer be required to possess a motorcycle license or motorcycle learner's permit. In addition, Georgia residents who wish to legally operate an auto-cycle in Georgia will no longer be required to take the DDS motorcycle knowledge test or motorcycle skills test. Instead, effective July 1, 2017, drivers in Georgia operating three-wheel auto-cycles will only be required to possess a valid Georgia Class C (regular) driver's license, a valid Georgia Class CP (regular) learner's permit, or any equivalent class of driver's license or learner's permit issued by another state. Governor Cuomo Announces Fake ID and Underage Drinking Sweeps at Summer Concerts Across New York

New York Governor Andrew M. Cuomo announced that DMV investigators and State Police, in cooperation with local law enforcement, have launched a 2017 summer concert crack down. As part of the state's "Operation Prevent" initiative, DMV held its first concert enforcement on Thursday, May 18, making 12 arrests at the Brad Paisley concert at Saratoga Performing Arts Center and 55 arrests at the Future concert at Darien Lake on May 24. At the Brad Paisley and Future concerts in May, fraudulent licenses from New York, Rhode Island, Illinois, Pennsylvania, Florida, Maryland, New Jersey, Connecticut and Florida were recovered. Operation Prevent Investigators will continue to conduct sweeps at venues this summer including SPAC, Darien Lake, Jones Beach, Canalside in Buffalo, CMAC in Canandaigua and the Lakeview Amphitheater in Syracuse, as well as other events where underage concertgoers are likely to gather. DMV's Division of Field Investigation perform the investigations in partnership with the State Liquor Authority, New York State Park Police, New York State Police, and local law enforcement agencies. [Read more here.](#)

FEDERAL NEWS

DOT Seeks To Renew Existing ICR On TIFIA Program

The Department of Transportation (DOT) [has submitted](#) an information collection request to the Office of Management and Budget (OMB) to renew an existing information collection which allows entities to apply for the Transportation Infrastructure Financing and Innovation Act program (TIFIA) credit assistance and assists the DOT in evaluating projects and project sponsors for program eligibility and creditworthiness. The TIFIA program requires applicants [to submit two types of responses](#) for consideration including a letter of interest and an application. Written comments should be submitted by June 30, 2017.

FMCSA Withdraws Advance Notice of Proposed Rulemaking Concerning Financial Responsibility for Motor Carriers, Freight Forwarders, and Brokers

The Federal Motor Carrier Safety Administration (FMCSA) [withdraws](#) its November 28, 2014 advance notice of proposed rulemaking (ANPRM) concerning financial responsibility for motor carriers, freight forwarders, and brokers. FMCSA is authorized to establish minimum levels of financial responsibility for motor carriers at or above the minimum levels set by Congress. In the ANPRM, FMCSA sought public comment on whether to exercise its discretion to increase the minimum levels of financial responsibility, and, if so, to what levels. After reviewing all public comments to the ANPRM, FMCSA has determined that it has insufficient data or information to support moving forward with a rulemaking proposal, at this time.

NTSB & NSC Announce July 24 Roundtable on Commercial Vehicle Safety Technology

The National Transportation Safety Board (NTSB) and the National Safety Council (NSC) will co-host a roundtable discussion on "[Advanced Driver Assistance Systems - Strategies for Increasing Commercial Vehicle Adoption](#)," July 24, 2017, from 1:00 - 5:30 P.M. CDT at the Renaissance Schaumburg Convention Center Hotel, in Schaumburg, Illinois. Roundtable participants will include experts on this topic from industry, government, advocacy groups, media, and academia. Motor vehicle crashes continue to be a leading cause of preventable deaths in the United States. According to the NSC, an estimated 40,000 Americans died from traffic accidents in 2016, a 6 percent jump from the previous year. And, in 2015, according to the Federal Motor Carrier Safety Administration, 4,311 large trucks and buses were involved in fatal crashes, an 8 percent increase from 2014. Advanced driver assistance systems (ADAS) - also known as collision avoidance technologies - can play a significant role in preventing crashes and saving lives. While we have seen significant growth in the passenger vehicle market, adoption of ADAS technologies in the commercial vehicle market (heavy trucks) and among employer and rental fleets has been slow. For more information, contact Amy

ENO Report: Adopting and Adapting: States and Automated Vehicles

The ENO Center for Transportation has released a report, *Adopting and Adapting: States and Automated Vehicles*. Automated vehicles are challenging the status quo of transportation networks and the policies that support them. The technology is developing quickly and has the potential to make roadways safer, more efficient, and more accessible for Americans. However, commercial deployment is still several years away, and successful implementation is far from guaranteed. To allow the technology to reach its full potential, governments at all levels need to adapt, especially on the state level. State governments have long played an important role in planning, regulating, and managing roadway networks, however AVs could entirely upend the existing federalist structure. This paper provides guidance on how states should prepare for an automated future by adapting their approach to motor vehicle regulations, infrastructure investment, and research. [Read more here.](#)

TIRF Releases Three New Resources for Alcohol Interlock Programs

The Traffic Injury Research Foundation is pleased to announce the publication of three new resources about alcohol interlock programs.

1. A new program evaluation module has been added to the Alcohol Interlock Curriculum for Practitioners (www.aic.tirf.ca). This resource is made possible through a cooperative agreement with the National Highway Traffic Safety Administration (NHTSA) and was developed with input from an expert panel of program administrators, highway safety office managers, and criminal justice practitioners. The new module is [available here](#). Please register in order to access the new module.

2. TIRF USA has published 2016 Annual Ignition Interlock Survey: United States. The Traffic Injury Research Foundation USA, Inc. (TIRF USA), in partnership with the Association of Ignition Interlock Program Administrators (AIIPA) and TIRF in Canada, conducted a national survey of the number of total installed and active installed ignition interlocks in the United States in 2015, and from January 1st through August 31st, 2016. These data provide a comprehensive picture of interlock installations across the United States and comparisons are made to data from the previous year where feasible. The 2016 alcohol interlock installation survey report is available at www.tirf.us.

3. The Proceedings from the 4th Annual Conference of the Association of Ignition Interlock Program Administrators are now available.

[Dealer Services Survey](#) (Ends 07/05/2017) Response received from AB.

ENO Report: Adopting and Adapting: States and Automated Vehicles

The ENO Center for Transportation has released a report, *Adopting and Adapting: States and Automated Vehicles*. Automated vehicles are challenging the status quo of transportation networks and the policies that support them. The technology is developing quickly and has the potential to make roadways safer, more efficient, and more accessible for Americans. However, commercial deployment is still several years away, and successful implementation is far from guaranteed. To allow the technology to reach its full potential, governments at all levels need to adapt, especially on the state level. State governments have long played an important role in planning, regulating, and managing roadway networks, however AVs could entirely upend the existing federalist structure. This paper provides guidance on how states should prepare for an automated future by adapting their approach to motor vehicle regulations, infrastructure investment, and research. [Read more here.](#)

TIRF Releases Three New Resources for Alcohol Interlock Programs

The Traffic Injury Research Foundation is pleased to announce the publication of three new resources about alcohol interlock programs.

1. A new program evaluation module has been added to the Alcohol Interlock Curriculum for Practitioners (www.aic.tirf.ca). This resource is made possible through a cooperative agreement with the National Highway Traffic Safety Administration (NHTSA) and was developed with input from an expert panel of program administrators, highway safety office managers, and criminal justice practitioners. The new module is [available here](#). Please register in order to access the new module.

2. TIRF USA has published 2016 Annual Ignition Interlock Survey: United States. The Traffic Injury Research Foundation USA, Inc. (TIRF USA), in partnership with the Association of Ignition Interlock Program Administrators (AIIPA) and TIRF in Canada, conducted a national survey of the number of total installed and active installed ignition interlocks in the United States in 2015, and from January 1st through August 31st, 2016. These data provide a comprehensive picture of interlock installations across the United States and comparisons are made to data from the previous year where feasible. The 2016 alcohol interlock installation survey report is available at www.tirf.us.

3. The Proceedings from the 4th Annual Conference of the Association of Ignition Interlock Program Administrators are now available.

[Dealer Services Survey](#) (Ends 07/05/2017) Response received from AB.

[IRS Form 2290 & Registering Heavy Weight Vehicles](#) (Ends 06/12/2017) Responses received from AL, CA, GA, ID, IL, KS, ME, MI, MN, MO, NC, ND, NE, NM, SC, UT, VA, VT, WA, WI.

If you need a Web password or have any questions about using the survey tool, please send an e-mail to webportalsupport@aamva.org or call Janice Dluzynski at 703-908-5842. All online surveys can be found on the AAMVA Web site [here](#).

This event was held on May 15th-18th, 2016 in Denver, Colorado. Key topics on the agenda included national trends in alcohol interlock legislation, the use of advanced device features, innovative compliance-based monitoring strategies, and opportunities to build program stakeholder partnerships. In addition, presentations explored effective ways manage special populations in interlock programs, including offenders with respiratory problems, Tribal communities, drug-impaired drivers, and participants for whom cost is a challenge. The full proceedings can be downloaded from the [AIIPA website](#).

TRB: Automated Vehicles Symposium 2017

TRB and the Association for Unmanned Vehicle Systems International (AUVSI) are cosponsoring the Automated Vehicles Symposium in July 11-13, 2017 in San Francisco, California. This event will focus on challenges and opportunities related to the increasing automation of motor vehicles as well as the environments in which they operate. The workshop will build on previous workshops providing updates on the state-of-the-art in road vehicle automation research. For questions, contact Rich Cunard at RCunard@nas.edu. IDEC Executive Board Seeks Volunteers

The IDEC Executive Board is seeking two jurisdiction members to serve on the IDEC Executive Board - one from Region I and one from Region II. The IDEC Board is made up of one representative from each of the four AAMVA regions. The members of the Board bring global views and innovative ideas to the examiner training arena, provide outreach to the AAMVA jurisdictions to gain input on jurisdictional driver examiner training programs and provide accreditation of those driver examiner training programs. If you are interested in serving on the IDEC Executive Board, please fill out the [IDEC Board Application form](#) and send it back to: committees@aamva.org.

JURISDICTION NEWS

Motorcycle Skills Tests and Motorcycle Licenses No Longer Required for Operation of Three-wheel Auto-cycles in Georgia

Based on a recent law change, beginning July 1, 2017, drivers in Georgia operating three-wheel auto-cycles (three-wheel motor vehicles controlled by a steering wheel) will no longer be required to possess a motorcycle license or motorcycle learner's permit. In addition, Georgia residents who wish to legally operate an auto-cycle in Georgia will no longer be required to take the DDS motorcycle knowledge test or motorcycle skills test. Instead, effective July 1, 2017, drivers in Georgia operating three-wheel auto-cycles will only be required to possess a valid Georgia Class C (regular) driver's license, a valid Georgia Class CP (regular) learner's permit, or any equivalent class of driver's license or learner's permit issued by another state. Governor Cuomo Announces Fake ID and Underage Drinking Sweeps at Summer Concerts Across New York

New York Governor Andrew M. Cuomo announced that DMV investigators and State Police, in cooperation with local law enforcement, have launched a 2017 summer concert crack down. As part of the state's "Operation Prevent" initiative, DMV held its first concert enforcement on Thursday, May 18, making 12 arrests at the Brad Paisley concert at Saratoga Performing Arts Center and 55 arrests at the Future concert at Darien Lake on May 24. At the Brad Paisley and Future concerts in May, fraudulent licenses from New York, Rhode Island, Illinois, Pennsylvania, Florida, Maryland, New Jersey, Connecticut and Florida were recovered. Operation Prevent Investigators will continue to conduct sweeps at venues this summer including SPAC, Darien Lake, Jones Beach, Canalside in Buffalo, CMAC in Canandaigua and the Lakeview Amphitheater in Syracuse, as well as other events where underage concertgoers are likely to gather. DMV's Division of Field Investigation perform the investigations in partnership with the State Liquor Authority, New York State Park Police, New York State Police, and local law enforcement agencies. [Read more here.](#)

FEDERAL NEWS

DOT Seeks To Renew Existing ICR On TIFIA Program

The Department of Transportation (DOT) [has submitted](#) an information collection request to the Office of Management and Budget (OMB) to renew an existing information collection which allows entities to apply for the Transportation Infrastructure Financing and Innovation Act program (TIFIA) credit assistance and assists the DOT in evaluating projects and project sponsors for program eligibility and creditworthiness. The TIFIA program requires applicants [to submit two types of responses](#) for consideration including a letter of interest and an application. Written comments should be submitted by June 30, 2017.

FMCSA Withdraws Advance Notice of Proposed Rulemaking Concerning Financial Responsibility for Motor Carriers, Freight Forwarders, and Brokers

The Federal Motor Carrier Safety Administration (FMCSA) [withdraws](#) its November 28, 2014 advance notice of proposed rulemaking (ANPRM) concerning financial responsibility for motor carriers, freight forwarders, and brokers. FMCSA is authorized to establish minimum levels of financial responsibility for motor carriers at or above the minimum levels set by Congress. In the ANPRM, FMCSA sought public comment on whether to exercise its discretion to increase the minimum levels of financial responsibility, and, if so, to what levels. After reviewing all public comments to the ANPRM, FMCSA has determined that it has insufficient data or information to support moving forward with a rulemaking proposal, at this time.

NTSB & NSC Announce July 24 Roundtable on Commercial Vehicle Safety Technology

The National Transportation Safety Board (NTSB) and the National Safety Council (NSC) will co-host a roundtable discussion on "[Advanced Driver Assistance Systems - Strategies for Increasing Commercial Vehicle Adoption](#)," July 24, 2017, from 1:00 - 5:30 P.M. CDT at the Renaissance Schaumburg Convention Center Hotel, in Schaumburg, Illinois. Roundtable participants will include experts on this topic from industry, government, advocacy groups, media, and academia. Motor vehicle crashes continue to be a leading cause of preventable deaths in the United States. According to the NSC, an estimated 40,000 Americans died from traffic accidents in 2016, a 6 percent jump from the previous year. And, in 2015, according to the Federal Motor Carrier Safety Administration, 4,311 large trucks and buses were involved in fatal crashes, an 8 percent increase from 2014. Advanced driver assistance systems (ADAS) - also known as collision avoidance technologies - can play a significant role in preventing crashes and saving lives. While we have seen significant growth in the passenger vehicle market, adoption of ADAS technologies in the commercial vehicle market (heavy trucks) and among employer and rental fleets has been slow. For more information, contact Amy

PARTNER NEWS

As Teen Traffic Deaths Spike, States Awarded New Grants

With teen driver deaths up 9 percent in 2015, The Governors Highway Safety Association (GHSA) and [Ford Driving Skills for Life](#) (Ford DSFL) have awarded [State Highway Safety Offices](#) (SHSOs) in Georgia, Montana, Nebraska, New Hampshire and New York \$74,000 in funding to support teen safe driving activities. This announcement comes on the heels of [new AAA Foundation for Traffic Safety research](#) that newly licensed teen drivers in were three times as likely as adults to be involved in fatal crashes. Also, according to NHTSA, a total of 1,866 teen drivers were killed in 2015 -- 163 more teen deaths than in 2014. Early estimates for 2016 reveal that traffic deaths continued their surge upward. ENO Report: Adopting and Adapting: States and Automated Vehicles

The ENO Center for Transportation has released a report, *Adopting and Adapting: States and Automated Vehicles*. Automated vehicles are challenging the status quo of transportation networks and the policies that support them. The technology is developing quickly and has the potential to make roadways safer, more efficient, and more accessible for Americans. However, commercial deployment is still several years away, and successful implementation is far from guaranteed. To allow the technology to reach its full potential, governments at all levels need to adapt, especially on the state level. State governments have long played an important role in planning, regulating, and managing roadway networks, however AVs could entirely upend the existing federalist structure. This paper provides guidance on how states should prepare for an automated future by adapting their approach to motor vehicle regulations, infrastructure investment, and research. [Read more here.](#)

TIRF Releases Three New Resources for Alcohol Interlock Programs

The Traffic Injury Research Foundation is pleased to announce the publication of three new resources about alcohol interlock programs.

1. A new program evaluation module has been added to the Alcohol Interlock Curriculum for Practitioners (www.aic.tirf.ca). This resource is made possible through a cooperative agreement with the National Highway Traffic Safety Administration (NHTSA) and was developed with input from an expert panel of program administrators, highway safety office managers, and criminal justice practitioners. The new module is [available here](#). Please register in order to access the new module.

2. TIRF USA has published 2016 Annual Ignition Interlock Survey: United States. The Traffic Injury Research Foundation USA, Inc. (TIRF USA), in partnership with the Association of Ignition Interlock Program Administrators (AIIPA) and TIRF in Canada, conducted a national survey of the number of total installed and active installed ignition interlocks in the United States in 2015, and from January 1st through August 31st, 2016. These data provide a comprehensive picture of interlock installations across the United States and comparisons are made to data from the previous year where feasible. The 2016 alcohol interlock installation survey report is available at www.tirf.us.

3. The Proceedings from the 4th Annual Conference of the Association of Ignition Interlock Program Administrators are now available.

[Dealer Services Survey](#) (Ends 07/05/2017) Response received from AB.

[IRS Form 2290 & Registering Heavy Weight Vehicles](#) (Ends 06/12/2017) Responses received from AL, CA, GA, ID, IL, KS, ME, MI, MN, MO, NC, ND, NE, NM, SC, UT, VA, VT, WA, WI.

If you need a Web password or have any questions about using the survey tool, please send an e-mail to webportalsupport@aamva.org or call Janice Dluzynski at 703-908-5842. All online surveys can be found on the AAMVA Web site [here](#).

This event was held on May 15th-18th, 2016 in Denver, Colorado. Key topics on the agenda included national trends in alcohol interlock legislation, the use of advanced device features, innovative compliance-based monitoring strategies, and opportunities to build program stakeholder partnerships. In addition, presentations explored effective ways manage special populations in interlock programs, including offenders with respiratory problems, Tribal communities, drug-impaired drivers, and participants for whom cost is a challenge. The full proceedings can be downloaded from the [AIIPA website](#).

TRB: Automated Vehicles Symposium 2017

TRB and the Association for Unmanned Vehicle Systems International (AUVSI) are cosponsoring the Automated Vehicles Symposium in July 11-13, 2017 in San Francisco, California. This event will focus on challenges and opportunities related to the increasing automation of motor vehicles as well as the environments in which they operate. The workshop will build on previous workshops providing updates on the state-of-the-art in road vehicle automation research. For questions, contact Rich Cunard at RCunard@nas.edu. Motorcycle Skills Tests and Motorcycle Licenses No Longer Required for Operation of Three-wheel Auto-cycles in Georgia

Based on a recent law change, beginning July 1, 2017, drivers in Georgia operating three-wheel auto-cycles (three-wheel motor vehicles controlled by a steering wheel) will no longer be required to possess a motorcycle license or motorcycle learner's permit. In addition, Georgia residents who wish to legally operate an auto-cycle in Georgia will no longer be required to take the DDS motorcycle knowledge test or motorcycle skills test. Instead, effective July 1, 2017, drivers in Georgia operating three-wheel auto-cycles will only be required to possess a valid Georgia Class C (regular) driver's license, a valid Georgia Class CP (regular) learner's permit, or any equivalent class of driver's license or learner's permit issued by another state. Governor Cuomo Announces Fake ID and Underage Drinking Sweeps at Summer Concerts Across New York

New York Governor Andrew M. Cuomo announced that DMV investigators and State Police, in cooperation with local law enforcement, have launched a 2017 summer concert crack down. As part of the state's "Operation Prevent" initiative, DMV held its first concert enforcement on Thursday, May 18, making 12 arrests at the Brad Paisley concert at Saratoga Performing Arts Center and 55 arrests at the Future concert at Darien Lake on May 24. At the Brad Paisley and Future concerts in May, fraudulent licenses from New York, Rhode Island, Illinois, Pennsylvania, Florida, Maryland, New Jersey, Connecticut and Florida were recovered. Operation Prevent Investigators will continue to conduct sweeps at venues this summer including SPAC, Darien Lake, Jones Beach, Canalside in Buffalo, CMAC in Canandaigua and the Lakeview Amphitheater in Syracuse, as well as other events where underage concertgoers are likely to gather. DMV's Division of Field Investigation perform the investigations in partnership with the State Liquor Authority, New York State Park Police, New York State Police, and local law enforcement agencies. [Read more here.](#)

FEDERAL NEWS

DOT Seeks To Renew Existing ICR On TIFIA Program

The Department of Transportation (DOT) [has submitted](#) an information collection request to the Office of Management and Budget (OMB) to renew an existing information collection which allows entities to apply for the Transportation Infrastructure Financing and Innovation Act program (TIFIA) credit assistance and assists the DOT in evaluating projects and project sponsors for program eligibility and creditworthiness. The TIFIA program requires applicants [to submit two types of responses](#) for consideration including a letter of interest and an application. Written comments should be submitted by June 30, 2017.

FMCSA Withdraws Advance Notice of Proposed Rulemaking Concerning Financial Responsibility for Motor Carriers, Freight Forwarders, and Brokers

The Federal Motor Carrier Safety Administration (FMCSA) [withdraws](#) its November 28, 2014 advance notice of proposed rulemaking (ANPRM) concerning financial responsibility for motor carriers, freight forwarders, and brokers. FMCSA is authorized to establish minimum levels of financial responsibility for motor carriers at or above the minimum levels set by Congress. In the ANPRM, FMCSA sought public comment on whether to exercise its discretion to increase the minimum levels of financial responsibility, and, if so, to what levels. After reviewing all public comments to the ANPRM, FMCSA has determined that it has insufficient data or information to support moving forward with a rulemaking proposal, at this time.

NTSB & NSC Announce July 24 Roundtable on Commercial Vehicle Safety Technology

The National Transportation Safety Board (NTSB) and the National Safety Council (NSC) will co-host a roundtable discussion on "[Advanced Driver Assistance Systems - Strategies for Increasing Commercial Vehicle Adoption](#)," July 24, 2017, from 1:00 - 5:30 P.M. CDT at the Renaissance Schaumburg Convention Center Hotel, in Schaumburg, Illinois. Roundtable participants will include experts on this topic from industry, government, advocacy groups, media, and academia. Motor vehicle crashes continue to be a leading cause of preventable deaths in the United States. According to the NSC, an estimated 40,000 Americans died from traffic accidents in 2016, a 6 percent jump from the previous year. And, in 2015, according to the Federal Motor Carrier Safety Administration, 4,311 large trucks and buses were involved in fatal crashes, an 8 percent increase from 2014. Advanced driver assistance systems (ADAS) - also known as collision avoidance technologies - can play a significant role in preventing crashes and saving lives. While we have seen significant growth in the passenger vehicle market, adoption of ADAS technologies in the commercial vehicle market (heavy trucks) and among employer and rental fleets has been slow. For more information, contact Amy

And, in 2015, according to the Federal Motor Carrier Safety Administration, 4,311 large trucks and buses were involved in fatal crashes, an 8 percent increase from 2014. Advanced driver assistance systems (ADAS) - also known as collision avoidance technologies - can play a significant role in preventing crashes and saving lives. While we have seen significant growth in the passenger vehicle market, adoption of ADAS technologies in the commercial vehicle market (heavy trucks) and among employer and rental fleets has been slow. For more information, contact Amy

PARTNER NEWS

As Teen Traffic Deaths Spike, States Awarded New Grants

With teen driver deaths up 9 percent in 2015, The Governors Highway Safety Association (GHSA) and [Ford Driving Skills for Life](#) (Ford DSFL) have awarded [State Highway Safety Offices](#) (SHSOs) in Georgia, Montana, Nebraska, New Hampshire and New York \$74,000 in funding to support teen safe driving activities. This announcement comes on the heels of [new AAA Foundation for Traffic Safety research](#) that newly licensed teen drivers in were three times as likely as adults to be involved in fatal crashes. Also, according to NHTSA, a total of 1,866 teen drivers were killed in 2015 -- 163 more teen deaths than in 2014. Early estimates for 2016 reveal that traffic deaths continued their surge upward. [Read more here.](#)

ENO Report: Adopting and Adapting: States and Automated Vehicles

The ENO Center for Transportation has released a report, *Adopting and Adapting: States and Automated Vehicles*. Automated vehicles are challenging the status quo of transportation networks and the policies that support them. The technology is developing quickly and has the potential to make roadways safer, more efficient, and more accessible for Americans. However, commercial deployment is still several years away, and successful implementation is far from guaranteed. To allow the technology to reach its full potential, governments at all levels need to adapt, especially on the state level. State governments have long played an important role in planning, regulating, and managing roadway networks, however AVs could entirely upend the existing federalist structure. This paper provides guidance on how states should prepare for an automated future by adapting their approach to motor vehicle regulations, infrastructure investment, and research. [Read more here.](#)

TIRF Releases Three New Resources for Alcohol Interlock Programs

The Traffic Injury Research Foundation is pleased to announce the publication of three new resources about alcohol interlock programs.

1. A new program evaluation module has been added to the Alcohol Interlock Curriculum for Practitioners (www.aic.tirf.ca). This resource is made possible through a cooperative agreement with the National Highway Traffic Safety Administration (NHTSA) and was developed with input from an expert panel of program administrators, highway safety office managers, and criminal justice practitioners. The new module is [available here](#). Please register in order to access the new module.

2. TIRF USA has published 2016 Annual Ignition Interlock Survey: United States. The Traffic Injury Research Foundation USA, Inc. (TIRF USA), in partnership with the Association of Ignition Interlock Program Administrators (AIIPA) and TIRF in Canada, conducted a national survey of the number of total installed and active installed ignition interlocks in the United States in 2015, and from January 1st through August 31st, 2016. These data provide a comprehensive picture of interlock installations across the United States and comparisons are made to data from the previous year where feasible. The 2016 alcohol interlock installation survey report is available at www.tirf.us.

3. The Proceedings from the 4th Annual Conference of the Association of Ignition Interlock Program Administrators are now available.

[Dealer Services Survey](#) (Ends 07/05/2017) Response received from AB.

[IRS Form 2290 & Registering Heavy Weight Vehicles](#) (Ends 06/12/2017) Responses received from AL, CA, GA, ID, IL, KS, ME, MI, MN, MO, NC, ND, NE, NM, SC, UT, VA, VT, WA, WI.

If you need a Web password or have any questions about using the survey tool, please send an e-mail to webportalsupport@aamva.org or call Janice Dluzynski at 703-908-5842. All online surveys can be found on the AAMVA Web site [here](#).

This event was held on May 15th-18th, 2016 in Denver, Colorado. Key topics on the agenda included national trends in alcohol interlock legislation, the use of advanced device features, innovative compliance-based monitoring strategies, and opportunities to build program stakeholder partnerships. In addition, presentations explored effective ways manage special populations in interlock programs, including offenders with respiratory problems, Tribal communities, drug-impaired drivers, and participants for whom cost is a challenge. The full proceedings can be downloaded from the [AIIPA website](#).

TRB: Automated Vehicles Symposium 2017

TRB and the Association for Unmanned Vehicle Systems International (AUVSI) are cosponsoring the Automated Vehicles Symposium in July 11-13, 2017 in San Francisco, California. This event will focus on challenges and opportunities related to the increasing automation of motor vehicles as well as the environments in which they operate. The workshop will build on previous workshops providing updates on the state-of-the-art in road vehicle automation research. For questions, contact Rich Cunard at RCunard@nas.edu. Motorcycle Skills Tests and Motorcycle Licenses No Longer Required for Operation of Three-wheel Auto-cycles in Georgia

Based on a recent law change, beginning July 1, 2017, drivers in Georgia operating three-wheel auto-cycles (three-wheel motor vehicles controlled by a steering wheel) will no longer be required to possess a motorcycle license or motorcycle learner's permit. In addition, Georgia residents who wish to legally operate an auto-cycle in Georgia will no longer be required to take the DDS motorcycle knowledge test or motorcycle skills test. Instead, effective July 1, 2017, drivers in Georgia operating three-wheel auto-cycles will only be required to possess a valid Georgia Class C (regular) driver's license, a valid Georgia Class CP (regular) learner's permit, or any equivalent class of driver's license or learner's permit issued by another state. Governor Cuomo Announces Fake ID and Underage Drinking Sweeps at Summer Concerts Across New York

New York Governor Andrew M. Cuomo announced that DMV investigators and State Police, in cooperation with local law enforcement, have launched a 2017 summer concert crack down. As part of the state's "Operation Prevent" initiative, DMV held its first concert enforcement on Thursday, May 18, making 12 arrests at the Brad Paisley concert at Saratoga Performing Arts Center and 55 arrests at the Future concert at Darien Lake on May 24. At the Brad Paisley and Future concerts in May, fraudulent licenses from New York, Rhode Island, Illinois, Pennsylvania, Florida, Maryland, New Jersey, Connecticut and Florida were recovered. Operation Prevent Investigators will continue to conduct sweeps at venues this summer including SPAC, Darien Lake, Jones Beach, Canalside in Buffalo, CMAC in Canandaigua and the Lakeview Amphitheater in Syracuse, as well as other events where underage concertgoers are likely to gather. DMV's Division of Field Investigation perform the investigations in partnership with the State Liquor Authority, New York State Park Police, New York State Police, and local law enforcement agencies. [Read more here.](#)

FEDERAL NEWS

DOT Seeks To Renew Existing ICR On TIFIA Program

The Department of Transportation (DOT) [has submitted](#) an information collection request to the Office of Management and Budget (OMB) to renew an existing information collection which allows entities to apply for the Transportation Infrastructure Financing and Innovation Act program (TIFIA) credit assistance and assists the DOT in evaluating projects and project sponsors for program eligibility and creditworthiness. The TIFIA program requires applicants [to submit two types of responses](#) for consideration including a letter of interest and an application. Written comments should be submitted by June 30, 2017.

FMCSA Withdraws Advance Notice of Proposed Rulemaking Concerning Financial Responsibility for Motor Carriers, Freight Forwarders, and Brokers

The Federal Motor Carrier Safety Administration (FMCSA) [withdraws](#) its November 28, 2014 advance notice of proposed rulemaking (ANPRM) concerning financial responsibility for motor carriers, freight forwarders, and brokers. FMCSA is authorized to establish minimum levels of financial responsibility for motor carriers at or above the minimum levels set by Congress. In the ANPRM, FMCSA sought public comment on whether to exercise its discretion to increase the minimum levels of financial responsibility, and, if so, to what levels. After reviewing all public comments to the ANPRM, FMCSA has determined that it has insufficient data or information to support moving forward with a rulemaking proposal, at this time.

NTSB & NSC Announce July 24 Roundtable on Commercial Vehicle Safety Technology

The National Transportation Safety Board (NTSB) and the National Safety Council (NSC) will co-host a roundtable discussion on "[Advanced Driver Assistance Systems - Strategies for Increasing Commercial Vehicle Adoption](#)," July 24, 2017, from 1:00 - 5:30 P.M. CDT at the Renaissance Schaumburg Convention Center Hotel, in Schaumburg, Illinois. Roundtable participants will include experts on this topic from industry, government, advocacy groups, media, and academia. Motor vehicle crashes continue to be a leading cause of preventable deaths in the United States. According to the NSC, an estimated 40,000 Americans died from traffic accidents in 2016, a 6 percent jump from the previous year. And, in 2015, according to the Federal Motor Carrier Safety Administration, 4,311 large trucks and buses were involved in fatal crashes, an 8 percent increase from 2014. Advanced driver assistance systems (ADAS) - also known as collision avoidance technologies - can play a significant role in preventing crashes and saving lives. While we have seen significant growth in the passenger vehicle market, adoption of ADAS technologies in the commercial vehicle market (heavy trucks) and among employer and rental fleets has been slow. Governor Cuomo Announces Fake ID and Underage Drinking Sweeps at Summer Concerts Across New York

New York Governor Andrew M. Cuomo announced that DMV investigators and State Police, in cooperation with local law enforcement, have launched a 2017 summer concert crack down. As part of the state's "Operation Prevent" initiative, DMV held its first concert enforcement on Thursday, May 18, making 12 arrests at the Brad Paisley concert at Saratoga Performing Arts Center and 55 arrests at the Future concert at Darien Lake on May 24. At the Brad Paisley and Future concerts in May, fraudulent licenses from New York, Rhode Island, Illinois, Pennsylvania, Florida, Maryland, New Jersey, Connecticut and Florida were recovered. Operation Prevent Investigators will continue to conduct sweeps at venues this summer including SPAC, Darien Lake, Jones Beach, Canalside in Buffalo, CMAC in Canandaigua and the Lakeview Amphitheater in Syracuse, as well as other events where underage concertgoers are likely to gather. DMV's Division of Field Investigation perform the investigations in partnership with the State Liquor Authority, New York State Park Police, New York State Police, and local law enforcement agencies. The Federal Motor Carrier Safety Administration (FMCSA) [withdraws](#) its November 28, 2014 advance notice of proposed rulemaking (ANPRM) concerning financial responsibility for motor carriers, freight forwarders, and brokers. FMCSA is authorized to establish minimum levels of financial responsibility for motor carriers at or above the minimum levels set by Congress. In the ANPRM, FMCSA sought public comment on whether to exercise its discretion to increase the minimum levels of financial responsibility, and, if so, to what levels. After reviewing all public comments to the ANPRM, FMCSA has determined that it has insufficient data or information to support moving forward with a rulemaking proposal, at this time.

NTSB & NSC Announce July 24 Roundtable on Commercial Vehicle Safety Technology

The National Transportation Safety Board (NTSB) and the National Safety Council (NSC) will co-host a roundtable discussion on "[Advanced Driver Assistance Systems - Strategies for Increasing Commercial Vehicle Adoption](#)," July 24, 2017, from 1:00 - 5:30 P.M. CDT at the Renaissance Schaumburg Convention Center Hotel, in Schaumburg, Illinois. Roundtable participants will include experts on this topic from industry, government, advocacy groups, media, and academia. Motor vehicle crashes continue to be a leading cause of preventable deaths in the United States. According to the NSC, an estimated 40,000 Americans died from traffic accidents in 2016, a 6 percent jump from the previous year. And, in 2015, according to the Federal Motor Carrier Safety Administration, 4,311 large trucks and buses were involved in fatal crashes, an 8 percent increase from 2014. Advanced driver assistance systems (ADAS) - also known as collision avoidance technologies - can play a significant role in preventing crashes and saving lives. While we have seen significant growth in the passenger vehicle market, adoption of ADAS technologies in the commercial vehicle market (heavy trucks) and among employer and rental fleets has been slow. For more information, contact Amy

PARTNER NEWS

As Teen Traffic Deaths Spike, States Awarded New Grants

With teen driver deaths up 9 percent in 2015, The Governors Highway Safety Association (GHSA) and [Ford Driving Skills for Life](#) (Ford DSFL) have awarded [State Highway Safety Offices](#) (SHSOs) in Georgia, Montana, Nebraska, New Hampshire and New York \$74,000 in funding to support teen safe driving activities. This announcement comes on the heels of [new AAA Foundation for Traffic Safety research](#) that newly licensed teen drivers in were three times as likely as adults to be involved in fatal crashes. Also, according to NHTSA, a total of 1,866 teen drivers were killed in 2015 -- 163 more teen deaths than in 2014. Early estimates for 2016 reveal that traffic deaths continued their surge upward. [Read more here.](#)

ENO Report: Adopting and Adapting: States and Automated Vehicles

The ENO Center for Transportation has released a report, *Adopting and Adapting: States and Automated Vehicles*. Automated vehicles are challenging the status quo of transportation networks and the policies that support them. The technology is developing quickly and has the potential to make roadways safer, more efficient, and more accessible for Americans. However, commercial deployment is still several years away, and successful implementation is far from guaranteed. To allow the technology to reach its full potential, governments at all levels need to adapt, especially on the state level. State governments have long played an important role in planning, regulating, and managing roadway networks, however AVs could entirely upend the existing federalist structure. This paper provides guidance on how states should prepare for an automated future by adapting their approach to motor vehicle regulations, infrastructure investment, and research. [Read more here.](#)

TIRF Releases Three New Resources for Alcohol Interlock Programs

The Traffic Injury Research Foundation is pleased to announce the publication of three new resources about alcohol interlock programs.

1. A new program evaluation module has been added to the Alcohol Interlock Curriculum for Practitioners (www.aic.tirf.ca). This resource is made possible through a cooperative agreement with the National Highway Traffic Safety Administration (NHTSA) and was developed with input from an expert panel of program administrators, highway safety office managers, and criminal justice practitioners. The new module is [available here](#). Please register in order to access the new module.

2. TIRF USA has published 2016 Annual Ignition Interlock Survey: United States. The Traffic Injury Research Foundation USA, Inc. (TIRF USA), in partnership with the Association of Ignition Interlock Program Administrators (AIIPA) and TIRF in Canada, conducted a national survey of the number of total installed and active installed ignition interlocks in the United States in 2015, and from January 1st through August 31st, 2016. These data provide a comprehensive picture of interlock installations across the United States and comparisons are made to data from the previous year where feasible. The 2016 alcohol interlock installation survey report is available at www.tirf.us.

3. The Proceedings from the 4th Annual Conference of the Association of Ignition Interlock Program Administrators are now available.

[Dealer Services Survey](#) (Ends 07/05/2017) Response received from AB.

[IRS Form 2290 & Registering Heavy Weight Vehicles](#) (Ends 06/12/2017) Responses received from AL, CA, GA, ID, IL, KS, ME, MI, MN, MO, NC, ND, NE, NM, SC, UT, VA, VT, WA, WI.

If you need a Web password or have any questions about using the survey tool, please send an e-mail to webportalsupport@aamva.org or call Janice Dluzynski at 703-908-5842. All online surveys can be found on the AAMVA Web site [here](#).

This event was held on May 15th-18th, 2016 in Denver, Colorado. Key topics on the agenda included national trends in alcohol interlock legislation, the use of advanced device features, innovative compliance-based monitoring strategies, and opportunities to build program stakeholder partnerships. In addition, presentations explored effective ways manage special populations in interlock programs, including offenders with respiratory problems, Tribal communities, drug-impaired drivers, and participants for whom cost is a challenge. The full proceedings can be downloaded from the [AIIPA website](#).

TRB: Automated Vehicles Symposium 2017

TRB and the Association for Unmanned Vehicle Systems International (AUVSI) are cosponsoring the Automated Vehicles Symposium in July 11-13, 2017 in San Francisco, California. This event will focus on challenges and opportunities related to the increasing automation of motor vehicles as well as the environments in which they operate. The workshop will build on previous workshops providing updates on the state-of-the-art in road vehicle automation research. For questions, contact Rich Cunard at RCunard@nas.edu. IDEC Executive Board Seeks Volunteers

The IDEC Executive Board is seeking two jurisdiction members to serve on the IDEC Executive Board - one from Region I and one from Region II. The IDEC Board is made up of one representative from each of the four AAMVA regions. The members of the Board bring global views and innovative ideas to the examiner training arena, provide outreach to the AAMVA jurisdictions to gain input on jurisdictional driver examiner training programs and provide accreditation of those driver examiner training programs. If you are interested in serving on the IDEC Executive Board, please fill out the [IDEC Board Application form](#) and send it back to: committees@aamva.org.

JURISDICTION NEWS

Motorcycle Skills Tests and Motorcycle Licenses No Longer Required for Operation of Three-wheel Auto-cycles in Georgia

Based on a recent law change, beginning July 1, 2017, drivers in Georgia operating three-wheel auto-cycles (three-wheel motor vehicles controlled by a steering wheel) will no longer be required to possess a motorcycle license or motorcycle learner's permit. In addition, Georgia residents who wish to legally operate an auto-cycle in Georgia will no longer be required to take the DDS motorcycle knowledge test or motorcycle skills test. Instead, effective July 1, 2017, drivers in Georgia operating three-wheel auto-cycles will only be required to possess a valid Georgia Class C (regular) driver's license, a valid Georgia Class CP (regular) learner's permit, or any equivalent class of driver's license or learner's permit issued by another state. Governor Cuomo Announces Fake ID and Underage Drinking Sweeps at Summer Concerts Across New York

New York Governor Andrew M. Cuomo announced that DMV investigators and State Police, in cooperation with local law enforcement, have launched a 2017 summer concert crack down. As part of the state's "Operation Prevent" initiative, DMV held its first concert enforcement on Thursday, May 18, making 12 arrests at the Brad Paisley concert at Saratoga Performing Arts Center and 55 arrests at the Future concert at Darien Lake on May 24. At the Brad Paisley and Future concerts in May, fraudulent licenses from New York, Rhode Island, Illinois, Pennsylvania, Florida, Maryland, New Jersey, Connecticut and Florida were recovered. Operation Prevent Investigators will continue to conduct sweeps at venues this summer including SPAC, Darien Lake, Jones Beach, Canalside in Buffalo, CMAC in Canandaigua and the Lakeview Amphitheater in Syracuse, as well as other events where underage concertgoers are likely to gather. DMV's Division of Field Investigation perform the investigations in partnership with the State Liquor Authority, New York State Park Police, New York State Police, and local law enforcement agencies. [Read more here.](#)

DOT Seeks To Renew Existing ICR On TIFIA Program

The Department of Transportation (DOT) [has submitted](#) an information collection request to the Office of Management and Budget (OMB) to renew an existing information collection which allows entities to apply for the Transportation Infrastructure Financing and Innovation Act program (TIFIA) credit assistance and assists the DOT in evaluating projects and project sponsors for program eligibility and creditworthiness. The TIFIA program requires applicants [to submit two types of responses](#) for consideration including a letter of interest and an application. Written comments should be submitted by June 30, 2017.

FMCSA Withdraws Advance Notice of Proposed Rulemaking Concerning Financial Responsibility for Motor Carriers, Freight Forwarders, and Brokers

The Federal Motor Carrier Safety Administration (FMCSA) [withdraws](#) its November 28, 2014 advance notice of proposed rulemaking (ANPRM) concerning financial responsibility for motor carriers, freight forwarders, and brokers. FMCSA is authorized to establish minimum levels of financial responsibility for motor carriers at or above the minimum levels set by Congress. In the ANPRM, FMCSA sought public comment on whether to exercise its discretion to increase the minimum levels of financial responsibility, and, if so, to what levels. After reviewing all public comments to the ANPRM, FMCSA has determined that it has insufficient data or information to support moving forward with a rulemaking proposal, at this time.

NTSB & NSC Announce July 24 Roundtable on Commercial Vehicle Safety Technology

The National Transportation Safety Board (NTSB) and the National Safety Council (NSC) will co-host a roundtable discussion on "[Advanced Driver Assistance Systems - Strategies for Increasing Commercial Vehicle Adoption](#)," July 24, 2017, from 1:00 - 5:30 P.M. CDT at the Renaissance Schaumburg Convention Center Hotel, in Schaumburg, Illinois. Roundtable participants will include experts on this topic from industry, government, advocacy groups, media, and academia. Motor vehicle crashes continue to be a leading cause of preventable deaths in the United States. According to the NSC, an estimated 40,000 Americans died from traffic accidents in 2016, a 6 percent jump from the previous year. And, in 2015, according to the Federal Motor Carrier Safety Administration, 4,311 large trucks and buses were involved in fatal crashes, an 8 percent increase from 2014. Governor Cuomo Announces Fake ID and Underage Drinking Sweeps at Summer Concerts Across New York

New York Governor Andrew M. Cuomo announced that DMV investigators and State Police, in cooperation with local law enforcement, have launched a 2017 summer concert crack down. As part of the state's "Operation Prevent" initiative, DMV held its first concert enforcement on Thursday, May 18, making 12 arrests at the Brad Paisley concert at Saratoga Performing Arts Center and 55 arrests at the Future concert at Darien Lake on May 24. At the Brad Paisley and Future concerts in May, fraudulent licenses from New York, Rhode Island, Illinois, Pennsylvania, Florida, Maryland, New Jersey, Connecticut and Florida were recovered. Operation Prevent Investigators will continue to conduct sweeps at venues this summer including SPAC, Darien Lake, Jones Beach, Canalside in Buffalo, CMAC in Canandaigua and the Lakeview Amphitheater in Syracuse, as well as other events where underage concertgoers are likely to gather. DMV's Division of Field Investigation perform the investigations in partnership with the State Liquor Authority, New York State Park Police, New York State Police, and local law enforcement agencies. FEDERAL NEWS

DOT Seeks To Renew Existing ICR On TIFIA Program

The Department of Transportation (DOT) [has submitted](#) an information collection request to the Office of Management and Budget (OMB) to renew an existing information collection which allows entities to apply for the Transportation Infrastructure Financing and Innovation Act program (TIFIA) credit assistance and assists the DOT in evaluating projects and project sponsors for program eligibility and creditworthiness. The TIFIA program requires applicants [to submit two types of responses](#) for consideration including a letter of interest and an application. Written comments should be submitted by June 30, 2017.

FMCSA Withdraws Advance Notice of Proposed Rulemaking Concerning Financial Responsibility for Motor Carriers, Freight Forwarders, and Brokers

The Federal Motor Carrier Safety Administration (FMCSA) [withdraws](#) its November 28, 2014 advance notice of proposed rulemaking (ANPRM) concerning financial responsibility for motor carriers, freight forwarders, and brokers. FMCSA is authorized to establish minimum levels of financial responsibility for motor carriers at or above the minimum levels set by Congress. In the ANPRM, FMCSA sought public comment on whether to exercise its discretion to increase the minimum levels of financial responsibility, and, if so, to what levels. After reviewing all public comments to the ANPRM, FMCSA has determined that it has insufficient data or information to support moving forward with a rulemaking proposal, at this time.

NTSB & NSC Announce July 24 Roundtable on Commercial Vehicle Safety Technology

The National Transportation Safety Board (NTSB) and the National Safety Council (NSC) will co-host a roundtable discussion on "[Advanced Driver Assistance Systems - Strategies for Increasing Commercial Vehicle Adoption](#)," July 24, 2017, from 1:00 - 5:30 P.M. CDT at the Renaissance Schaumburg Convention Center Hotel, in Schaumburg, Illinois. Roundtable participants will include experts on this topic from industry, government, advocacy groups, media, and academia. Motor vehicle crashes continue to be a leading cause of preventable deaths in the United States. According to the NSC, an estimated 40,000 Americans died from traffic accidents in 2016, a 6 percent jump from the previous year. And, in 2015, according to the Federal Motor Carrier Safety Administration, 4,311 large trucks and buses were involved in fatal crashes, an 8 percent increase from 2014. Advanced driver assistance systems (ADAS) - also known as collision avoidance technologies - can play a significant role in preventing crashes and saving lives. While we have seen significant growth in the passenger vehicle market, adoption of ADAS technologies in the commercial vehicle market (heavy trucks) and among employer and rental fleets has been slow. For more information, contact Amy

PARTNER NEWS

As Teen Traffic Deaths Spike, States Awarded New Grants

With teen driver deaths up 9 percent in 2015, The Governors Highway Safety Association (GHSA) and [Ford Driving Skills for Life](#) (Ford DSFL) have awarded [State Highway Safety Offices](#) (SHSOs) in Georgia, Montana, Nebraska, New Hampshire and New York \$74,000 in funding to support teen safe driving activities. This announcement comes on the heels of [new AAA Foundation for Traffic Safety research](#) that newly licensed teen drivers in were three times as likely as adults to be involved in fatal crashes. Also, according to NHTSA, a total of 1,866 teen drivers were killed in 2015 -- 163 more teen deaths than in 2014. Early estimates for 2016 reveal that traffic deaths continued their surge upward. [Read more here.](#)

ENO Report: Adopting and Adapting: States and Automated Vehicles

The ENO Center for Transportation has released a report, *Adopting and Adapting: States and Automated Vehicles*. Automated vehicles are challenging the status quo of transportation networks and the policies that support them. The technology is developing quickly and has the potential to make roadways safer, more efficient, and more accessible for Americans. However, commercial deployment is still several years away, and successful implementation is far from guaranteed. To allow the technology to reach its full potential, governments at all levels need to adapt, especially on the state level. State governments have long played an important role in planning, regulating, and managing roadway networks, however AVs could entirely upend the existing federalist structure. This paper provides guidance on how states should prepare for an automated future by adapting their approach to motor vehicle regulations, infrastructure investment, and research. [Read more here.](#)

TIRF Releases Three New Resources for Alcohol Interlock Programs

The Traffic Injury Research Foundation is pleased to announce the publication of three new resources about alcohol interlock programs.

1. A new program evaluation module has been added to the Alcohol Interlock Curriculum for Practitioners (www.aic.tirf.ca). This resource is made possible through a cooperative agreement with the National Highway Traffic Safety Administration (NHTSA) and was developed with input from an expert panel of program administrators, highway safety office managers, and criminal justice practitioners. The new module is [available here](#). Please register in order to access the new module.

2. TIRF USA has published 2016 Annual Ignition Interlock Survey: United States. The Traffic Injury Research Foundation USA, Inc. (TIRF USA), in partnership with the Association of Ignition Interlock Program Administrators (AIIPA) and TIRF in Canada, conducted a national survey of the number of total installed and active installed ignition interlocks in the United States in 2015, and from January 1st through August 31st, 2016. These data provide a comprehensive picture of interlock installations across the United States and comparisons are made to data from the previous year where feasible. The 2016 alcohol interlock installation survey report is available at www.tirf.us.

3. The Proceedings from the 4th Annual Conference of the Association of Ignition Interlock Program Administrators are now available.

[Dealer Services Survey](#) (Ends 07/05/2017) Response received from AB.

[IRS Form 2290 & Registering Heavy Weight Vehicles](#) (Ends 06/12/2017) Responses received from AL, CA, GA, ID, IL, KS, ME, MI, MN, MO, NC, ND, NE, NM, SC, UT, VA, VT, WA, WI.

If you need a Web password or have any questions about using the survey tool, please send an e-mail to webportalsupport@aamva.org or call Janice Dluzynski at 703-908-5842. All online surveys can be found on the AAMVA Web site [here](#).

This event was held on May 15th-18th, 2016 in Denver, Colorado. Key topics on the agenda included national trends in alcohol interlock legislation, the use of advanced device features, innovative compliance-based monitoring strategies, and opportunities to build program stakeholder partnerships. In addition, presentations explored effective ways manage special populations in interlock programs, including offenders with respiratory problems, Tribal communities, drug-impaired drivers, and participants for whom cost is a challenge. The full proceedings can be downloaded from the [AIIPA website](#).

TRB: Automated Vehicles Symposium 2017

TRB and the Association for Unmanned Vehicle Systems International (AUUSI) are cosponsoring the Automated Vehicles Symposium in July 11-13, 2017 in San Francisco, California. This event will focus on challenges and opportunities related to the increasing automation of motor vehicles as well as the environments in which they operate. The workshop will build on previous workshops providing updates on the state-of-the-art in road vehicle automation research. For questions, contact Rich Cunard at RCunard@nas.edu. Governor Cuomo Announces Fake ID and Underage Drinking Sweeps at Summer Concerts Across New York

New York Governor Andrew M. Cuomo announced that DMV investigators and State Police, in cooperation with local law enforcement, have launched a 2017 summer concert crack down. As part of the state's "Operation Prevent" initiative, DMV held its first concert enforcement on Thursday, May 18, making 12 arrests at the Brad Paisley concert at Saratoga Performing Arts Center and 55 arrests at the Future concert at Darien Lake on May 24. At the Brad Paisley and Future concerts in May, fraudulent licenses from New York, Rhode Island, Illinois, Pennsylvania, Florida, Maryland, New Jersey, Connecticut and Florida were recovered. Operation Prevent Investigators will continue to conduct sweeps at venues this summer including SPAC, Darien Lake, Jones Beach, Canalside in Buffalo, CMAC in Canandaigua and the Lakeview Amphitheater in Syracuse, as well as other events where underage concertgoers are likely to gather. DMV's Division of Field Investigation perform the investigations in partnership with the State Liquor Authority, New York State Park Police, New York State Police, and local law enforcement agencies. [Read more here.](#)

FEDERAL NEWS

DOT Seeks To Renew Existing ICR On TIFIA Program

The Department of Transportation (DOT) [has submitted](#) an information collection request to the Office of Management and Budget (OMB) to renew an existing information collection which allows entities to apply for the Transportation Infrastructure Financing and Innovation Act program (TIFIA) credit assistance and assists the DOT in evaluating projects and project sponsors for program eligibility and creditworthiness. The TIFIA program requires applicants [to submit two types of responses](#) for consideration including a letter of interest and an application. Written comments should be submitted by June 30, 2017.

FMCSA Withdraws Advance Notice of Proposed Rulemaking Concerning Financial Responsibility for Motor Carriers, Freight Forwarders, and Brokers

The Federal Motor Carrier Safety Administration (FMCSA) [withdraws](#) its November 28, 2014 advance notice of proposed rulemaking (ANPRM) concerning financial responsibility for motor carriers, freight forwarders, and brokers. FMCSA is authorized to establish minimum levels of financial responsibility for motor carriers at or above the minimum levels set by Congress. In the ANPRM, FMCSA sought public comment on whether to exercise its discretion to increase the minimum levels of financial responsibility, and, if so, to what levels. After reviewing all public comments to the ANPRM, FMCSA has determined that it has insufficient data or information to support moving forward with a rulemaking proposal, at this time.

NTSB & NSC Announce July 24 Roundtable on Commercial Vehicle Safety Technology

The National Transportation Safety Board (NTSB) and the National Safety Council (NSC) will co-host a roundtable discussion on "[Advanced Driver Assistance Systems - Strategies for Increasing Commercial Vehicle Adoption](#)," July 24, 2017, from 1:00 - 5:30 P.M. CDT at the Renaissance Schaumburg Convention Center Hotel, in Schaumburg, Illinois. Roundtable participants will include experts on this topic from industry, government, advocacy groups, media, and academia. Motor vehicle crashes continue to be a leading cause of preventable deaths in the United States. According to the NSC, an estimated 40,000 Americans died from traffic accidents in 2016, a 6 percent jump from the previous year. And, in 2015, according to the Federal Motor Carrier Safety Administration, 4,311 large trucks and buses were involved in fatal crashes, an 8 percent increase from 2014. Advanced driver assistance systems (ADAS) - also known as collision avoidance technologies - can play a significant role in preventing crashes and saving lives. While we have seen significant growth in the passenger vehicle market, adoption of ADAS technologies in the commercial vehicle market (heavy trucks) and among employer and rental fleets has been slow. For more information, contact Amy

PARTNER NEWS

As Teen Traffic Deaths Spike, States Awarded New Grants

With teen driver deaths up 9 percent in 2015, The Governors Highway Safety Association (GHSA) and [Ford Driving Skills for Life](#) (Ford DSFL) have awarded [State Highway Safety Offices](#) (SHSOs) in Georgia, Montana, Nebraska, New Hampshire and New York \$74,000 in funding to support teen safe driving activities. This announcement comes on the heels of [new AAA Foundation for Traffic Safety research](#) that newly licensed teen drivers in were three times as likely as adults to be involved in fatal crashes. Also, according to NHTSA, a total of 1,866 teen drivers were killed in 2015 -- 163 more teen deaths than in 2014. Early estimates for 2016 reveal that traffic deaths continued their surge upward. [Read more here.](#)

ENO Report: Adopting and Adapting: States and Automated Vehicles

The ENO Center for Transportation has released a report, *Adopting and Adapting: States and Automated Vehicles*. Automated vehicles are challenging the status quo of transportation networks and the policies that support them. The technology is developing quickly and has the potential to make roadways safer, more efficient, and more accessible for Americans. However, commercial deployment is still several years away, and successful implementation is far from guaranteed. To allow the technology to reach its full potential, governments at all levels need to adapt, especially on the state level. State governments have long played an important role in planning, regulating, and managing roadway networks, however AVs could entirely upend the existing federalist structure. This paper provides guidance on how states should prepare for an automated future by adapting their approach to motor vehicle regulations, infrastructure investment, and research. [Read more here.](#)

TIRF Releases Three New Resources for Alcohol Interlock Programs

The Traffic Injury Research Foundation is pleased to announce the publication of three new resources about alcohol interlock programs.

1. A new program evaluation module has been added to the Alcohol Interlock Curriculum for Practitioners (www.aic.tirf.ca). This resource is made possible through a cooperative agreement with the National Highway Traffic Safety Administration (NHTSA) and was developed with input from an expert panel of program administrators, highway safety office managers, and criminal justice practitioners. The new module is [available here](#). Please register in order to access the new module.

2. TIRF USA has published 2016 Annual Ignition Interlock Survey: United States. The Traffic Injury Research Foundation USA, Inc. (TIRF USA), in partnership with the Association of Ignition Interlock Program Administrators (AIIPA) and TIRF in Canada, conducted a national survey of the number of total installed and active installed ignition interlocks in the United States in 2015, and from January 1st through August 31st, 2016. These data provide a comprehensive picture of interlock installations across the United States and comparisons are made to data from the previous year where feasible. The 2016 alcohol interlock installation survey report is available at www.tirf.us.

3. The Proceedings from the 4th Annual Conference of the Association of Ignition Interlock Program Administrators are now available.

[Dealer Services Survey](#) (Ends 07/05/2017) Response received from AB.

[IRS Form 2290 & Registering Heavy Weight Vehicles](#) (Ends 06/12/2017) Responses received from AL, CA, GA, ID, IL, KS, ME, MI, MN, MO, NC, ND, NE, NM, SC, UT, VA, VT, WA, WI.

If you need a Web password or have any questions about using the survey tool, please send an e-mail to webportalsupport@aamva.org or call Janice Dluzynski at 703-908-5842. All online surveys can be found on the AAMVA Web site [here](#).

This event was held on May 15th-18th, 2016 in Denver, Colorado. Key topics on the agenda included national trends in alcohol interlock legislation, the use of advanced device features, innovative compliance-based monitoring strategies, and opportunities to build program stakeholder partnerships. In addition, presentations explored effective ways manage special populations in interlock programs, including offenders with respiratory problems, Tribal communities, drug-impaired drivers, and participants for whom cost is a challenge. The full proceedings can be downloaded from the [AIIPA website](#).

TRB: Automated Vehicles Symposium 2017

TRB and the Association for Unmanned Vehicle Systems International (AUVSI) are cosponsoring the Automated Vehicles Symposium in July 11-13, 2017 in San Francisco, California. This event will focus on challenges and opportunities related to the increasing automation of motor vehicles as well as the environments in which they operate. The workshop will build on previous workshops providing updates on the state-of-the-art in road vehicle automation research. For questions, contact Rich Cunard at RCunard@nas.edu. IDEC Executive Board Seeks Volunteers

The IDEC Executive Board is seeking two jurisdiction members to serve on the IDEC Executive Board - one from Region I and one from Region II. The IDEC Board is made up of one representative from each of the four AAMVA regions. The members of the Board bring global views and innovative ideas to the examiner training arena, provide outreach to the AAMVA jurisdictions to gain input on jurisdictional driver examiner training programs and provide accreditation of those driver examiner training programs. If you are interested in serving on the IDEC Executive Board, please fill out the [IDEC Board Application form](#) and send it back to: committees@aamva.org.

JURISDICTION NEWS

Motorcycle Skills Tests and Motorcycle Licenses No Longer Required for Operation of Three-wheel Auto-cycles in Georgia

Based on a recent law change, beginning July 1, 2017, drivers in Georgia operating three-wheel auto-cycles (three-wheel motor vehicles controlled by a steering wheel) will no longer be required to possess a motorcycle license or motorcycle learner's permit. In addition, Georgia residents who wish to legally operate an auto-cycle in Georgia will no longer be required to take the DDS motorcycle knowledge test or motorcycle skills test. Instead, effective July 1, 2017, drivers in Georgia operating three-wheel auto-cycles will only be required to possess a valid Georgia Class C (regular) driver's license, a valid Georgia Class CP (regular) learner's permit, or any equivalent class of driver's license or learner's permit issued by another state. Governor Cuomo Announces Fake ID and Underage Drinking Sweeps at Summer Concerts Across New York

New York Governor Andrew M. Cuomo announced that DMV investigators and State Police, in cooperation with local law enforcement, have launched a 2017 summer concert crack down. As part of the state's "Operation Prevent" initiative, DMV held its first concert enforcement on Thursday, May 18, making 12 arrests at the Brad Paisley concert at Saratoga Performing Arts Center and 55 arrests at the Future concert at Darien Lake on May 24. At the Brad Paisley and Future concerts in May, fraudulent licenses from New York, Rhode Island, Illinois, Pennsylvania, Florida, Maryland, New Jersey, Connecticut and Florida were recovered. Operation Prevent Investigators will continue to conduct sweeps at venues this summer including SPAC, Darien Lake, Jones Beach, Canalside in Buffalo, CMAC in Canandaigua and the Lakeview Amphitheater in Syracuse, as well as other events where underage concertgoers are likely to gather. DMV's Division of Field Investigation perform the investigations in partnership with the State Liquor Authority, New York State Park Police, New York State Police, and local law enforcement agencies. Motorcycle Skills Tests and Motorcycle Licenses No Longer Required for Operation of Three-wheel Auto-cycles in Georgia

Based on a recent law change, beginning July 1, 2017, drivers in Georgia operating three-wheel auto-cycles (three-wheel motor vehicles controlled by a steering wheel) will no longer be required to possess a motorcycle license or motorcycle learner's permit. In addition, Georgia residents who wish to legally operate an auto-cycle in Georgia will no longer be required to take the DDS motorcycle knowledge test or motorcycle skills test. Instead, effective July 1, 2017, drivers in Georgia operating three-wheel auto-cycles will only be required to possess a valid Georgia Class C (regular) driver's license, a valid Georgia Class CP (regular) learner's permit, or any equivalent class of driver's license or learner's permit issued by another state. Governor Cuomo Announces Fake ID and Underage Drinking Sweeps at Summer Concerts Across New York

New York Governor Andrew M. Cuomo announced that DMV investigators and State Police, in cooperation with local law enforcement, have launched a 2017 summer concert crack down. As part of the state's "Operation Prevent" initiative, DMV held its first concert enforcement on Thursday, May 18, making 12 arrests at the Brad Paisley concert at Saratoga Performing Arts Center and 55 arrests at the Future concert at Darien Lake on May 24. At the Brad Paisley and Future concerts in May, fraudulent licenses from New York, Rhode Island, Illinois, Pennsylvania, Florida, Maryland, New Jersey, Connecticut and Florida were recovered. Operation Prevent Investigators will continue to conduct sweeps at venues this summer including SPAC, Darien Lake, Jones Beach, Canalside in Buffalo, CMAC in Canandaigua and the Lakeview Amphitheater in Syracuse, as well as other events where underage concertgoers are likely to gather. DMV's Division of Field Investigation perform the investigations in partnership with the State Liquor Authority, New York State Park Police, New York State Police, and local law enforcement agencies. FEDERAL NEWS

DOT Seeks To Renew Existing ICR On TIFIA Program

The Department of Transportation (DOT) [has submitted](#) an information collection request to the Office of Management and Budget (OMB) to renew an existing information collection which allows entities to apply for the Transportation Infrastructure Financing and Innovation Act program (TIFIA) credit assistance and assists the DOT in evaluating projects and project sponsors for program eligibility and creditworthiness. The TIFIA program requires applicants [to submit two types of responses](#) for consideration including a letter of interest and an application. Written comments should be submitted by June 30, 2017.

FMCSA Withdraws Advance Notice of Proposed Rulemaking Concerning Financial Responsibility for Motor Carriers, Freight Forwarders, and Brokers

The Federal Motor Carrier Safety Administration (FMCSA) [withdraws](#) its November 28, 2014 advance notice of proposed rulemaking (ANPRM) concerning financial responsibility for motor carriers, freight forwarders, and brokers. FMCSA is authorized to establish minimum levels of financial responsibility for motor carriers at or above the minimum levels set by Congress. In the ANPRM, FMCSA sought public comment on whether to exercise its discretion to increase the minimum levels of financial responsibility, and, if so, to what levels. After reviewing all public comments to the ANPRM, FMCSA has determined that it has insufficient data or information to support moving forward with a rulemaking proposal, at this time.

NTSB & NSC Announce July 24 Roundtable on Commercial Vehicle Safety Technology

The National Transportation Safety Board (NTSB) and the National Safety Council (NSC) will co-host a roundtable discussion on "[Advanced Driver Assistance Systems - Strategies for Increasing Commercial Vehicle Adoption](#)," July 24, 2017, from 1:00 - 5:30 P.M. CDT at the Renaissance Schaumburg Convention Center Hotel, in Schaumburg, Illinois. Roundtable participants will include experts on this topic from industry, government, advocacy groups, media, and academia. Motor vehicle crashes continue to be a leading cause of preventable deaths in the United States. According to the NSC, an estimated 40,000 Americans died from traffic accidents in 2016, a 6 percent jump from the previous year. And, in 2015, according to the Federal Motor Carrier Safety Administration, 4,311 large trucks and buses were involved in fatal crashes, an 8 percent increase from 2014. Advanced driver assistance systems (ADAS) - also known as collision avoidance technologies - can play a significant role in preventing crashes and saving lives. While we have seen significant growth in the passenger vehicle market, adoption of ADAS technologies in the commercial vehicle market (heavy trucks) and among employer and rental fleets has been slow. As Teen Traffic Deaths Spike, States Awarded New Grants

With teen driver deaths up 9 percent in 2015, The Governors Highway Safety Association (GHSA) and [Ford Driving Skills for Life](#) (Ford DSFL) have awarded [State Highway Safety Offices](#) (SHSOs) in Georgia, Montana, Nebraska, New Hampshire and New York \$74,000 in funding to support teen safe driving activities. This announcement comes on the heels of [new AAA Foundation for Traffic Safety research](#) that newly licensed teen drivers in were three times as likely as adults to be involved in fatal crashes. Also, according to NHTSA, a total of 1,866 teen drivers were killed in 2015 -- 163 more teen deaths than in 2014. Early estimates for 2016 reveal that traffic deaths continued their surge upward. [Read more here.](#)

ENO Report: Adopting and Adapting: States and Automated Vehicles

The ENO Center for Transportation has released a report, *Adopting and Adapting: States and Automated Vehicles*. Automated vehicles are challenging the status quo of transportation networks and the policies that support them. The technology is developing quickly and has the potential to make roadways safer, more efficient, and more accessible for Americans. However, commercial deployment is still several years away, and successful implementation is far from guaranteed. To allow the technology to reach its full potential, governments at all levels need to adapt, especially on the state level. State governments have long played an important role in planning, regulating, and managing roadway networks, however AVs could entirely upend the existing federalist structure. This paper provides guidance on how states should prepare for an automated future by adapting their approach to motor vehicle regulations, infrastructure investment, and research. [Read more here.](#)

TIRF Releases Three New Resources for Alcohol Interlock Programs

The Traffic Injury Research Foundation is pleased to announce the publication of three new resources about alcohol interlock programs.

1. A new program evaluation module has been added to the Alcohol Interlock Curriculum for Practitioners (www.aic.tirf.ca). This resource is made possible through a cooperative agreement with the National Highway Traffic Safety Administration (NHTSA) and was developed with input from an expert panel of program administrators, highway safety office managers, and criminal justice practitioners. The new module is [available here](#). Please register in order to access the new module.

2. TIRF USA has published 2016 Annual Ignition Interlock Survey: United States. The Traffic Injury Research Foundation USA, Inc. (TIRF USA), in partnership with the Association of Ignition Interlock Program Administrators (AIIPA) and TIRF in Canada, conducted a national survey of the number of total installed and active installed ignition interlocks in the United States in 2015, and from January 1st through August 31st, 2016. These data provide a comprehensive picture of interlock installations across the United States and comparisons are made to data from the previous year where feasible. The 2016 alcohol interlock installation survey report is available at www.tirf.us.

3. The Proceedings from the 4th Annual Conference of the Association of Ignition Interlock Program Administrators are now available.

[Dealer Services Survey](#) (Ends 07/05/2017) Response received from AB.

[IRS Form 2290 & Registering Heavy Weight Vehicles](#) (Ends 06/12/2017) Responses received from AL, CA, GA, ID, IL, KS, ME, MI, MN, MO, NC, ND, NE, NM, SC, UT, VA, VT, WA, WI.

If you need a Web password or have any questions about using the survey tool, please send an e-mail to webportalsupport@aamva.org or call Janice Dluzynski at 703-908-5842. All online surveys can be found on the AAMVA Web site [here](#).

This event was held on May 15th-18th, 2016 in Denver, Colorado. Key topics on the agenda included national trends in alcohol interlock legislation, the use of advanced device features, innovative compliance-based monitoring strategies, and opportunities to build program stakeholder partnerships. In addition, presentations explored effective ways manage special populations in interlock programs, including offenders with respiratory problems, Tribal communities, drug-impaired drivers, and participants for whom cost is a challenge. The full proceedings can be downloaded from the [AIIPA website](#).

TRB: Automated Vehicles Symposium 2017

TRB and the Association for Unmanned Vehicle Systems International (AUVSI) are cosponsoring the Automated Vehicles Symposium in July 11-13, 2017 in San Francisco, California. This event will focus on challenges and opportunities related to the increasing automation of motor vehicles as well as the environments in which they operate. The workshop will build on previous workshops providing updates on the state-of-the-art in road vehicle automation research. For questions, contact Rich Cunard at RCunard@nas.edu. IDEC Executive Board Seeks Volunteers

The IDEC Executive Board is seeking two jurisdiction members to serve on the IDEC Executive Board - one from Region I and one from Region II. The IDEC Board is made up of one representative from each of the four AAMVA regions. The members of the Board bring global views and innovative ideas to the examiner training arena, provide outreach to the AAMVA jurisdictions to gain input on jurisdictional driver examiner training programs and provide accreditation of those driver examiner training programs. If you are interested in serving on the IDEC Executive Board, please fill out the [IDEC Board Application form](#) and send it back to: committees@aamva.org.

IDEC Executive Board Seeks Volunteers

The IDEC Executive Board is seeking two jurisdiction members to serve on the IDEC Executive Board - one from Region I and one from Region II. The IDEC Board is made up of one representative from each of the four AAMVA regions. The members of the Board bring global views and innovative ideas to the examiner training arena, provide outreach to the AAMVA jurisdictions to gain input on jurisdictional driver examiner training programs and provide accreditation of those driver examiner training programs. If you are interested in serving on the IDEC Executive Board, please fill out the [IDEC Board Application form](#) and send it back to: committees@aamva.org.

JURISDICTION NEWS

Motorcycle Skills Tests and Motorcycle Licenses No Longer Required for Operation of Three-wheel Auto-cycles in Georgia

Based on a recent law change, beginning July 1, 2017, drivers in Georgia operating three-wheel auto-cycles (three-wheel motor vehicles controlled by a steering wheel) will no longer be required to possess a motorcycle license or motorcycle learner's permit. In addition, Georgia residents who wish to legally operate an auto-cycle in Georgia will no longer be required to take the DDS motorcycle knowledge test or motorcycle skills test. Instead, effective July 1, 2017, drivers in Georgia operating three-wheel auto-cycles will only be required to possess a valid Georgia Class C (regular) driver's license, a valid Georgia Class CP (regular) learner's permit, or any equivalent class of driver's license or learner's permit issued by another state. Governor Cuomo Announces Fake ID and Underage Drinking Sweeps at Summer Concerts Across New York

New York Governor Andrew M. Cuomo announced that DMV investigators and State Police, in cooperation with local law enforcement, have launched a 2017 summer concert crack down. As part of the state's "Operation Prevent" initiative, DMV held its first concert enforcement on Thursday, May 18, making 12 arrests at the Brad Paisley concert at Saratoga Performing Arts Center and 55 arrests at the Future concert at Darien Lake on May 24. At the Brad Paisley and Future concerts in May, fraudulent licenses from New York, Rhode Island, Illinois, Pennsylvania, Florida, Maryland, New Jersey, Connecticut and Florida were recovered. Operation Prevent Investigators will continue to conduct sweeps at venues this summer including SPAC, Darien Lake, Jones Beach, Canalside in Buffalo, CMAC in Canandaigua and the Lakeview Amphitheater in Syracuse, as well as other events where underage concertgoers are likely to gather. DMV's Division of Field Investigation perform the investigations in partnership with the State Liquor Authority, New York State Park Police, New York State Police, and local law enforcement agencies. [Read more here.](#)

FEDERAL NEWS

DOT Seeks To Renew Existing ICR On TIFIA Program

The Department of Transportation (DOT) [has submitted](#) an information collection request to the Office of Management and Budget (OMB) to renew an existing information collection which allows entities to apply for the Transportation Infrastructure Financing and Innovation Act program (TIFIA) credit assistance and assists the DOT in evaluating projects and project sponsors for program eligibility and creditworthiness. The TIFIA program requires applicants [to submit two types of responses](#) for consideration including a letter of interest and an application. Written comments should be submitted by June 30, 2017.

FMCSA Withdraws Advance Notice of Proposed Rulemaking Concerning Financial Responsibility for Motor Carriers, Freight Forwarders, and Brokers

The Federal Motor Carrier Safety Administration (FMCSA) [withdraws](#) its November 28, 2014 advance notice of proposed rulemaking (ANPRM) concerning financial responsibility for motor carriers, freight forwarders, and brokers. FMCSA is authorized to establish minimum levels of financial responsibility for motor carriers at or above the minimum levels set by Congress. In the ANPRM, FMCSA sought public comment on whether to exercise its discretion to increase the minimum levels of financial responsibility, and, if so, to what levels. After reviewing all public comments to the ANPRM, FMCSA has determined that it has insufficient data or information to support moving forward with a rulemaking proposal, at this time.

NTSB & NSC Announce July 24 Roundtable on Commercial Vehicle Safety Technology

The National Transportation Safety Board (NTSB) and the National Safety Council (NSC) will co-host a roundtable discussion on "[Advanced Driver Assistance Systems - Strategies for Increasing Commercial Vehicle Adoption](#)," July 24, 2017, from 1:00 - 5:30 P.M. CDT at the Renaissance Schaumburg Convention Center Hotel, in Schaumburg, Illinois. Roundtable participants will include experts on this topic from industry, government, advocacy groups, media, and academia. Motor vehicle crashes continue to be a leading cause of preventable deaths in the United States. According to the NSC, an estimated 40,000 Americans died from traffic accidents in 2016, a 6 percent jump from the previous year. And, in 2015, according to the Federal Motor Carrier Safety Administration, 4,311 large trucks and buses were involved in fatal crashes, an 8 percent increase from 2014. Advanced driver assistance systems (ADAS) - also known as collision avoidance technologies - can play a significant role in preventing crashes and saving lives. While we have seen significant growth in the passenger vehicle market, adoption of ADAS technologies in the commercial vehicle market (heavy trucks) and among employer and rental fleets has been slow. For more information, contact Amy

As Teen Traffic Deaths Spike, States Awarded New Grants

With teen driver deaths up 9 percent in 2015, The Governors Highway Safety Association (GHSA) and [Ford Driving Skills for Life](#) (Ford DSFL) have awarded [State Highway Safety Offices](#) (SHSOs) in Georgia, Montana, Nebraska, New Hampshire and New York \$74,000 in funding to support teen safe driving activities. This announcement comes on the heels of [new AAA Foundation for Traffic Safety research](#) that newly licensed teen drivers in were three times as likely as adults to be involved in fatal crashes. Also, according to NHTSA, a total of 1,866 teen drivers were killed in 2015 -- 163 more teen deaths than in 2014. Early estimates for 2016 reveal that traffic deaths continued their surge upward. [Read more here.](#)

ENO Report: Adopting and Adapting: States and Automated Vehicles

The ENO Center for Transportation has released a report, *Adopting and Adapting: States and Automated Vehicles*. Automated vehicles are challenging the status quo of transportation networks and the policies that support them. The technology is developing quickly and has the potential to make roadways safer, more efficient, and more accessible for Americans. However, commercial deployment is still several years away, and successful implementation is far from guaranteed. To allow the technology to reach its full potential, governments at all levels need to adapt, especially on the state level. State governments have long played an important role in planning, regulating, and managing roadway networks, however AVs could entirely upend the existing federalist structure. This paper provides guidance on how states should prepare for an automated future by adapting their approach to motor vehicle regulations, infrastructure investment, and research. [Read more here.](#)

TIRF Releases Three New Resources for Alcohol Interlock Programs

The Traffic Injury Research Foundation is pleased to announce the publication of three new resources about alcohol interlock programs.

1. A new program evaluation module has been added to the Alcohol Interlock Curriculum for Practitioners (www.aic.tirf.ca). This resource is made possible through a cooperative agreement with the National Highway Traffic Safety Administration (NHTSA) and was developed with input from an expert panel of program administrators, highway safety office managers, and criminal justice practitioners. The new module is [available here](#). Please register in order to access the new module.

2. TIRF USA has published 2016 Annual Ignition Interlock Survey: United States. The Traffic Injury Research Foundation USA, Inc. (TIRF USA), in partnership with the Association of Ignition Interlock Program Administrators (AIIPA) and TIRF in Canada, conducted a national survey of the number of total installed and active installed ignition interlocks in the United States in 2015, and from January 1st through August 31st, 2016. These data provide a comprehensive picture of interlock installations across the United States and comparisons are made to data from the previous year where feasible. The 2016 alcohol interlock installation survey report is available at www.tirf.us.

3. The Proceedings from the 4th Annual Conference of the Association of Ignition Interlock Program Administrators are now available.

[Dealer Services Survey](#) (Ends 07/05/2017) Response received from AB.

[IRS Form 2290 & Registering Heavy Weight Vehicles](#) (Ends 06/12/2017) Responses received from AL, CA, GA, ID, IL, KS, ME, MI, MN, MO, NC, ND, NE, NM, SC, UT, VA, VT, WA, WI.

If you need a Web password or have any questions about using the survey tool, please send an e-mail to webportalsupport@aamva.org or call Janice Dluzynski at 703-908-5842. All online surveys can be found on the AAMVA Web site [here](#).

This event was held on May 15th-18th, 2016 in Denver, Colorado. Key topics on the agenda included national trends in alcohol interlock legislation, the use of advanced device features, innovative compliance-based monitoring strategies, and opportunities to build program stakeholder partnerships. In addition, presentations explored effective ways manage special populations in interlock programs, including offenders with respiratory problems, Tribal communities, drug-impaired drivers, and participants for whom cost is a challenge. The full proceedings can be downloaded from the [AIIPA website](#).

TRB: Automated Vehicles Symposium 2017

IDEC Executive Board Seeks Volunteers

The IDEC Executive Board is seeking two jurisdiction members to serve on the IDEC Executive Board - one from Region I and one from Region II. The IDEC Board is made up of one representative from each of the four AAMVA regions. The members of the Board bring global views and innovative ideas to the examiner training arena, provide outreach to the AAMVA jurisdictions to gain input on jurisdictional driver examiner training programs and provide accreditation of those driver examiner training programs. If you are interested in serving on the IDEC Executive Board, please fill out the [IDEC Board Application form](#) and send it back to: committees@aamva.org.

JURISDICTION NEWS

Motorcycle Skills Tests and Motorcycle Licenses No Longer Required for Operation of Three-wheel Auto-cycles in Georgia

Based on a recent law change, beginning July 1, 2017, drivers in Georgia operating three-wheel auto-cycles (three-wheel motor vehicles controlled by a steering wheel) will no longer be required to possess a motorcycle license or motorcycle learner's permit. In addition, Georgia residents who wish to legally operate an auto-cycle in Georgia will no longer be required to take the DDS motorcycle knowledge test or motorcycle skills test. Instead, effective July 1, 2017, drivers in Georgia operating three-wheel auto-cycles will only be required to possess a valid Georgia Class C (regular) driver's license, a valid Georgia Class CP (regular) learner's permit, or any equivalent class of driver's license or learner's permit issued by another state. Governor Cuomo Announces Fake ID and Underage Drinking Sweeps at Summer Concerts Across New York

New York Governor Andrew M. Cuomo announced that DMV investigators and State Police, in cooperation with local law enforcement, have launched a 2017 summer concert crack down. As part of the state's "Operation Prevent" initiative, DMV held its first concert enforcement on Thursday, May 18, making 12 arrests at the Brad Paisley concert at Saratoga Performing Arts Center and 55 arrests at the Future concert at Darien Lake on May 24. At the Brad Paisley and Future concerts in May, fraudulent licenses from New York, Rhode Island, Illinois, Pennsylvania, Florida, Maryland, New Jersey, Connecticut and Florida were recovered. Operation Prevent Investigators will continue to conduct sweeps at venues this summer including SPAC, Darien Lake, Jones Beach, Canalside in Buffalo, CMAC in Canandaigua and the Lakeview Amphitheater in Syracuse, as well as other events where underage concertgoers are likely to gather. DMV's Division of Field Investigation perform the investigations in partnership with the State Liquor Authority, New York State Park Police, New York State Police, and local law enforcement agencies. [Read more here.](#)

FEDERAL NEWS

DOT Seeks To Renew Existing ICR On TIFIA Program

The Department of Transportation (DOT) [has submitted](#) an information collection request to the Office of Management and Budget (OMB) to renew an existing information collection which allows entities to apply for the Transportation Infrastructure Financing and Innovation Act program (TIFIA) credit assistance and assists the DOT in evaluating projects and project sponsors for program eligibility and creditworthiness. The TIFIA program requires applicants [to submit two types of responses](#) for consideration including a letter of interest and an application. Written comments should be submitted by June 30, 2017.

FMCSA Withdraws Advance Notice of Proposed Rulemaking Concerning Financial Responsibility for Motor Carriers, Freight Forwarders, and Brokers

The Federal Motor Carrier Safety Administration (FMCSA) [withdraws](#) its November 28, 2014 advance notice of proposed rulemaking (ANPRM) concerning financial responsibility for motor carriers, freight forwarders, and brokers. FMCSA is authorized to establish minimum levels of financial responsibility for motor carriers at or above the minimum levels set by Congress. In the ANPRM, FMCSA sought public comment on whether to exercise its discretion to increase the minimum levels of financial responsibility, and, if so, to what levels. After reviewing all public comments to the ANPRM, FMCSA has determined that it has insufficient data or information to support moving forward with a rulemaking proposal, at this time.

NTSB & NSC Announce July 24 Roundtable on Commercial Vehicle Safety Technology

The National Transportation Safety Board (NTSB) and the National Safety Council (NSC) will co-host a roundtable discussion on "[Advanced Driver Assistance Systems - Strategies for Increasing Commercial Vehicle Adoption](#)," July 24, 2017, from 1:00 - 5:30 P.M. CDT at the Renaissance Schaumburg Convention Center Hotel, in Schaumburg, Illinois. Roundtable participants will include experts on this topic from industry, government, advocacy groups, media, and academia. Motor vehicle crashes continue to be a leading cause of preventable deaths in the United States. According to the NSC, an estimated 40,000 Americans died from traffic accidents in 2016, a 6 percent jump from the previous year. And, in 2015, according to the Federal Motor Carrier Safety Administration, 4,311 large trucks and buses were involved in fatal crashes, an 8 percent increase from 2014. Advanced driver assistance systems (ADAS) - also known as collision avoidance technologies - can play a significant role in preventing crashes and saving lives. While we have seen significant growth in the passenger vehicle market, adoption of ADAS technologies in the commercial vehicle market (heavy trucks) and among employer and rental fleets has been slow. For more information, contact Amy

As Teen Traffic Deaths Spike, States Awarded New Grants

With teen driver deaths up 9 percent in 2015, The Governors Highway Safety Association (GHSA) and [Ford Driving Skills for Life](#) (Ford DSFL) have awarded [State Highway Safety Offices](#) (SHSOs) in Georgia, Montana, Nebraska, New Hampshire and New York \$74,000 in funding to support teen safe driving activities. This announcement comes on the heels of [new AAA Foundation for Traffic Safety research](#) that newly licensed teen drivers in were three times as likely as adults to be involved in fatal crashes. Also, according to NHTSA, a total of 1,866 teen drivers were killed in 2015 -- 163 more teen deaths than in 2014. Early estimates for 2016 reveal that traffic deaths continued their surge upward. [Read more here.](#)

ENO Report: Adopting and Adapting: States and Automated Vehicles

The ENO Center for Transportation has released a report, *Adopting and Adapting: States and Automated Vehicles*. Automated vehicles are challenging the status quo of transportation networks and the policies that support them. The technology is developing quickly and has the potential to make roadways safer, more efficient, and more accessible for Americans. However, commercial deployment is still several years away, and successful implementation is far from guaranteed. To allow the technology to reach its full potential, governments at all levels need to adapt, especially on the state level. State governments have long played an important role in planning, regulating, and managing roadway networks, however AVs could entirely upend the existing federalist structure. This paper provides guidance on how states should prepare for an automated future by adapting their approach to motor vehicle regulations, infrastructure investment, and research. [Read more here.](#)

TIRF Releases Three New Resources for Alcohol Interlock Programs

The Traffic Injury Research Foundation is pleased to announce the publication of three new resources about alcohol interlock programs.

1. A new program evaluation module has been added to the Alcohol Interlock Curriculum for Practitioners (www.aic.tirf.ca). This resource is made possible through a cooperative agreement with the National Highway Traffic Safety Administration (NHTSA) and was developed with input from an expert panel of program administrators, highway safety office managers, and criminal justice practitioners. The new module is [available here](#). Please register in order to access the new module.

2. TIRF USA has published 2016 Annual Ignition Interlock Survey: United States. The Traffic Injury Research Foundation USA, Inc. (TIRF USA), in partnership with the Association of Ignition Interlock Program Administrators (AIIPA) and TIRF in Canada, conducted a national survey of the number of total installed and active installed ignition interlocks in the United States in 2015, and from January 1st through August 31st, 2016. These data provide a comprehensive picture of interlock installations across the United States and comparisons are made to data from the previous year where feasible. The 2016 alcohol interlock installation survey report is available at www.tirf.us.

3. The Proceedings from the 4th Annual Conference of the Association of Ignition Interlock Program Administrators are now available.

[Dealer Services Survey](#) (Ends 07/05/2017) Response received from AB.

[IRS Form 2290 & Registering Heavy Weight Vehicles](#) (Ends 06/12/2017) Responses received from AL, CA, GA, ID, IL, KS, ME, MI, MN, MO, NC, ND, NE, NM, SC, UT, VA, VT, WA, WI.

If you need a Web password or have any questions about using the survey tool, please send an e-mail to webportalsupport@aamva.org or call Janice Dluzynski at 703-908-5842. All online surveys can be found on the AAMVA Web site [here](#).

This event was held on May 15th-18th, 2016 in Denver, Colorado. Key topics on the agenda included national trends in alcohol interlock legislation, the use of advanced device features, innovative compliance-based monitoring strategies, and opportunities to build program stakeholder partnerships. In addition, presentations explored effective ways manage special populations in interlock programs, including offenders with respiratory problems, Tribal communities, drug-impaired drivers, and participants for whom cost is a challenge. The full proceedings can be downloaded from the [AIIPA website](#).

TRB: Automated Vehicles Symposium 2017

TRB and the Association for Unmanned Vehicle Systems International (AUVSI) are cosponsoring the Automated Vehicles Symposium in July 11-13, 2017 in San Francisco, California. This event will focus on challenges and opportunities related to the increasing automation of motor vehicles as well as the environments in which they operate. The workshop will build on previous workshops providing updates on the state-of-the-art in road vehicle automation research. For questions, contact Rich Cunard at RCunard@nas.edu. IDEC Executive Board Seeks Volunteers

The IDEC Executive Board is seeking two jurisdiction members to serve on the IDEC Executive Board - one from Region I and one from Region II. The IDEC Board is made up of one representative from each of the four AAMVA regions. The members of the Board bring global views and innovative ideas to the examiner training arena, provide outreach to the AAMVA jurisdictions to gain input on jurisdictional driver examiner training programs and provide accreditation of those driver examiner training programs. If you are interested in serving on the IDEC Executive Board, please fill out the [IDEC Board Application form](#) and send it back to: committees@aamva.org.

JURISDICTION NEWS

Motorcycle Skills Tests and Motorcycle Licenses No Longer Required for Operation of Three-wheel Auto-cycles in Georgia

Based on a recent law change, beginning July 1, 2017, drivers in Georgia operating three-wheel auto-cycles (three-wheel motor vehicles controlled by a steering wheel) will no longer be required to possess a motorcycle license or motorcycle learner's permit. In addition, Georgia residents who wish to legally operate an auto-cycle in Georgia will no longer be required to take the DDS motorcycle knowledge test or motorcycle skills test. Instead, effective July 1, 2017, drivers in Georgia operating three-wheel auto-cycles will only be required to possess a valid Georgia Class C (regular) driver's license, a valid Georgia Class CP (regular) learner's permit, or any equivalent class of driver's license or learner's permit issued by another state. Governor Cuomo Announces Fake ID and Underage Drinking Sweeps at Summer Concerts Across New York

New York Governor Andrew M. Cuomo announced that DMV investigators and State Police, in cooperation with local law enforcement, have launched a 2017 summer concert crack down. As part of the state's "Operation Prevent" initiative, DMV held its first concert enforcement on Thursday, May 18, making 12 arrests at the Brad Paisley concert at Saratoga Performing Arts Center and 55 arrests at the Future concert at Darien Lake on May 24. At the Brad Paisley and Future concerts in May, fraudulent licenses from New York, Rhode Island, Illinois, Pennsylvania, Florida, Maryland, New Jersey, Connecticut and Florida were recovered. Operation Prevent Investigators will continue to conduct sweeps at venues this summer including SPAC, Darien Lake, Jones Beach, Canalside in Buffalo, CMAC in Canandaigua and the Lakeview Amphitheater in Syracuse, as well as other events where underage concertgoers are likely to gather. DMV's Division of Field Investigation perform the investigations in partnership with the State Liquor Authority, New York State Park Police, New York State Police, and local law enforcement agencies. FEDERAL NEWS

DOT Seeks To Renew Existing ICR On TIFIA Program

The Department of Transportation (DOT) [has submitted](#) an information collection request to the Office of Management and Budget (OMB) to renew an existing information collection which allows entities to apply for the Transportation Infrastructure Financing and Innovation Act program (TIFIA) credit assistance and assists the DOT in evaluating projects and project sponsors for program eligibility and creditworthiness. The TIFIA program requires applicants [to submit two types of responses](#) for consideration including a letter of interest and an application. Written comments should be submitted by June 30, 2017.

FMCSA Withdraws Advance Notice of Proposed Rulemaking Concerning Financial Responsibility for Motor Carriers, Freight Forwarders, and Brokers

The Federal Motor Carrier Safety Administration (FMCSA) [withdraws](#) its November 28, 2014 advance notice of proposed rulemaking (ANPRM) concerning financial responsibility for motor carriers, freight forwarders, and brokers. FMCSA is authorized to establish minimum levels of financial responsibility for motor carriers at or above the minimum levels set by Congress. In the ANPRM, FMCSA sought public comment on whether to exercise its discretion to increase the minimum levels of financial responsibility, and, if so, to what levels. After reviewing all public comments to the ANPRM, FMCSA has determined that it has insufficient data or information to support moving forward with a rulemaking proposal, at this time.

NTSB & NSC Announce July 24 Roundtable on Commercial Vehicle Safety Technology

The National Transportation Safety Board (NTSB) and the National Safety Council (NSC) will co-host a roundtable discussion on "[Advanced Driver Assistance Systems - Strategies for Increasing Commercial Vehicle Adoption](#)," July 24, 2017, from 1:00 - 5:30 P.M. CDT at the Renaissance Schaumburg Convention Center Hotel, in Schaumburg, Illinois. Roundtable participants will include experts on this topic from industry, government, advocacy groups, media, and academia. Motor vehicle crashes continue to be a leading cause of preventable deaths in the United States. According to the NSC, an estimated 40,000 Americans died from traffic accidents in 2016, a 6 percent jump from the previous year. And, in 2015, according to the Federal Motor Carrier Safety Administration, 4,311 large trucks and buses were involved in fatal crashes, an 8 percent increase from 2014. Advanced driver assistance systems (ADAS) - also known as collision avoidance technologies - can play a significant role in preventing crashes and saving lives. While we have seen significant growth in the passenger vehicle market, adoption of ADAS technologies in the commercial vehicle market (heavy trucks) and among employer and rental fleets has been slow. ENO Report: Adopting and Adapting: States and Automated Vehicles

The ENO Center for Transportation has released a report, *Adopting and Adapting: States and Automated Vehicles*. Automated vehicles are challenging the status quo of transportation networks and the policies that support them. The technology is developing quickly and has the potential to make roadways safer, more efficient, and more accessible for Americans. However, commercial deployment is still several years away, and successful implementation is far from guaranteed. To allow the technology to reach its full potential, governments at all levels need to adapt, especially on the state level. State governments have long played an important role in planning, regulating, and managing roadway networks, however AVs could entirely upend the existing federalist structure. This paper provides guidance on how states should prepare for an automated future by adapting their approach to motor vehicle regulations, infrastructure investment, and research. [Read more here.](#)

TIRF Releases Three New Resources for Alcohol Interlock Programs

The Traffic Injury Research Foundation is pleased to announce the publication of three new resources about alcohol interlock programs.

1. A new program evaluation module has been added to the Alcohol Interlock Curriculum for Practitioners (www.aic.tirf.ca). This resource is made possible through a cooperative agreement with the National Highway Traffic Safety Administration (NHTSA) and was developed with input from an expert panel of program administrators, highway safety office managers, and criminal justice practitioners. The new module is [available here](#). Please register in order to access the new module.

2. TIRF USA has published 2016 Annual Ignition Interlock Survey: United States. The Traffic Injury Research Foundation USA, Inc. (TIRF USA), in partnership with the Association of Ignition Interlock Program Administrators (AIIPA) and TIRF in Canada, conducted a national survey of the number of total installed and active installed ignition interlocks in the United States in 2015, and from January 1st through August 31st, 2016. These data provide a comprehensive picture of interlock installations across the United States and comparisons are made to data from the previous year where feasible. The 2016 alcohol interlock installation survey report is available at www.tirf.us.

3. The Proceedings from the 4th Annual Conference of the Association of Ignition Interlock Program Administrators are now available.

[Dealer Services Survey](#) (Ends 07/05/2017) Response received from AB.

[IRS Form 2290 & Registering Heavy Weight Vehicles](#) (Ends 06/12/2017) Responses received from AL, CA, GA, ID, IL, KS, ME, MI, MN, MO, NC, ND, NE, NM, SC, UT, VA, VT, WA, WI.

If you need a Web password or have any questions about using the survey tool, please send an e-mail to webportalsupport@aamva.org or call Janice Dluzynski at 703-908-5842. All online surveys can be found on the AAMVA Web site [here](#).

This event was held on May 15th-18th, 2016 in Denver, Colorado. Key topics on the agenda included national trends in alcohol interlock legislation, the use of advanced device features, innovative compliance-based monitoring strategies, and opportunities to build program stakeholder partnerships. In addition, presentations explored effective ways manage special populations in interlock programs, including offenders with respiratory problems, Tribal communities, drug-impaired drivers, and participants for whom cost is a challenge. The full proceedings can be downloaded from the [AIIPA website](#).

TRB: Automated Vehicles Symposium 2017

TRB and the Association for Unmanned Vehicle Systems International (AUVSI) are cosponsoring the Automated Vehicles Symposium in July 11-13, 2017 in San Francisco, California. This event will focus on challenges and opportunities related to the increasing automation of motor vehicles as well as the environments in which they operate. The workshop will build on previous workshops providing updates on the state-of-the-art in road vehicle automation research. For questions, contact Rich Cunard at RCunard@nas.edu. Subject: AK NMVTIS Testing - 002, 005, 006, 011, 012

Good morning Susan,

I've attached my current version of the spreadsheet, as well as images for test cases 002, 005, 006, and 011. I've also performed TC012 which now correctly results in no messages being sent.

A few notes:

- TC005 returned the UT with errors, I'm assuming this is expected.
- State Titling Key wasn't being populated on our CSOT messages sent from the titling system. I had run into this before but couldn't find the cause. Between TC006 and TC011 I located the cause and fixed the issue. TC006 is the only CSOT that succeeded without a state titling key, and I believe the in-state change that'll be performed by TC007 will add the state titling key to the record.
- Originally TC012 correctly skipped sending inquiry messages but sent a UA message with AI title number 7277334. I fixed the issue, performed a Title Undo, removed the vehicle from our system, and titled it again as a new vehicle using 7277335. This correctly resulted in no messages being sent.
- We have the make "Mini Cooper" in our migrated data as "MNNI" rather than "MINI". I believe this to be a typo in the production and/or migrated data. I'll address this as soon as I can.

Unless I hear otherwise I'll continue performing the initial tests cases of each group where possible.

Thank you,

This email comes from an external source, so remember, Think Before You Click!
Hi Dillon,

I have updated the state titling key for the gold test cases. You can go ahead and get started. The duplicate you mentioned is meant to be there.

Also in answer to your question "Is it safe to assume there's no harm in assigning information for a test case that later ends up unused / not resulting in a titling event? There are some cases where I'll need to run inquiries to know what data to use. For example, Test Case 021 seems to imply that Test Case 020 will return a theft result and shouldn't be titled." is yes this is required. You should go ahead and title and your programs should determine if the records should be sent to NMVTIS as well as if an inquiry should be executed. As stated previously vehicles that are not to be sent to NMVTIS should not be inquired upon but it will be necessary to inquire on all other vehicles as you will need to respond according to what is found in the response to the inquiry.

Thanks,
Susan Creighton / 703.908.5893 office

Hello Susan,

I've made sure that our database has a vehicle stored for every row with Old SOT set to "AI". Please update the records you created for the five gold/orange rows with Old State AI to include the state titling key I've filled out. The system relies on state titling key as a primary identifier.

Additionally, I got back a duplicate title result for the UA pertaining to **AISTRUCTREDTSTW01**

Subject: RE: AK NMVTIS Testing - Structured Testing values

Hi Susan,

I ran into two issues. I can't find any production data to support a vehicle of type "Van Camper", so I don't have a Make listed for that yet. Also, I can't find production data to support what I believe was supposed to be a Chevy Auto Carrier. I ended up using Aztec as the make instead.

Outside of these issues, I believe I've appropriately populated all the necessary fields. Please let me know if I've missed anything.

Thank you,

Subject: RE: AK NMVTIS Testing - Structured Testing values

This email comes from an external source, so remember, Think Before You Click!

Hi Dillon,

Please go ahead and set up all the data for the AK titles that should already be in the AK DB and on NMVTIS before we start the actual test scenario. These would be vehicles that are already titled in AK before the actual test scenario starts so we need to have the data updated in the AK DB and NMVTIS for those titles. These titles will be the yellow/gold highlighted cells in Columns G through N, the "Old" information. So go ahead and actually create the test data that will be used for AI which are highlighted yellow/gold in columns G – N. The instructions to do this are in the Comments column Z. For the gold highlighted cells the data is already in NMVTIS so you need to create the data on the AK DB via a backend method so that you do not send anything to NMVTIS. If you cannot do that, just go ahead and send a UA for those but let me know so I can delete/update data on NMVTIS before we start. Be sure you use the data already designated in those columns if there is data. For the yellow, you need to provide me what data you used when you did the setup.

For the Columns O – X we can capture the rest as we go.

Thanks,

Susan Creighton / 703.908.5893 office

Subject: RE: AK NMVTIS Testing - Structured Testing values

Hello Susan,

I've gone ahead and allocated a large block of title numbers, and started filling out the information I anticipate will be used during the test. Title Date and State Titling Key will not be available until the test is executed. Please ignore sections in red (they'll represent test cases I intend to inquire about with Debra) and any zero values (will be replaced by the time I'm done).

I've yet to start looking up valid makes for these vehicles, but does what I've filled out thus far seem appropriate?

Is it safe to assume there's no harm in assigning information for a test case that later ends up unused / not resulting in a titling event? There are some cases where I'll need to run inquiries to know what data to use. For example, Test Case 021 seems to imply that Test Case 020 will return a theft result and shouldn't be titled.

Subject: RE: AK NMVTIS Testing - Structured Test Case 001

This email comes from an external source, so remember, Think Before You Click!
Hi Dillon,

Since I need to know the data that you are setting up in order to update our test tool, it would be most appreciated if you could go ahead and do the setup as well as update the test case plan with that information before we get started (you don't need to redo the 1st test case). For this testing I'm going to give you a set of test cases you can do and you need to let me know which ones you did by sending the same info you sent me before for each one. You won't have to wait on me to validate before moving forward unless the test case has associated test cases or is highlighted blue indicating you need to contact AAMVA in which case I need to execute processes on our side before you move forward. So go ahead and do the setup for the test cases highlighted yellow/gold and provide the data you setup back to me in the test case plan and we will go from there.

Thanks,
Susan Creighton / 703.908.5893 office

Subject: AK NMVTIS Testing - Structured Test Case 001

Alright Susan,

I've deduced that 12,001-18,000 lbs. is the appropriate weight range for the information I input. The titling process has completed without sending an inquiry. The previous inquiries were from inputting values typical of a passenger vehicle as a sanity check.

I've attached the test case plan. Do you want me to attach it after each test case? Are we still doing one test case at a time?

Thank you,

Hi Dillon,

I'm finding a record on NMVTIS for this VIN where you sent a UA after you did an inquiry. I only see one IU and one UA, not multiple IUs. Please check into this and let me know when you are ready for me to remove the data so you can start over.

TitleId	OriginalJurisd	VIN	TitlingJurisd	TitleNumber	TransactionDate	TransactionType	Title

Subject: AK NMVTIS Testing - Structured Test Case 001

Alright Susan,

I've deduced that 12,001-18,000 lbs. is the appropriate weight range for the information I input. The titling process has completed without sending an inquiry. The previous inquiries were from inputting values typical of a passenger vehicle as a sanity check.

I've attached the test case plan. Do you want me to attach it after each test case? Are we still doing one test case at a time?

Thank you,

Hello Susan,

I'm still working on executing the test case. Running into non-UNI-related validation issues. Thank you for looking that up. Still waking up and I didn't realize we have a code that corresponded directly to Food Wagon, so I could've just searched production data. I'll let you know as soon as it's done.

Thank you,

Hi Dillon,

I found this online when I looked up Food Truck: 2013 14' Ford E450 Step Van

Please make sure you have set up the data that is highlighted yellow and gold in the scenario test cases and updated the Test Case Plan (TCP) with the data you are using. Please use the TCP I sent on Friday and then provide a copy of back to me. We need to have this completed before we start as I need that data in order to update my test tool.

Thanks,
Susan Creighton / 703.908.5893 office

Hi AK,

Attached is the testing status report and updated test case plan. We have completed as much as we can of the Readiness Testing. I'm not sure when we will have the Theft file access working, and I validated that the format is correct via your screenshot so we can move forward with the scenario testing when you are ready.

Thanks,

Oh, sorry. I missed excluding in on the test case plan. That means we have completed as much as we can of the readiness testing as they are still working on our access to the NICB theft system so I cannot yet validate the IT message.

In the meanwhile, would you go ahead and do the IT on the VIN that is provided and let me know if you are seeing the theft hit via your screens that are displayed to your clerks/helpdesk? I'm not sure when they will have our access working and I don't want that to hold us up.

Thanks,

Hello Susan,

I used their function for adding a salvage status (they call it "junked" and it's different than brand code 8 "junk") to the vehicle. Let me ask Debra.

In the meantime, I can do the version you're describing. When titling a vehicle as reconstructed the order of events as you described do happen.

Here is the screenshot for R09 through the help desk.

Thank you,

I'm validating this but I have a question. Since this is coming from your titling system I checked to ensure you did an inquiry which I thought would be automatic, but I'm not finding it. I checked your Test Questionnaire and it says you always create a title when branding and I don't see that either. From your helpdesk you did add a new title and did the inquiry. Is there a reason it did not happen from the titling system?

Thanks,
Susan Creighton / 703.908.5893 office

Hello Susan,

I seem to have gotten the record stuck into a CSOT Undo – In Progress state. For some reason I thought we were doing it through the Titling System rather than the help desk, but I have all the screenshots to remind me we already did it that way.

Trying to undo the titling system CSOT I just did and redo it through the NMVTIS menu.

Could you reset the record for me please? Back to just being titled to S7.

The CSOT flag should have been set to N on my side before starting but I was able to validate R09 anyway. R09 passed. But because we need the record to be on NMVTIS in order to execute R10, could you please do the UT again so that NMVTIS gets updated and then proceed with R10. I have updated the CSOT flag so it will work this time.

Thanks,

Susan Creighton / 703.908.5893 office

Hi Susan,

Here are the screenshots for R09. There should be 10 total, numbered in order of occurrence. The CSOT was returned with a CSOT Undo In Progress error. I'm guessing this is expected?

Thank you,

This email comes from an external source, so remember, Think Before You Click!

Hi Dillon,

R05 passed. Please let me know for sure if the titling clerks will or will not have the ability to undo records. What if they make a mistake and realize it just after the record was sent to NMVTIS. Will that have to go to the helpdesk? If so then we will exclude the Undo message testing from Titling System readiness testing and just include those for the Helpdesk.

Please move forward with R08.

Thanks,
Susan Creighton / 703.908.5893 office

Subject: RE: AK - NMVTIS Readiness Testing R06

Here is the R05 completed using the help desk. I don't believe there's a way to perform an In-State Change Undo through the titling system.

Subject: RE: AK - NMVTIS Readiness Testing R06

This email comes from an external source, so remember, Think Before You Click!

Well dang it, it is obviously time for me to go home as I told you wrong.

The SOT and Title Number should have been from the NT message so you had it correct to begin with. I'm so sorry!!

17.6.5 Restored SOT - Message Transmission - C3

The SOT generates a C3 - Restore State of Title Confirmation message to the Brand & VIN Pointer controller, indicating it has processed the NT and acknowledges it is the current SOT.

The C3 message contains:

- o VIN (VVHIDN) from the NT message
- o SOT (VTIJUR) from the NT message
- o Title Number (VTINUM) from the NT message
- o The Saved Transaction Originator (GTROR1) is set to the Saved Transaction Originator (GTROR1) from the NT message
- o The Saved Message Locator (GMSLO1) is set to the Saved Message Locator (GMSLO1) from the NT message
- o See Appendix A for remaining NCB and MEC (02/3) block settings
- o Any applicable warning messages (see standard warning message settings in the Exception Processing section)

Again, I apologize, it has been a long day.

Thanks,
Susan Creighton / 703.908.5893 office

Hello Susan,

I see that we were using site code for VTIJUR instead of AK postal code. I'm not seeing a VTIPJU defined for C3. If this is the parameter you meant, I've made the change and it should be ready for testing.

Thank you,

Subject: RE: AK - NMVTIS Readiness Testing R06

That title has been set to active, and I moved the brand lookup earlier so that any errors be returned before the status is changed.

Subject: RE: AK - NMVTIS Readiness Testing R06

Hello Susan,

I found the issue. I was accidentally calling the HC version of brand lookup in HD, thus why it was referencing Title Number rather than Old Title Number. Please test again.

Non-Active Title warning is the error I have it setup to return in the case you mentioned. I'm working on a short database script to set that particular record back to active, but you may receive that warning depending on which of us is quicker.

I think you have set your title status to moved out of state due to the CSOT that we sent so the SD is getting sent back in error. Try updating your title status.

Thanks,

Susan,

I've pushed up my changes and I'm ready for another test. I'm still working out why GMSMSI isn't blank, as we're not explicitly assigning it any value. Is it expected to be blank for HC?

Thank you,

Good morning Susan,

I used an online VIN decoder at try and match the values you'd previously stated were different from expected, but I've heard nothing about a vin decoder being used the DMV and we do not incorporate one into the application.

HC and HD shared the majority of mappings, so I'm working on deviating the mappings to appropriately. Should be ready shortly.

This email comes from an external source, so remember, Think Before You Click!
Hi Dillon,

One thing I failed to ask. Your Make and Model Year are not the decoded values. Are you using a VIN decoder?

For R07 HD:

02/3	GMSLEI	MESSAGE MATCH LIMIT EXCEEDED IND SHOULD BE BLANK
02/3	GMSMSI	MESSAGE MATCH SEQUENCE ID SHOULD BE BLANK
02/3	GEMSAN	EXPECTED MESSAGE ADJUSTMENT NUMBER SHOULD BE BLANK
06/2	VVHVJI	VIN/HIN JURISDICTION IS MISSING
26/2	VTINUM	TITLE NUMBER IS MISSING
26/2	VTIJUR	TITLING JURISDICTION IS MISSING
26/3	VTIPJU	PREVIOUS TITLING JURISDICTION SHOULD BE POSTAL CODE
26/3	VTIPNU	PREVIOUS TITLE NUMBER IS PRESENT BUT NOT TO BE SENT IN TEST QUESTIONNAIRE
37/1	VBRDCD	BRANDER CODE (BOTH OCCURRENCES) ARE MISSING
37/1	VBRCOD	BRAND CODE (BOTH OCCURRENCES) ARE MISSING
37/1	VBRDAO	BRAND DATE (BOTH OCCURRENCES) ARE MISSING

The fact that the Title Number and the Titling Jurisdiction which are required fields caused the HD to be sent back to you in error, therefore, the HF was not created for the new SOT.

Regarding your questions below, please see my answers in-line.

Thanks,
Susan Creighton / 703.908.5893 office

Subject: RE: AK - NMVTIS Readiness Testing R06

Hello Susan,

In one of our previous conference calls you mentioned that we should not execute a brand undo when we add a reconstructed brand.

Does this hold true accounting for the fact that it is a salvage brand which would be replaced and not a junk brand?

Yes, the Salvage brand should remain on NMVTIS as the Brand File is to be a full history of NMVTIS branding events. The Reconstructed brand with a later date indicates the vehicle has been fixed (this will be in the procedures guide so other states understand what AK does).

Is a 1-to-1 correlation expected between the brand results returned in HC/HD and the brands recorded on the NMVTIS pointer?

I checked on this and you should send all of your brand history in the HC/HD, even if you have brands that are not to be recorded in NMVTIS, such as bond posted, etc. I believe in your case it will be a 1 to 1 correlation.

In the event the answer to both are yes, I'll need to consult with David and Debra to find a solution which meets these requirements. However, if either is no or flexible, then the issue is either already or easily solved depending on which.

Thank you,

Susan,

I've made that additional change. It looks much better in the UNI tool with the brand values aligned into exactly two blocks each. Really ready for you to test this time.

Quick update before you test Susan,

Comparing the offsets you gave me with the test I just run, I think I might need to adjust the brand record length to 122 instead to account for the expected two empty padding spaces. Give me just a moment and I'll fix that.

Dillon

Hello Susan,

Thank you for the explanation.

Our lengths of the parameter groups did differ from what was expected (35 instead of the expected 54 for VINOWN and 82 instead of 120 for brand information). I've changed those lengths and also fixed the zero padding issue in GEMSAN.

I'm ready for a re-test.

Thank you,

Subject: RE: AK - NMVTIS Readiness Testing R06

This email comes from an external source, so remember, Think Before You Click!

Hi Dillon,

I have updated the Test Questionnaire to indicate you will not be sending Use Class or Number of Axles and marked those as non-issues. The reason I asked about axles is because on the Test Questionnaire you indicated you will be sending the number of axles for commercial vehicles. Sending blank is fine for those if you never plan to populate those fields, but because you answered you would sometimes send, I needed to validate that you are sending actual data in the correct positions. On the Cylinders and Doors, you indicated you would not send on the Test Questionnaire.

I executed again:

The GEMSAN EXPECTED MESSAGE ADJUSTMENT NUMBER SHOULD BE 00 since you will never send an H1
OWNER 2nd occurrence starts in position 39 and should start in 58
OWNER 3rd occurrence starts in position 74 and should start in 112
OWNER 4th occurrence starts in position 109 and should start in 166
BRANDER 2nd occurrence starts in position 23 of 37102 and should start in position 2 of 37103
BRAND CODE 2nd occurrence starts in position 34 of 37103 and should start in position 13 of 37104
BRAND DATE 2nd occurrence starts in position 36 of 37103 and should start in position 15 of 37104

Thanks,
Susan Creighton / 703.908.5893 office

Subject: RE: AK - NMVTIS Readiness Testing R06

Hello Susan,

Please see the responses below that indicate Alaska doesn't collect information for the two parameters in question. I'm curious, why is VVHNAX considered inadequate when blank but not similar parameters (that Alaska also does not explicitly record) such as VVHNCY (Cylinders) and VVHNDO (Doors)? Is this a discrepancy in the questionnaire?

I've sorted out the issue with names. I believe the only comment this leaves unaddressed is:

For Brands will you only ever have 1 brand given your brand mapping? The Test Questionnaire indicates 2 occurrences. Also you have AI just after the brand date which does not belong there.

My understanding is that we will have 0-2 brands, the record we're using now has both, and that the "AI" after brand date represents the second occurrence of Brander Code (VBRDCD).

Please test again when possible.

Thank you,

Subject: NMVTIS Testing - Problematic parameters

Hello David and Debra,

I have two parameters I'm having issues with during testing.

The first is fairly straight forward. VVHUCC (VEHICLE USE CLASS CODE) appears to be supported by the current system only when receiving messages from NMVTIS. I've found no code that collects this information nor populates this

parameter when sending any relevant message type. From the documentation, the acceptable values for this parameter are:

0.19.36 - Vehicle Use Class Code			
The utilization of the vehicle.		Source of Definition: MVA Source of Data: Accident report, registration, MVA Synonyms: Special Use, Usage Class.	
Value	Description	Value	Description
00	None (not in use)	08	Agriculture
01	Personal	09	Wrecker or Tow
02	Driver Training	10	Police
03	Construction/Maintenance	11	Other Business
04	Ambulance	12	Fire fighting
05	Military	13	Bus
06	Taxi	97	Other
07	Transportation of property	99	Unknown
VVH/CC			
Format=Alpha-numeric Size=2 CUM-YD6-USE-CLASS			
Logical Format (Type/Max Length): AN/2			

I can make the change which will default these values to “00” for “None (not in use)” if there is no direct correlation between with the information we collect and these values.

The second parameter is VVHNAX (VEHICLE NUMBER OF AXLES). There exists a column in the AMB_PROPERTY table which corresponds to this field, but all values for this column in Treehouse are null. There appears to be no way to set this value in your current system. Could you please confirm that Alaska’s intention at this time is not to collect this data?

Thank you for your time and help,

Hi Dillon, thanks for the update.

Attached is the Defect Status Report that I promised I would try to have out each Friday. I am also attaching an updated Test Case Plan which denotes the test cases completed, etc. Please let me know if you have any questions.

Thanks,
Susan Creighton / 703.908.5893 office

Subject: RE: AK - NMVTIS Readiness Testing R06

One other note:

You asked: "On your Test Questionnaire I show that you do not plan to send previous title number. Is that wrong?"

The questionnaire is correct. Part of this set of changes will revert the changes I described previously.

I mistook that parameter as being amongst the "optional" parameters you were requesting we find a way to populate. Not populating that parameter resolves my confusion as to how we'd be expected to return something we don't store.

Thank you,

Dillon Salsman-Pressley • Programmer Analyst

Subject: RE: AK - NMVTIS Readiness Testing R06

Hello Susan,

Thank you for testing both cases. I'm attempting to address the issue with owner names. Meanwhile, I'm passing the questions about following parameters on to DMV:

06/4 VVHUCC VEHICLE USE CLASS CODE
parameter

There appears to be no way to support this

06/4 VVHNAX VEHICLE NUMBER OF AXLES
obtaining a non-null value

There appears to be no non-null data nor method of

I believe I've addressed all other issues. I'll be updating the test environment as soon as I have the names issue addressed and will request another test at that point.

Thank you,

Dillon Salsman-Pressley • Programmer Analyst

Hi Dillon,

I ran another inquiry and you are no longer sending the NON- ACTIVE TITLE warning. All other issues still exist.

For the first occurrence of GERDOC you should use "01".

I changed the Title Number as you requested and ran the inquiry again which caused you to return the SC back with the 409:TITLE NOT ON FILE error which is correct. The error was formatted correctly.

Thanks,
Susan Creighton / 703.908.5893 office

Another update Susan,

I found a few more places where we add warnings and I believe simultaneously corrected the issue with mistaking titles as being non-active. If you could please execute the query both with title number '5061805' for no GEROUT errors, and '5061804' for a correctly formatted non-active title warning, I would greatly appreciate it.

Thank you,

Subject: RE: AK - NMVTIS Readiness Testing R02A

Susan,

For now I've set it to "01". Before we address the issue causing the error to arise, can you go ahead and test again to make sure the error format is correct? My assumption is that the error is arising due to changes I've made which necessitated new in-state changes / title numbers.

Dillon

Hi Susan,

Looks like I might've accidentally hit reply rather than reply all last night. I've added everybody back to CC.

I'm working on the issues you've identified. I had a quick question about GERDOC.
Should the value for non-repeating parameters be " ", "00", or "01"?

Thank you,

Subject: RE: AK - NMVTIS Readiness Testing R02A

This email comes from an external source, so remember, Think Before You Click!
Hi Dillon,

I'm sorry but yesterday I missed the following missing data:

02/3	GPROST	PROCESSING STATUS
02/3	GMSLEI	MESSAGE MATCH LIMIT EXCEEDED IND
02/3	GMSMSI	MESSAGE MATCH SEQUENCE ID
02/3	GEMSAN	EXPECTED MESSAGE ADJUSTMENT NUMBER
06/2	VVHVJ	VIN/HIN JURISDICTION

You designated that you will “always” send the VVHVJ and that really should be “sometimes” as that is the Jurisdiction that assigned the non-standard VIN to the vehicle. Please just use Alaska and it should be AK not AI since the definition indicates it should be the postal code for the jurisdiction.

You should also be sending AK instead of AI for VTIJUR - TITLING JURISDICTION as the definition indicates it should be the postal code for the jurisdiction that issued the title.

I also noticed that you sent a 507:NON-ACTIVE TITLE message in the 99/2 block which should not have been sent (your Title Status shows Active which it should). But you also did not send the following data in that message which will affect later testing.

99/2	GERAEN	ERROR ELEMENT AAMVA CODE
99/2	GERAET	AAMVA ERROR TYPE
99/2	GERDOC	ERROR DATA OCCURRENCE

The following was in position 1 but should start in position 10

99/2	GERMTX	ERROR MESSAGE TEXT
------	--------	--------------------

Still missing:

06/4	VVHUCC	VEHICLE USE CLASS CODE	(you indicated you are still working on this)
06/4	VVHNAX	VEHICLE NUMBER OF AXLES	

26/3 VTIPJU - PREVIOUS TITLING JURISDICTION should have AK instead of AI as it should be the postal code

34/1 VOWNAM – OWNER NAME currently has Alvin.Shared.CommonLibrary.SharedMo 4 times but the second, third and fourth occurrences do not start in the correct positions (see below):

VOWNAM - OWNER NAME	AN	35	4
VOWNAM - OWNER NAME	AN	35	58
VOWNAM - OWNER NAME	AN	35	112
VOWNAM - OWNER NAME	AN	35	166

And for at least one of the owner names please use an individual so that I can check the format. If the owner is a business, the owner is free form. If the owner is an individual, a specific format is used which is defined in the Online Spec in Appendix D.2.1 See the **AAMVA Person Name Rule** (on page 269) for the complete set of rules governing the format of a person's name.

Also, on your Test Questionnaire I show that you do not plan to send previous title number. Is that wrong?

For Brands will you only ever have 1 brand given your brand mapping? The Test Questionnaire indicates 2 occurrences. Also you have AI just after the brand date which does not belong there.

Thanks,
Susan Creighton / 703.908.5893 office

Subject: RE: AK - NMVTIS Readiness Testing R02A

Hello Susan,

I believe I've made the necessary changes to our data and test environment.

The system does track previous state but not previous title number (outside of our own). I believe the intent is to let NMVTIS to keep a detailed account of information such as title transfers. For now I've made it so that previous title number returns the second most recent title we have on file.

I'll need to look into Use Code some more.

Please try R06 again when possible and let me know if any of the parameters not mentioned above are failing to meet expectations.

I'm headed home for the day.

Hi Dillon,

Please see my answers in-line below. It will be okay if you want to issue another title to add anything. If you don't need to issue another title I can just do another inquiry once you have everything fixed and have moved your code.

Thanks,
Susan Creighton / 703.908.5893 office

Cc: Garber, Casey; Chaudhry, Amir; David Nolen, AK Dept. of Administration; Mina Peters, AK Dept. of Administration
Subject: RE: AK - NMVTIS Readiness Testing R02A

Hello Susan,

Here are the changes I've made. I'll be moving the code changes to the test environment momentarily. I believe we'll need to reset the record and title again from scratch. There was no previous state provided when we titled the vehicle.

Our system does not do vin decoding.

06/3	VVHMNA	VEHICLE/VESSEL MODEL NAME	– Will be set to REC to have brand 10
06/3	VVHBST	VEHICLE/VESSEL BODY TYPE	– From what I can tell this is supposed to map to “CP”

(Coupe)? **Yes**

Just needed additional data.

06/3	VVHCOM	VEHICLE/VESSEL MINOR COLOR	- added secondary color
06/3	VVHNLN	NUMBER OF ACTIVE LIENS	– should have previously been 0, now 1
06/4	VVHENU	VEHICLE EQUIPMENT NUMBER	- added equipment number
30/6	VLHNAM	LIENHOLDER	- added lienholder
30/8	VLHADD	LIENHOLDER ADDRESS	- added lienholder
34/1	VOWNAM	OWNER NAME	- added additional owners

Code changes.

06/3	VVHLEI	VEHICLE LEASE INDICATOR	- fixed mapping
06/4	VVHNAX	VEHICLE NUMBER OF AXLES	- fixed mapping
06/4	VVHUL2	VEHICLE UNLADEN WEIGHT	- fixed mapping
26/4	VODDTE	ODOMETER DATE	- was supposed to already have been mapped to title date, system doesn't ask for / obtain this information

If you haven't already please check as to why this did not return the title date in this field.

30/7	VLNDAT	LIEN DATE	- mapped to title date, system doesn't ask for / obtain this information
------	--------	-----------	--

These three should potentially be fixed. We don't store brands. Presence of REC model type indicates brand 10, and an existing status message of type J indicates brand 11. Index / record length look suspect, so we may need updated call list format indexes for these fields.

37/1	VBRDCD	BRANDER CODE
37/1	VBRCOD	BRAND CODE (2 occurrences)
37/1	VBRDAO	BRAND DATE (2 occurrences)

Parameters we were asked to title on did not return a previous jurisdiction.

26/3	VTIPJU	PREVIOUS TITLING JURISDICTION	The previous title was Alaska
------	--------	-------------------------------	--------------------------------------

Is this supposed to correlate to one of the spreadsheets? I'm having a hard time tracking this one down.

06/4	VVHUCC	VEHICLE USE CLASS CODE	This is in the online spec in Appendix D (search on use case)
------	--------	------------------------	--

Thank you,

Subject: RE: AK - NMVTIS Readiness Testing R02A

This email comes from an external source, so remember, Think Before You Click!

Hi Dillon,

This time I received the HC in response but not all the fields are filled. You need to set up the vehicle so that the VIN decodes correctly, therefore, the vehicle make, year, body type, etc. are correct, and all the fields that you designated on your test questionnaire that you will always or sometimes send, have data for the maximum number of occurrences. I know some of the data will not make sense, but please fill anyway as I am checking that the data is coming in the correct positions.

MISSING DATA:

06/3	VVHBS	VEHICLE/VESSEL BODY TYPE – Should be what it decodes to
06/3	VVHMNA	VEHICLE/VESSEL MODEL NAME – Should be what it decodes to
06/3	VVHCOM	VEHICLE/VESSEL MINOR COLOR
06/3	VVHLEI	VEHICLE LEASE INDICATOR
06/3	VVHNLN	NUMBER OF ACTIVE LIENS – Please fill with a number
06/4	VVHUCC	VEHICLE USE CLASS CODE
06/4	VVHENU	VEHICLE EQUIPMENT NUMBER
06/4	VVHNAX	VEHICLE NUMBER OF AXLES
06/4	VVHUL2	VEHICLE UNLADEN WEIGHT
26/3	VTIPJU	PREVIOUS TITLING JURISDICTION
26/4	VODDTE	ODOMETER DATE
30/6	VLHNAM	LIENHOLDER NAME
30/7	VLNDAT	LIEN DATE
30/8	VLHADD	LIENHOLDER ADDRESS
34/1	VOWNAM	OWNER NAME (4 occurrences – I got 1 but need 4)
37/1	VBRDCD	BRANDER CODE
37/1	VBRCOD	BRAND CODE (2 occurrences)
37/1	VBRDAO	BRAND DATE (2 occurrences)

For Vehicle Owner Name, please use an individual so that I can check the format where you should be using @ between the first, last and middle names

34/1 VOWNAM OWNER NAME

Thanks,

Subject: RE: AK - NMVTIS Readiness Testing R02A

It seems like the State Titling Key isn't being set during the Title Add like it should be. The system checks against both the State Titling Key and VIN when receiving unsolicited messages. I'll investigate.

I know it's pushing 6pm on a Friday your time, how much longer will you be available?

Apologies for the delay, we're looking into a non-UNI-related bug where fields which should be able to have information entered into them aren't allowing us to do so. It's having the unfortunate side effect of preventing us from reaching the stage that we send the UA. While that's being investigated I'll see if I can manage the help desk version of UA.

Hi Dillon,

I validated the Titling Transactions for R02A and R02B and the Helpdesk Transaction for R02C and all passed.

Let's do R03 from Titling and once I validate we will do R04 from Titling so that we do all the test cases using the titling system. Once we finish I will reset the data and we will do those same transactions from the Helpdesk.

Thanks,
Susan Creighton / 703.908.5893 office

Subject: RE: AK - NMVTIS Readiness Testing R02A

Good morning Susan,

I apologize, my Outlook stopped receiving e-mails despite appearing to be functioning correctly. I assumed you simply had a busy morning until I attempted to send this e-mail and was presented with an error.

While I was waiting, I took the liberty of creating screenshots for all the variations of tests cases R02A, B, and C. In total you should find twelve images attached:

R02A: 2 images for IU & IT messages sent after the first form of the titling process
2 images for IU & IT messages sent by the 'help desk' function that sends both
2 images for the IU sent by the 'help desk' function that sends only an IU

R02B: 2 images for IU & IT messages sent after the first form of the titling process
2 images for IU & IT messages sent by the 'help desk' function that sends both
1 image for the IU sent by the 'help desk' function that sends only an IU

R02C: 1 image for the IU sent by the 'help desk' function that sends only an IU

Hopefully this covers any cases we're currently lacking.

-Dillon

Hi Dillon,

Based on your flow chart it looks as if the titling clerks use the Vehicle Menu and your Helpdesk uses the AAMVA Menu or NMVTIS Menu. Please confirm.

Based on the fact that the Helpdesk is calling the same code as the titling system and the only differences in the AAMVA Menu versus the NMVTIS Menu for the Helpdesk is which of the transactions they are allowed to do and whether the inquiries are sent automatically, we feel the below is what we need to test. Please let me know if you think this coverage will suffice. You will need to ensure that the AAMVA Menu messages are returning the same data as the NMVTIS Menu.

Test Case	Test Scenario	VIN	SOT	Title Number	Titling System	NMVTIS Menu Helpdesk
R02A	Send a Used Vehicle Inquiry (IU) <i>all optional and required fields should be populated</i>	AICASUALCURRTC003				P
R02B	Send a Used Vehicle Inquiry (IU) <i>Inquire using VIN/SOT/and Title#</i>	ZFF70RCA2B0177029	<i>S7</i>	<i>NOMATCHTITLE</i>		P

R02C	Send a Used Vehicle Inquiry (IU) Inquire using SOT/Title# only		NJ	AI201602600000482	X		
R03	Send an Add Title Transaction (UA) all optional and required fields should be populated	ZFF70RCA2B0177029					
R04	Send an In-state Title Change on the same VIN in TC R03 (UV) all optional and required fields should be populated	Same VIN as R03					
R06	You will receive a state vehicle data request (SC). Send the response (HC and H1 if applicable) all optional and required fields should be populated	Same VIN as R03					
R07	You will receive an old state vehicle data request (SD). Send the response (HD) all optional and required fields should be populated	Same VIN as R03					
R11	You will receive an Undo CSOT message (NT). Send the response (C3) all optional and required fields should be populated	Same VIN as R03					
R05	Remove the In-state Title Change in TC R04 (DU) all optional and required fields should be populated	Same VIN as R03					
R08	Remove the Add Title record in TC R03 (DM) all optional and required fields should be populated	Same VIN as R03					
R09	Send a Change State of Title (UT) all optional and required fields should be populated	AICASUALCURRTC008					
R10	Remove the Change State of Title (DT) all optional and required fields should be populated	Same VIN as R07					
R12	Send a Brand Inquiry (IB) all optional and required fields should be populated	AICASUALCURRTC001			X		
R13	Send a Brand Add (UB) for a brand you have mapped all optional and required fields should be populated	State Provided VIN					

R14	Remove the Brand in TC R13 (DB) all optional and required fields should be populated	Same VIN as R13				
R15	Send a History Inquiry (IH) all optional and required fields should be populated	AISTRUCTREDTSTY01			X	
R16	Send a Theft Inquiry (IT) all optional and required fields should be populated	THEFTINQUIRY222222				
R17	Purge an active record (DV). Please setup data in your state database and the Central File for this test case. All optional and required fields should be populated	State Provided VIN			X

As for which code is the same, perhaps this diagram will help.

Non-white backgrounds indicate color-coordinated shared code, with the exception of the solid blue starting nodes.

Subject: RE: AK - NMVTIS Readiness Testing R02A

Hi all,

Let me take a stab at it, based on my understanding. Dillon/David, please correct me if I am mistaken.

Our users have the ability to manually perform the following functions in the NMVTIS menu:

BRAND INQUIRY (IB)
TITLE HISTORY INQUIRY (IH)
THEFT INQUIRY (IT)
VEHICLE INQUIRY (IU)
BRAND UNDO (DB)
TITLE UNDO (DM)
CSOT UNDO (DT)
IN-STATE CHG UNDO NMVTIS
SET PURGE INDICATOR (DV)
RESEND C3 OR HD MSG
IN-STATE CHANGE (UV)
CSOT (UT)
BRAND ADD (UB)
ADD TITLE (UA)
THEFT OVERRIDE
ERROR REPORTS
IN-STATE CHG UNDO ALVIN

Common inquiries were duplicated in the AAMVA menu, which was around before the NMVTIS menu and includes DL functionality, and is slightly easier to navigate to. The AAMVA menu functions are:

NVMTIS BRAND INQUIRY
NMVTIS TITLE HISTORY
NMVTIS THEFT INQUIRY
NMVTIS VEHICLE INQUIRY

This should be using the same code as the corresponding functions in the NMVTIS menu. I believe this is what is meant by the Help Desk functionality...but it really is available to all users.

On top of that, some of the messages are embedded into the transaction itself. So when doing a new title/registration, an IU and IT are sent automatically, so the user does not need to manually perform the function. There probably are other embedded messages that I am not aware of.

So, the result is that although an IU (and other messages) can be sent from either a transaction or a manual process, it should all funnel into the same "Send IU" code. Right, Dillon?

Regards,

Mina Peters

Subject: RE: AK - NMVTIS Readiness Testing R02A

I'm trying to understand the difference in the AAMVA menu and NMVTIS menu for helpdesk. Are those two menus used for different resource types? And then there is a separate titling system that the titling clerks use? Are each of these methods using the same application code except for the differences in automatically sending the IT using VIN / SOT / Title Number in its various inquiry forms, so regardless of which menu you send the request from, it is the same code not different code?

Thanks,
Susan Creighton / 703.908.5893 office

Cc: Garber, Casey <CGarber@aamva.org>; Mina Peters, AK Dept. of Administration <mina.peters@alaska.gov>
Subject: RE: AK - NMVTIS Readiness Testing R02A

I've finished the alternate implementation on the AAMVA menu. In total there are three different ways IU's are sent:

- 1.) Implicitly as part of the various titling processes, which to my understanding requires a VIN.
- 2.) Explicitly from the AAMVA menu, as a help desk function, also sending an IT and thus requiring a VIN to be used.
- 3.) Explicitly from the NMVTIS menu, as a help desk function, does not send an IT and does not require VIN to be used. (Although there is an explicit theft inquiry on both the NMVTIS and AAMVA menu which both require a VIN to be used.)

To the best of my understanding, R02A and R02B can be executed all three ways, while R02C can only be executed the third way.

The very first screenshot I sent you would've been R02A using method 3.

The following screenshots with IT's sent now reflect R02A and R02B being executed using method 2, but I'd be happy to redo these tests.

The last screen shot represents R03 using method 3.

This leaves R02B using method 3 untested, with the titling versions completely untested.

This email comes from an external source, so remember, Think Before You Click!
And NMVTIS?

So, we will need to test both titling and helpdesk. You can do R02A again using the titling system or if you need to gain access we can move forward to R02C from the helpdesk and go back to R02A from your titling system once you are able. But we will need to test both the helpdesk and the titling system for readiness before we move to the online scenario testing. We will not need to test R02C from titling since you will only be using that format from the helpdesk.

Thanks,
Susan Creighton / 703.908.5893 office

Subject: RE: AK - NMVTIS Readiness Testing R02A

All requests thus far were executed from the NMVTIS menu which has been described as the Helpdesk application.

No requests thus far have been made as a result of attempting to formally title vehicle. (At no point this morning have I used nor perceived being instructed to use the explicit titling function which automatically sends a vehicle inquiry.)

I'm not sure whether the AAMVA menu functions are considered Help Desk functions or not.
David, could you please clarify?

Subject: RE: AK - NMVTIS Readiness Testing R03

Edit: Accidentally used wrong but correctly spelled words in a few places.

After some additional testing and research in between responses, I'm afraid I was mistaken in my previous statements and that we may have to backtrack a little.

It turns out that the functionality of the two manual endpoints on the production environment are as follows:

NMVTIS Menu Vehicle Inquiry:

- Will not automatically send an IT
- Will accept either VIN, Title Number and State of Title, or both.

AAMVA Menu Vehicle Inquiry:

- Automatically sends IT and IU
- Will only accept requests which include a VIN, with or without Title Number and State of Title.
- Will not accept a **request** without a VIN.

I apologize, I was not involved in the analysis nor “implementation” of the second endpoint. I will revert the previous change I made this morning to the existing NMVTIS Menu version and implement this alternate version for the AAMVA Menu. It seems, we will need to test both menus separately after all.

For this one I need to see the UA and on the high level the IU/IT/UA and then the responses. Please use the VIN provided in the test case plan. I will be checking that you are sending the correct make and model year as the VIN is decodable and that the data in your HC when I perform inquiry is based on this VIN.

Thanks,

Ok, I think we won't have to test it separately, but I'm checking to be sure. In the meantime, let's go ahead with R02B.

Thanks,

Susan Creighton / 703.908.5893 office

Subject: RE: AK - NMVTIS Readiness Testing

In the new application, they share entirely the same code (NMVTIS functions on the AAMVA menu redirect to their equivalent function on the NMVTIS menu). In the existing production environment, it is a separate form that provides additional "person" related fields to support non-NMVTIS functions, but both call the same code to send message.

In that case it would seem that the help desk functionality is integrated into the application, and that the IU/IT sent previously was performed using the help desk application.

All solicited messages can be manually sent from this "NMVTIS Menu". There are duplicate endpoints for Vehicle Inquiry (IU/IT), Title History, Brand Inquiry, and Theft Inquiry on an "AAMVA Menu", which I suspect is also considered Help Desk functionality. However, functionally they are identical. For those four endpoints I can send the message from both ways, but functions which manipulate pointer data will only be manually available from the "NMVTIS Menu".

It's the NMVTIS menu on the mainframe. Use PF9 from the vehicle menu.

If the help desk application is indeed separate as previously indicated, I do not have access to it.

I've reach out to David for clarification, in the meantime would it be possible to continue the readiness test for the main application?

Okay, perfect. Please perform the same test using your helpdesk. We have to test that separately since it is standalone.

BTW: I Changed the subject of this email.

I've made the change so that performing a manual IU now automatically sends an IT. Please find attached new images from the UNI Web Tool.

The screenshot shows a web browser window with the address bar displaying `http://dmvvaicunidev1: Network Message Log`. The application has a menu bar with **Edit**, **View**, **Tools**, **Admin**, and **Help**. Below the menu is a section titled **Log Message** containing a table of log entries.

IU and IT both have a dedicated endpoint for being called manually, but my understanding is that when attempting to title a vehicle both will be sent. I sent the IU manually rather than attempting to title AICASUALCURRTC003. The IT has now been sent.

I'll also make a note to check whether the manual endpoint in the production environment sends both.

This email comes from an external source, so remember, Think Before You Click!

Also, for the record, yesterday I mentioned that you should be performing inquiry before any updates. There is one exception. Should not perform inquiry on vehicles that are not NMVTIS eligible, like boats, golf carts, trailers, etc. In the vehicle mapping which is included in the test case plan there is a column that says whether the vehicle is supposed to be sent to NMVTIS or not. If it says no, you should not do inquiry.

As far as the testing, I don't see where you sent an IT. Also, I need to be able to see all the responses you received. There should be some more RI/RJ messages. Otherwise, the format of the message looks good.

Thanks,

Susan Creighton / 703.908.5893 office

Here's a screenshot of the IU from R02A.

I've gone ahead and CC'd Mina as well, as another developer indicated she wanted to be included during SPEX testing.

Mina, if there's anybody else you'd like me to include please let me know. Or likewise if you'd like to opt out.

Hi Dillon,

I forgot to ask you to please send me screenshots of the UNI Messages you send opened up in Text format and a high level screenshot of all the responses you receive. It should look like this and don't shrink them as I need to be able to read them. I highlighted how where you need to change the format to text.

Thanks,
Susan Creighton / 703.908.5893 office

From: Creighton, Susan
Sent: Thursday, May 11, 2017 11:20 AM
To: 'Dillon Salsman'
Cc: Garber, Casey
Subject: RE: AK - NMVTIS Re-write AMIE Online Updates/Inquiries Meeting Minutes

Ok, let me check the data. I have to copy our business team on all emails so I'm adding Casey.

Thanks,
Susan Creighton / 703.908.5893 office

Hi AK,

Attached are the minutes for today's meeting. Please let me know if I missed or misstated anything.

Please don't hesitate to let me know if you have questions.

Thanks,

Susan Creighton | Lead Systems Analyst - Quality Assurance Vehicles |AAMVA | 4401 Wilson Blvd, Ste 700, Arlington, VA 22203 | 703.908.5893 | screighton@aamva.org | www.aamva.org

Hello Susan,

I believe the issue was resolved with the changes I detailed for the other test cases. Please reset the record and I will attempt again.

Thank you,

Hi Dillon,

I'm finding a record on NMVTIS for this VIN where you sent a UA after you did an inquiry. I only see one IU and one UA, not multiple IUs. Please check into this and let me know when you are ready for me to remove the data so you can start over.

Subject: AK NMVTIS Testing - Structured Test Case 001

Alright Susan,

I've deduced that 12,001-18,000 lbs. is the appropriate weight range for the information I input. The titling process has completed without sending an inquiry. The previous inquiries were from inputting values typical of a passenger vehicle as a sanity check.

I've attached the test case plan. Do you want me to attach it after each test case? Are we still doing one test case at a time?

Thank you,

Dillon Salsman-Pressley • Programmer Analyst

Hello Susan,

I'm still working on executing the test case. Running into non-UNI-related validation issues. Thank you for looking that up. Still waking up and I didn't realize we have a code that corresponded directly to Food Wagon, so I could've just searched production data. I'll let you know as soon as it's done.

Thank you,

Hi Dillon,

I found this online when I looked up Food Truck: 2013 14' Ford E450 Step Van

Please make sure you have set up the data that is highlighted yellow and gold in the scenario test cases and updated the Test Case Plan (TCP) with the data you are using. Please use the TCP I sent on Friday and then provide a copy of back to me. We need to have this completed before we start as I need that data in order to update my test tool.

Thanks,
Susan Creighton / 703.908.5893 office

Hi AK,

Attached is the testing status report and updated test case plan. We have completed as much as we can of the Readiness Testing. I'm not sure when we will have the Theft file access working, and I validated that the format is correct via your screenshot so we can move forward with the scenario testing when you are ready.

Thanks,
Susan Creighton / 703.908.5893 office

Oh, sorry. I missed excluding in on the test case plan. That means we have completed as much as we can of the readiness testing as they are still working on our access to the NICB theft system so I cannot yet validate the IT message.

In the meanwhile, would you go ahead and do the IT on the VIN that is provided and let me know if you are seeing the theft hit via your screens that are displayed to your clerks/helpdesk? I'm not sure when they will have our access working and I don't want that to hold us up.

Thanks,
Susan Creighton / 703.908.5893 office

What you did is fine for the Helpdesk readiness testing. R09 passed and R13 passed. Please go ahead and execute R10. Will it be from Titling or Helpdesk? I'm showing we test R10 via Helpdesk last time.

Thanks,
Susan Creighton / 703.908.5893 office

Hello Susan,

I used their function for adding a salvage status (they call it "junked" and it's different than brand code 8 "junk") to the vehicle. Let me ask Debra.

In the meantime, I can do the version you're describing. When titling a vehicle as reconstructed the order of events as you described do happen.

Here is the screenshot for R09 through the help desk.

I'm validating this but I have a question. Since this is coming from your titling system I checked to ensure you did an inquiry which I thought would be automatic, but I'm not finding it. I checked your Test Questionnaire and it says you always create a title when branding and I don't see that either. From your helpdesk you did add a new title and did the inquiry. Is there a reason it did not happen from the titling system?

Thanks,
Susan Creighton / 703.908.5893 office

Hello Susan,

I seem to have gotten the record stuck into a CSOT Undo – In Progress state. For some reason I thought we were doing it through the Titling System rather than the help desk, but I have all the screenshots to remind me we already did it that way.

Trying to undo the titling system CSOT I just did and redo it through the NMVTIS menu.

Could you reset the record for me please? Back to just being titled to S7.

Sorry, typo. Should be R03 instead of R09 which I corrected below.

Thanks,
Susan Creighton / 703.908.5893 office

Subject: RE: AK - NMVTIS Readiness Testing

Hi Dillon,

R17 passed. We can start over now with the Titling System for R03. There are no titles but there are 2 brands for the VIN. Do you need me to remove the brands so you can setup your side again?

I'm planning to leave in a few minutes so we can pick up tomorrow unless you need to continue today.

Thanks,
Susan Creighton / 703.908.5893 office

Hi Dillon,

R15 passed.

Unfortunately, I need to validate the IT message by connecting to the NICB Theft File but for some reason the connection is not working. I have reported this so a ticket has been created but I'm not sure when they will have it fixed. So let's skip it for now and we will come back to it once the connection is fixed. Please go ahead with R17.

Thanks,
Susan Creighton / 703.908.5893 office

The CSOT flag should have been set to N on my side before starting but I was able to validate R09 anyway. R09 passed. But because we need the record to be on NMVTIS in order to execute R10, could you please do the UT again so that NMVTIS gets updated and then proceed with R10. I have updated the CSOT flag so it will work this time.

Thanks,

This email comes from an external source, so remember, Think Before You Click!

Hi Dillon,

R05 passed. Please let me know for sure if the titling clerks will or will not have the ability to undo records. What if they make a mistake and realize it just after the record was sent to NMVTIS. Will that have to go to the helpdesk? If so then we will exclude the Undo message testing from Titling System readiness testing and just include those for the Helpdesk.

Please move forward with R08.

Thanks,
Susan Creighton / 703.908.5893 office

Subject: RE: AK - NMVTIS Readiness Testing R06

This email comes from an external source, so remember, Think Before You Click!

Well dang it, it is obviously time for me to go home as I told you wrong.

The SOT and Title Number should have been from the NT message so you had it correct to begin with. I'm so sorry!!

17.6.5 Restored SOT - Message Transmission - C3

The SOT generates a C3 - Restore State of Title Confirmation message to the Brand & VIN Pointer controller, indicating it has processed the NT and acknowledges it is the current SOT.

The C3 message contains:

- o VIN (VVHIDN) from the NT message
- o SOT (VTIJUR) from the NT message
- o Title Number (VTINUM) from the NT message
- o The Saved Transaction Originator (GTROR1) is set to the Saved Transaction Originator (GTROR1) from the NT message
- o The Saved Message Locator (GMSLO1) is set to the Saved Message Locator (GMSLO1) from the NT message
- o See Appendix A for remaining NCB and MEC (02/3) block settings
- o Any applicable warning messages (see standard warning message settings in the Exception Processing section)

Again, I apologize, it has been a long day.

Thanks,
Susan Creighton / 703.908.5893 office

Hello Susan,

I see that we were using site code for VTIJUR instead of AK postal code. I'm not seeing a VTIPJU defined for C3. If this is the parameter you meant, I've made the change and it should be ready for testing.

Thank you,

Hi Dillon,

R07 passed.

R11 has just 1 issue on the C3:

26/3 VTIPJU PREVIOUS TITLING JURISDICTION SHOULD BE POSTAL CODE

Thanks,

Susan Creighton / 703.908.5893 office

From: Dillon Salsman [<mailto:dsalsman@resdat.com>]

Subject: RE: AK - NMVTIS Readiness Testing R06

That title has been set to active, and I moved the brand lookup earlier so that any errors be returned before the status is changed.

Subject: RE: AK - NMVTIS Readiness Testing R06

Hello Susan,

I found the issue. I was accidentally calling the HC version of brand lookup in HD, thus why it was referencing Title Number rather than Old Title Number. Please test again.

Non-Active Title warning is the error I have it setup to return in the case you mentioned. I'm working on a short database script to set that particular record back to active, but you may receive that warning depending on which of us is quicker.

Thank you,

I think you have set your title status to moved out of state due to the CSOT that we sent so the SD is getting sent back in error. Try updating your title status.

Thanks,
Susan Creighton / 703.908.5893 office

Hello Susan,

I'm seeing your SD requests get bounced back. I'm looking into it.

Susan,

I've pushed up my changes and I'm ready for another test. I'm still working out why GMSMSI isn't blank, as we're not explicitly assigning it any value. Is it expected to be blank for HC?

Thank you,

Good morning Susan,

I used an online VIN decoder at try and match the values you'd previously stated were different from expected, but I've heard nothing about a vin decoder being used the DMV and we do not incorporate one into the application.

HC and HD shared the majority of mappings, so I'm working on deviating the mappings to appropriately. Should be ready shortly.

Thank you,

Subject: RE: AK - NMVTIS Readiness Testing R06

This email comes from an external source, so remember, Think Before You Click!
Hi Dillon,

One thing I failed to ask. Your Make and Model Year are not the decoded values. Are you using a VIN decoder?

For R07 HD:

02/3	GMSLEI	MESSAGE MATCH LIMIT EXCEEDED IND SHOULD BE BLANK
02/3	GMSMSI	MESSAGE MATCH SEQUENCE ID SHOULD BE BLANK
02/3	GEMSAN	EXPECTED MESSAGE ADJUSTMENT NUMBER SHOULD BE BLANK
06/2	VVHVJI	VIN/HIN JURISDICTION IS MISSING
26/2	VTINUM	TITLE NUMBER IS MISSING
26/2	VTIJUR	TITLING JURISDICTION IS MISSING
26/3	VTIPJU	PREVIOUS TITLING JURISDICTION SHOULD BE POSTAL CODE
26/3	VTIPNU	PREVIOUS TITLE NUMBER IS PRESENT BUT NOT TO BE SENT IN TEST QUESTIONNAIRE
37/1	VBRDCD	BRANDER CODE (BOTH OCCURRENCES) ARE MISSING
37/1	VBRCOD	BRAND CODE (BOTH OCCURRENCES) ARE MISSING
37/1	VBRDAO	BRAND DATE (BOTH OCCURRENCES) ARE MISSING

The fact that the Title Number and the Titling Jurisdiction which are required fields caused the HD to be sent back to you in error, therefore, the HF was not created for the new SOT.

Regarding your questions below, please see my answers in-line.

Thanks,
Susan Creighton / 703.908.5893 office

Subject: RE: AK - NMVTIS Readiness Testing R06

Hello Susan,

In one of our previous conference calls you mentioned that we should not execute a brand undo when we add a reconstructed brand.

Does this hold true accounting for the fact that it is a salvage brand which would be replaced and not a junk brand?

Yes, the Salvage brand should remain on NMVTIS as the Brand File is to be a full history of NMVTIS branding events. The Reconstructed brand with a later date indicates the vehicle has been fixed (this will be in the procedures guide so other states understand what AK does).

Is a 1-to-1 correlation expected between the brand results returned in HC/HD and the brands recorded on the NMVTIS pointer?

I checked on this and you should send all of your brand history in the HC/HD, even if you have brands that are not to be recorded in NMVTIS, such as bond posted, etc. I believe in your case it will be a 1 to 1 correlation.

In the event the answer to both are yes, I'll need to consult with David and Debra to find a solution which meets these requirements. However, if either is no or flexible, then the issue is either already or easily solved depending on which.

Thank you,

Susan,

I've made that additional change. It looks much better in the UNI tool with the brand values aligned into exactly two blocks each. Really ready for you to test this time.

Thank you,

Quick update before you test Susan,

Comparing the offsets you gave me with the test I just run, I think I might need to adjust the brand record length to 122 instead to account for the expected two empty padding spaces. Give me just a moment and I'll fix that.

Dillon

Subject: RE: AK - NMVTIS Readiness Testing R06

Hello Susan,

Thank you for the explanation.

Our lengths of the parameter groups did differ from what was expected (35 instead of the expected 54 for VINOWN and 82 instead of 120 for brand information). I've changed those lengths and also fixed the zero padding issue in GEMSAN.

I'm ready for a re-test.

Thank you,

This email comes from an external source, so remember, Think Before You Click!

Hi Dillon,

I have updated the Test Questionnaire to indicate you will not be sending Use Class or Number of Axles and marked those as non-issues. The reason I asked about axles is because on the Test Questionnaire you indicated you will be sending the number of axles for commercial vehicles. Sending blank is fine for those if you never plan to populate those fields, but because you answered you would sometimes send, I needed to validate that you are sending actual data in the correct positions. On the Cylinders and Doors, you indicated you would not send on the Test Questionnaire.

I executed again:

The GEMSAN EXPECTED MESSAGE ADJUSTMENT NUMBER SHOULD BE 00 since you will never send an H1
OWNER 2nd occurrence starts in position 39 and should start in 58
OWNER 3rd occurrence starts in position 74 and should start in 112
OWNER 4th occurrence starts in position 109 and should start in 166
BRANDER 2nd occurrence starts in position 23 of 37102 and should start in position 2 of 37103
BRAND CODE 2nd occurrence starts in position 34 of 37103 and should start in position 13 of 37104
BRAND DATE 2nd occurrence starts in position 36 of 37103 and should start in position 15 of 37104

Thanks,
Susan Creighton / 703.908.5893 office

Subject: RE: AK - NMVTIS Readiness Testing R06

Hello Susan,

Please see the responses below that indicate Alaska doesn't collect information for the two parameters in question. I'm curious, why is VVHNAX considered inadequate when blank but not similar parameters (that Alaska also does not explicitly record) such as VVHNCY (Cylinders) and VVHNDO (Doors)? Is this a discrepancy in the questionnaire?

I've sorted out the issue with names. I believe the only comment this leaves unaddressed is:

For Brands will you only ever have 1 brand given your brand mapping? The Test Questionnaire indicates 2 occurrences. Also you have AI just after the brand date which does not belong there.

My understanding is that we will have 0-2 brands, the record we're using now has both, and that the "AI" after brand date represents the second occurrence of Brander Code (VBRDCD).

Please test again when possible.

Thank you,

Subject: NMVTIS Testing - Problematic parameters

Hello David and Debra,

I have two parameters I'm having issues with during testing.

The first is fairly straight forward. VVHUCC (VEHICLE USE CLASS CODE) appears to be supported by the current system only when receiving messages from NMVTIS. I've found no code that collects this information nor populates this

parameter when sending any relevant message type. From the documentation, the acceptable values for this parameter are:

0.19.36 - Vehicle Use Class Code			
The utilization of the vehicle.		Source of Definition: MVA Source of Data: Accident report, registration, MVA Synonyms: Special Use, Usage Class.	
Value	Description	Value	Description
00	None (not in use)	08	Agriculture
01	Personal	09	Wrecker or Tow
02	Driver Training	10	Police
03	Construction/Maintenance	11	Other Business
04	Ambulance	12	Fire fighting
05	Military	13	Bus
06	Taxi	97	Other
07	Transportation of property	99	Unknown

VVH/CC
Format=Alpha-numeric Size=2 CUM-YD6-USE-CLASS
Logical Format (Type/Max Length): AN/2

I can make the change which will default these values to "00" for "None (not in use)" if there is no direct correlation between with the information we collect and these values.

The second parameter is VVHNAX (VEHICLE NUMBER OF AXLES). There exists a column in the AMB_PROPERTY table which corresponds to this field, but all values for this column in Treehouse are null. There appears to be no way to set this value in your current system. Could you please confirm that Alaska's intention at this time is not to collect this data?

Thank you for your time and help,

Subject: RE: AK - NMVTIS Readiness Testing R06

One other note:

You asked: "On your Test Questionnaire I show that you do not plan to send previous title number. Is that wrong?"

The questionnaire is correct. Part of this set of changes will revert the changes I described previously.

I mistook that parameter as being amongst the "optional" parameters you were requesting we find a way to populate. Not populating that parameter resolves my confusion as to how we'd be expected to return something we don't store.

Thank you,

Subject: RE: AK - NMVTIS Readiness Testing R06

Hello Susan,

Thank you for testing both cases. I'm attempting to address the issue with owner names. Meanwhile, I'm passing the questions about following parameters on to DMV:

06/4 VVHUCC VEHICLE USE CLASS CODE
parameter

There appears to be no way to support this

06/4 VVHNAX VEHICLE NUMBER OF AXLES
obtaining a non-null value

There appears to be no non-null data nor method of

I believe I've addressed all other issues. I'll be updating the test environment as soon as I have the names issue addressed and will request another test at that point.

Thank you,

Hi Dillon,

I ran another inquiry and you are no longer sending the NON- ACTIVE TITLE warning. All other issues still exist.

For the first occurrence of GERDOC you should use "01".

I changed the Title Number as you requested and ran the inquiry again which caused you to return the SC back with the 409:TITLE NOT ON FILE error which is correct. The error was formatted correctly.

Thanks,
Susan Creighton / 703.908.5893 office

Another update Susan,

I found a few more places where we add warnings and I believe simultaneously corrected the issue with mistaking titles as being non-active. If you could please execute the query both with title number '5061805' for no GEROUT errors, and '5061804' for a correctly formatted non-active title warning, I would greatly appreciate it.

Subject: RE: AK - NMVTIS Readiness Testing R02A

Susan,

For now I've set it to "01". Before we address the issue causing the error to arise, can you go ahead and test again to make sure the error format is correct? My assumption is that the error is arising due to changes I've made which necessitated new in-state changes / title numbers.

Dillon

Hi Susan,

Looks like I might've accidentally hit reply rather than reply all last night. I've added everybody back to CC.

I'm working on the issues you've identified. I had a quick question about GERDOC.
Should the value for non-repeating parameters be " ", "00", or "01"?

Thank you,

Subject: RE: AK - NMVTIS Readiness Testing R02A

This email comes from an external source, so remember, Think Before You Click!
Hi Dillon,

I'm sorry but yesterday I missed the following missing data:

02/3	GPROST	PROCESSING STATUS
02/3	GMSLEI	MESSAGE MATCH LIMIT EXCEEDED IND
02/3	GMSMSI	MESSAGE MATCH SEQUENCE ID
02/3	GEMSAN	EXPECTED MESSAGE ADJUSTMENT NUMBER
06/2	VVHVJ	VIN/HIN JURISDICTION

You designated that you will “always” send the VVHVJ and that really should be “sometimes” as that is the Jurisdiction that assigned the non-standard VIN to the vehicle. Please just use Alaska and it should be AK not AI since the definition indicates it should be the postal code for the jurisdiction.

You should also be sending AK instead of AI for VTIJUR - TITLING JURISDICTION as the definition indicates it should be the postal code for the jurisdiction that issued the title.

I also noticed that you sent a 507:NON-ACTIVE TITLE message in the 99/2 block which should not have been sent (your Title Status shows Active which it should). But you also did not send the following data in that message which will affect later testing.

99/2	GERAEN	ERROR ELEMENT AAMVA CODE
99/2	GERAET	AAMVA ERROR TYPE
99/2	GERDOC	ERROR DATA OCCURRENCE

The following was in position 1 but should start in position 10

99/2	GERMTX	ERROR MESSAGE TEXT
------	--------	--------------------

Still missing:

06/4	VVHUCC	VEHICLE USE CLASS CODE	(you indicated you are still working on this)
06/4	VVHNAX	VEHICLE NUMBER OF AXLES	

26/3 VTIPJU - PREVIOUS TITLING JURISDICTION should have AK instead of AI as it should be the postal code

34/1 VOWNAM – OWNER NAME currently has Alvin.Shared.CommonLibrary.SharedMo 4 times but the second, third and fourth occurrences do not start in the correct positions (see below):

VOWNAM - OWNER NAME	AN	35	4
VOWNAM - OWNER NAME	AN	35	58
VOWNAM - OWNER NAME	AN	35	112
VOWNAM - OWNER NAME	AN	35	166

And for at least one of the owner names please use an individual so that I can check the format. If the owner is a business, the owner is free form. If the owner is an individual, a specific format is used which is defined in the Online Spec in Appendix D.2.1 See the **AAMVA Person Name Rule** (on page 269) for the complete set of rules governing the format of a person's name.

Also, on your Test Questionnaire I show that you do not plan to send previous title number. Is that wrong?

For Brands will you only ever have 1 brand given your brand mapping? The Test Questionnaire indicates 2 occurrences. Also you have AI just after the brand date which does not belong there.

Thanks,
Susan Creighton / 703.908.5893 office

Subject: RE: AK - NMVTIS Readiness Testing R02A

Hello Susan,

I believe I've made the necessary changes to our data and test environment.

The system does track previous state but not previous title number (outside of our own). I believe the intent is to let NMVTIS to keep a detailed account of information such as title transfers. For now I've made it so that previous title number returns the second most recent title we have on file.

I'll need to look into Use Code some more.

Please try R06 again when possible and let me know if any of the parameters not mentioned above are failing to meet expectations.

I'm headed home for the day.

Cc: Garber, Casey; Chaudhry, Amir; David Nolen, AK Dept. of Administration; Mina Peters, AK Dept. of Administration
Subject: RE: AK - NMVTIS Readiness Testing R02A

Hello Susan,

Here are the changes I've made. I'll be moving the code changes to the test environment momentarily. I believe we'll need to reset the record and title again from scratch. There was no previous state provided when we titled the vehicle.

Our system does not do vin decoding.

06/3	VVHMNA	VEHICLE/VESSEL MODEL NAME	– Will be set to REC to have brand 10
06/3	VVHBST	VEHICLE/VESSEL BODY TYPE	– From what I can tell this is supposed to map to “CP”

(Coupe)? **Yes**

Just needed additional data.

06/3	VVHCOM	VEHICLE/VESSEL MINOR COLOR	- added secondary color
06/3	VVHNLN	NUMBER OF ACTIVE LIENS	– should have previously been 0, now 1
06/4	VVHENU	VEHICLE EQUIPMENT NUMBER	- added equipment number
30/6	VLHNAM	LIENHOLDER	- added lienholder
30/8	VLHADD	LIENHOLDER ADDRESS	- added lienholder
34/1	VOWNAM	OWNER NAME	- added additional owners

Code changes.

06/3	VVHLEI	VEHICLE LEASE INDICATOR	- fixed mapping
06/4	VVHNAX	VEHICLE NUMBER OF AXLES	- fixed mapping
06/4	VVHUL2	VEHICLE UNLADEN WEIGHT	- fixed mapping
26/4	VODDTE	ODOMETER DATE	- was supposed to already have been mapped to title date, system doesn't ask for / obtain this information

If you haven't already please check as to why this did not return the title date in this field.

30/7	VLNDAT	LIEN DATE	- mapped to title date, system doesn't ask for / obtain this information
------	--------	-----------	--

These three should potentially be fixed. We don't store brands. Presence of REC model type indicates brand 10, and an existing status message of type J indicates brand 11. Index / record length look suspect, so we may need updated call list format indexes for these fields.

37/1	VBRDCD	BRANDER CODE
37/1	VBRCOD	BRAND CODE (2 occurrences)
37/1	VBRDAO	BRAND DATE (2 occurrences)

Parameters we were asked to title on did not return a previous jurisdiction.

26/3	VTIPJU	PREVIOUS TITLING JURISDICTION	The previous title was Alaska
------	--------	-------------------------------	--------------------------------------

Is this supposed to correlate to one of the spreadsheets? I'm having a hard time tracking this one down.

06/4	VVHUCC	VEHICLE USE CLASS CODE	This is in the online spec in Appendix D (search on use case)
------	--------	------------------------	--

Thank you,

Subject: RE: AK - NMVTIS Readiness Testing R02A

This email comes from an external source, so remember, Think Before You Click!

Hi Dillon,

This time I received the HC in response but not all the fields are filled. You need to set up the vehicle so that the VIN decodes correctly, therefore, the vehicle make, year, body type, etc. are correct, and all the fields that you designated on your test questionnaire that you will always or sometimes send, have data for the maximum number of occurrences. I know some of the data will not make sense, but please fill anyway as I am checking that the data is coming in the correct positions.

MISSING DATA:

06/3	VVHBS	VEHICLE/VESSEL BODY TYPE – Should be what it decodes to
06/3	VVHMNA	VEHICLE/VESSEL MODEL NAME – Should be what it decodes to
06/3	VVHCOM	VEHICLE/VESSEL MINOR COLOR
06/3	VVHLEI	VEHICLE LEASE INDICATOR
06/3	VVHNLN	NUMBER OF ACTIVE LIENS – Please fill with a number
06/4	VVHUCC	VEHICLE USE CLASS CODE
06/4	VVHENU	VEHICLE EQUIPMENT NUMBER
06/4	VVHNAX	VEHICLE NUMBER OF AXLES
06/4	VVHUL2	VEHICLE UNLADEN WEIGHT
26/3	VTIPJU	PREVIOUS TITLING JURISDICTION
26/4	VODDTE	ODOMETER DATE
30/6	VLHNAM	LIENHOLDER NAME
30/7	VLNDAT	LIEN DATE
30/8	VLHADD	LIENHOLDER ADDRESS
34/1	VOWNAM	OWNER NAME (4 occurrences – I got 1 but need 4)
37/1	VBRDCD	BRANDER CODE
37/1	VBRCOD	BRAND CODE (2 occurrences)
37/1	VBRDAO	BRAND DATE (2 occurrences)

For Vehicle Owner Name, please use an individual so that I can check the format where you should be using @ between the first, last and middle names

34/1 VOWNAM OWNER NAME

Thanks,

Apologies for the delay, we're looking into a non-UNI-related bug where fields which should be able to have information entered into them aren't allowing us to do so. It's having the unfortunate side effect of preventing us from reaching the stage that we send the UA. While that's being investigated I'll see if I can manage the help desk version of UA.

Hi Dillon,

I validated the Titling Transactions for R02A and R02B and the Helpdesk Transaction for R02C and all passed.

Let's do R03 from Titling and once I validate we will do R04 from Titling so that we do all the test cases using the titling system. Once we finish I will reset the data and we will do those same transactions from the Helpdesk.

Thanks,
Susan Creighton / 703.908.5893 office

Good morning Susan,

I apologize, my Outlook stopped receiving e-mails despite appearing to be functioning correctly. I assumed you simply had a busy morning until I attempted to send this e-mail and was presented with an error.

While I was waiting, I took the liberty of creating screenshots for all the variations of tests cases R02A, B, and C. In total you should find twelve images attached:

R02A: 2 images for IU & IT messages sent after the first form of the titling process
2 images for IU & IT messages sent by the 'help desk' function that sends both
2 images for the IU sent by the 'help desk' function that sends only an IU

R02B: 2 images for IU & IT messages sent after the first form of the titling process
2 images for IU & IT messages sent by the 'help desk' function that sends both
1 image for the IU sent by the 'help desk' function that sends only an IU

R02C: 1 image for the IU sent by the 'help desk' function that sends only an IU

Hopefully this covers any cases we're currently lacking.

-Dillon

Hi Dillon,

Based on your flow chart it looks as if the titling clerks use the Vehicle Menu and your Helpdesk uses the AAMVA Menu or NMVTIS Menu. Please confirm.

Based on the fact that the Helpdesk is calling the same code as the titling system and the only differences in the AAMVA Menu versus the NMVTIS Menu for the Helpdesk is which of the transactions they are allowed to do and whether the inquiries are sent automatically, we feel the below is what we need to test. Please let me know if you think this coverage will suffice. You will need to ensure that the AAMVA Menu messages are returning the same data as the NMVTIS Menu.

Test Case	Test Scenario	VIN	SOT	Title Number	Titling System	NMVTIS Menu Helpdesk
R02A	Send a Used Vehicle Inquiry (IU) <i>all optional and required fields should be populated</i>	AICASUALCURRTC003				P
R02B	Send a Used Vehicle Inquiry (IU) <i>Inquire using VIN/SOT/and Title#</i>	ZFF70RCA2B0177029	<i>S7</i>	<i>NOMATCHTITLE</i>		P

R02C	Send a Used Vehicle Inquiry (IU) Inquire using SOT/Title# only		NJ	AI201602600000482	X		
R03	Send an Add Title Transaction (UA) all optional and required fields should be populated	ZFF70RCA2B0177029					
R04	Send an In-state Title Change on the same VIN in TC R03 (UV) all optional and required fields should be populated	Same VIN as R03					
R06	You will receive a state vehicle data request (SC). Send the response (HC and H1 if applicable) all optional and required fields should be populated	Same VIN as R03					
R07	You will receive an old state vehicle data request (SD). Send the response (HD) all optional and required fields should be populated	Same VIN as R03					
R11	You will receive an Undo CSOT message (NT). Send the response (C3) all optional and required fields should be populated	Same VIN as R03					
R05	Remove the In-state Title Change in TC R04 (DU) all optional and required fields should be populated	Same VIN as R03					
R08	Remove the Add Title record in TC R03 (DM) all optional and required fields should be populated	Same VIN as R03					
R09	Send a Change State of Title (UT) all optional and required fields should be populated	AICASUALCURRTC008					
R10	Remove the Change State of Title (DT) all optional and required fields should be populated	Same VIN as R07					
R12	Send a Brand Inquiry (IB) all optional and required fields should be populated	AICASUALCURRTC001			X		
R13	Send a Brand Add (UB) for a brand you have mapped all optional and required fields should be populated	State Provided VIN					

R14	Remove the Brand in TC R13 (DB) all optional and required fields should be populated	Same VIN as R13				
R15	Send a History Inquiry (IH) all optional and required fields should be populated	AISTRUCTREDTSTY01			X	
R16	Send a Theft Inquiry (IT) all optional and required fields should be populated	THEFTINQUIRY222222				
R17	Purge an active record (DV). Please setup data in your state database and the Central File for this test case. All optional and required fields should be populated	State Provided VIN			X

As for which code is the same, perhaps this diagram will help.

Non-white backgrounds indicate color-coordinated shared code, with the exception of the solid blue starting nodes.

Subject: RE: AK - NMVTIS Readiness Testing R02A

Hi all,

Let me take a stab at it, based on my understanding. Dillon/David, please correct me if I am mistaken.

Our users have the ability to manually perform the following functions in the NMVTIS menu:

BRAND INQUIRY (IB)
TITLE HISTORY INQUIRY (IH)
THEFT INQUIRY (IT)
VEHICLE INQUIRY (IU)
BRAND UNDO (DB)
TITLE UNDO (DM)
CSOT UNDO (DT)
IN-STATE CHG UNDO NMVTIS
SET PURGE INDICATOR (DV)
RESEND C3 OR HD MSG
IN-STATE CHANGE (UV)
CSOT (UT)
BRAND ADD (UB)
ADD TITLE (UA)
THEFT OVERRIDE
ERROR REPORTS
IN-STATE CHG UNDO ALVIN

Common inquiries were duplicated in the AAMVA menu, which was around before the NMVTIS menu and includes DL functionality, and is slightly easier to navigate to. The AAMVA menu functions are:

NVMTIS BRAND INQUIRY
NMVTIS TITLE HISTORY
NMVTIS THEFT INQUIRY
NMVTIS VEHICLE INQUIRY

This should be using the same code as the corresponding functions in the NMVTIS menu. I believe this is what is meant by the Help Desk functionality...but it really is available to all users.

On top of that, some of the messages are embedded into the transaction itself. So when doing a new title/registration, an IU and IT are sent automatically, so the user does not need to manually perform the function. There probably are other embedded messages that I am not aware of.

So, the result is that although an IU (and other messages) can be sent from either a transaction or a manual process, it should all funnel into the same "Send IU" code. Right, Dillon?

Regards,

Mina Peters

Subject: RE: AK - NMVTIS Readiness Testing R02A

I'm trying to understand the difference in the AAMVA menu and NMVTIS menu for helpdesk. Are those two menus used for different resource types? And then there is a separate titling system that the titling clerks use? Are each of these methods using the same application code except for the differences in automatically sending the IT using VIN / SOT / Title Number in its various inquiry forms, so regardless of which menu you send the request from, it is the same code not different code?

Thanks,
Susan Creighton / 703.908.5893 office

To: 'Creighton, Susan' <screighton@aamva.org>; David Nolen, AK Dept. of Administration <david.nolen@alaska.gov>
Cc: Garber, Casey <CGarber@aamva.org>; Mina Peters, AK Dept. of Administration <mina.peters@alaska.gov>
Subject: RE: AK - NMVTIS Readiness Testing R02A

I've finished the alternate implementation on the AAMVA menu. In total there are three different ways IU's are sent:

- 1.) Implicitly as part of the various titling processes, which to my understanding requires a VIN.
- 2.) Explicitly from the AAMVA menu, as a help desk function, also sending an IT and thus requiring a VIN to be used.
- 3.) Explicitly from the NMVTIS menu, as a help desk function, does not send an IT and does not require VIN to be used. (Although there is an explicit theft inquiry on both the NMVTIS and AAMVA menu which both require a VIN to be used.)

To the best of my understanding, R02A and R02B can be executed all three ways, while R02C can only be executed the third way.

The very first screenshot I sent you would've been R02A using method 3.

The following screenshots with IT's sent now reflect R02A and R02B being executed using method 2, but I'd be happy to redo these tests.

The last screen shot represents R03 using method 3.

This leaves R02B using method 3 untested, with the titling versions completely untested.

This email comes from an external source, so remember, Think Before You Click!
And NMVTIS?

So, we will need to test both titling and helpdesk. You can do R02A again using the titling system or if you need to gain access we can move forward to R02C from the helpdesk and go back to R02A from your titling system once you are able. But we will need to test both the helpdesk and the titling system for readiness before we move to the online scenario testing. We will not need to test R02C from titling since you will only be using that format from the helpdesk.

Thanks,
Susan Creighton / 703.908.5893 office

Subject: RE: AK - NMVTIS Readiness Testing R02A

All requests thus far were executed from the NMVTIS menu which has been described as the Helpdesk application.

No requests thus far have been made as a result of attempting to formally title vehicle. (At no point this morning have I used nor perceived being instructed to use the explicit titling function which automatically sends a vehicle inquiry.)

I'm not sure whether the AAMVA menu functions are considered Help Desk functions or not.
David, could you please clarify?

Subject: RE: AK - NMVTIS Readiness Testing R03

Edit: Accidentally used wrong but correctly spelled words in a few places.

After some additional testing and research in between responses, I'm afraid I was mistaken in my previous statements and that we may have to backtrack a little.

It turns out that the functionality of the two manual endpoints on the production environment are as follows:

NMVTIS Menu Vehicle Inquiry:

- Will not automatically send an IT
- Will accept either VIN, Title Number and State of Title, or both.

AAMVA Menu Vehicle Inquiry:

- Automatically sends IT and IU
- Will only accept requests which include a VIN, with or without Title Number and State of Title.
- Will not accept a **request** without a VIN.

I apologize, I was not involved in the analysis nor “implementation” of the second endpoint. I will revert the previous change I made this morning to the existing NMVTIS Menu version and implement this alternate version for the AAMVA Menu. It seems, we will need to test both menus separately after all.

For this one I need to see the UA and on the high level the IU/IT/UA and then the responses. Please use the VIN provided in the test case plan. I will be checking that you are sending the correct make and model year as the VIN is decodable and that the data in your HC when I perform inquiry is based on this VIN.

Thanks,

This email comes from an external source, so remember, Think Before You Click!

I received confirmation that we do not need to test the helpdesk separately.

R02B passed.

Let's move on to R03

Thanks,

Susan Creighton / 703.908.5893 office

In the new application, they share entirely the same code (NMVTIS functions on the AAMVA menu redirect to their equivalent function on the NMVTIS menu). In the existing production environment, it is a separate form that provides additional "person" related fields to support non-NMVTIS functions, but both call the same code to send message.

In that case it would seem that the help desk functionality is integrated into the application, and that the IU/IT sent previously was performed using the help desk application.

All solicited messages can be manually sent from this "NMVTIS Menu". There are duplicate endpoints for Vehicle Inquiry (IU/IT), Title History, Brand Inquiry, and Theft Inquiry on an "AAMVA Menu", which I suspect is also considered Help Desk functionality. However, functionally they are identical. For those four endpoints I can send the message from both ways, but functions which manipulate pointer data will only be manually available from the "NMVTIS Menu".

It's the NMVTIS menu on the mainframe. Use PF9 from the vehicle menu.

If the help desk application is indeed separate as previously indicated, I do not have access to it.

I've reach out to David for clarification, in the meantime would it be possible to continue the readiness test for the main application?

Okay, perfect. Please perform the same test using your helpdesk. We have to test that separately since it is standalone.

BTW: I Changed the subject of this email.

Thanks,

I've made the change so that performing a manual IU now automatically sends an IT. Please find attached new images from the UNI Web Tool.

The screenshot shows a web browser window with the address bar displaying `http://dmvvaicunidev1: Network Message Log`. The application has a menu bar with **Edit**, **View**, **Tools**, **Admin**, and **Help**. After examining the production code I discovered that an IT is indeed supposed to be automatically sent when an IU is manually sent. I'll make that change as soon as possible.

Subject: RE: AK - NMVTIS Re-write AMIE Online Updates/Inquiries Meeting Minutes

IU and IT both have a dedicated endpoint for being called manually, but my understanding is that when attempting to title a vehicle both will be sent. I sent the IU manually rather than attempting to title AICASUALCURRTC003. The IT has now been sent.

I'll also make a note to check whether the manual endpoint in the production environment sends both.

Okay. Everything looks good except I did not see an IT sent. Is that something you send automatically when you do inquiry or do you have to manually send it?

Thanks,

Subject: RE: AK - NMVTIS Re-write AMIE Online Updates/Inquiries Meeting Minutes

This email comes from an external source, so remember, Think Before You Click!

Also, for the record, yesterday I mentioned that you should be performing inquiry before any updates. There is one exception. Should not perform inquiry on vehicles that are not NMVTIS eligible, like boats, golf carts, trailers, etc. In the vehicle mapping which is included in the test case plan there is a column that says whether the vehicle is supposed to be sent to NMVTIS or not. If it says no, you should not do inquiry.

As far as the testing, I don't see where you sent an IT. Also, I need to be able to see all the responses you received. There should be some more RI/RJ messages. Otherwise, the format of the message looks good.

Thanks,

Susan Creighton / 703.908.5893 office

Subject: RE: AK - NMVTIS Re-write AMIE Online Updates/Inquiries Meeting Minutes

Here's a screenshot of the IU from R02A.

I've gone ahead and CC'd Mina as well, as another developer indicated she wanted to be included during SPEX testing.

Mina, if there's anybody else you'd like me to include please let me know. Or likewise if you'd like to opt out.

Hi Dillon,

I forgot to ask you to please send me screenshots of the UNI Messages you send opened up in Text format and a high level screenshot of all the responses you receive. It should look like this and don't shrink them as I need to be able to read them. I highlighted how where you need to change the format to text.

Hello Susan,

I believe the issue was resolved with the changes I detailed for the other test cases. Please reset the record and I will attempt again.

Thank you,

Hi Dillon,

I'm finding a record on NMVTIS for this VIN where you sent a UA after you did an inquiry. I only see one IU and one UA, not multiple IUs. Please check into this and let me know when you are ready for me to remove the data so you can start over.

Subject: AK NMVTIS Testing - Structured Test Case 001

Alright Susan,

I've deduced that 12,001-18,000 lbs. is the appropriate weight range for the information I input. The titling process has completed without sending an inquiry. The previous inquiries were from inputting values typical of a passenger vehicle as a sanity check.

I've attached the test case plan. Do you want me to attach it after each test case? Are we still doing one test case at a time?

Thank you,

Dillon Salsman-Pressley • Programmer Analyst

Please ignore the inquiries sent. They're the result of trying to get around/understand the weight validations holding me back.

Hello Susan,

I'm still working on executing the test case. Running into non-UNI-related validation issues. Thank you for looking that up. Still waking up and I didn't realize we have a code that corresponded directly to Food Wagon, so I could've just searched production data. I'll let you know as soon as it's done.

Thank you,

Hi Dillon,

I found this online when I looked up Food Truck: 2013 14' Ford E450 Step Van

Please make sure you have set up the data that is highlighted yellow and gold in the scenario test cases and updated the Test Case Plan (TCP) with the data you are using. Please use the TCP I sent on Friday and then provide a copy of back to me. We need to have this completed before we start as I need that data in order to update my test tool.

Thanks,
Susan Creighton / 703.908.5893 office

Good morning Susan,

I'm ready to start. Could you give me an example of what a food wagon make/model would be? In the meantime I'm checking whether it matters for any make/model with code 33.

Thank you,

Hi AK,

Attached is the testing status report and updated test case plan. We have completed as much as we can of the Readiness Testing. I'm not sure when we will have the Theft file access working, and I validated that the format is correct via your screenshot so we can move forward with the scenario testing when you are ready.

Thanks,
Susan Creighton / 703.908.5893 office

Oh, sorry. I missed excluding in on the test case plan. That means we have completed as much as we can of the readiness testing as they are still working on our access to the NICB theft system so I cannot yet validate the IT message.

In the meanwhile, would you go ahead and do the IT on the VIN that is provided and let me know if you are seeing the theft hit via your screens that are displayed to your clerks/helpdesk? I'm not sure when they will have our access working and I don't want that to hold us up.

Thanks,
Susan Creighton / 703.908.5893 office

What you did is fine for the Helpdesk readiness testing. R09 passed and R13 passed. Please go ahead and execute R10. Will it be from Titling or Helpdesk? I'm showing we test R10 via Helpdesk last time.

Thanks,
Susan Creighton / 703.908.5893 office

Hello Susan,

I used their function for adding a salvage status (they call it "junked" and it's different than brand code 8 "junk") to the vehicle. Let me ask Debra.

In the meantime, I can do the version you're describing. When titling a vehicle as reconstructed the order of events as you described do happen.

Here is the screenshot for R09 through the help desk.

Thank you,

I'm validating this but I have a question. Since this is coming from your titling system I checked to ensure you did an inquiry which I thought would be automatic, but I'm not finding it. I checked your Test Questionnaire and it says you always create a title when branding and I don't see that either. From your helpdesk you did add a new title and did the inquiry. Is there a reason it did not happen from the titling system?

Thanks,

Susan Creighton / 703.908.5893 office

Subject: RE: AK - NMVTIS Readiness Testing

Hello Susan,

I seem to have gotten the record stuck into a CSOT Undo – In Progress state. For some reason I thought we were doing it through the Titling System rather than the help desk, but I have all the screenshots to remind me we already did it that way.

Trying to undo the titling system CSOT I just did and redo it through the NMVTIS menu.

Could you reset the record for me please? Back to just being titled to S7.

Thank you,

Good morning Susan,

Here's the screenshot for R03 using the titling system. The Brand Add included in the logs is because I used REC (reconstructed) as the model name. I couldn't remember what I used for model last time.

Thank you,

Hi Dillon,

R17 passed. We can start over now with the Titling System for R03. There are no titles but there are 2 brands for the VIN. Do you need me to remove the brands so you can setup your side again?

I'm planning to leave in a few minutes so we can pick up tomorrow unless you need to continue today.

Thanks,
Susan Creighton / 703.908.5893 office

Hi Dillon,

R15 passed.

Unfortunately, I need to validate the IT message by connecting to the NICB Theft File but for some reason the connection is not working. I have reported this so a ticket has been created but I'm not sure when they will have it fixed. So let's skip it for now and we will come back to it once the connection is fixed. Please go ahead with R17.

Thanks,

The CSOT flag should have been set to N on my side before starting but I was able to validate R09 anyway. R09 passed. But because we need the record to be on NMVTIS in order to execute R10, could you please do the UT again so that NMVTIS gets updated and then proceed with R10. I have updated the CSOT flag so it will work this time.

Thanks,
Susan Creighton / 703.908.5893 office

Hello Susan,

Here is R08 from the help desk. Same help desk only situation, as far as I know.

I'll e-mail David & Debra and get a confirmation for all the processes I believe are only accessible through the help desk.

Subject: RE: AK - NMVTIS Readiness Testing R06

This email comes from an external source, so remember, Think Before You Click!

Hi Dillon,

R05 passed. Please let me know for sure if the titling clerks will or will not have the ability to undo records. What if they make a mistake and realize it just after the record was sent to NMVTIS. Will that have to go to the helpdesk? If so then we will exclude the Undo message testing from Titling System readiness testing and just include those for the Helpdesk.

Please move forward with R08.

Thanks,
Susan Creighton / 703.908.5893 office

Here is the R05 completed using the help desk. I don't believe there's a way to perform an In-State Change Undo through the titling system.

Hi Dillon,

Yes, I can work on it this morning. I'll re-drive the NT now.

Thanks,
Susan Creighton / 703.908.5893 office

No worries, I've reverted the change.

I managed to make in a little earlier this morning. I wouldn't mind starting on the rest of the solicited cases if you're available.

Thank you,

Subject: RE: AK - NMVTIS Readiness Testing R06

This email comes from an external source, so remember, Think Before You Click!

Well dang it, it is obviously time for me to go home as I told you wrong.

The SOT and Title Number should have been from the NT message so you had it correct to begin with. I'm so sorry!!

17.6.5 Restored SOT - Message Transmission - C3

The SOT generates a C3 - Restore State of Title Confirmation message to the Brand & VIN Pointer controller, indicating it has processed the NT and acknowledges it is the current SOT.

The C3 message contains:

- o VIN (VVHIDN) from the NT message
- o SOT (VTIJUR) from the NT message
- o Title Number (VTINUM) from the NT message
- o The Saved Transaction Originator (GTROR1) is set to the Saved Transaction Originator (GTROR1) from the NT message
- o The Saved Message Locator (GMSLO1) is set to the Saved Message Locator (GMSLO1) from the NT message
- o See Appendix A for remaining NCB and MEC (02/3) block settings
- o Any applicable warning messages (see standard warning message settings in the Exception Processing section)

Again, I apologize, it has been a long day.

Thanks,
Susan Creighton / 703.908.5893 office

Hello Susan,

I see that we were using site code for VTIJUR instead of AK postal code. I'm not seeing a VTIPJU defined for C3. If this is the parameter you meant, I've made the change and it should be ready for testing.

Thank you,

Hi Dillon,

R07 passed.

R11 has just 1 issue on the C3:

26/3 VTIPJU PREVIOUS TITLING JURISDICTION SHOULD BE POSTAL CODE

Thanks,

Susan Creighton / 703.908.5893 office

From: Dillon Salsman [<mailto:dsalsman@resdat.com>]

Subject: RE: AK - NMVTIS Readiness Testing R06

That title has been set to active, and I moved the brand lookup earlier so that any errors be returned before the status is changed.

Subject: RE: AK - NMVTIS Readiness Testing R06

Hello Susan,

I found the issue. I was accidentally calling the HC version of brand lookup in HD, thus why it was referencing Title Number rather than Old Title Number. Please test again.

Non-Active Title warning is the error I have it setup to return in the case you mentioned. I'm working on a short database script to set that particular record back to active, but you may receive that warning depending on which of us is quicker.

Thank you,

I think you have set your title status to moved out of state due to the CSOT that we sent so the SD is getting sent back in error. Try updating your title status.

Thanks,
Susan Creighton / 703.908.5893 office

Susan,

I've pushed up my changes and I'm ready for another test. I'm still working out why GMSMSI isn't blank, as we're not explicitly assigning it any value. Is it expected to be blank for HC?

Thank you,

Subject: RE: AK - NMVTIS Readiness Testing R06

Good morning Susan,

I used an online VIN decoder at try and match the values you'd previously stated were different from expected, but I've heard nothing about a vin decoder being used the DMV and we do not incorporate one into the application.

HC and HD shared the majority of mappings, so I'm working on deviating the mappings to appropriately. Should be ready shortly.

Thank you,

Hi Dillon,

One thing I failed to ask. Your Make and Model Year are not the decoded values. Are you using a VIN decoder?

For R07 HD:

02/3	GMSLEI	MESSAGE MATCH LIMIT EXCEEDED IND SHOULD BE BLANK
02/3	GMSMSI	MESSAGE MATCH SEQUENCE ID SHOULD BE BLANK
02/3	GEMSAN	EXPECTED MESSAGE ADJUSTMENT NUMBER SHOULD BE BLANK
06/2	VVHVJI	VIN/HIN JURISDICTION IS MISSING
26/2	VTINUM	TITLE NUMBER IS MISSING
26/2	VTIJUR	TITLING JURISDICTION IS MISSING
26/3	VTIPJU	PREVIOUS TITLING JURISDICTION SHOULD BE POSTAL CODE
26/3	VTIPNU	PREVIOUS TITLE NUMBER IS PRESENT BUT NOT TO BE SENT IN TEST QUESTIONNAIRE
37/1	VBRDCD	BRANDER CODE (BOTH OCCURRENCES) ARE MISSING
37/1	VBRCOD	BRAND CODE (BOTH OCCURRENCES) ARE MISSING
37/1	VBRDAO	BRAND DATE (BOTH OCCURRENCES) ARE MISSING

The fact that the Title Number and the Titling Jurisdiction which are required fields caused the HD to be sent back to you in error, therefore, the HF was not created for the new SOT.

Regarding your questions below, please see my answers in-line.

Thanks,
Susan Creighton / 703.908.5893 office

Subject: RE: AK - NMVTIS Readiness Testing R06

Hello Susan,

In one of our previous conference calls you mentioned that we should not execute a brand undo when we add a reconstructed brand.

Does this hold true accounting for the fact that it is a salvage brand which would be replaced and not a junk brand?

Yes, the Salvage brand should remain on NMVTIS as the Brand File is to be a full history of NMVTIS branding events. The Reconstructed brand with a later date indicates the vehicle has been fixed (this will be in the procedures guide so other states understand what AK does).

Is a 1-to-1 correlation expected between the brand results returned in HC/HD and the brands recorded on the NMVTIS pointer?

I checked on this and you should send all of your brand history in the HC/HD, even if you have brands that are not to be recorded in NMVTIS, such as bond posted, etc. I believe in your case it will be a 1 to 1 correlation.

In the event the answer to both are yes, I'll need to consult with David and Debra to find a solution which meets these requirements. However, if either is no or flexible, then the issue is either already or easily solved depending on which.

Thank you,

Susan,

I've made that additional change. It looks much better in the UNI tool with the brand values aligned into exactly two blocks each. Really ready for you to test this time.

Thank you,

Quick update before you test Susan,

Comparing the offsets you gave me with the test I just run, I think I might need to adjust the brand record length to 122 instead to account for the expected two empty padding spaces. Give me just a moment and I'll fix that.

Dillon

Subject: RE: AK - NMVTIS Readiness Testing R06

Hello Susan,

Thank you for the explanation.

Our lengths of the parameter groups did differ from what was expected (35 instead of the expected 54 for VINOWN and 82 instead of 120 for brand information). I've changed those lengths and also fixed the zero padding issue in GEMSAN.

I'm ready for a re-test.

Thank you,

Hi Dillon,

I have updated the Test Questionnaire to indicate you will not be sending Use Class or Number of Axles and marked those as non-issues. The reason I asked about axles is because on the Test Questionnaire you indicated you will be sending the number of axles for commercial vehicles. Sending blank is fine for those if you never plan to populate those fields, but because you answered you would sometimes send, I needed to validate that you are sending actual data in the correct positions. On the Cylinders and Doors, you indicated you would not send on the Test Questionnaire.

I executed again:

The GEMSAN EXPECTED MESSAGE ADJUSTMENT NUMBER SHOULD BE 00 since you will never send an H1
OWNER 2nd occurrence starts in position 39 and should start in 58
OWNER 3rd occurrence starts in position 74 and should start in 112
OWNER 4th occurrence starts in position 109 and should start in 166
BRANDER 2nd occurrence starts in position 23 of 37102 and should start in position 2 of 37103
BRAND CODE 2nd occurrence starts in position 34 of 37103 and should start in position 13 of 37104
BRAND DATE 2nd occurrence starts in position 36 of 37103 and should start in position 15 of 37104

Thanks,
Susan Creighton / 703.908.5893 office

Subject: RE: AK - NMVTIS Readiness Testing R06

Hello Susan,

Please see the responses below that indicate Alaska doesn't collect information for the two parameters in question. I'm curious, why is VVHNAX considered inadequate when blank but not similar parameters (that Alaska also does not explicitly record) such as VVHNCY (Cylinders) and VVHNDO (Doors)? Is this a discrepancy in the questionnaire?

I've sorted out the issue with names. I believe the only comment this leaves unaddressed is:

For Brands will you only ever have 1 brand given your brand mapping? The Test Questionnaire indicates 2 occurrences. Also you have AI just after the brand date which does not belong there.

My understanding is that we will have 0-2 brands, the record we're using now has both, and that the "AI" after brand date represents the second occurrence of Brander Code (VBRDCD).

Please test again when possible.

Thank you,

Subject: NMVTIS Testing - Problematic parameters

Hello David and Debra,

I have two parameters I'm having issues with during testing.

The first is fairly straight forward. VVHUCC (VEHICLE USE CLASS CODE) appears to be supported by the current system only when receiving messages from NMVTIS. I've found no code that collects this information nor populates this

parameter when sending any relevant message type. From the documentation, the acceptable values for this parameter are:

0.19.36 - Vehicle Use Class Code			
The utilization of the vehicle.		Source of Definition: MVA Source of Data: Accident report, registration, MVA Synonyms: Special Use, Usage Class.	
Value	Description	Value	Description
00	None (not in use)	08	Agriculture
01	Personal	09	Wrecker or Tow
02	Driver Training	10	Police
03	Construction/Maintenance	11	Other Business
04	Ambulance	12	Fire fighting
05	Military	13	Bus
06	Taxi	97	Other
07	Transportation of property	99	Unknown
VVM/CC			
Format=Alpha-numeric Size=2 CUM-YD6-USE-CLASS Logical Format (Type/Max Length): AN/2			

I can make the change which will default these values to “00” for “None (not in use)” if there is no direct correlation between with the information we collect and these values.

The second parameter is VVHNAX (VEHICLE NUMBER OF AXLES). There exists a column in the AMB_PROPERTY table which corresponds to this field, but all values for this column in Treehouse are null. There appears to be no way to set this value in your current system. Could you please confirm that Alaska’s intention at this time is not to collect this data?

Thank you for your time and help,

Subject: RE: AK - NMVTIS Readiness Testing R06

One other note:

You asked: "On your Test Questionnaire I show that you do not plan to send previous title number. Is that wrong?"

The questionnaire is correct. Part of this set of changes will revert the changes I described previously.

I mistook that parameter as being amongst the "optional" parameters you were requesting we find a way to populate. Not populating that parameter resolves my confusion as to how we'd be expected to return something we don't store.

Thank you,

Subject: RE: AK - NMVTIS Readiness Testing R06

Hello Susan,

Thank you for testing both cases. I'm attempting to address the issue with owner names. Meanwhile, I'm passing the questions about following parameters on to DMV:

06/4 VVHUCC VEHICLE USE CLASS CODE
parameter

There appears to be no way to support this

06/4 VVHNAX VEHICLE NUMBER OF AXLES
obtaining a non-null value

There appears to be no non-null data nor method of

I believe I've addressed all other issues. I'll be updating the test environment as soon as I have the names issue addressed and will request another test at that point.

Thank you,

Hi Dillon,

I ran another inquiry and you are no longer sending the NON- ACTIVE TITLE warning. All other issues still exist.

For the first occurrence of GERDOC you should use "01".

I changed the Title Number as you requested and ran the inquiry again which caused you to return the SC back with the 409:TITLE NOT ON FILE error which is correct. The error was formatted correctly.

Thanks,
Susan Creighton / 703.908.5893 office

Another update Susan,

I found a few more places where we add warnings and I believe simultaneously corrected the issue with mistaking titles as being non-active. If you could please execute the query both with title number '5061805' for no GEROUT errors, and '5061804' for a correctly formatted non-active title warning, I would greatly appreciate it.

Subject: RE: AK - NMVTIS Readiness Testing R02A

Susan,

For now I've set it to "01". Before we address the issue causing the error to arise, can you go ahead and test again to make sure the error format is correct? My assumption is that the error is arising due to changes I've made which necessitated new in-state changes / title numbers.

Dillon

Subject: RE: AK - NMVTIS Readiness Testing R02A

This email comes from an external source, so remember, Think Before You Click!
Hi Dillon,

I'm sorry but yesterday I missed the following missing data:

02/3	GPROST	PROCESSING STATUS
02/3	GMSLEI	MESSAGE MATCH LIMIT EXCEEDED IND
02/3	GMSMSI	MESSAGE MATCH SEQUENCE ID
02/3	GEMSAN	EXPECTED MESSAGE ADJUSTMENT NUMBER
06/2	VVHVJ	VIN/HIN JURISDICTION

You designated that you will “always” send the VVHVJ and that really should be “sometimes” as that is the Jurisdiction that assigned the non-standard VIN to the vehicle. Please just use Alaska and it should be AK not AI since the definition indicates it should be the postal code for the jurisdiction.

You should also be sending AK instead of AI for VTIJUR - TITLING JURISDICTION as the definition indicates it should be the postal code for the jurisdiction that issued the title.

I also noticed that you sent a 507:NON-ACTIVE TITLE message in the 99/2 block which should not have been sent (your Title Status shows Active which it should). But you also did not send the following data in that message which will affect later testing.

99/2	GERAEN	ERROR ELEMENT AAMVA CODE
99/2	GERAET	AAMVA ERROR TYPE
99/2	GERDOC	ERROR DATA OCCURRENCE

The following was in position 1 but should start in position 10

99/2	GERMTX	ERROR MESSAGE TEXT
------	--------	--------------------

Still missing:

06/4	VVHUCC	VEHICLE USE CLASS CODE	(you indicated you are still working on this)
06/4	VVHNAX	VEHICLE NUMBER OF AXLES	

26/3 VTIPJU - PREVIOUS TITLING JURISDICTION should have AK instead of AI as it should be the postal code

34/1 VOWNAM – OWNER NAME currently has Alvin.Shared.CommonLibrary.SharedMo 4 times but the second, third and fourth occurrences do not start in the correct positions (see below):

VOWNAM - OWNER NAME	AN	35	4
VOWNAM - OWNER NAME	AN	35	58
VOWNAM - OWNER NAME	AN	35	112
VOWNAM - OWNER NAME	AN	35	166

And for at least one of the owner names please use an individual so that I can check the format. If the owner is a business, the owner is free form. If the owner is an individual, a specific format is used which is defined in the Online Spec in Appendix D.2.1 See the **AAMVA Person Name Rule** (on page 269) for the complete set of rules governing the format of a person's name.

Also, on your Test Questionnaire I show that you do not plan to send previous title number. Is that wrong?

For Brands will you only ever have 1 brand given your brand mapping? The Test Questionnaire indicates 2 occurrences. Also you have AI just after the brand date which does not belong there.

Thanks,
Susan Creighton / 703.908.5893 office

Subject: RE: AK - NMVTIS Readiness Testing R02A

Hello Susan,

I believe I've made the necessary changes to our data and test environment.

The system does track previous state but not previous title number (outside of our own). I believe the intent is to let NMVTIS to keep a detailed account of information such as title transfers. For now I've made it so that previous title number returns the second most recent title we have on file.

I'll need to look into Use Code some more.

Please try R06 again when possible and let me know if any of the parameters not mentioned above are failing to meet expectations.

I'm headed home for the day.

Cc: Garber, Casey; Chaudhry, Amir; David Nolen, AK Dept. of Administration; Mina Peters, AK Dept. of Administration
Subject: RE: AK - NMVTIS Readiness Testing R02A

Hello Susan,

Here are the changes I've made. I'll be moving the code changes to the test environment momentarily. I believe we'll need to reset the record and title again from scratch. There was no previous state provided when we titled the vehicle.

Our system does not do vin decoding.

06/3	VVHMNA	VEHICLE/VESSEL MODEL NAME	– Will be set to REC to have brand 10
06/3	VVHBST	VEHICLE/VESSEL BODY TYPE	– From what I can tell this is supposed to map to “CP”

(Coupe)? **Yes**

Just needed additional data.

06/3	VVHCOM	VEHICLE/VESSEL MINOR COLOR	- added secondary color
06/3	VVHNLN	NUMBER OF ACTIVE LIENS	– should have previously been 0, now 1
06/4	VVHENU	VEHICLE EQUIPMENT NUMBER	- added equipment number
30/6	VLHNAM	LIENHOLDER	- added lienholder
30/8	VLHADD	LIENHOLDER ADDRESS	- added lienholder
34/1	VOWNAM	OWNER NAME	- added additional owners

Code changes.

06/3	VVHLEI	VEHICLE LEASE INDICATOR	- fixed mapping
06/4	VVHNAX	VEHICLE NUMBER OF AXLES	- fixed mapping
06/4	VVHUL2	VEHICLE UNLADEN WEIGHT	- fixed mapping
26/4	VODDTE	ODOMETER DATE	- was supposed to already have been mapped to title date, system doesn't ask for / obtain this information

If you haven't already please check as to why this did not return the title date in this field.

30/7	VLNDAT	LIEN DATE	- mapped to title date, system doesn't ask for / obtain this information
------	--------	-----------	--

These three should potentially be fixed. We don't store brands. Presence of REC model type indicates brand 10, and an existing status message of type J indicates brand 11. Index / record length look suspect, so we may need updated call list format indexes for these fields.

37/1	VBRDCD	BRANDER CODE
37/1	VBRCOD	BRAND CODE (2 occurrences)
37/1	VBRDAO	BRAND DATE (2 occurrences)

Parameters we were asked to title on did not return a previous jurisdiction.

26/3	VTIPJU	PREVIOUS TITLING JURISDICTION	The previous title was Alaska
------	--------	-------------------------------	--------------------------------------

Is this supposed to correlate to one of the spreadsheets? I'm having a hard time tracking this one down.

06/4	VVHUCC	VEHICLE USE CLASS CODE	This is in the online spec in Appendix D (search on use case)
------	--------	------------------------	--

Thank you,

Hi Dillon,

This time I received the HC in response but not all the fields are filled. You need to set up the vehicle so that the VIN decodes correctly, therefore, the vehicle make, year, body type, etc. are correct, and all the fields that you designated on your test questionnaire that you will always or sometimes send, have data for the maximum number of occurrences. I know some of the data will not make sense, but please fill anyway as I am checking that the data is coming in the correct positions.

MISSING DATA:

06/3	VVHBS	VEHICLE/VESSEL BODY TYPE – Should be what it decodes to
06/3	VVHMNA	VEHICLE/VESSEL MODEL NAME – Should be what it decodes to
06/3	VVHCOM	VEHICLE/VESSEL MINOR COLOR
06/3	VVHLEI	VEHICLE LEASE INDICATOR
06/3	VVHNLN	NUMBER OF ACTIVE LIENS – Please fill with a number
06/4	VVHUCC	VEHICLE USE CLASS CODE
06/4	VVHENU	VEHICLE EQUIPMENT NUMBER
06/4	VVHNAX	VEHICLE NUMBER OF AXLES
06/4	VVHUL2	VEHICLE UNLADEN WEIGHT
26/3	VTIPJU	PREVIOUS TITLING JURISDICTION
26/4	VODDTE	ODOMETER DATE
30/6	VLHNAM	LIENHOLDER NAME
30/7	VLNDAT	LIEN DATE
30/8	VLHADD	LIENHOLDER ADDRESS
34/1	VOWNAM	OWNER NAME (4 occurrences – I got 1 but need 4)
37/1	VBRDCD	BRANDER CODE
37/1	VBRCOD	BRAND CODE (2 occurrences)
37/1	VBRDAO	BRAND DATE (2 occurrences)

For Vehicle Owner Name, please use an individual so that I can check the format where you should be using @ between the first, last and middle names

34/1 VOWNAM OWNER NAME

Thanks,

Susan Creighton / 703.908.5893 office

Good morning Susan,

I'm ready to pick up where we left off Friday when you are. I've resolved the issue with the record you tested SC against.

Thank you,

Subject: RE: AK - NMVTIS Readiness Testing R02A

It seems like the State Titling Key isn't being set during the Title Add like it should be. The system checks against both the State Titling Key and VIN when receiving unsolicited messages. I'll investigate.

I know it's pushing 6pm on a Friday your time, how much longer will you be available?

Apologies for the delay, we're looking into a non-UNI-related bug where fields which should be able to have information entered into them aren't allowing us to do so. It's having the unfortunate side effect of preventing us from reaching the stage that we send the UA. While that's being investigated I'll see if I can manage the help desk version of UA.

Hi Dillon,

I validated the Titling Transactions for R02A and R02B and the Helpdesk Transaction for R02C and all passed.

Let's do R03 from Titling and once I validate we will do R04 from Titling so that we do all the test cases using the titling system. Once we finish I will reset the data and we will do those same transactions from the Helpdesk.

Thanks,
Susan Creighton / 703.908.5893 office

Subject: RE: AK - NMVTIS Readiness Testing R02A

Good morning Susan,

I apologize, my Outlook stopped receiving e-mails despite appearing to be functioning correctly. I assumed you simply had a busy morning until I attempted to send this e-mail and was presented with an error.

While I was waiting, I took the liberty of creating screenshots for all the variations of tests cases R02A, B, and C. In total you should find twelve images attached:

R02A: 2 images for IU & IT messages sent after the first form of the titling process
2 images for IU & IT messages sent by the 'help desk' function that sends both
2 images for the IU sent by the 'help desk' function that sends only an IU

R02B: 2 images for IU & IT messages sent after the first form of the titling process
2 images for IU & IT messages sent by the 'help desk' function that sends both
1 image for the IU sent by the 'help desk' function that sends only an IU

R02C: 1 image for the IU sent by the 'help desk' function that sends only an IU

Hopefully this covers any cases we're currently lacking.

-Dillon

Subject: RE: AK - NMVTIS Readiness Testing R02A

This email comes from an external source, so remember, Think Before You Click!
Hi Dillon,

Based on your flow chart it looks as if the titling clerks use the Vehicle Menu and your Helpdesk uses the AAMVA Menu or NMVTIS Menu. Please confirm.

Based on the fact that the Helpdesk is calling the same code as the titling system and the only differences in the AAMVA Menu versus the NMVTIS Menu for the Helpdesk is which of the transactions they are allowed to do and whether the inquiries are sent automatically, we feel the below is what we need to test. Please let me know if you think this coverage will suffice. You will need to ensure that the AAMVA Menu messages are returning the same data as the NMVTIS Menu.

Test Case	Test Scenario	VIN	SOT	Title Number	Titling System	NMVTIS Menu Helpdesk
R02A	Send a Used Vehicle Inquiry (IU) all optional and required fields should be populated	AICASUALCURRTC003				P
R02B	Send a Used Vehicle Inquiry (IU) Inquire using VIN/SOT/and Title#	ZFF70RCA2B0177029	S7	NOMATCHTITLE		P

R02C	Send a Used Vehicle Inquiry (IU) Inquire using SOT/Title# only		NJ	AI201602600000482	X		
R03	Send an Add Title Transaction (UA) all optional and required fields should be populated	ZFF70RCA2B0177029					
R04	Send an In-state Title Change on the same VIN in TC R03 (UV) all optional and required fields should be populated	Same VIN as R03					
R06	You will receive a state vehicle data request (SC). Send the response (HC and H1 if applicable) all optional and required fields should be populated	Same VIN as R03					
R07	You will receive an old state vehicle data request (SD). Send the response (HD) all optional and required fields should be populated	Same VIN as R03					
R11	You will receive an Undo CSOT message (NT). Send the response (C3) all optional and required fields should be populated	Same VIN as R03					
R05	Remove the In-state Title Change in TC R04 (DU) all optional and required fields should be populated	Same VIN as R03					
R08	Remove the Add Title record in TC R03 (DM) all optional and required fields should be populated	Same VIN as R03					
R09	Send a Change State of Title (UT) all optional and required fields should be populated	AICASUALCURRTC008					
R10	Remove the Change State of Title (DT) all optional and required fields should be populated	Same VIN as R07					
R12	Send a Brand Inquiry (IB) all optional and required fields should be populated	AICASUALCURRTC001			X		
R13	Send a Brand Add (UB) for a brand you have mapped all optional and required fields should be populated	State Provided VIN					

R14	Remove the Brand in TC R13 (DB) all optional and required fields should be populated	Same VIN as R13				
R15	Send a History Inquiry (IH) all optional and required fields should be populated	AISTRUCTREDTSTY01			X	
R16	Send a Theft Inquiry (IT) all optional and required fields should be populated	THEFTINQUIRY222222				
R17	Purge an active record (DV). Please setup data in your state database and the Central File for this test case. All optional and required fields should be populated	State Provided VIN			X

As for which code is the same, perhaps this diagram will help.

Non-white backgrounds indicate color-coordinated shared code, with the exception of the solid blue starting nodes.

Subject: RE: AK - NMVTIS Readiness Testing R02A

Hi all,

Let me take a stab at it, based on my understanding. Dillon/David, please correct me if I am mistaken.

Our users have the ability to manually perform the following functions in the NMVTIS menu:

BRAND INQUIRY (IB)
TITLE HISTORY INQUIRY (IH)
THEFT INQUIRY (IT)
VEHICLE INQUIRY (IU)
BRAND UNDO (DB)
TITLE UNDO (DM)
CSOT UNDO (DT)
IN-STATE CHG UNDO NMVTIS
SET PURGE INDICATOR (DV)
RESEND C3 OR HD MSG
IN-STATE CHANGE (UV)
CSOT (UT)
BRAND ADD (UB)
ADD TITLE (UA)
THEFT OVERRIDE
ERROR REPORTS
IN-STATE CHG UNDO ALVIN

Common inquiries were duplicated in the AAMVA menu, which was around before the NMVTIS menu and includes DL functionality, and is slightly easier to navigate to. The AAMVA menu functions are:

NVMTIS BRAND INQUIRY
NMVTIS TITLE HISTORY
NMVTIS THEFT INQUIRY
NMVTIS VEHICLE INQUIRY

This should be using the same code as the corresponding functions in the NMVTIS menu. I believe this is what is meant by the Help Desk functionality...but it really is available to all users.

On top of that, some of the messages are embedded into the transaction itself. So when doing a new title/registration, an IU and IT are sent automatically, so the user does not need to manually perform the function. There probably are other embedded messages that I am not aware of.

So, the result is that although an IU (and other messages) can be sent from either a transaction or a manual process, it should all funnel into the same "Send IU" code. Right, Dillon?

Subject: RE: AK - NMVTIS Readiness Testing R02A

I'm trying to understand the difference in the AAMVA menu and NMVTIS menu for helpdesk. Are those two menus used for different resource types? And then there is a separate titling system that the titling clerks use? Are each of these methods using the same application code except for the differences in automatically sending the IT using VIN / SOT / Title Number in its various inquiry forms, so regardless of which menu you send the request from, it is the same code not different code?

Thanks,
Susan Creighton / 703.908.5893 office

To: 'Creighton, Susan' <screighton@aamva.org>; David Nolen, AK Dept. of Administration <david.nolen@alaska.gov>
Cc: Garber, Casey <CGarber@aamva.org>; Mina Peters, AK Dept. of Administration <mina.peters@alaska.gov>
Subject: RE: AK - NMVTIS Readiness Testing R02A

I've finished the alternate implementation on the AAMVA menu. In total there are three different ways IU's are sent:

- 1.) Implicitly as part of the various titling processes, which to my understanding requires a VIN.
- 2.) Explicitly from the AAMVA menu, as a help desk function, also sending an IT and thus requiring a VIN to be used.
- 3.) Explicitly from the NMVTIS menu, as a help desk function, does not send an IT and does not require VIN to be used. (Although there is an explicit theft inquiry on both the NMVTIS and AAMVA menu which both require a VIN to be used.)

To the best of my understanding, R02A and R02B can be executed all three ways, while R02C can only be executed the third way.

The very first screenshot I sent you would've been R02A using method 3.

The following screenshots with IT's sent now reflect R02A and R02B being executed using method 2, but I'd be happy to redo these tests.

The last screen shot represents R03 using method 3.

This leaves R02B using method 3 untested, with the titling versions completely untested.

This email comes from an external source, so remember, Think Before You Click!
And NMVTIS?

So, we will need to test both titling and helpdesk. You can do R02A again using the titling system or if you need to gain access we can move forward to R02C from the helpdesk and go back to R02A from your titling system once you are able. But we will need to test both the helpdesk and the titling system for readiness before we move to the online scenario testing. We will not need to test R02C from titling since you will only be using that format from the helpdesk.

Thanks,
Susan Creighton / 703.908.5893 office

Subject: RE: AK - NMVTIS Readiness Testing R02A

All requests thus far were executed from the NMVTIS menu which has been described as the Helpdesk application.

No requests thus far have been made as a result of attempting to formally title vehicle. (At no point this morning have I used nor perceived being instructed to use the explicit titling function which automatically sends a vehicle inquiry.)

I'm not sure whether the AAMVA menu functions are considered Help Desk functions or not.
David, could you please clarify?

Subject: RE: AK - NMVTIS Readiness Testing R03

Edit: Accidentally used wrong but correctly spelled words in a few places.

After some additional testing and research in between responses, I'm afraid I was mistaken in my previous statements and that we may have to backtrack a little.

It turns out that the functionality of the two manual endpoints on the production environment are as follows:

NMVTIS Menu Vehicle Inquiry:

- Will not automatically send an IT
- Will accept either VIN, Title Number and State of Title, or both.

AAMVA Menu Vehicle Inquiry:

- Automatically sends IT and IU
- Will only accept requests which include a VIN, with or without Title Number and State of Title.
- Will not accept a **request** without a VIN.

I apologize, I was not involved in the analysis nor “implementation” of the second endpoint. I will revert the previous change I made this morning to the existing NMVTIS Menu version and implement this alternate version for the AAMVA Menu. It seems, we will need to test both menus separately after all.

Subject: RE: AK - NMVTIS Readiness Testing R03

This email comes from an external source, so remember, Think Before You Click!

For this one I need to see the UA and on the high level the IU/IT/UA and then the responses. Please use the VIN provided in the test case plan. I will be checking that you are sending the correct make and model year as the VIN is decodable and that the data in your HC when I perform inquiry is based on this VIN.

Thanks,

Susan Creighton / 703.908.5893 office

Subject: RE: AK - NMVTIS Readiness Testing

In the new application, they share entirely the same code (NMVTIS functions on the AAMVA menu redirect to their equivalent function on the NMVTIS menu). In the existing production environment, it is a separate form that provides additional "person" related fields to support non-NMVTIS functions, but both call the same code to send message.

Subject: RE: AK - NMVTIS Readiness Testing

In that case it would seem that the help desk functionality is integrated into the application, and that the IU/IT sent previously was performed using the help desk application.

All solicited messages can be manually sent from this "NMVTIS Menu". There are duplicate endpoints for Vehicle Inquiry (IU/IT), Title History, Brand Inquiry, and Theft Inquiry on an "AAMVA Menu", which I suspect is also considered Help Desk functionality. However, functionally they are identical. For those four endpoints I can send the message from both ways, but functions which manipulate pointer data will only be manually available from the "NMVTIS Menu".

Subject: RE: AK - NMVTIS Re-write AMIE Online Updates/Inquiries Meeting Minutes

IU and IT both have a dedicated endpoint for being called manually, but my understanding is that when attempting to title a vehicle both will be sent. I sent the IU manually rather than attempting to title AICASUALCURRTC003. The IT has now been sent.

I'll also make a note to check whether the manual endpoint in the production environment sends both.

Okay. Everything looks good except I did not see an IT sent. Is that something you send automatically when you do inquiry or do you have to manually send it?

Thanks,

Susan Creighton / 703.908.5893 office

Understood.

Here's the first page of the log which contains rest of the RI/RJ messages.

Subject: RE: AK - NMVTIS Re-write AMIE Online Updates/Inquiries Meeting Minutes

This email comes from an external source, so remember, Think Before You Click!

Also, for the record, yesterday I mentioned that you should be performing inquiry before any updates. There is one exception. Should not perform inquiry on vehicles that are not NMVTIS eligible, like boats, golf carts, trailers, etc. In the vehicle mapping which is included in the test case plan there is a column that says whether the vehicle is supposed to be sent to NMVTIS or not. If it says no, you should not do inquiry.

As far as the testing, I don't see where you sent an IT. Also, I need to be able to see all the responses you received. There should be some more RI/RJ messages. Otherwise, the format of the message looks good.

Thanks,

Susan Creighton / 703.908.5893 office

Subject: RE: AK - NMVTIS Re-write AMIE Online Updates/Inquiries Meeting Minutes

Here's a screenshot of the IU from R02A.

I've gone ahead and CC'd Mina as well, as another developer indicated she wanted to be included during SPEX testing.

Mina, if there's anybody else you'd like me to include please let me know. Or likewise if you'd like to opt out.

Hi Dillon,

I forgot to ask you to please send me screenshots of the UNI Messages you send opened up in Text format and a high level screenshot of all the responses you receive. It should look like this and don't shrink them as I need to be able to read them. I highlighted how where you need to change the format to text.

Subject: RE: AK NMVTIS Testing - 002

Hi Dillon,

We currently have you set up in production and test to sometimes use the state titling key. Should that be always or sometimes?

The MINI Make was setup that way on NMVTIS by mistake. Please use the correct MAKE MNNI when you title as David pointed out.

TC 002:

Title Issue Date on message does not match spreadsheet

Title Number on message does not match spreadsheet

Model Year on message does not match spreadsheet

Is the spreadsheet wrong? If so I will update the spreadsheet.

I will send a separate email for each of the remaining test cases so we can keep them separate for Mina.

Thanks,
Susan Creighton / 703.908.5893 office

Subject: AK NMVTIS Testing - 002, 005, 006, 011, 012

Good morning Susan,

I've attached my current version of the spreadsheet, as well as images for test cases 002, 005, 006, and 011. I've also performed TC012 which now correctly results in no messages being sent.

A few notes:

- TC005 returned the UT with errors, I'm assuming this is expected.
- State Titling Key wasn't being populated on our CSOT messages sent from the titling system. I had run into this before but couldn't find the cause. Between TC006 and TC011 I located the cause and fixed the issue. TC006 is the only CSOT that succeeded without a state titling key, and I believe the in-state change that'll be performed by TC007 will add the state titling key to the record.

- Originally TC012 correctly skipped sending inquiry messages but sent a UA message with AI title number 7277334. I fixed the issue, performed a Title Undo, removed the vehicle from our system, and titled it again as a new vehicle using 7277335. This correctly resulted in no messages being sent.
- We have the make “Mini Cooper” in our migrated data as “MNNI” rather than “MINI”. I’m believe this to be a typo in the production and/or migrated data. I’ll address this as soon as I can.

Unless I hear otherwise I’ll continue performing the initial tests cases of each group where possible.

Thank you,

Subject: RE: AK NMVTIS Testing - Structured Testing values

This email comes from an external source, so remember, Think Before You Click!
 Hi Dillon,

I have updated the state titling key for the gold test cases. You can go ahead and get started. The duplicate you mentioned is meant to be there.

Also in answer to your question “Is it safe to assume there’s no harm in assigning information for a test case that later ends up unused / not resulting in a titling event? There are some cases where I’ll need to run inquiries to know what data to use. For example, Test Case 021 seems to imply that Test Case 020 will return a theft result and shouldn’t be titled.” is yes this is required. You should go ahead and title and your programs should determine if the records should be sent to NMVTIS as well as if an inquiry should be executed. As stated previously vehicles that are not to be sent to NMVTIS should not be inquired upon but it will be necessary to inquire on all other vehicles as you will need to respond according to what is found in the response to the inquiry.

Thanks,
 Susan Creighton / 703.908.5893 office

Subject: RE: AK NMVTIS Testing - Structured Testing values

Hello Susan,

I've made sure that our database has a vehicle stored for every row with Old SOT set to "AI". Please update the records you created for the five gold/orange rows with Old State AI to include the state titling key I've filled out. The system relies on state titling key as a primary identifier.

Additionally, I got back a duplicate title result for the UA pertaining to **AISTRUCTREDTSTW01**

The screenshot shows a web browser window with the URL <https://dmvrapp1.dmv.loc/Web/Aamva/MessageQueue/UnreadMessagesForUser?Index=0&AID=2be19801ff1b4>. The page title is "View ALVIN Message". The message is a "Response to UA Message" for VIN AISTRUCTREDTSTW01, sent on 6/1/2017 at 9:10 AM. The message content includes a warning: "NMVTIS 'TEST' HM Title added successfully" and "NMVTIS 'TEST' R2 Title added successfully". Below this, it states "Duplicate title created for VIN AISTRUCTREDTSTW01" and "More than six title records found for VIN AISTRUCTREDTSTW01". A table titled "Title Records" shows the following data:

Title Number	State	Title Key
7277314	AI	1727731
20140520	CA	

At the bottom of the message, there is a button labeled "Return To Nmvtis Menu".

Just a heads up in case it's unintentional.

Subject: RE: AK NMVTIS Testing - Structured Testing values

Hi Susan,

I ran into two issues. I can't find any production data to support a vehicle of type "Van Camper", so I don't have a Make listed for that yet. Also, I can't find production data to support what I believe was supposed to be a Chevy Auto Carrier. I ended up using Aztec as the make instead.

Outside of these issues, I believe I've appropriately populated all the necessary fields. Please let me know if I've missed anything.

Thank you,

Subject: RE: AK NMVTIS Testing - Structured Testing values

This email comes from an external source, so remember, Think Before You Click!
Hi Dillon,

Please go ahead and set up all the data for the AK titles that should already be in the AK DB and on NMVTIS before we start the actual test scenario. These would be vehicles that are already titled in AK before the actual test scenario starts so we need to have the data updated in the AK DB and NMVTIS for those titles. These titles will be the yellow/gold highlighted cells in Columns G through N, the "Old" information. So go ahead and actually create the test data that will be used for AI which are highlighted yellow/gold in columns G – N. The instructions to do this are in the Comments column Z. For the gold highlighted cells the data is already in NMVTIS so you need to create the data on the AK DB via a backend method so that you do not send anything to NMVTIS. If you cannot do that, just go ahead and send a UA for those but let me know so I can delete/update data on NMVTIS before we start. Be sure you use the data already

designated in those columns if there is data. For the yellow, you need to provide me what data you used when you did the setup.

For the Columns O – X we can capture the rest as we go.

Thanks,
Susan Creighton / 703.908.5893 office

Subject: RE: AK NMVTIS Testing - Structured Testing values

Hello Susan,

I've gone ahead and allocated a large block of title numbers, and started filling out the information I anticipate will be used during the test. Title Date and State Titling Key will not be available until the test is executed. Please ignore sections in red (they'll represent test cases I intend to inquire about with Debra) and any zero values (will be replaced by the time I'm done).

I've yet to start looking up valid makes for these vehicles, but does what I've filled out thus far seem appropriate?

Is it safe to assume there's no harm in assigning information for a test case that later ends up unused / not resulting in a titling event? There are some cases where I'll need to run inquiries to know what data to use. For example, Test Case 021 seems to imply that Test Case 020 will return a theft result and shouldn't be titled.

Subject: RE: AK NMVTIS Testing - Structured Test Case 001

This email comes from an external source, so remember, Think Before You Click!
Hi Dillon,

Since I need to know the data that you are setting up in order to update our test tool, it would be most appreciated if you could go ahead and do the setup as well as update the test case plan with that information before we get started (you don't need to redo the 1st test case). For this testing I'm going to give you a set of test cases you can do and you

need to let me know which ones you did by sending the same info you sent me before for each one. You won't have to wait on me to validate before moving forward unless the test case has associated test cases or is highlighted blue indicating you need to contact AAMVA in which case I need to execute processes on our side before you move forward. So go ahead and do the setup for the test cases highlighted yellow/gold and provide the data you setup back to me in the test case plan and we will go from there.

Thanks,
Susan Creighton / 703.908.5893 office

Subject: AK NMVTIS Testing - Structured Test Case 001

Alright Susan,

I've deduced that 12,001-18,000 lbs. is the appropriate weight range for the information I input. The titling process has completed without sending an inquiry. The previous inquiries were from inputting values typical of a passenger vehicle as a sanity check.

I've attached the test case plan. Do you want me to attach it after each test case? Are we still doing one test case at a time?

Thank you,

Hi Andrew,

Nichole and I would like for you to register for all the trainings with AAMVA on June 13, 14, 15 & 16th. This will give you a great introduction to CDLIS and AAMVA.

You may or may not be able to register yet, Nichole has sent AAMVA a request for a login for you and it's in process. But please notate these trainings on your calendar and be aware that the trainings are listed in Eastern Time. So if it starts at 2:00 ET it's actually 10:00 our time.

Please let me know if you have any questions.

Subject: RE: AK NMVTIS Testing - 002

Hello Susan,

As far as I know State Titling Key should always be used. At the very least UA (Title Add), UV (CSOT), SC, and SD all should have state titling key populated. State Titling Key is used in conjunction with VIN to uniquely identify an existing state record.

I just ran an IU for the VIN provided in TC002. As far as I can tell everything besides title date seems to correspond with the data provided in my spreadsheet. I'm not sure where these dates are coming from, I'll investigate.

Subject: AK NMVTIS Testing - 002, 005, 006, 011, 012

Good morning Susan,

I've attached my current version of the spreadsheet, as well as images for test cases 002, 005, 006, and 011. I've also performed TC012 which now correctly results in no messages being sent.

A few notes:

- TC005 returned the UT with errors, I'm assuming this is expected.
- State Titling Key wasn't being populated on our CSOT messages sent from the titling system. I had run into this before but couldn't find the cause. Between TC006 and TC011 I located the cause and fixed the issue. TC006 is the only CSOT that succeeded without a state titling key, and I believe the in-state change that'll be performed by TC007 will add the state titling key to the record.
- Originally TC012 correctly skipped sending inquiry messages but sent a UA message with AI title number 7277334. I fixed the issue, performed a Title Undo, removed the vehicle from our system, and titled it again as a new vehicle using 7277335. This correctly resulted in no messages being sent.
- We have the make "Mini Cooper" in our migrated data as "MNNI" rather than "MINI". I'm believe this to be a typo in the production and/or migrated data. I'll address this as soon as I can.

Unless I hear otherwise I'll continue performing the initial tests cases of each group where possible.

Thank you,

Subject: RE: AK NMVTIS Testing - Structured Testing values

This email comes from an external source, so remember, Think Before You Click!

Hi Dillon,

I have updated the state titling key for the gold test cases. You can go ahead and get started. The duplicate you mentioned is meant to be there.

Also in answer to your question "Is it safe to assume there's no harm in assigning information for a test case that later ends up unused / not resulting in a titling event? There are some cases where I'll need to run inquiries to know what data to use. For example, Test Case 021 seems to imply that Test Case 020 will return a theft result and shouldn't be titled." is yes this is required. You should go ahead and title and your programs should determine if the records should be sent to NMVTIS as well as if an inquiry should be executed. As stated previously vehicles that are not to be sent to NMVTIS should not be inquired upon but it will be necessary to inquire on all other vehicles as you will need to respond according to what is found in the response to the inquiry.

Thanks,

Susan Creighton / 703.908.5893 office

Subject: RE: AK NMVTIS Testing - Structured Testing values

Hello Susan,

I've made sure that our database has a vehicle stored for every row with Old SOT set to "AI". Please update the records you created for the five gold/orange rows with Old State AI to include the state titling key I've filled out. The system

relies on state titling key as a primary identifier.

Additionally, I got back a duplicate title result for the UA pertaining to **AISTRUCTREDTSTW01**

Just a heads up in case it's unintentional.

Thank you,

Subject: RE: AK NMVTIS Testing - Structured Testing values

This email comes from an external source, so remember, Think Before You Click!
Hi Dillon,

Please go ahead and set up all the data for the AK titles that should already be in the AK DB and on NMVTIS before we start the actual test scenario. These would be vehicles that are already titled in AK before the actual test scenario starts so we need to have the data updated in the AK DB and NMVTIS for those titles. These titles will be the yellow/gold highlighted cells in Columns G through N, the "Old" information. So go ahead and actually create the test data that will be used for AI which are highlighted yellow/gold in columns G – N. The instructions to do this are in the Comments column Z. For the gold highlighted cells the data is already in NMVTIS so you need to create the data on the AK DB via a backend method so that you do not send anything to NMVTIS. If you cannot do that, just go ahead and send a UA for those but let me know so I can delete/update data on NMVTIS before we start. Be sure you use the data already designated in those columns if there is data. For the yellow, you need to provide me what data you used when you did the setup.

For the Columns O – X we can capture the rest as we go.

Thanks,
Susan Creighton / 703.908.5893 office

Subject: RE: AK NMVTIS Testing - Structured Testing values

Hello Susan,

I've gone ahead and allocated a large block of title numbers, and started filling out the information I anticipate will be used during the test. Title Date and State Titling Key will not be available until the test is executed. Please ignore sections in red (they'll represent test cases I intend to inquire about with Debra) and any zero values (will be replaced by the time I'm done).

I've yet to start looking up valid makes for these vehicles, but does what I've filled out thus far seem appropriate?

Is it safe to assume there's no harm in assigning information for a test case that later ends up unused / not resulting in a titling event? There are some cases where I'll need to run inquiries to know what data to use. For example, Test Case 021 seems to imply that Test Case 020 will return a theft result and shouldn't be titled.

Subject: RE: AK NMVTIS Testing - Structured Test Case 001

This email comes from an external source, so remember, Think Before You Click!

Hi Dillon,

Since I need to know the data that you are setting up in order to update our test tool, it would be most appreciated if you could go ahead and do the setup as well as update the test case plan with that information before we get started (you don't need to redo the 1st test case). For this testing I'm going to give you a set of test cases you can do and you need to let me know which ones you did by sending the same info you sent me before for each one. You won't have to wait on me to validate before moving forward unless the test case has associated test cases or is highlighted blue indicating you need to contact AAMVA in which case I need to execute processes on our side before you move forward. So go ahead and do the setup for the test cases highlighted yellow/gold and provide the data you setup back to me in the test case plan and we will go from there.

Thanks,
Susan Creighton / 703.908.5893 office

Subject: AK NMVTIS Testing - Structured Test Case 001

Alright Susan,

I've deduced that 12,001-18,000 lbs. is the appropriate weight range for the information I input. The titling process has completed without sending an inquiry. The previous inquiries were from inputting values typical of a passenger vehicle as a sanity check.

I've attached the test case plan. Do you want me to attach it after each test case? Are we still doing one test case at a time?

Thank you,

Hello Susan,

As far as I know State Titling Key should always be used. At the very least UA (Title Add), UV (CSOT), SC, and SD all should have state titling key populated. State Titling Key is used in conjunction with VIN to uniquely identify an existing state record.

I just ran an IU for the VIN provided in TC002. As far as I can tell everything besides title date seems to correspond with the data provided in my spreadsheet. I'm not sure where these dates are coming from, I'll investigate.

Hi Dillon,

We currently have you set up in production and test to sometimes use the state titling key. Should that be always or sometimes?

The MINI Make was setup that way on NMVTIS by mistake. Please use the correct MAKE MNNI when you title as David pointed out.

TC 002:
Title Issue Date on message does not match spreadsheet

Title Number on message does not match spreadsheet

Model Year on message does not match spreadsheet

Is the spreadsheet wrong? If so I will update the spreadsheet.

I will send a separate email for each of the remaining test cases so we can keep them separate for Mina.

Thanks,
Susan Creighton / 703.908.5893 office

I've yet to start looking up valid makes for these vehicles, but does what I've filled out thus far seem appropriate?

Is it safe to assume there's no harm in assigning information for a test case that later ends up unused / not resulting in a titling event? There are some cases where I'll need to run inquiries to know what data to use. For example, Test Case 021 seems to imply that Test Case 020 will return a theft result and shouldn't be titled.

Thank you,

Subject: RE: AK NMVTIS Testing - Structured Test Case 001

This email comes from an external source, so remember, Think Before You Click!
Hi Dillon,

Since I need to know the data that you are setting up in order to update our test tool, it would be most appreciated if you could go ahead and do the setup as well as update the test case plan with that information before we get started (you don't need to redo the 1st test case). For this testing I'm going to give you a set of test cases you can do and you

need to let me know which ones you did by sending the same info you sent me before for each one. You won't have to wait on me to validate before moving forward unless the test case has associated test cases or is highlighted blue indicating you need to contact AAMVA in which case I need to execute processes on our side before you move forward. So go ahead and do the setup for the test cases highlighted yellow/gold and provide the data you setup back to me in the test case plan and we will go from there.

Thanks,
Susan Creighton / 703.908.5893 office

Subject: AK NMVTIS Testing - Structured Test Case 001

Alright Susan,

I've deduced that 12,001-18,000 lbs. is the appropriate weight range for the information I input. The titling process has completed without sending an inquiry. The previous inquiries were from inputting values typical of a passenger vehicle as a sanity check.

I've attached the test case plan. Do you want me to attach it after each test case? Are we still doing one test case at a time?

Thank you,

Subject: FW: AAMVA Training for Jurisdictions

Good morning, Boyd,

These might be helpful (free) training for you – I’ve highlighted what I would suggest as helpful. The class tomorrow might be a little advanced since we haven’t looked at UNI transactions yet – though when we ultimately do, it might end up making more sense. Or it could be put off till the next time it comes around. They do send training materials that can be used as reference.

Regards,

Mina Peters

To: Tham, Nichole M (DOA)
Subject: RE: New AK DMV Staff

Hi Nichole,

I have made the request for CDL related sharepoint access and have pasted instructions for the new folks to get access to the AAMVA website below. Thanks and take care.

It is not necessary to log in every time you access the AAMVA website. Only some of the information requires member log-in. If you attempt to access members only information without logging in, a screen will appear prompting you to do so.

To establish your access for the first time, type www.aamva.org into your web browser. On the upper right side is a yellow box that reads "Login". Click it to see a log-on screen. Find the sentence that reads "If you don't have an AAMVA website account, you can [create](#) one now." Click "[create](#)" and follow the steps to set-up your own access.

Next time you need to access a members only section of the webpage, click the yellow "Log In" button and provide the ID and password information you've created.

From the My Account page, you can also manage your AAMVA subscriptions. You will now begin receiving AAMVA publications such as The Week in Review, Regional News, and MOVE magazine in both electronic and paper formats. If you want to make changes to AAMVA subscriptions, do so under "Manage My Subscriptions". You can change the status of each as often as you'd like.

Please let me know if you have questions or issues, or if I can be of assistance in any way.

Subject: AK NMVTIS Testing - 002, 005, 006, 011, 012

Good morning Susan,

I've attached my current version of the spreadsheet, as well as images for test cases 002, 005, 006, and 011. I've also performed TC012 which now correctly results in no messages being sent.

A few notes:

- TC005 returned the UT with errors, I'm assuming this is expected.
- State Titling Key wasn't being populated on our CSOT messages sent from the titling system. I had run into this before but couldn't find the cause. Between TC006 and TC011 I located the cause and fixed the issue. TC006 is the only CSOT that succeeded without a state titling key, and I believe the in-state change that'll be performed by TC007 will add the state titling key to the record.
- Originally TC012 correctly skipped sending inquiry messages but sent a UA message with AI title number 7277334. I fixed the issue, performed a Title Undo, removed the vehicle from our system, and titled it again as a new vehicle using 7277335. This correctly resulted in no messages being sent.
- We have the make "Mini Cooper" in our migrated data as "MNNI" rather than "MINI". I believe this to be a typo in the production and/or migrated data. I'll address this as soon as I can.

Unless I hear otherwise I'll continue performing the initial tests cases of each group where possible.

Thank you,

This email comes from an external source, so remember, Think Before You Click!
Hi Dillon,

I have updated the state titling key for the gold test cases. You can go ahead and get started. The duplicate you mentioned is meant to be there.

Also in answer to your question “Is it safe to assume there’s no harm in assigning information for a test case that later ends up unused / not resulting in a titling event? There are some cases where I’ll need to run inquiries to know what data to use. For example, Test Case 021 seems to imply that Test Case 020 will return a theft result and shouldn’t be titled.” is yes this is required. You should go ahead and title and your programs should determine if the records should be sent to NMVTIS as well as if an inquiry should be executed. As stated previously vehicles that are not to be sent to NMVTIS should not be inquired upon but it will be necessary to inquire on all other vehicles as you will need to respond according to what is found in the response to the inquiry.

Thanks,
Susan Creighton / 703.908.5893 office

Hello Susan,

I’ve made sure that our database has a vehicle stored for every row with Old SOT set to “AI”. Please update the records you created for the five gold/orange rows with Old State AI to include the state titling key I’ve filled out. The system relies on state titling key as a primary identifier.

Additionally, I got back a duplicate title result for the UA pertaining to **AISTRUCTREDTSTW01**

Subject: RE: AK NMVTIS Testing - Structured Testing values

Hi Susan,

I ran into two issues. I can't find any production data to support a vehicle of type "Van Camper", so I don't have a Make listed for that yet. Also, I can't find production data to support what I believe was supposed to be a Chevy Auto Carrier. I ended up using Aztec as the make instead.

Outside of these issues, I believe I've appropriately populated all the necessary fields. Please let me know if I've missed anything.

Thank you,

Subject: RE: AK NMVTIS Testing - Structured Testing values

This email comes from an external source, so remember, Think Before You Click!
Hi Dillon,

Please go ahead and set up all the data for the AK titles that should already be in the AK DB and on NMVTIS before we start the actual test scenario. These would be vehicles that are already titled in AK before the actual test scenario starts so we need to have the data updated in the AK DB and NMVTIS for those titles. These titles will be the yellow/gold highlighted cells in Columns G through N, the "Old" information. So go ahead and actually create the test data that will be used for AI which are highlighted yellow/gold in columns G – N. The instructions to do this are in the Comments column Z. For the gold highlighted cells the data is already in NMVTIS so you need to create the data on the AK DB via a backend method so that you do not send anything to NMVTIS. If you cannot do that, just go ahead and send a UA for those but let me know so I can delete/update data on NMVTIS before we start. Be sure you use the data already designated in those columns if there is data. For the yellow, you need to provide me what data you used when you did the setup.

For the Columns O – X we can capture the rest as we go.

Thanks,
Susan Creighton / 703.908.5893 office

Subject: RE: AK NMVTIS Testing - Structured Testing values

Hello Susan,

I've gone ahead and allocated a large block of title numbers, and started filling out the information I anticipate will be used during the test. Title Date and State Titling Key will not be available until the test is executed. Please ignore sections in red (they'll represent test cases I intend to inquire about with Debra) and any zero values (will be replaced by the time I'm done).

I've yet to start looking up valid makes for these vehicles, but does what I've filled out thus far seem appropriate?

Is it safe to assume there's no harm in assigning information for a test case that later ends up unused / not resulting in a titling event? There are some cases where I'll need to run inquiries to know what data to use. For example, Test Case 021 seems to imply that Test Case 020 will return a theft result and shouldn't be titled.

Thank you,

Subject: RE: AK NMVTIS Testing - Structured Test Case 001

This email comes from an external source, so remember, Think Before You Click!

Hi Dillon,

Since I need to know the data that you are setting up in order to update our test tool, it would be most appreciated if you could go ahead and do the setup as well as update the test case plan with that information before we get started (you don't need to redo the 1st test case). For this testing I'm going to give you a set of test cases you can do and you need to let me know which ones you did by sending the same info you sent me before for each one. You won't have to wait on me to validate before moving forward unless the test case has associated test cases or is highlighted blue indicating you need to contact AAMVA in which case I need to execute processes on our side before you move forward. So go ahead and do the setup for the test cases highlighted yellow/gold and provide the data you setup back to me in the test case plan and we will go from there.

Thanks,

Susan Creighton / 703.908.5893 office

Subject: AK NMVTIS Testing - Structured Test Case 001

Alright Susan,

I've deduced that 12,001-18,000 lbs. is the appropriate weight range for the information I input. The titling process has completed without sending an inquiry. The previous inquiries were from inputting values typical of a passenger vehicle as a sanity check.

I've attached the test case plan. Do you want me to attach it after each test case? Are we still doing one test case at a time?

Thank you,

Hi Dillon,

TC 006:

Title Issue Date on message does not match spreadsheet

Also, when I executed the inquiry to check the HC, you returned the SC in error 415: VIN NOT ON FILE. Please keep the data available until after the testing has concluded.

Thanks,
Susan Creighton / 703.908.5893 office

Subject: AK NMVTIS Testing - 002, 005, 006, 011, 012

Good morning Susan,

I've attached my current version of the spreadsheet, as well as images for test cases 002, 005, 006, and 011. I've also performed TC012 which now correctly results in no messages being sent.

A few notes:

- TC005 returned the UT with errors, I'm assuming this is expected.
- State Titling Key wasn't being populated on our CSOT messages sent from the titling system. I had run into this before but couldn't find the cause. Between TC006 and TC011 I located the cause and fixed the issue. TC006 is the only CSOT that succeeded without a state titling key, and I believe the in-state change that'll be performed by TC007 will add the state titling key to the record.
- Originally TC012 correctly skipped sending inquiry messages but sent a UA message with AI title number 7277334. I fixed the issue, performed a Title Undo, removed the vehicle from our system, and titled it again as a new vehicle using 7277335. This correctly resulted in no messages being sent.
- We have the make "Mini Cooper" in our migrated data as "MNNI" rather than "MINI". I believe this to be a typo in the production and/or migrated data. I'll address this as soon as I can.

Unless I hear otherwise I'll continue performing the initial tests cases of each group where possible.

Thank you,

Subject: RE: AK NMVTIS Testing - Structured Testing values

This email comes from an external source, so remember, Think Before You Click!
Hi Dillon,

I have updated the state titling key for the gold test cases. You can go ahead and get started. The duplicate you mentioned is meant to be there.

Also in answer to your question "Is it safe to assume there's no harm in assigning information for a test case that later ends up unused / not resulting in a titling event? There are some cases where I'll need to run inquiries to know what data to use. For example, Test Case 021 seems to imply that Test Case 020 will return a theft result and shouldn't be titled." is yes this is required. You should go ahead and title and your programs should determine if the records should be sent to NMVTIS as well as if an inquiry should be executed. As stated previously vehicles that are not to be sent to NMVTIS should not be inquired upon but it will be necessary to inquire on all other vehicles as you will need to respond according to what is found in the response to the inquiry.

Thanks,
Susan Creighton / 703.908.5893 office

Subject: RE: AK NMVTIS Testing - Structured Testing values

Hello Susan,

I've made sure that our database has a vehicle stored for every row with Old SOT set to "AI". Please update the records you created for the five gold/orange rows with Old State AI to include the state titling key I've filled out. The system relies on state titling key as a primary identifier.

Additionally, I got back a duplicate title result for the UA pertaining to **AISTRUCTREDTSTW01**

The screenshot shows a web browser window with the URL <https://dmvrapp1.dmv.alaska.gov/Web/Aamva/MessageQueue/UnreadMessagesForUser?Index=0&AID=2be19801ff1b4>. The page title is "View ALVIN Message". Below the title, it says "Response to UA Message" and "VIN AISTRUCTREDTSTW01". There are two sections for "NMVTIS 'TEST' HM" and "NMVTIS 'TEST' R2", both showing "Warning(s)" and "Title added successfully". A message states "Duplicate title created for VIN AISTRUCTREDTSTW01". Below this is a table of title records:

Title Number	State	Title Key
7277314	AI	1727731
20140520	CA	

At the bottom, there is a button labeled "Return To Nmvttis Menu".

Just a heads up in case it's unintentional.

Subject: RE: AK NMVTIS Testing - Structured Testing values

Hi Susan,

I ran into two issues. I can't find any production data to support a vehicle of type "Van Camper", so I don't have a Make listed for that yet. Also, I can't find production data to support what I believe was supposed to be a Chevy Auto Carrier. I ended up using Aztec as the make instead.

Outside of these issues, I believe I've appropriately populated all the necessary fields. Please let me know if I've missed anything.

Thank you,

Subject: RE: AK NMVTIS Testing - Structured Testing values

This email comes from an external source, so remember, Think Before You Click!

Hi Dillon,

Please go ahead and set up all the data for the AK titles that should already be in the AK DB and on NMVTIS before we start the actual test scenario. These would be vehicles that are already titled in AK before the actual test scenario starts so we need to have the data updated in the AK DB and NMVTIS for those titles. These titles will be the yellow/gold highlighted cells in Columns G through N, the "Old" information. So go ahead and actually create the test data that will be used for AI which are highlighted yellow/gold in columns G – N. The instructions to do this are in the Comments column Z. For the gold highlighted cells the data is already in NMVTIS so you need to create the data on the AK DB via a backend method so that you do not send anything to NMVTIS. If you cannot do that, just go ahead and send a UA for those but let me know so I can delete/update data on NMVTIS before we start. Be sure you use the data already designated in those columns if there is data. For the yellow, you need to provide me what data you used when you did the setup.

For the Columns O – X we can capture the rest as we go.

Thanks,

Susan Creighton / 703.908.5893 office

Subject: RE: AK NMVTIS Testing - Structured Test Case 001

This email comes from an external source, so remember, Think Before You Click!
Hi Dillon,

Since I need to know the data that you are setting up in order to update our test tool, it would be most appreciated if you could go ahead and do the setup as well as update the test case plan with that information before we get started (you don't need to redo the 1st test case). For this testing I'm going to give you a set of test cases you can do and you need to let me know which ones you did by sending the same info you sent me before for each one. You won't have to wait on me to validate before moving forward unless the test case has associated test cases or is highlighted blue indicating you need to contact AAMVA in which case I need to execute processes on our side before you move forward. So go ahead and do the setup for the test cases highlighted yellow/gold and provide the data you setup back to me in the test case plan and we will go from there.

Thanks,
Susan Creighton / 703.908.5893 office

Subject: AK NMVTIS Testing - Structured Test Case 001

Alright Susan,

I've deduced that 12,001-18,000 lbs. is the appropriate weight range for the information I input. The titling process has completed without sending an inquiry. The previous inquiries were from inputting values typical of a passenger vehicle as a sanity check.

I've attached the test case plan. Do you want me to attach it after each test case? Are we still doing one test case at a time?

Thank you,

Hello Susan,

Would you please reverse the record? I'm still addressing the issue with 05/17/2017 is being used for title issue date everywhere. The system failed to return a vehicle because there was no state titling key set during the CSOT. This issue was fixed between TC006 and TC011.

Would you please also provide the latest revision of our questionnaire?

Thank you,

Subject: RE: AK NMVTIS Testing - Structured Test Case 001

This email comes from an external source, so remember, Think Before You Click!

Hi Dillon,

Since I need to know the data that you are setting up in order to update our test tool, it would be most appreciated if you could go ahead and do the setup as well as update the test case plan with that information before we get started (you don't need to redo the 1st test case). For this testing I'm going to give you a set of test cases you can do and you need to let me know which ones you did by sending the same info you sent me before for each one. You won't have to wait on me to validate before moving forward unless the test case has associated test cases or is highlighted blue indicating you need to contact AAMVA in which case I need to execute processes on our side before you move forward. So go ahead and do the setup for the test cases highlighted yellow/gold and provide the data you setup back to me in the test case plan and we will go from there.

Thanks,

Susan Creighton / 703.908.5893 office

Subject: AK NMVTIS Testing - Structured Test Case 001

Alright Susan,

I've deduced that 12,001-18,000 lbs. is the appropriate weight range for the information I input. The titling process has completed without sending an inquiry. The previous inquiries were from inputting values typical of a passenger vehicle as a sanity check.

I've attached the test case plan. Do you want me to attach it after each test case? Are we still doing one test case at a time?

Thank you,

Hi Dillon,

When you receive an error from another state, in this case the SC and SD were sent back in error with 409: TITLE NOT ON FILE, you should follow up with the old SOT to see why as this could be fraud. So you should put a stop on this until it is investigated.

Thanks,
Susan Creighton / 703.908.5893 office

Subject: AK NMVTIS Testing - 002, 005, 006, 011, 012

Good morning Susan,

I've attached my current version of the spreadsheet, as well as images for test cases 002, 005, 006, and 011. I've also performed TC012 which now correctly results in no messages being sent.

A few notes:

- TC005 returned the UT with errors, I'm assuming this is expected.
- State Titling Key wasn't being populated on our CSOT messages sent from the titling system. I had run into this before but couldn't find the cause. Between TC006 and TC011 I located the cause and fixed the issue. TC006 is the only CSOT that succeeded without a state titling key, and I believe the in-state change that'll be performed by TC007 will add the state titling key to the record.
- Originally TC012 correctly skipped sending inquiry messages but sent a UA message with AI title number 7277334. I fixed the issue, performed a Title Undo, removed the vehicle from our system, and titled it again as a new vehicle using 7277335. This correctly resulted in no messages being sent.
- We have the make "Mini Cooper" in our migrated data as "MNNI" rather than "MINI". I'm believe this to be a typo in the production and/or migrated data. I'll address this as soon as I can.

Unless I hear otherwise I'll continue performing the initial tests cases of each group where possible.

Thank you,

Subject: RE: AK NMVTIS Testing - Structured Testing values

This email comes from an external source, so remember, Think Before You Click!

Hi Dillon,

I have updated the state titling key for the gold test cases. You can go ahead and get started. The duplicate you mentioned is meant to be there.

Also in answer to your question "Is it safe to assume there's no harm in assigning information for a test case that later ends up unused / not resulting in a titling event? There are some cases where I'll need to run inquiries to know what data to use. For example, Test Case 021 seems to imply that Test Case 020 will return a theft result and shouldn't be titled." is yes this is required. You should go ahead and title and your programs should determine if the records should be sent to NMVTIS as well as if an inquiry should be executed. As stated previously vehicles that are not to be sent to NMVTIS should not be inquired upon but it will be necessary to inquire on all other vehicles as you will need to respond according to what is found in the response to the inquiry.

Thanks,

Susan Creighton / 703.908.5893 office

Hello Susan,

I've made sure that our database has a vehicle stored for every row with Old SOT set to "AI". Please update the records you created for the five gold/orange rows with Old State AI to include the state titling key I've filled out. The system

relies on state titling key as a primary identifier.

Additionally, I got back a duplicate title result for the UA pertaining to **AISTRUCTREDTSTW01**

Subject: RE: AK NMVTIS Testing - Structured Testing values

Hi Susan,

I ran into two issues. I can't find any production data to support a vehicle of type "Van Camper", so I don't have a Make listed for that yet. Also, I can't find production data to support what I believe was supposed to be a Chevy Auto Carrier. I ended up using Aztec as the make instead.

Outside of these issues, I believe I've appropriately populated all the necessary fields. Please let me know if I've missed anything.

Subject: RE: AK NMVTIS Testing - Structured Testing values

This email comes from an external source, so remember, Think Before You Click!
Hi Dillon,

Please go ahead and set up all the data for the AK titles that should already be in the AK DB and on NMVTIS before we start the actual test scenario. These would be vehicles that are already titled in AK before the actual test scenario starts so we need to have the data updated in the AK DB and NMVTIS for those titles. These titles will be the yellow/gold highlighted cells in Columns G through N, the "Old" information. So go ahead and actually create the test data that will be used for AI which are highlighted yellow/gold in columns G – N. The instructions to do this are in the Comments column Z. For the gold highlighted cells the data is already in NMVTIS so you need to create the data on the AK DB via a backend method so that you do not send anything to NMVTIS. If you cannot do that, just go ahead and send a UA for those but let me know so I can delete/update data on NMVTIS before we start. Be sure you use the data already designated in those columns if there is data. For the yellow, you need to provide me what data you used when you did the setup.

For the Columns O – X we can capture the rest as we go.

Thanks,
Susan Creighton / 703.908.5893 office

Subject: RE: AK NMVTIS Testing - Structured Testing values

Hello Susan,

I've gone ahead and allocated a large block of title numbers, and started filling out the information I anticipate will be used during the test. Title Date and State Titling Key will not be available until the test is executed. Please ignore sections in red (they'll represent test cases I intend to inquire about with Debra) and any zero values (will be replaced by the time I'm done).

I've yet to start looking up valid makes for these vehicles, but does what I've filled out thus far seem appropriate?

Is it safe to assume there's no harm in assigning information for a test case that later ends up unused / not resulting in a titling event? There are some cases where I'll need to run inquiries to know what data to use. For example, Test Case 021 seems to imply that Test Case 020 will return a theft result and shouldn't be titled.

Hi Dillon,

Please go ahead and set up all the data for the AK titles that should already be in the AK DB and on NMVTIS before we start the actual test scenario. These would be vehicles that are already titled in AK before the actual test scenario starts so we need to have the data updated in the AK DB and NMVTIS for those titles. These titles will be the yellow/gold highlighted cells in Columns G through N, the "Old" information. So go ahead and actually create the test data that will be used for AI which are highlighted yellow/gold in columns G – N. The instructions to do this are in the Comments column Z. For the gold highlighted cells the data is already in NMVTIS so you need to create the data on the AK DB via a backend method so that you do not send anything to NMVTIS. If you cannot do that, just go ahead and send a UA for those but let me know so I can delete/update data on NMVTIS before we start. Be sure you use the data already designated in those columns if there is data. For the yellow, you need to provide me what data you used when you did the setup.

For the Columns O – X we can capture the rest as we go.

Thanks,
Susan Creighton / 703.908.5893 office

Subject: RE: AK NMVTIS Testing - Structured Testing values

Hello Susan,

I've gone ahead and allocated a large block of title numbers, and started filling out the information I anticipate will be used during the test. Title Date and State Titling Key will not be available until the test is executed. Please ignore sections in red (they'll represent test cases I intend to inquire about with Debra) and any zero values (will be replaced by the time I'm done).

I've yet to start looking up valid makes for these vehicles, but does what I've filled out thus far seem appropriate?

Is it safe to assume there's no harm in assigning information for a test case that later ends up unused / not resulting in a titling event? There are some cases where I'll need to run inquiries to know what data to use. For example, Test Case 021 seems to imply that Test Case 020 will return a theft result and shouldn't be titled.

Thank you,

Subject: RE: AK NMVTIS Testing - Structured Test Case 001

This email comes from an external source, so remember, Think Before You Click!

Hi Dillon,

Since I need to know the data that you are setting up in order to update our test tool, it would be most appreciated if you could go ahead and do the setup as well as update the test case plan with that information before we get started (you don't need to redo the 1st test case). For this testing I'm going to give you a set of test cases you can do and you need to let me know which ones you did by sending the same info you sent me before for each one. You won't have to wait on me to validate before moving forward unless the test case has associated test cases or is highlighted blue indicating you need to contact AAMVA in which case I need to execute processes on our side before you move forward. So go ahead and do the setup for the test cases highlighted yellow/gold and provide the data you setup back to me in the test case plan and we will go from there.

Thanks,

Susan Creighton / 703.908.5893 office

Subject: AK NMVTIS Testing - Structured Test Case 001

Alright Susan,

I've deduced that 12,001-18,000 lbs. is the appropriate weight range for the information I input. The titling process has completed without sending an inquiry. The previous inquiries were from inputting values typical of a passenger vehicle as a sanity check.

I've attached the test case plan. Do you want me to attach it after each test case? Are we still doing one test case at a time?

Thank you,

Good morning from Alaska,

Congratulation to both of you! Shelia, I'm sad you're leaving...yet Julie, I'm excited that you're our new AAMVA contact! Could you point me in the direction of who to contact regarding AAMVA website and Sharepoint access for new hires? We just staffed two CDL PI grant funded positions working with CSTIMS and CDLIS/S2S and are eager to get them connected.

Sincerely,

Nichole Tham

NMVTIS Conference Call May 17, 2017

The purpose of the call was to provide updates on various aspects of the project. Present on the call: AZ, CA, FL, IA, ID, IN, KY, MD, MI, MO, ND, NE, NH, NV, PA, TX, VA, WA, WI and AAMVA staff.

New Change Data Request Form

Four states are still using the old Change Data Request Form. Although your change data requests have been processed by the AAMVA Help Desk please use the new form for all future requests. The new form is available for download on the AAMVA Web Site. It is located here: <http://www.aamva.org/NMVTIS/> on the documentation tab. Login is required.

Ohio duplicate VIN problem

In most cases, a VIN is unique to a single vehicle and there is one current title record on file for the vehicle, but circumstances may cause more than one current title vehicle record to have the same VIN. A duplicate VIN situation may exist within a single jurisdiction.

Since go-live in January 2017 the Ohio online implementation has been creating an extraordinary high volume of duplicate current pointer records on the central site. The volume of duplicates being generated is approximately 7K per day. This is creating a significant burden on help desks across many states. The root cause of the problem has been identified. Ohio is looking to resolve this issue ASAP.

Batch Duplicate VIN Resolution - Process Planning Update

The Batch Duplicate VIN Resolution Process was last executed in May 2015. We are gearing up for another run in June 2017. We are looking to distribute the impact reports by May 25th and plan our execution on June 11th and 18th. Communications regarding the process schedule will be distributed shortly.

Batch Duplicate VIN Resolution - Point-of-contact distribution list

Thank you for your assistance in getting the Batch Duplicate VIN Resolution distribution list up-to-date.

The Business Rules Working Group Meeting in Arlington, VA – Meeting Recap

It was a great three day meeting. The group reviewed the Performance Management Concept Cost Estimate. We discussed how we will measure the return on investment. What is the financial sustainability for the project and how to ensure the jurisdictions will use the application. We also held a joint discussion with the Law Enforcement Working Group and developed best practices for Salvage Brands.

We also welcomed four new members to the NMVTIS BRWG. Technically, three as Scott Clapper (DE) was a former member of this working group but he is re-joining us. In addition to Scott we also welcomed: Deidra Walker (CO), Sandy O'Day (SD), and Melanie Lester (VA). We are very excited to have you all on the team and really look forward to working with all of you.

The NCIC Code Manual is available on the AAMVA Web Site

We have posted the version that was published on March 31, 2017 to the AAMVA Web Site. The manual is located here: <http://www.aamva.org/vehicle-registration-and-titling/>
User login is required.

Open forum:

Washington State mentioned that the State Vehicle Data response from Ohio is returning invalid values in the Make field. AAMVA will follow-up with Ohio to resolve the issue.

Subject: National Registry II Documentation Update

Importance: High

Dear CDLIS Participants,

The Mini Specification for the second National Registry II transaction 'NR02 MEC Transmission' is now available on the AAMVA website. The 'NR01 MEC Verification Inquiry' Mini Specification posted in March, has also been replaced with a more recent version. The updated specification includes changes that allow for errors to be returned to the state when the PDPS Status Response (HG) message fails validations performed by the Central Site. This change has been approved by the CDLIS Working Group and by FMCSA.

These Mini Specifications and notes regarding the usage of these documents are now available under the 'Documentation' tab of the National Registry II page: <http://www.aamva.org/National-Registry-II/>

AAMVA hosted webinars that provided a high level overview of the National Registry II solution, and a walk through of the NR01 Mini Spec in February 2017. AAMVA also hosted webinars to review the National Registry II solution, and a walk through of the NR02 Mini Spec in April 2017. The recording for these webinars and associated slides can be found in the AAMVA Webinar Archives: <http://www.aamva.org/Webinar-Archives/>

AAMVA will continue to release Mini Specifications for National Registry II and will inform you once they are available. The complete Master Specification will be published by February 2018.

If you have any questions regarding the specification, please contact Helpdesk@aamva.org.

Subject: AK NMVTIS Testing - 002, 005, 006, 011, 012

Good morning Susan,

I've attached my current version of the spreadsheet, as well as images for test cases 002, 005, 006, and 011. I've also performed TC012 which now correctly results in no messages being sent.

A few notes:

- TC005 returned the UT with errors, I'm assuming this is expected.
- State Titling Key wasn't being populated on our CSOT messages sent from the titling system. I had run into this before but couldn't find the cause. Between TC006 and TC011 I located the cause and fixed the issue. TC006 is the only CSOT that succeeded without a state titling key, and I believe the in-state change that'll be performed by TC007 will add the state titling key to the record.
- Originally TC012 correctly skipped sending inquiry messages but sent a UA message with AI title number 7277334. I fixed the issue, performed a Title Undo, removed the vehicle from our system, and titled it again as a new vehicle using 7277335. This correctly resulted in no messages being sent.
- We have the make "Mini Cooper" in our migrated data as "MNNI" rather than "MINI". I'm believe this to be a typo in the production and/or migrated data. I'll address this as soon as I can.

Unless I hear otherwise I'll continue performing the initial tests cases of each group where possible.

Thank you,

Hi Dillon,

I have updated the state titling key for the gold test cases. You can go ahead and get started. The duplicate you mentioned is meant to be there.

Also in answer to your question "Is it safe to assume there's no harm in assigning information for a test case that later ends up unused / not resulting in a titling event? There are some cases where I'll need to run inquiries to know what data to use. For example, Test Case 021 seems to imply that Test Case 020 will return a theft result and shouldn't be titled." is yes this is required. You should go ahead and title and your programs should determine if the records should be sent to NMVTIS as well as if an inquiry should be executed. As stated previously vehicles that are not to be sent to NMVTIS should not be inquired upon but it will be necessary to inquire on all other vehicles as you will need to respond according to what is found in the response to the inquiry.

Thanks,
Susan Creighton / 703.908.5893 office

Hello Susan,

I've made sure that our database has a vehicle stored for every row with Old SOT set to "AI". Please update the records you created for the five gold/orange rows with Old State AI to include the state titling key I've filled out. The system relies on state titling key as a primary identifier.

Additionally, I got back a duplicate title result for the UA pertaining to **AISTRUCTREDTSTW01**

Subject: RE: AK NMVTIS Testing - Structured Testing values

Hi Susan,

I ran into two issues. I can't find any production data to support a vehicle of type "Van Camper", so I don't have a Make listed for that yet. Also, I can't find production data to support what I believe was supposed to be a Chevy Auto Carrier. I ended up using Aztec as the make instead.

Outside of these issues, I believe I've appropriately populated all the necessary fields. Please let me know if I've missed anything.

Thank you,

Subject: RE: AK NMVTIS Testing - Structured Testing values

This email comes from an external source, so remember, Think Before You Click!
Hi Dillon,

Please go ahead and set up all the data for the AK titles that should already be in the AK DB and on NMVTIS before we start the actual test scenario. These would be vehicles that are already titled in AK before the actual test scenario starts so we need to have the data updated in the AK DB and NMVTIS for those titles. These titles will be the yellow/gold highlighted cells in Columns G through N, the "Old" information. So go ahead and actually create the test data that will be used for AI which are highlighted yellow/gold in columns G – N. The instructions to do this are in the Comments column Z. For the gold highlighted cells the data is already in NMVTIS so you need to create the data on the AK DB via a backend method so that you do not send anything to NMVTIS. If you cannot do that, just go ahead and send a UA for those but let me know so I can delete/update data on NMVTIS before we start. Be sure you use the data already designated in those columns if there is data. For the yellow, you need to provide me what data you used when you did the setup.

For the Columns O – X we can capture the rest as we go.

Thanks,
Susan Creighton / 703.908.5893 office

Subject: RE: AK NMVTIS Testing - Structured Testing values

Hello Susan,

I've gone ahead and allocated a large block of title numbers, and started filling out the information I anticipate will be used during the test. Title Date and State Titling Key will not be available until the test is executed. Please ignore sections in red (they'll represent test cases I intend to inquire about with Debra) and any zero values (will be replaced by the time I'm done).

I've yet to start looking up valid makes for these vehicles, but does what I've filled out thus far seem appropriate?

Is it safe to assume there's no harm in assigning information for a test case that later ends up unused / not resulting in a titling event? There are some cases where I'll need to run inquiries to know what data to use. For example, Test Case 021 seems to imply that Test Case 020 will return a theft result and shouldn't be titled.

Subject: RE: AK NMVTIS Testing - Structured Test Case 001

This email comes from an external source, so remember, Think Before You Click!

Hi Dillon,

Since I need to know the data that you are setting up in order to update our test tool, it would be most appreciated if you could go ahead and do the setup as well as update the test case plan with that information before we get started (you don't need to redo the 1st test case). For this testing I'm going to give you a set of test cases you can do and you need to let me know which ones you did by sending the same info you sent me before for each one. You won't have to wait on me to validate before moving forward unless the test case has associated test cases or is highlighted blue indicating you need to contact AAMVA in which case I need to execute processes on our side before you move forward. So go ahead and do the setup for the test cases highlighted yellow/gold and provide the data you setup back to me in the test case plan and we will go from there.

Thanks,

Susan Creighton / 703.908.5893 office

Subject: CDLIS Working Group Monthly Meeting
Location: Conference Room Monte Carlo 4-6

Start: Tue 6/27/2017 7:00 AM
End: Tue 6/27/2017 8:30 AM
Show Time As: Tentative

Recurrence: (none)

Meeting Status: Not yet responded

Organizer: Chandrasekharan, Madhu

Dear CDLIS Working Group,

We are going to be using GoToMeeting for our meetings going forward. Below is the details of the GoToMeeting.

The meeting agenda for tomorrow's meeting has been uploaded to the SharePoint Site. Please let us know if you do not have access to the SharePoint Site and we can add you.

1. Please join my meeting.

<https://global.gotomeeting.com/join/212601757>

2. Use your microphone and speakers (VoIP) - a headset is recommended. Or, call in using your telephone.

Dial +1 (786) 535-3211

Access Code: 212-601-757

Audio PIN: Shown after joining the meeting

Meeting ID: 212-601-757

Dear CDLIS Working Group,

I am having to reschedule this meeting to a week later from the scheduled date of 6/20, as I will be out of office that week attending the Region II conference.

I have also had a request to use GoToMeeting for our calls instead of GotoWebinar from many of you, so below is the GoToMeeting link for the meeting.

Please make sure you join the GoToMeeting and not the GotoWebinar.

Tue, Jun 27, 2017 11:00 AM - 12:30 PM EDT

Please join my meeting from your computer, tablet or smartphone.

Access Code: 339-625-829

Thanks,
Madhu

Dear CDLIS Working Group,

The prior calendar invite we had for our working group monthly meeting has expired, so sending out a new one.

The purpose of our meetings will be to review change proposals, discuss CDLIS related changes and issues and discuss and review change requests.

The existing Webinar Series is still active (through July 18th 2017). If you have not already registered for this webinar series please do so using the following information:

Please register for CDLIS Working Group Monthly Meeting at:

<https://attendee.gotowebinar.com/register/7320634559712968195>

After registering, you will receive a confirmation email containing information about joining the webinar.

Brought to you by GoToWebinar®
Webinars Made Easy®

Thank you,

Madhu Chandrasekharan

Subject: AK NMVTIS Testing - 002, 005, 006, 011, 012

Good morning Susan,

I've attached my current version of the spreadsheet, as well as images for test cases 002, 005, 006, and 011. I've also performed TC012 which now correctly results in no messages being sent.

A few notes:

- TC005 returned the UT with errors, I'm assuming this is expected.
- State Titling Key wasn't being populated on our CSOT messages sent from the titling system. I had run into this before but couldn't find the cause. Between TC006 and TC011 I located the cause and fixed the issue. TC006 is the only CSOT that succeeded without a state titling key, and I believe the in-state change that'll be performed by TC007 will add the state titling key to the record.
- Originally TC012 correctly skipped sending inquiry messages but sent a UA message with AI title number 7277334. I fixed the issue, performed a Title Undo, removed the vehicle from our system, and titled it again as a new vehicle using 7277335. This correctly resulted in no messages being sent.
- We have the make "Mini Cooper" in our migrated data as "MNNI" rather than "MINI". I believe this to be a typo in the production and/or migrated data. I'll address this as soon as I can.

Unless I hear otherwise I'll continue performing the initial tests cases of each group where possible.

Thank you,

Subject: RE: AK NMVTIS Testing - Structured Testing values

This email comes from an external source, so remember, Think Before You Click!

Hi Dillon,

I have updated the state titling key for the gold test cases. You can go ahead and get started. The duplicate you mentioned is meant to be there.

Also in answer to your question "Is it safe to assume there's no harm in assigning information for a test case that later ends up unused / not resulting in a titling event? There are some cases where I'll need to run inquiries to know what data to use. For example, Test Case 021 seems to imply that Test Case 020 will return a theft result and shouldn't be titled." is yes this is required. You should go ahead and title and your programs should determine if the records should be sent to NMVTIS as well as if an inquiry should be executed. As stated previously vehicles that are not to be sent to NMVTIS should not be inquired upon but it will be necessary to inquire on all other vehicles as you will need to respond according to what is found in the response to the inquiry.

Thanks,
Susan Creighton / 703.908.5893 office

Hello Susan,

I've made sure that our database has a vehicle stored for every row with Old SOT set to "AI". Please update the records you created for the five gold/orange rows with Old State AI to include the state titling key I've filled out. The system relies on state titling key as a primary identifier.

Additionally, I got back a duplicate title result for the UA pertaining to **AISTRUCTREDTSTW01**

ALVIN **F2** All **F3** AAMVA **F4** MSG **F5** GEN **F7** PER **F8** DS **F9** VEH **F10** DL

Subject: RE: AK NMVTIS Testing - Structured Testing values

Hi Susan,

I ran into two issues. I can't find any production data to support a vehicle of type "Van Camper", so I don't have a Make listed for that yet. Also, I can't find production data to support what I believe was supposed to be a Chevy Auto Carrier. I ended up using Aztec as the make instead.

Outside of these issues, I believe I've appropriately populated all the necessary fields. Please let me know if I've missed anything.

Thank you,

Subject: RE: AK NMVTIS Testing - Structured Testing values

This email comes from an external source, so remember, Think Before You Click!
Hi Dillon,

Please go ahead and set up all the data for the AK titles that should already be in the AK DB and on NMVTIS before we start the actual test scenario. These would be vehicles that are already titled in AK before the actual test scenario starts so we need to have the data updated in the AK DB and NMVTIS for those titles. These titles will be the yellow/gold highlighted cells in Columns G through N, the "Old" information. So go ahead and actually create the test data that will be used for AI which are highlighted yellow/gold in columns G – N. The instructions to do this are in the Comments column Z. For the gold highlighted cells the data is already in NMVTIS so you need to create the data on the AK DB via a backend method so that you do not send anything to NMVTIS. If you cannot do that, just go ahead and send a UA for those but let me know so I can delete/update data on NMVTIS before we start. Be sure you use the data already designated in those columns if there is data. For the yellow, you need to provide me what data you used when you did the setup.

For the Columns O – X we can capture the rest as we go.

Thanks,
Susan Creighton / 703.908.5893 office

Subject: RE: AK NMVTIS Testing - Structured Testing values

Hello Susan,

I've gone ahead and allocated a large block of title numbers, and started filling out the information I anticipate will be used during the test. Title Date and State Titling Key will not be available until the test is executed. Please ignore sections in red (they'll represent test cases I intend to inquire about with Debra) and any zero values (will be replaced by the time I'm done).

I've yet to start looking up valid makes for these vehicles, but does what I've filled out thus far seem appropriate?

Is it safe to assume there's no harm in assigning information for a test case that later ends up unused / not resulting in a titling event? There are some cases where I'll need to run inquiries to know what data to use. For example, Test Case 021 seems to imply that Test Case 020 will return a theft result and shouldn't be titled.

Subject: RE: AK NMVTIS Testing - Structured Test Case 001

This email comes from an external source, so remember, Think Before You Click!
Hi Dillon,

Since I need to know the data that you are setting up in order to update our test tool, it would be most appreciated if you could go ahead and do the setup as well as update the test case plan with that information before we get started (you don't need to redo the 1st test case). For this testing I'm going to give you a set of test cases you can do and you need to let me know which ones you did by sending the same info you sent me before for each one. You won't have to wait on me to validate before moving forward unless the test case has associated test cases or is highlighted blue indicating you need to contact AAMVA in which case I need to execute processes on our side before you move forward. So go ahead and do the setup for the test cases highlighted yellow/gold and provide the data you setup back to me in the test case plan and we will go from there.

Thanks,
Susan Creighton / 703.908.5893 office

Subject: AK NMVTIS Testing - Structured Test Case 001

Alright Susan,

I've deduced that 12,001-18,000 lbs. is the appropriate weight range for the information I input. The titling process has completed without sending an inquiry. The previous inquiries were from inputting values typical of a passenger vehicle as a sanity check.

I've attached the test case plan. Do you want me to attach it after each test case? Are we still doing one test case at a time?

Thank you,

Subject: AK NMVTIS Testing - 002, 005, 006, 011, 012

Good morning Susan,

I've attached my current version of the spreadsheet, as well as images for test cases 002, 005, 006, and 011. I've also performed TC012 which now correctly results in no messages being sent.

A few notes:

- TC005 returned the UT with errors, I'm assuming this is expected.
- State Titling Key wasn't being populated on our CSOT messages sent from the titling system. I had run into this before but couldn't find the cause. Between TC006 and TC011 I located the cause and fixed the issue. TC006 is the only CSOT that succeeded without a state titling key, and I believe the in-state change that'll be performed by TC007 will add the state titling key to the record.
- Originally TC012 correctly skipped sending inquiry messages but sent a UA message with AI title number 7277334. I fixed the issue, performed a Title Undo, removed the vehicle from our system, and titled it again as a new vehicle using 7277335. This correctly resulted in no messages being sent.
- We have the make "Mini Cooper" in our migrated data as "MNNI" rather than "MINI". I'm believe this to be a typo in the production and/or migrated data. I'll address this as soon as I can.

Unless I hear otherwise I'll continue performing the initial tests cases of each group where possible.

Thank you,

This email comes from an external source, so remember, Think Before You Click!

Hi Dillon,

I have updated the state titling key for the gold test cases. You can go ahead and get started. The duplicate you mentioned is meant to be there.

Also in answer to your question “Is it safe to assume there’s no harm in assigning information for a test case that later ends up unused / not resulting in a titling event? There are some cases where I’ll need to run inquiries to know what data to use. For example, Test Case 021 seems to imply that Test Case 020 will return a theft result and shouldn’t be titled.” is yes this is required. You should go ahead and title and your programs should determine if the records should be sent to NMVTIS as well as if an inquiry should be executed. As stated previously vehicles that are not to be sent to NMVTIS should not be inquired upon but it will be necessary to inquire on all other vehicles as you will need to respond according to what is found in the response to the inquiry.

Thanks,
Susan Creighton / 703.908.5893 office

Subject: RE: AK NMVTIS Testing - Structured Testing values

Hello Susan,

I’ve made sure that our database has a vehicle stored for every row with Old SOT set to “AI”. Please update the records you created for the five gold/orange rows with Old State AI to include the state titling key I’ve filled out. The system relies on state titling key as a primary identifier.

Additionally, I got back a duplicate title result for the UA pertaining to **AISTRUCTREDTSTW01**

Just a heads up in case it's unintentional.

Thank you,

Subject: RE: AK NMVTIS Testing - Structured Testing values

Hi Susan,

I ran into two issues. I can't find any production data to support a vehicle of type "Van Camper", so I don't have a Make listed for that yet. Also, I can't find production data to support what I believe was supposed to be a Chevy Auto Carrier. I ended up using Aztec as the make instead.

Outside of these issues, I believe I've appropriately populated all the necessary fields. Please let me know if I've missed anything.

Thank you,

Subject: RE: AK NMVTIS Testing - Structured Testing values

This email comes from an external source, so remember, Think Before You Click!
Hi Dillon,

Please go ahead and set up all the data for the AK titles that should already be in the AK DB and on NMVTIS before we start the actual test scenario. These would be vehicles that are already titled in AK before the actual test scenario starts so we need to have the data updated in the AK DB and NMVTIS for those titles. These titles will be the yellow/gold highlighted cells in Columns G through N, the "Old" information. So go ahead and actually create the test data that will be used for AI which are highlighted yellow/gold in columns G – N. The instructions to do this are in the Comments column Z. For the gold highlighted cells the data is already in NMVTIS so you need to create the data on the AK DB via a backend method so that you do not send anything to NMVTIS. If you cannot do that, just go ahead and send a UA for those but let me know so I can delete/update data on NMVTIS before we start. Be sure you use the data already designated in those columns if there is data. For the yellow, you need to provide me what data you used when you did the setup.

For the Columns O – X we can capture the rest as we go.

Thanks,
Susan Creighton / 703.908.5893 office

Subject: RE: AK NMVTIS Testing - Structured Test Case 001

This email comes from an external source, so remember, Think Before You Click!

Hi Dillon,

Since I need to know the data that you are setting up in order to update our test tool, it would be most appreciated if you could go ahead and do the setup as well as update the test case plan with that information before we get started (you don't need to redo the 1st test case). For this testing I'm going to give you a set of test cases you can do and you need to let me know which ones you did by sending the same info you sent me before for each one. You won't have to wait on me to validate before moving forward unless the test case has associated test cases or is highlighted blue indicating you need to contact AAMVA in which case I need to execute processes on our side before you move forward. So go ahead and do the setup for the test cases highlighted yellow/gold and provide the data you setup back to me in the test case plan and we will go from there.

Thanks,

Susan Creighton / 703.908.5893 office

Subject: AK NMVTIS Testing - Structured Test Case 001

Alright Susan,

I've deduced that 12,001-18,000 lbs. is the appropriate weight range for the information I input. The titling process has completed without sending an inquiry. The previous inquiries were from inputting values typical of a passenger vehicle as a sanity check.

I've attached the test case plan. Do you want me to attach it after each test case? Are we still doing one test case at a time?

Thank you,

Subject: AK NMVTIS Testing - Structured Test Case 001

Alright Susan,

I've deduced that 12,001-18,000 lbs. is the appropriate weight range for the information I input. The titling process has completed without sending an inquiry. The previous inquiries were from inputting values typical of a passenger vehicle as a sanity check.

I've attached the test case plan. Do you want me to attach it after each test case? Are we still doing one test case at a time?

Thank you,

Hello Susan,

I've resolved the issue with title issue date and zero padding exempt/unknown odometer readings. Just trying to figure out how odometer units is ending up as "M" when I'm explicitly setting it otherwise in those cases. I'll let you know as soon as I can.

Thank you,

Subject: AK NMVTIS Testing - 002, 005, 006, 011, 012

Good morning Susan,

I've attached my current version of the spreadsheet, as well as images for test cases 002, 005, 006, and 011. I've also performed TC012 which now correctly results in no messages being sent.

A few notes:

- TC005 returned the UT with errors, I'm assuming this is expected.
- State Titling Key wasn't being populated on our CSOT messages sent from the titling system. I had run into this before but couldn't find the cause. Between TC006 and TC011 I located the cause and fixed the issue. TC006 is

the only CSOT that succeeded without a state titling key, and I believe the in-state change that'll be performed by TC007 will add the state titling key to the record.

- Originally TC012 correctly skipped sending inquiry messages but sent a UA message with AI title number 7277334. I fixed the issue, performed a Title Undo, removed the vehicle from our system, and titled it again as a new vehicle using 7277335. This correctly resulted in no messages being sent.
- We have the make "Mini Cooper" in our migrated data as "MNNI" rather than "MINI". I believe this to be a typo in the production and/or migrated data. I'll address this as soon as I can.

Unless I hear otherwise I'll continue performing the initial tests cases of each group where possible.

Thank you,

Subject: RE: AK NMVTIS Testing - Structured Testing values

This email comes from an external source, so remember, Think Before You Click!
Hi Dillon,

I have updated the state titling key for the gold test cases. You can go ahead and get started. The duplicate you mentioned is meant to be there.

Also in answer to your question "Is it safe to assume there's no harm in assigning information for a test case that later ends up unused / not resulting in a titling event? There are some cases where I'll need to run inquiries to know what data to use. For example, Test Case 021 seems to imply that Test Case 020 will return a theft result and shouldn't be titled." is yes this is required. You should go ahead and title and your programs should determine if the records should be sent to NMVTIS as well as if an inquiry should be executed. As stated previously vehicles that are not to be sent to NMVTIS should not be inquired upon but it will be necessary to inquire on all other vehicles as you will need to respond according to what is found in the response to the inquiry.

Thanks,
Susan Creighton / 703.908.5893 office

Hello Susan,

I've made sure that our database has a vehicle stored for every row with Old SOT set to "AI". Please update the records you created for the five gold/orange rows with Old State AI to include the state titling key I've filled out. The system relies on state titling key as a primary identifier.

Additionally, I got back a duplicate title result for the UA pertaining to **AISTRUCTREDTSTW01**

Subject: RE: AK NMVTIS Testing - Structured Testing values

Hi Susan,

I ran into two issues. I can't find any production data to support a vehicle of type "Van Camper", so I don't have a Make listed for that yet. Also, I can't find production data to support what I believe was supposed to be a Chevy Auto Carrier. I ended up using Aztec as the make instead.

Outside of these issues, I believe I've appropriately populated all the necessary fields. Please let me know if I've missed anything.

Subject: RE: AK NMVTIS Testing - Structured Testing values

This email comes from an external source, so remember, Think Before You Click!
Hi Dillon,

Please go ahead and set up all the data for the AK titles that should already be in the AK DB and on NMVTIS before we start the actual test scenario. These would be vehicles that are already titled in AK before the actual test scenario starts so we need to have the data updated in the AK DB and NMVTIS for those titles. These titles will be the yellow/gold highlighted cells in Columns G through N, the "Old" information. So go ahead and actually create the test data that will be used for AI which are highlighted yellow/gold in columns G – N. The instructions to do this are in the Comments column Z. For the gold highlighted cells the data is already in NMVTIS so you need to create the data on the AK DB via a backend method so that you do not send anything to NMVTIS. If you cannot do that, just go ahead and send a UA for

those but let me know so I can delete/update data on NMVTIS before we start. Be sure you use the data already designated in those columns if there is data. For the yellow, you need to provide me what data you used when you did the setup.

For the Columns O – X we can capture the rest as we go.

Thanks,
Susan Creighton / 703.908.5893 office

Subject: RE: AK NMVTIS Testing - Structured Testing values

Hello Susan,

I've gone ahead and allocated a large block of title numbers, and started filling out the information I anticipate will be used during the test. Title Date and State Titling Key will not be available until the test is executed. Please ignore sections in red (they'll represent test cases I intend to inquire about with Debra) and any zero values (will be replaced by the time I'm done).

I've yet to start looking up valid makes for these vehicles, but does what I've filled out thus far seem appropriate?

Is it safe to assume there's no harm in assigning information for a test case that later ends up unused / not resulting in a titling event? There are some cases where I'll need to run inquiries to know what data to use. For example, Test Case 021 seems to imply that Test Case 020 will return a theft result and shouldn't be titled.

Subject: RE: AK NMVTIS Testing - Structured Test Case 001

This email comes from an external source, so remember, Think Before You Click!
Hi Dillon,

Since I need to know the data that you are setting up in order to update our test tool, it would be most appreciated if you could go ahead and do the setup as well as update the test case plan with that information before we get started

(you don't need to redo the 1st test case). For this testing I'm going to give you a set of test cases you can do and you need to let me know which ones you did by sending the same info you sent me before for each one. You won't have to wait on me to validate before moving forward unless the test case has associated test cases or is highlighted blue indicating you need to contact AAMVA in which case I need to execute processes on our side before you move forward. So go ahead and do the setup for the test cases highlighted yellow/gold and provide the data you setup back to me in the test case plan and we will go from there.

Thanks,
Susan Creighton / 703.908.5893 office

Good morning from Alaska,

Congratulation to both of you! Shelia, I'm sad you're leaving...yet Julie, I'm excited that you're our new AAMVA contact! Could you point me in the direction of who to contact regarding AAMVA website and Sharepoint access for new hires? We just staffed two CDL PI grant funded positions working with CSTIMS and CDLIS/S2S and are eager to get them connected.

Sincerely,

Nichole Tham

Good morning from Alaska,

Congratulation to both of you! Shelia, I'm sad you're leaving...yet Julie, I'm excited that you're our new AAMVA contact! Could you point me in the direction of who to contact regarding AAMVA website and Sharepoint access for new hires? We just staffed two CDL PI grant funded positions working with CSTIMS and CDLIS/S2S and are eager to get them connected.

Sincerely,

Nichole Tham

Subject: RE: AK NMVTIS Testing - TC 005

Hello Susan & Debra,

I'm a bit confused as to how to proceed with titling a vehicle that returns brand 43.

Susan: Is the expected outcome still a change state of title? Is a new VIN arbitrarily chosen?

Debra: Is this scenario related to the "Previous State Invalid VIN" field? What do you do when only the original VIN is provided and you receive this brand during the titling process?

Thank you,

Subject: RE: AK NMVTIS Testing - TC 005

This email comes from an external source, so remember, Think Before You Click!

TC 005:

1. Odometer reading contained invalid value – this is the reason the UT failed (see screenshot below)
2. Odometer Unit of Measure should be blank when you send EXEMPT or UNKNOWN
3. VIN should be changed since Brand 43 sent in response

Be sure to check the error in the message that is returned to you when a message fails.

Subject: AK NMVTIS Testing - 002, 005, 006, 011, 012

Good morning Susan,

I've attached my current version of the spreadsheet, as well as images for test cases 002, 005, 006, and 011. I've also performed TC012 which now correctly results in no messages being sent.

A few notes:

- TC005 returned the UT with errors, I'm assuming this is expected.
- State Titling Key wasn't being populated on our CSOT messages sent from the titling system. I had run into this before but couldn't find the cause. Between TC006 and TC011 I located the cause and fixed the issue. TC006 is the only CSOT that succeeded without a state titling key, and I believe the in-state change that'll be performed by TC007 will add the state titling key to the record.
- Originally TC012 correctly skipped sending inquiry messages but sent a UA message with AI title number 7277334. I fixed the issue, performed a Title Undo, removed the vehicle from our system, and titled it again as a new vehicle using 7277335. This correctly resulted in no messages being sent.
- We have the make "Mini Cooper" in our migrated data as "MNNI" rather than "MINI". I'm believe this to be a typo in the production and/or migrated data. I'll address this as soon as I can.

Unless I hear otherwise I'll continue performing the initial tests cases of each group where possible.

Thank you,

Subject: RE: AK NMVTIS Testing - Structured Testing values

This email comes from an external source, so remember, Think Before You Click!

Hi Dillon,

I have updated the state titling key for the gold test cases. You can go ahead and get started. The duplicate you mentioned is meant to be there.

Also in answer to your question “Is it safe to assume there’s no harm in assigning information for a test case that later ends up unused / not resulting in a titling event? There are some cases where I’ll need to run inquiries to know what data to use. For example, Test Case 021 seems to imply that Test Case 020 will return a theft result and shouldn’t be titled.” is yes this is required. You should go ahead and title and your programs should determine if the records should be sent to NMVTIS as well as if an inquiry should be executed. As stated previously vehicles that are not to be sent to NMVTIS should not be inquired upon but it will be necessary to inquire on all other vehicles as you will need to respond according to what is found in the response to the inquiry.

Thanks,
Susan Creighton / 703.908.5893 office

Subject: RE: AK NMVTIS Testing - Structured Testing values

Hello Susan,

I’ve made sure that our database has a vehicle stored for every row with Old SOT set to “AI”. Please update the records you created for the five gold/orange rows with Old State AI to include the state titling key I’ve filled out. The system relies on state titling key as a primary identifier.

Additionally, I got back a duplicate title result for the UA pertaining to **AISTRUCTREDTSTW01**

ALVIN **F2** All **F3** AAMVA **F4** MSG **F5** GEN **F7** PER **F8** DS **F9** VEH **F10** DL

Subject: RE: AK NMVTIS Testing - Structured Testing values

Hi Susan,

I ran into two issues. I can't find any production data to support a vehicle of type "Van Camper", so I don't have a Make listed for that yet. Also, I can't find production data to support what I believe was supposed to be a Chevy Auto Carrier. I ended up using Aztec as the make instead.

Outside of these issues, I believe I've appropriately populated all the necessary fields. Please let me know if I've missed anything.

Thank you,

Subject: RE: AK NMVTIS Testing - Structured Testing values

This email comes from an external source, so remember, Think Before You Click!
Hi Dillon,

Please go ahead and set up all the data for the AK titles that should already be in the AK DB and on NMVTIS before we start the actual test scenario. These would be vehicles that are already titled in AK before the actual test scenario starts so we need to have the data updated in the AK DB and NMVTIS for those titles. These titles will be the yellow/gold highlighted cells in Columns G through N, the "Old" information. So go ahead and actually create the test data that will be used for AI which are highlighted yellow/gold in columns G – N. The instructions to do this are in the Comments column Z. For the gold highlighted cells the data is already in NMVTIS so you need to create the data on the AK DB via a backend method so that you do not send anything to NMVTIS. If you cannot do that, just go ahead and send a UA for those but let me know so I can delete/update data on NMVTIS before we start. Be sure you use the data already designated in those columns if there is data. For the yellow, you need to provide me what data you used when you did the setup.

For the Columns O – X we can capture the rest as we go.

Thanks,
Susan Creighton / 703.908.5893 office

Subject: RE: AK NMVTIS Testing - Structured Testing values

Hello Susan,

I've gone ahead and allocated a large block of title numbers, and started filling out the information I anticipate will be used during the test. Title Date and State Titling Key will not be available until the test is executed. Please ignore sections in red (they'll represent test cases I intend to inquire about with Debra) and any zero values (will be replaced by the time I'm done).

I've yet to start looking up valid makes for these vehicles, but does what I've filled out thus far seem appropriate?

Is it safe to assume there's no harm in assigning information for a test case that later ends up unused / not resulting in a titling event? There are some cases where I'll need to run inquiries to know what data to use. For example, Test Case 021 seems to imply that Test Case 020 will return a theft result and shouldn't be titled.

Subject: RE: AK NMVTIS Testing - Structured Test Case 001

This email comes from an external source, so remember, Think Before You Click!

Hi Dillon,

Since I need to know the data that you are setting up in order to update our test tool, it would be most appreciated if you could go ahead and do the setup as well as update the test case plan with that information before we get started (you don't need to redo the 1st test case). For this testing I'm going to give you a set of test cases you can do and you need to let me know which ones you did by sending the same info you sent me before for each one. You won't have to wait on me to validate before moving forward unless the test case has associated test cases or is highlighted blue indicating you need to contact AAMVA in which case I need to execute processes on our side before you move forward. So go ahead and do the setup for the test cases highlighted yellow/gold and provide the data you setup back to me in the test case plan and we will go from there.

Thanks,

Susan Creighton / 703.908.5893 office

Subject: AK NMVTIS Testing - Structured Test Case 001

Alright Susan,

I've deduced that 12,001-18,000 lbs. is the appropriate weight range for the information I input. The titling process has completed without sending an inquiry. The previous inquiries were from inputting values typical of a passenger vehicle as a sanity check.

I've attached the test case plan. Do you want me to attach it after each test case? Are we still doing one test case at a time?

Thank you,

DHS Uses Budget Hearing to Address Real ID Extensions and Enforcement

Department of Homeland Security (DHS) Secretary John Kelly [appeared](#) before the United States Senate Committee on Homeland Security and Governmental Affairs to discuss the DHS Fiscal Year 2018 Budget Request. Secretary Kelly used this platform to discuss the numerous priorities of the Department, including an increased emphasis on identification security and identity vetting.

The appearance was coupled with public outreach to reinforce the Department's current position on extending compliance deadlines associated with Real ID. DHS has updated their ["Federal Enforcement"](#) page to include language regarding state compliance extensions stating that:

"All REAL ID extensions are pending a decision by Secretary Kelly until further notice. For states with extensions that expire after June 6, 2017 that do not receive an extension Federal agencies will not begin enforcement until the grace period ends on July 10, 2017. During the grace period, Federal facilities are expected to continue accepting driver's licenses and identification cards issued by states with an expired limited extension."

Of particular note is that DHS has now added the new July 10, 2017 enforcement date. Expiring states/territories with a limited extension will be subject to Real ID enforcement as of July 10, 2017. The requirement does not impact the January 22, 2018 date by which all non-compliant states/territories will be subject to Real ID enforcement at TSA checkpoints.

During the hearing, Secretary Kelly indicated that he will make a decision next week about whether to offer extensions until October on a state-by-state basis. AAMVA will continue to monitor the issue as it progresses and keep its membership notified.

For states with extensions that expire after June 6, 2017 that do not receive an extension Federal agencies will not begin enforcement until the grace period ends on July 10, 2017. During the grace period, Federal facilities are expected to continue accepting driver's licenses and identification cards issued by states with an expired limited extension."

Of particular note is that DHS has now added the new July 10, 2017 enforcement date. Expiring states/territories with a limited extension will be subject to Real ID enforcement as of July 10, 2017. The requirement does not impact the January 22, 2018 date by which all non-compliant states/territories will be subject to Real ID enforcement at TSA checkpoints.

During the hearing, Secretary Kelly indicated that he will make a decision next week about whether to offer extensions until October on a state-by-state basis. AAMVA will continue to monitor the issue as it progresses and keep its membership notified.

DHS Uses Budget Hearing to Address Real ID Extensions and Enforcement

Department of Homeland Security (DHS) Secretary John Kelly [appeared](#) before the United States Senate Committee on Homeland Security and Governmental Affairs to discuss the DHS Fiscal Year 2018 Budget Request. Secretary Kelly used this platform to discuss the numerous priorities of the Department, including an increased emphasis on identification security and identity vetting.

The appearance was coupled with public outreach to reinforce the Department's current position on extending compliance deadlines associated with Real ID. DHS has updated their ["Federal Enforcement"](#) page to include language regarding state compliance extensions stating that:

"All REAL ID extensions are pending a decision by Secretary Kelly until further notice. For states with extensions that expire after June 6, 2017 that do not receive an extension Federal agencies will not begin enforcement until the grace period ends on July 10, 2017. During the grace period, Federal facilities are expected to continue accepting driver's licenses and identification cards issued by states with an expired limited extension."

Subject: AK Event 12 Alert [NCS-ASH-PROD] (Primary Connection)

Alaska. Your connection to the NCS application has disconnected abnormally. This disconnection was not initiated by AAMVA and only affects your site. Please check your system logs (UNI and/or Network and Firewall) to identify what initiated this disconnection and reestablish your connectivity. Please provide AAMVA detailed information on the cause of this loss of connectivity.

AAMVA is also checking all dedicated resources. If it is determined that the cause of the problem is at any of AAMVA's dedicated resources we will let you know.

For UNI users, if you cannot determine the cause then please send the UNI IP log to UniHelpDesk@aamva.org.

UNI IP Log for CICS is the TCPM (TCPDATA) CICS System log.
UNI IP Log for IMS is the UNI Error Log.
UNI IP Log for Windows today's status log (UNI40\Data\Log).
UNI IP Log for UNIX is the UNISES files in \$UNI_DATA/uni/UNISES*

Subject: The National Driver Register will conduct a Cleanfile on June 18, 2017

Importance: High

PDPS Participants:

The National Driver Register will conduct a Cleanfile on June 18th, 2017.

Cleanfile is an optional process. It is a means for jurisdictions to refresh the pointers it has on PDPS. NDR replaces all pointers on the PDPS file with the Cleanfile set of pointers sent by the jurisdiction. In order for a pointer to be included in the Cleanfile, the associated record in the jurisdiction must contain a conviction or withdrawal specified in 23 CFR Part 1327 section 1327.5 (a) or in Appendix A to that rule.

To participate in this Cleanfile, please email NDR by June 7th, 2017, and plan to send your file to NDR no later than June 14th, 2017.

Cleanfiles must be submitted via Secure FTP or FTP. Please schedule a test of SFTP/FTP connectivity with NDR before attempting to send the full Cleanfile.

If you plan to participate in this Cleanfile or if you have any questions please contact the NDR Office by sending an e-mail to NDR_Operations@dot.gov<mailto:NDR_Operations@dot.gov>.

Subject: AK- Weekly Suspense Report

Good morning,

During this reporting period, your jurisdiction did not have any CDLIS drivers in suspense. AAMVA and FMCSA appreciate your great work on completing the suspended transactions.

We appreciate your assistance! Please let me know if you have any questions or concerns.

Regards,

Oscar A. Castillo | System Analyst | AAMVA | 4401 Wilson Blvd., Suite 700 Arlington, Va.
